"There's a gentleman below, sir," he said. "I knew you was here, sir, but I told him I would see."

"What was his name?" asked DeWolfe.

"Smallwood, sir, Smallwood. A very sleepish man—a restful man, like."

"You never can tell by the first look," said Peter. "Sunday night! And Smallwood—bring him up."

The second meeting with the pale personality of the authority on books made him appear to Peter a few shades lighter in pallor. His eyes were almost mere colorless openings in a face of little more the color of a moonstone by contrast with the shell rims of his glasses. His free hand hung listless as if it were just out of refrigeration. He wore a suit of pale gray, the pattern of which was so delicate that it might have been only the fancy of weak eyes. Smallwood looked as if he were something that had stood out through a rainy season.

"Here I am," he drawled.

"You don't mean—!" exclaimed Peter.

The other man in answer placed the package under his arm on Peter's long Jacobean table. The motion was almost surreptitious.

"Yes, I did find one," he drawled. "Not so far away either."

He looked up inquiringly into DeWolfe's expressive face, now swept by many emotions like puffs of wind scurrying across the surface of water.

"That's great!" Peter exclaimed. "It's great."

"Oh, how kind of you to say so," Smallwood said. "I found this today and I thought I would drop in with it."

He appeared about ready to lie down and go to sleep.

"Look here," said Peter. "You know that was mighty kind, to come up here—and all that. I'll not forget it. Quite aside from the professional obligation."

Smallwood raised his cold-storage hand as the orator does when pretending that applause is undeserved. The gesture also appeared to give Peter permission to inspect the prize. Off came the string and off the wrapping paper. Without a glance at the binding or title Peter flapped over the pages. Thirty, thirty-one, two, three, four, five. Thirty-six! Thirty-seven! "All here!" exclaimed DeWolfe looking up, but as if even the pallor of Smallwood had faded out completely, the book collector's counselor had gone; he had closed the door noiselessly as if the paleness of him not only was for the sight but for the sense of hearing as well.

Peter pushed the third copy of the rare volume upon which he had put his hands under the arc of the bronze lamp.

"The way presents no obstacles to progress save the sand which is loose for the feet of horses," Father Carlos, the Jesuit explorer, had written. "This region of fine sand blown by winds from the Mesa begins at the valley that we have called the Dry Cup and that we have called the Dry Cup and by me is so marked upon the drawing. Thence it runneth straight north for a distance of one hundred and five. Here was found a vast mound, some of our party saying below a great rock was to be found. The course from this mound is northwest; one we have followed by great good fortune like a miracle, there being only impassable clefts in the plain to the right and to the left and only one entrance into the Great Cleft, where is the ruins of the city—part upon the level ground and part upon the southern wall of the Mesa."

Peter turned to the map drawn so quaintly by the painstaking priest nearly two centuries ago, "lest others unguided by the hand of God become lost."

At the end of twenty minutes of study DeWolfe stood erect and drew in a deep breath. These pages then were those which Parmalee had sought and found, the same as those which he had torn out of the book; they had been associated with some strange call. Was the call to that region or was the call something that followed his search for this quaint old volume and its possession?

To Peter it appeared now that one more piece of material was needed to fill the pattern. He had been reluctant to seek this piece but now there was too much confirmation to allow anything to stand in the way.

He could not wait; he took his hat. The evening was now filled with moonlight, so clear, upon white cloud banks on a purple velvet sky, that it invited all to walk leisurely under a spell of silvery calm that even transformed the rectangular prisms of the city and the deep streets between. Peter knew nothing of the moon; he pursued one end, blind to all else.

After hurrying on foot for two blocks he succeeded in stopping an empty taxicab that was clattering southward on the avenue.

"Take me there," he said to the driver, putting a card in his hand.

The car turned about as if it had forgotten something uptown and after ten blocks on the asphalt, swung through a cross street to the car tracks upon which it purred like a brush on velvet until it turned around a hospital on a corner and found a block of old-fashioned brownstone houses.

Up the long steps of one of them, Peter climbed, looking for a doctor's sign, and finding it there he rang the bell.

The man he had come to see met him in a typical doctor's office with its mingled and vague impressions of milky glass slabs, nickel instrument trays, the vicious appearance of a harmless nose and throat apparatus, books bound in dark red, scattered medical journals folded twice lengthwise, the sound of water dripping into a washbowl behind a white door and the faint smells of ether and aristol powder.

Peter gave no inspection to the man who received him; he began abruptly by stating his name.

The professional man, acting from habit, nodded, put on his glasses, took out a card case and said in a carefully nurtured tone of sympathy:

"What's the matter?"

"Nothing is the matter," replied DeWolfe, "I'm not ill. I took a chance on finding you on Sunday evening. I know nothing of your office hours. Apparently I'm lucky."

"Possibly."

"I came to consult you in your other capacity."

The other man got up: Peter could now see that he was a tall man who had neglected to shave that morning. He guessed that the practice of this physician did not flourish, but he sensed at once the vanity of the man the moment his second field of skill had been mentioned.

"Yes, I do a little of that, too," the doctor said with fraudulent modesty.

"I should say so," replied Peter. "Who do you suppose sent me here?"

"One of my lawyers, perhaps."

"The district attorney."

The doctor was plainly pleased. He said, "Well, handwriting has been my hobby, Mr. DeWolfe, for nearly twenty-two years. It began curiously enough by a triviality—an attempt to read character through penmanship; it has ended in a scientific inquiry, the development of method, a system of rhythm measurements. Scarcely a day goes by that I am not consulted by the prosecuting authorities in many cities. I testified in London in the famous Speere murder case."

"I was told," said Peter, "I was told that you were in advance of any other man in America with perhaps one exception. I came to you for that reason. I came for an opinion. For that opinion I will gladly pay the fee you ask, but I want to say to you that the result of your opinion will have the gravest bearing upon the lives of at least two persons."

"I do not give opinions," the other said severely, "I give facts. I guess at nothing. My reports are not speculations; they are statements."

Peter ejaculated one word: "Exactly!" He was nervous and he could not conceal it.

"Well?" said the doctor.

From his memoranda book DeWolfe took out two pieces of paper. One of them was that with the symbol of the feathered serpent and the two words "The Sign" which once had been in the possession of Jim Hennepin; the other was the check drawn by Compton Parmalee to the order of his wife, Brena Selcoss Parmalee, which she had indorsed. He placed this indorsement up and not down as he put the two pieces of paper side by side upon the table.

"Huh!" said the doctor, bending over them.

Peter looked up at him sharply.

"That," said the doctor, putting a square-ended forefinger upon the words "The Sign."

"What?" asked Peter.

"It is an excellent example of an attempt to disguise penmanship."

DeWolfe felt it necessary to contract his muscles to hold in an exclamation that had tried to leap from him.

"That is not the problem," said he.

"What is it?"

"The problem is whether the same hand wrote the words on these two pieces of paper. Did they?"

"Did they?" repeated the doctor scornfully. "Did you expect an answer to that—at once—in a minute? Upon the specimens you have brought? My stars! Man! There are only two words on this piece."

"I thought it would not require much time—"

"Much time!" exclaimed the doctor. "Well, it wouldn't require much time. It requires measurements, it requires the microscope to pick out the arcs. That is all. I could get at it tomorrow morning and in a few hours—"

"Tonight," said Peter firmly. "I know that this sounds unreasonable. Look here. It is worth a thousand dollars for me to know tonight."

The doctor swallowed.

"You want a yes or no answer?"

"And I want you to telephone me. No matter what hour, I shall be waiting. Here is my number. No matter what hour. You understand. A thousand dollars."

The other swallowed again.

"It isn't worth a thousand dollars."

"It is to me," said Peter earnestly.

* * * * * * *

At half-past four in the morning, when Peter was staring out at the first color in the eastern sky, filled with strange chill of a sleepless night, his telephone rang at last.

He had his answer.

At half-past four in the afternoon five days later Brena Selcoss walked into the office of Colby Pennington. She had come directly from the pier on the North river. Her face was white, her sensitive lips moved uneasily as if seeking to suppress emotions of their own. Pennington was moved by her presence.

"I am a friend of Mr. DeWolfe's," she said. "I have sent a wireless addressed to him here. I have been on the sea for eleven days."

Pennington held up the undelivered envelope.

"Are you Miss Selcoss?" he asked. "Well, Peter DeWolfe sent you a cablegram—something about advising you to delay your coming. You had started. Too bad. Just now Mr. DeWolfe is out of town."

"Out of town?"

"Why, yes. He went a few days ago. He had something to investigate. We rather expected to hear from him. He went off in a hurry—some hurry and flurry. I believe he had received some kind of message."

Pennington stopped.

"For God's sake what's the matter?" Brena Selcoss, leaning forward in her chair, had thrown her arms upon his desk and in the curve of one elbow she had buried her face.

For a moment she appeared as lifeless as if she had been struck a crashing blow upon the head.

(TO BE CONTINUED.)

Grave Purpose Behind Writing of Fiction

Universal nature, too strong for the petty fiber of the bard, sits on his neck and writes through his hand; so that when he seems to vent a mere caprice and wild romance the issue is an exact allegory. Hence Plato said that "poets utter great and wise things which they do not themselves understand." All the fictions of the Middle ages explain themselves as a masked or frolic expression of that which in grave earnest the mind of that period toiled to achieve. Magic, and all that is ascribed to it, is a deep presentment of the powers of science. The shoes of swiftness, the sword of sharpness, the power of subduing the elements, of using the secret virtues of minerals, of understanding the voices of birds, are the obscure gropings of the mind in a right direction. The preternatural prowess of the hero, the gift of perpetual youth and the like are but the endeavor of the human spirit "to bend the shows of things to the desires of the mind."—Ralph Waldo Emerson in "Essay on History."

Peculiar Whistle

An English scientist has invented a whistle with adjustable plug by which the whistle can be rendered more and more shrill until the vibrations are so rapid that they no longer affect the human ear. But a dog can still hear them, and will leap readily to their call.

Or an Onion

A wealthy New York doctor is being sued by two women to whom he paid ardent attention. "One of them ought to have eaten an apple a day," is the comment of the Arkansas Thomas Cat.

PE-RU-NA

With a Bottle in the House You Are Always Ready

GAINED 17 NEEDED POUNDS

Adding her voice to the thousands who are praising Tanlac for the return of health and strength, Mrs. George Hernigle, relates her remarkable experience with the medicine.

"To me Tanlac is the grandest medicine in the world. It has not only increased my weight 17 lbs., but it has also brought me the best of health. I had suffered from nervous indigestion for five or six years and had reached the point where it was either get relief or break completely down.

"When I began taking Tanlac I only weighed 99 lbs. I couldn't sleep, felt tired all the time, and was often unable to do my housework. Since taking Tanlac I weigh 116 lbs. and am a new person. Tanlac is also helping my little eight year old girl. It makes her eat more and sleep better, and I consider it deserving of only the highest praise."

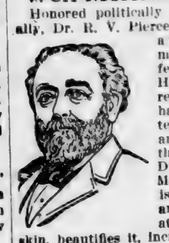
What Tanlac has done for others it can also do for you. For sale by all good druggists. Accept no substitute. Over 40 million bottles sold.

Tanlac Vegetable Pills for constipation, made and recommended by the manufacturers of Tanlac.

TANLAC FOR YOUR HEALTH

It is doubtful if humility ever did much good.

Well-Merited Success



Honored politically and professionally, Dr. R. V. Pierce, whose picture appears here, made a success few have equalled. His pure herbal remedies which have stood the test for fifty years are still among the "best sellers." Dr. Pierce's Golden Medical Discovery is a blood medicine and stomach alterative. It clears the skin, beautifies it, increases the blood supply and the circulation, and pimples and eruptions vanish quickly. This Discovery of Doctor Pierce's puts you in fine condition, with all the organs active. All dealers have it.

A HOME WITHOUT CHILDREN

Lacks the Greatest Joys of Life

Many Wives are Childless Because of Ill Health. Read How Lydia E. Pinkham's Vegetable Compound Helped Mrs. Benedict

MRS. MARY R. BENEDICT
819 PAYSON STREET, KEWANEE, ILLINOIS

Kewanee, Illinois. — "When I was married about a year and a half I took Lydia E. Pinkham's Vegetable Compound because of ill health. I did not have any children. I now have two healthy little girls and I am sure I would not have had them had it not been for your medicine. Last spring and summer I got all run down, irregular, and I had awful headaches, and my back and side hurt me so that I could stay up only a short time. My limbs would get so tired and ache till I could cry. I started to take the Vegetable Compound again and used the Sanative Wash, and it was not long till I was relieved. Now I do all my own work and help others. I sure praise Lydia E. Pinkham's medicines to any one I meet that is suffering from similar troubles. I think if mothers with girls would give it to them when they come to womanhood it would make them stronger. People who have known me all my life are astonished to see me now as I was always sickly when in my 'teens until I started taking the Vegetable Compound."—Mrs. MARY R. BENEDICT, 313 Payson Street, Kewanee, Ill.

Has a Beautiful Baby Girl Now

Bridport, Vermont.—"In the first place I wanted a baby, but none seemed to come to me. I just love children and my husband is away all day, so I was not happy at all. A doctor told me I could not have a baby until I went to a hospital. But my sisters said, 'Take Lydia E. Pinkham's Vegetable Compound and you will be O.K.' I was nervous, had organic weakness, with backache, sideache, headache and no strength. I had been in bed nearly a week when I began taking the Vegetable Compound. It was all that ever helped me and I just wish you could see my beautiful baby girl. I am fine now, and so is she. I am still taking the medicine as it keeps me well. You may be sure I am recommending the Vegetable Compound and always will."—Mrs. A. W. Howe, Bridport, Vermont.

Old fools are more foolish than young ones.—Rochefoucauld.

If a man is a good debater, he argues about everything.

We are all of us more or less the slaves of opinion.

Constructive criticism is as much criticism as any other kind.

DR. W. B. CALDWELL AT THE AGE OF 83

"In children's ills, a harsh, sickening 'physic' often makes matters worse by lowering the child's resistance."
—DR. CALDWELL

Mother! It's Cruel to "Physic" Your Child

To Dr. W. B. Caldwell of Monticello, Ill., a practicing physician for 47 years, it seemed cruel that so many constipated infants and children had to be kept constantly "stirred up" and half sick by taking cathartic pills, tablets, salts, calomel and nasty oils.

While he knew that constipation was the cause of nearly all children's little ills, he did not believe that a sickening "purge" or "physic" every day or two was necessary.

In Dr. Caldwell's Syrup Pepsin he discovered a laxative which regulates the bowels. A single dose will establish natural, healthy bowel movement for weeks at a time, even if the child was chronically constipated. Dr. Caldwell's Syrup Pepsin not only causes a gentle, easy bowel movement but, best of all, it is often months before another dose is necessary. Besides, it is absolutely harmless, and so pleasant that even a cross, feverish, bilious, sick child gladly takes it.

Buy a large 60-cent bottle at any store that sells medicine and just see for yourself.

Dr. Caldwell's SYRUP PEPSIN

Very crude are the emotions of those who want to hit the people they don't like.

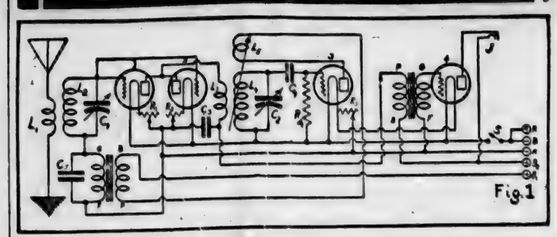
RADIO



Four-Tube Receiver in Which RF Stage is Connected in Two Tubes; Detector is Regenerative; First Audio Stage, Reflexed in Parallel Stage.

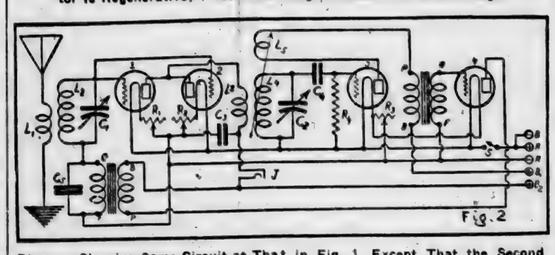


Diagram Showing Same Circuit as That in Fig. 1, Except That the Second Audio Stage Is the Reflexed One, Instead of the First.

By SIDNEY E. FINKELSTEIN,
In Radio World.

For the fan who has made many sets some variations on the accepted themes are very inviting, hence two circuits are presented that offer encouragement to those who like to work out solutions from suggested data.

The first circuit (Fig. 1) consists of a stage of tuned radio-frequency amplification, with its two tubes connected in parallel, a regenerative detector, the first stage of audio reflexed in the parallel-connected tubes, the second stage of audio being "solo."

The other circuit (Fig. 2), using the same principle, makes the last audio stage the reflexed one. The parallel connection of the tubes in the reflexed stage is retained.

Only one reason for connecting tubes in parallel may be advanced—to make them share equally the load of the stage in which they are connected. With RF amplification so popular often there is too much of it, so that distortion arises from RF causes, no less than from an overburden of audio current.

Two Audio Stages Employed.

As the test is one for reducing the overload, if any, two audio stages must be employed. Some may find that the hook-ups as suggested will improve the quality of reception. At least experimenters may establish to their own satisfaction which of the two methods, if either, gives them better results in quality, and possibly even greater volume than obtained heretofore, when the four tubes were hooked up simply in straight fashion.

Constructors who have test boards will find the circuits very interesting subjects of experiment. The change involved in making one into the other is slight.

The set, in point of distance getting, will not accomplish any more than the regulation hook-up. But if a fan is troubled with distorted reception, instead of introducing resistances across audio transformers, or condensers that cut down the volume, he may try either or both of the methods outlined, and see if he cannot get very clear reception without any reduction in volume.

L1L2 is a radio-frequency transformer and C1 is a variable condenser of correct capacity to tune the secondary L2 throughout the band of broadcasting. L3L4L5 is a 3-circuit tuning coil in which L5 is the tickler. C2 tunes L4. C3 is a by-pass condenser, about 001 mfd.. So is C5. R4 is a grid leak, about 2 megohms.

The tubes are numbered 1, 2, 3 and 4. In effect tubes 1 and 2 represent only one stage in either diagram. The input is to the two grids and the output is from the two plates. These two tubes should be of the same type.

Two Tubes in Parallel.

The RF load on the tube is partly determined by the number of turns on the primary L3. Generally speaking, the lesser the inductance and coupling, the lesser the tendency to overload. But unless one has a ratio of at 4-to-1 there may be losses, i. e., insufficiency transfer of energy. Assuming, therefore, one has the type of windings most commonly used, where that ratio is used, or something near it, there may be still quite a tendency to ask too much RF work of the first tube. Hence we will use two tubes in parallel for accomplishing only the same quantitative results. Now, not to require the use of any more tubes than would the standard hook-up, we must resort to reflexing. That often causes difficulties and if the reflexing isn't a careful wiring job, with proper regard for position and length of leads, all attempts to attain improved results are almost certain to fail. Hence be careful of your reflex work.

Now, the last audio tube handles the heavier audio load. Maybe that is the one that should be reflected, since the signals are to be delivered into the parallel-connected stage, which it is assumed are able to handle them best. But the experimenter may find that the audio load is not the troublesome one. The radio load having been shared satisfactorily between the two tubes (1 and 2), the reflex idea may be embodied solely for the object of avoiding the extra tube, and not for remedying any condition due to an audio overload. Therefore, in such a case, the first audio stage would be properly reflexed. Also the leads would be shorter that way.

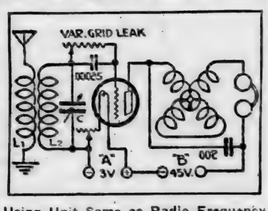
Fans who do not care much about the cost entailed may omit the reflexing entirely and use either parallel-connected tubes in the radio stage or in the last audio stage or in both places, as an experiment.

The two sets shown in the diagrams work well, as do the two others suggested. The problem is for the experimenter to decide whether the parallel idea is worth while and if so, whether for radio or audio reasons, or for a combination of both.

To Use Neutroformer in Your Single-Tube Set

Here is R. D. hook-up which uses a unit the same as a radio frequency transformer in the neutrodyne set. The coil L1 consists of ten turns of No. 26 dsc. wire on a 3-inch tube which is slipped inside of coil L2. This latter coil consists of 58 turns of No. 26 dsc. on a 2¾-inch tube. C represents a 23-plate condenser attached to the L2.

To tune, writes a Michigan correspondent in Radio Digest, vary C for the wave length variations and follow



Using Unit Same as Radio Frequency Transformer in Neutrodyne Set.

up with the variometer for regeneration. Keep the two in such relation that it is just below the point where a rushing sound is heard. If properly constructed and operated the set will give excellent results on a 199 tube with an electric light circuit aerial. With the same kind of an aerial and two 199 tubes as audio frequency amplification I have heard Mexico City, stations in California and two Cuban stations. I have a total list of 88 stations.

RADIO RHYMES

By Robert Stewart Sutliffe.

IN THE EVENING

WHEN the snow is on the roadway and the wind a blowing hard,
And the weather uninviting as you look out in the yard;
(Or perhaps down south you're living and you have no place to go)
Then's the time you feel like giving your thanks for radio.

When your family's 'round about you, and the things are cleared away,
And the daily paper's finished and you haven't much to say;
Though you live out in a section where all things are mighty slow,
You can brush away dejection if you have your radio.

You get the folks to listen as you plug into your set,
And they cannot help but marvel at the wondrous things you get;
For you hear some star a-singing at some distant big-town show,
Or a jazz that comes a-swinging through the air by radio.

Perhaps some fellow's talking about the stars above,
Or some young maid reciting some poem that you love;
Or perhaps the girls are dancing to a tune from Chicago,
A thousand things entrancing are for you by radio.
Then time comes for retiring and you go along to bed

Will Solve Old Problem

When radio encircles the earth one of the problems of making both ends meet will be solved.

Eat Yeast Foam *this easy way*

Drop a cake of Yeast Foam in a glass of water; let it stand for 5 minutes; stir with spoon; let settle and drink the milky water, including the white precipitate.

Nothing could be easier or more palatable than this way of eating Yeast Foam. Yet you get its full tonic value.

Eat Yeast Foam for constipation, indigestion, lack of weight and strength, boil pimples and run down condition.

SAMPLE CAKE FREE

NORTHWESTERN YEAST CO.

Ask Dad— See If He Knows

Father and mother are always thinking of your welfare—there isn't a thing within reason they wouldn't do for you.

But they may unknowingly have been risking your life every day.

When you are at dinner tonight with dad, ask him this question:

"Dad, is our school firesafe?"

Perhaps he won't be able to answer—he may not know.

Ask dad if he knows that somewhere in the country a schoolhouse burns every day. Ask him if he knows that one-third of all the schoolhouses in the country are nothing better than firetraps—maybe your school is one of them.

Of course dad knows that buildings can be built that will not burn. They are being built everywhere, every day.

If your school is firesafe, you're lucky. If it isn't, ask dad what he is going to do about it. You have a right to know.

• • •

The highest type of firesafe construction is concrete. Our illustrated booklet "Concrete Schoolhouses" contains a wealth of information on firesafe construction with which every parent ought to be familiar. Write today for your free copy.

PERSONAL PARAGRAPHS

Receipt books on sale at News office.

House for rent. Inquire of M. P. Bishop. 42t1

Lester Gee and family spent Sunday in Butler.

Mr. and Mrs. F H. Langley, of Defiance were in town last Thursday.

The William Brown residence is being painted by Roy Kinsey this week.

The stock yards are being cleaned today and given a coat of white wash

Glen Abel and wife of Peru, are here guests of his parents for the week.

McCall patterns are ordered through The News. Phone us your order

Mrs Martha Miser of Waterloo, spent over the weekend in the Ed Miser home.

"No smoking allowed" is the new order posted at the Filling Station, taking effect Tuesday.

Claud Laub and family spent Sunday with Mrs. Laub's parents, Mr. and Mrs. Fred Blaker near Butler.

Property for sale, located on Main Street. Inquire of S. S. Widney or Olen Dermott. Price right. 42t2.

Tom Brunson and family and Dan Keller were Sunday guests of Mr. and Mrs George Seevers, near Logan, Ohio.

Wm. Curie received word today to appear at Indianapolis November 4, to serve on the Jury in the U. S. Court.

Wm Curie, Grover Curie J C F. Abel and Ward Woodcox, spent the past few days at Hamilton Lake fishing.

Mr and Mrs. Lyman Winn and two daughters of near Hicksville were Sunday guests of H. C Bartlewick and wife.

Among the transfers of property titles is that of Wm C. Perry et al to Wm. Brown, lot 11, block 4, O P, St Joe, $500.

Lester Pugsley moved the family and household goods of Chas Kaser from here to Montgomery Michigan, Monday

Roy Bowser and wife and Harry Hursh and wife, spent Saturday night and Sunday with Harry Kinsey and wife at Fremont.

Spencerville Rink Sat. Eve. October 24, also Masquerade Skate Sat. Evening. Oct. 31st with CASH prizes. Come.

Mr. and Mrs. Frank Scholes had as Sunday guests Henry Debner, wife and children of Decatur and Robert Ulm and family of Butler.

W. G. Stout and wife of Hamilton stopped a short time Monday at this place with the latter's mother, Mrs Alice Copp, enroute to spend the winter in Florida.

Mr and Mrs. Frank Hickman of Bryan, Ohio, Mr. and Mrs A E Hickman and Mr. and Mrs Raymond Bayliss of near Ney, O. spent Sunday here in the Frank Hickman home.

The horse hoe pitching contest at Auburn last week drew contestants for miles. E. B Smith entered in the free for all and came out fifth with 64 ringers and 187 points entitling him to have a suit pressed free by Otto Graf.

Mr and Mrs Frank Moses and family, Alonzo Springer, Sylvester Springer and Miss Florence Robison, all of Fort Wayne and Roy Kinsey, wife and daughter, Miss Ida were guests of Dr and Mrs H R Minnick at Albany, Indiana, Sunday.

Mr. and Mrs. Laney Gee and daughter, Miss Mildred, attended a farewell reception at the home of Mrs. Ida Hose, near Butler Sunday for Mrs Cecelia Wyatt Johnson, who left Wednesday afternoon for her home in California after a year's visit here with relatives and friends.

Roy Collins of Fort Wayne, was home over Sunday.

George Berry is at Valparaiso taking a course in telegraphy.

Wanted: Wood cutters. See Howard Shilling. Phone 2202.

Writing tablets and envelopes at News office, also box stationery from 10c up.

Wm Quance and family of Auburn, were Sunday guests in the J. C. Hull home.

The Horticulture class of the Auburn high school, visited the Leighty apple orchard Thursday.

Mr. and Mrs Elmer Bachelor had as Sunday guests, their daughter, Miss Helen and friend from Grand Rapids, Michigan.

A good overcoat and five gallons of gasoline were taken from the Carl Perkins automobile last Saturday evening, while parked in St. Joe.

Chas. Thomas of Reading, Mich, was in town Thursday on business, making out the papers in the sale of the N. D. Thomas property to Roy Rinsey and wife.

Rink nite is Saturday nite at Spencerville, also a Masquerade Skate on Saturday Night Oct. 31 with CASH prize money. You are invited.

Mrs. Emma Baker spent the past week a guest of Mr and Mrs Fred Gaskins on the Lincoln Highway near Fort Wayne. They all spent a day with Rev. and Mrs F. A Dressel at Richmond

George Arnold and mother, Mrs Clara Arnold of Gary, visited Friday and Saturday with Mrs Mary Timmerman in the Nan Lyshe home. They also visited other relatives in this vicinity.

YOUR Last Name

IS IT HINMAN?

THERE is no English Hinman family. Burke gives arms for Inman, Hindman and Hyndman. A genealogist of the American Hinman family suggests that Inman is the original form of the name for which Hinman is a Cockney variation.

At any rate there was early a big family of Hinmans in this country. The first of the name here was Sergeant Edward, who is recorded in Stratford, Conn., between 1650 and 1652. There is a family tradition that he was a sergeant-at-arms in the bodyguard of King Charles I, and that that is where he got his designation as sergeant.

There is record that he and Capt. Charles Underhill, in Albany, offered their services to Governor Stuyesant to help the Dutch fight the Indians but Stuyvesant turned down their offer, saying that he considered the Indians as good friends as the English.

Sedgeant Edward married Hannah, daughter of Francis and Sarah Stiles of Windsor, Conn. He died in 1681, leaving four daughters and four sons, Titus, Samuel, Benjamin and Edward.

POWNALL—This name is derived from a township so called in Cheshire, England. The founder of the family here was Thomas Pownall, who was born in Lincoln, England. He was son of an English civil officer in India. Thomas, the son, came to this country as private secretary to Sir Danvers Osborne, governor of New York.

BUCK—The Buck family, to which Dudley Buck, the musician, belonged, was founded here by Emanuel Buck, who came to Massachusetts shortly after the founding of Plymouth. He was one of the earliest settlers of Wethersfield, Conn., in 1647. The family is connected with those of Winthrop, Saltonstall and Dudley. Dudley Buck's maternal grandfather was Nathaniel Adams, a noted lawyer of New Hampshire, the preceptor of Webster and one-time grand master of the Masons. Dudley Buck's grandmother was a member of the Winthrop family. The name is of old English origin and is doubtless derived from the animal, famed in the chase.

Prehistoric Ugliness

Skeletons of three prehistoric men and one woman, who are believed to have lived in southern France more than 15,000 years ago, were discovered recently. All have square, receding chins, flat noses and huge eye cavities.

Swan Upsets a Man

A flying swan knocked down the mayor-designate of Bath, England, but the official's greatest injury was to his dignity.

Polishing Furniture

When polishing furniture if it is rubbed the same way as the grain it will polish much brighter and quicker

BEST OF HUMOR

Good Reason

Phyllis—How dare you kiss me? Harry—I need the practice.

Now It's His Car

"Clothes certainly make the man." "Not any more, my dear—now it's his car."

Bright Idea

"I'm going to the masquerade as a clown." "How original."

Cautious

"Do you like rural scenery?" "That depends. Are you a real estate man?"

Softening the Sound

Coed—"Your new overcoat is rather loud." Frosh—"It's all right when I put on a muffler."

Definitions

Nerve—Asking a man just back from his vacation to lend you ten.
Miracle—Having him do it.

Collective

Parent (anxiously)—Nurse, is it a "him," or "her?"
The Nurse—It's a "them!"

He Did

Him—"You should see the altar in our church." Her—"Lead me to it."—Wisconsin Octopus.

More Economical

"Do you keep a dog?" "No. If we hear a noise we bark ourselves!"—Le Rire.

While the Horn Is Hot

"Is Pete a good salesman?" "Yes, indeed; sells accident insurance to everybody he bumps into."

Competition

"We girls have been comparing our records of summer engagements." "And who is the ring-leader?"

His Notes Are Good

"Is the living he makes on a sound basis?" "You bet it is. He beats the bass drum in a band."

The Woman Pays

"Does your wife take to bridge?" "She takes to it more than she brings back."—Boston Transcript.

Co-Operation in China

The remedy for the woes of China and the safeguard against these perils are in principle simplicity itself. Time and again it has been demonstrated that when the Chinese, whether in the capital or in the provinces, know that the powers are really earnest and united upon a common course of action, they bow without reserve to the demands made upon them. It is not creditable to the statesmanship of the principal powers concerned that they have not managed to preserve this unity in essentials when dealing with China.—London Times.

Science Called On to Come to Nature's Aid

Some alarm has been caused recently by the announcement that the Matterhorn is in a distinctly shaky condition, and may topple over into the Italian valley above which it towers.

Similar fears were entertained some twenty years ago regarding the Rocher de la Clusette, in the Jura, which then threatened to fall into the valley of the Areuse. Had this happened, the valley would have been blocked, and the flow of water, on which the district depended for its supply of electricity, would have been stopped.

Immediate action had to be taken to avert this calamity, which would have plunged the countryside in darkness and disorganized its transport. Engineers rushed to the spot, the mountain was shored up with concrete, and all was well once more.

Tolls Not Abolished

Although tolls are no longer collected from people walking across Brooklyn bridge or from automobiles, all trolley cars and elevated trains that pass over the bridge still pay for the privilege. New York city collects five cents for every electric trolley car that makes a round trip across the bridge and a dime for each car of an elevated train.

Five Per Cent to Charity

Farmers, laborers and clergymen lead in Wisconsin in the amount of their income given to charity, a survey of the income tax returns show. General average of contributions to charity in the state is 5 per cent, the investigation showed.

Poisoned Arrows

The poison used by certain South American tribes for tipping arrows is obtained from the same plant which they use for making their daily bread. —Science Service.

SPENCERVILLE

Henry Markle was a Sunday guest in the B L Smith home.

Born to John Doll and wife of Fort Wayne, Saturday, a daughter.

Orpha Silberg of Butler, spent the weekend with her grandmother Mrs. Sophia Miller.

Wm. Allen moved Monday to the Palmer home. Mr. and Mrs. Jason Keyes will occupy the home vacated by Mr. Allen.

Prof and Mrs A J Smith and children, were Sunday afternoon guests of Charles Goheens and family of near Fort Wayne.

The C. C. Club were very pleasantly entertained Friday afternoon at the home of Mrs. John Hosler. Contests were enjoyed. Mrs. Arline Rhoads and Mrs. Mettie Furnish were guests.

Miss Lillian Steffey has been on the sick list this week but is improved.

Rev. S. D. Steffey transacted business in Auburn Tuesday afternoon.

B. F. Markle and family, were Tuesday evening guests at the Matilda Oberholtzer home near Harlan.

Mrs. Emila Gloyd and sons, Gerry and Clarence, were Sunday guests of Isadore Badica and family of near Fort Wayne.

A Get-Together supper and social is being planned by the M. E church and Sunday School, to be given in the near future.

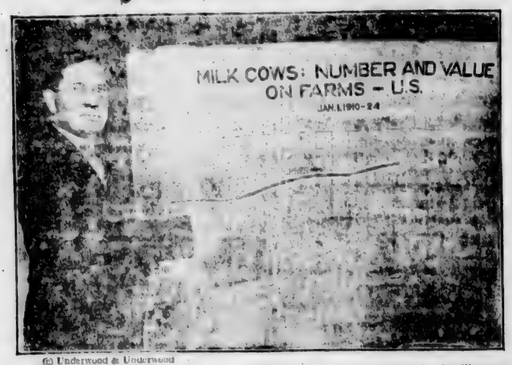
The Home Coming at the Lutheran church Sunday was well attended and the pastor, S. D. Steffey reports one of the best communion services of the year. Because of the funeral of John Haifley, the afternoon session was called off. Rev Sorensen of Auburn was slated for the address, but will be given at a later date.

For Sale: 200 bu. of hand picked apples, price, .75 and $1. Wind falls, 50 cts. at my farm 3 miles west of Spencerville.

Meno Gerig. 41t2.

A collision took place Sunday at the corners near the Community Hall Raymond Randall was going north and Mrs. W. P. Steward was going east to the Methodist church. Each expected the other to stop, consequently they smashed together. Both cars were damaged considerable.

More per Cow Rather than More Cows Says U. S. Bureau Chief



© Underwood & Underwood

Dr. C. W. Larson keeps track of milk cows on farms of the country, and how much milk they give.

In a Chicago address, recently, Dr. C. W. Larson, Chief of the United States Bureau of Dairying, made a plea for greater production per cow rather than an increase in the number of cows.

The average cow in the United States yields annually only about 4,000 pounds of milk of which 2.7% is butterfat.

Careful breeding and elimination by test in the milk herd makes an increase to 8,000 pounds of milk annually per cow not impossible with the average dairyman. This would net the milk producer $75.00 above feed cost per cow as compared with the present average of only $26.00.

Membership in a cow-testing association and the maintenance of herd records are extremely desirable. The system of records should at least include an identification record, an account of production for each cow—the amount of feed given and breeding dates. For a grade dairy herd, the record system may be quite simple.

Cow-testing associations promote a more faithful follow-through of the rudiments of dairying. Among them are intelligent feeding, proper stabling, regular milking, thorough grooming, periodical clipping of the long hair from flanks, udder and underline and other attendant precautions against the presence of bacteria in the milk.

In cow-testing associations, records of the milk and butterfat production of pure bred cows are made under the supervision of the association and are given official recognition.

Supper October 31st

Annual Hallowe'en Supper will be given by Ladies of the Lutheran Church in the basement of their church, Saturday evening, October 31. The public is invited to attend.

To Make Settlement

All persons knowing themselves to be in debt to the Beams & Co. Store will please call and make settlement as the estate is soon to be closed. 42t3.

Burial of Mrs. A. Heyman at Wayne

Mrs. Nellie Heyman, daughter of Mr. and Mrs. John Benninghoff of Fort Wayne, and wife of Arthur Heyman, former lumber dealer of Spencerville, was buried Monday afternoon at 2 o'clock from the home at 1901 Lawndale Drive. Interment was made in Lindenwood. Her illness was of long duration and the family has the sympathy of their many friends here.

Notice of Administrat'n

GATHERED GEMS

Light is the symbol of truth.—Lowell.

Stolen kisses are always sweetest.—Leigh Hunt.

Pain improves judgment and it is about the only sure way.

Who overcomes by force, overcomes but half his foe.—Milton.

Most advice is good, but you are given no will power with it.

A wise wife lets her husband beat her at cards once in a while.

When you feel like nagging, go into another room where you can't.

People like money for their efficiency; but they also like praise.

If a man is proud of his whiskers he complains of how tough they are.

Even grown folks do not take liberties with a boy who hasn't much to say.

Very crude are the emotions of those who want to hit the people they don't like.

You never can tell. Lots of people who are sure they are right don't go ahead.

It is mighty difficult to build up a reputation on the things you are going to do.

One of the greatest mistakes a fellow can make is to try to fix other people's.

One who is tempted and doesn't fall is greater than one who is never tempted.

Some who dodge work, don't dodge responsibility, so they have good jobs, after all.

Unfortunately, a weak intellect isn't going to keep a fellow from being headstrong.

A man may be guilty of sins of omission, even when he is in the commission business.

Anybody can have education who wants it, and in this age, it is a mystery how anybody escapes it.

Science Will Reveal Treasures of Earth

The possibility of finding gold in the earth by wireless is foreshadowed by Sir Robert N. Kotze, the well-known mining engineer.

Sir Ribert declares that in the future—say, 100 or 200 years hence—the science of geology will reveal the geology of the earth to a depth of a mile.

He believes that methods will be devised whereby geologists will be able to peep into the crust of the earth. They had already succeeded in transmitting speech underground by wireless, which meant that when wireless waves were used the crust of the earth was transparent.

Sir Robert suggests that an apparatus using such waves might be devised which could see into the earth, and what would be "opaque" would be ore deposits, and with a refinement of this principle the future geological prospector could determine the nature and the size of the deposits.—London Answers.

Innocent "Burglars"

A man passing the Wilson home in George street, Providence, R. I., at night observed a dim light within. As no one was supposed to be home, he halted, and when two figures glided by the light, he called the police. A squad surrounded the house, entered it and climbed all over it, but there was no burglar. The mystery was dispelled by an inspector. He noted that a second floor room of the Hinckley home across the street bore a light and that children were moving about the room. He explained that the light was being reflected in a mirror in the Wilson home. The movements of the children, also shown in the mirror, were the "burglars."

Noiseless Rubber Streets

Some of our scientists continue to be more speculative than the widest prophets. Prof. A. M. Low predicts a future which will include noiseless rubber streets, moving sidepaths at the rate of 20 miles an hour, one meal a day only, trousered woman, and "a mild oscillatory stimulant taken in a few moments" instead of sleep. Doctor Low speaks of "our universal longing for the future," but who would long for the kind of future he foreshadows or threatens?—Westminister Gazette.

Pilgrim Pear Tree

Still standing and bearing fruit every year is a tree brought from England in 1630 by Gov. John Endicott and planted on his clearing in Massachusetts. In six years the tree will have its third centennial, and is thought to be the oldest fruit-bearing tree in the United States.

Farm Acreage Decreasing

The latest federal census shows that the acreage of improved farm lands in New York and New England has decreased more than 11,000,000 acres during the last 40 years.

The Old and the New

The old-fashioned girl who used to bring in the milk bottles when she woke up now has a daughter who brings them in when she is going to retire.—Providence Tribune.

Home Stayers

You can appreciate the great change in the last hundred and fifty years when you remember that on his midnight ride Paul Revere found most of the folks at home.

Charitable Investment

The land and property invested in almshouses in the United States was valued at about $150,000,000 at the end of 1924.—Science Service.

Parent-Teacher Association

ST. JOE.

The first meeting of the P T A for 1925-26 was held at the school house Friday eve, Oct 16 Due to bad weather the crowd was not as large as it would otherwise have been also the program was cut short on this account.

Mrs. F. R Bowman, president from last year, had charge of the meeting. C. A Woodcox conducted an opening program of music and the senior high gave an interesting program. In the business session it was necessary to elect a new president to succeed Mrs Havens, who moved away Ralph Sechler was elected to the office.

As a fitting conclusion for the evening a lunch was served.

SENATOR RALSTON OF INDIANA DEAD

Passed Away Wednesday Night After Being Unconscious 24 Hours

INDIANAPOLIS, Ind., Oct. 15.—Samuel M. Ralston, United States Senator from Indiana, died last night at his country estate north of this city. Death came shortly after 11 o'clock, the Senator having lain unconscious for nearly 24 hours.

Death was caused by a complication of heart, kidney and bladder trouble and he had been forced to give up business and political activities since the middle of September.

Those associated with Mr. Ralston in business and political circles, regardless of political affiliation, alike paid tribute to his integrity, understanding of public problems and sound common sense which elevated him from a mine worker to one of the most prominent men in public life. He served as Governor of his home state and steadfastly

SAMUEL M. RALSTON

refused to be a Democratic candidate for President of the United States during the deadlock between William G. McAdoo and Governor Al Smith. At one time, in reference to this, he said: "There is something about the greatness of this exalted position that admonishes me against wanting to undertake the execution of its grave and solemn duties."

Dreaded Campaign

Senator Ralston said confidentially at the time that his age and general physical condition was not such that would permit of his giving the time and attention the presidency demanded, if he were to win the office. He said he even dreaded the thought of the rigorous campaigning that would follow the Democratic nomination, and if elected, probably would die in office as the result.

Senator Ralston had virtually retired from politics prior to entering the Indiana senatorial race in 1922. It was only on the insistence of his friends, who declared it his duty to enter that he finally consented. The result was that the jovial Democrat defeated Albert J. Beveridge, Republican entry.

The Hoosier displayed little interest in the last Democratic national convention, going about his usual routine at "Hoosier Home," his country estate. Only occasionally did he enter the living room to lisetn to the radio which was in direct connection with Madison Square garden, New York city.

Informed that the convention was leaning toward him after numerous ballots, lines of worry crossed his face. It was at that time that he got into telephonic communication with Mr. Taggart. Mr. Taggart literally begged him to keep in the race. Nothing definite was done at the time, but early the next morning the message of withdrawel was sent:

A lawyer by profession and a farmer by inclination, Mr. Ralston never really cared for political office. He preferred the battles of the law, tempered by the quiet and peace of the rolling acres of his Indiana farm.

Until he was swept into the governor's chair in 1912, Mr. Ralston had sought public office only twice, and each time was defeated. After his four years' term as chief executive, he retired to his farm near Indianapolis, and confided to friends that he was through with politics.

Born on a farm in Tuscarawas county, Ohio, on December 1, 1857, Senator Ralston came from a hardy pioneer stock. His great-grandfather served in the Continental army and was wounded at the battle of Brandywine. He was of Scotch-Irish ancestry, but in his own life the strain of the Scotch lineage was uppermost; consequently he was cautious and deliberate.

When the senator was 8 years old, his father moved to Indiana and enjoyed the average amount of prosperity of a farmer until the panic of 1873 when the farm was lost. Young Ralston became butcher boy, coal miner, sheep herder, farm laborer and school teacher before he took up the study of law.

There being too many lawyers in his own home place, he set out for less populated legal fields, settling finally at Lebanon, Ind. He early entered into political fights and gained a reputation as a forceful, vigorous speaker. After he had served as president of the local school board his friends put him forward as a candidate for secretary of state but he was defeated twice for that office.

Seen and Heard In Indiana

For the third time within a year the alleged slayer of Thad Fancher, Crown Point attorney, heard the verdict of a jury in a murder trial at Valparaiso and it was "acquitted."

W. D. Robinson of Versailles was re-elected president of the National Horsethief Detective association at the closing session of the sixty-fifth annual convention.

H. N. Sherwood, superintendent of public instruction at Indianapolis, announces the next conference of rural education to be held at Auburn, October 31. The conference will be the eighth of its kind to be held in the state.

Frank Fuchs, Evansville banker, serving a five-year term in the Atlanta Federal penitentiary for violation of the national bank act, has been paroled on recommendation of the federal parole board at Washington. He had served twenty months.

Mrs. Lorena Stephens of Fort Wayne, has been appointed by Richard Lieber, director of the state department of conservation as a nonsalaried deputy game warden in Allen county. She is the first woman in Indiana to be selected for such an office.

Four miles of new pavement has been opened to traffic on No. 10 just south of Carlisle, and traffic is now using nearly all new pavement between Indianapolis and Anderson via Nos. 3 and 11, it was announced in the state highway commission's traffic bulletin issued at Indianapolis

A tabulation made of the accounts in the office of Thomas S. McMurray, commissioner of the Indiana insurance department at Indianapolis, showed that during the fiscal year, which ended September 30, this department collected for the state in various fees the sum of $1,657,837.43.

Investigation conducted for the past five years at the college of agriculture, University of Illinois, indicate infected flocks of poultry probably are the principal source of avian tuberculosis in swine, Dr. Robert Graham told delegates to the Lakes state conference at Indianapolis on the eradication of tuberculosis in live stock.

Raymond Powers, Terre Haute, said to have been a participant in the Spencer bank robberies several months ago, and who escaped from an operative of a detective agency while he was being taken from the state reformatory to Greencastle, to testify in the trial of one of his alleged accomplices, was caught, Harry C. Webster, head of the agency, reported at Indianapolis.

As a result of discussions had recently at the Indiana state conference on social work at Vincennes, a committee of six members, appointed at that conference, is expected to confer in the next few weeks with state officials, including the governor, to discuss and study the question of a central selling agency or medium for the manufactured products of the state penal institutions, the state prison, the state reformatory and state farm.

Damages of $50,000 and a restraining order to prevent further alleged interference with the operation of the Beech Grove motor busses was asked in a suit filed in Superior court at Indianapolis by the South Side Motor Coach company against fifteen citizens of Beech Grove. The complaint alleges that the defendants have encouraged persons to patronize the Beech Grove Traction company lines instead of the busses.

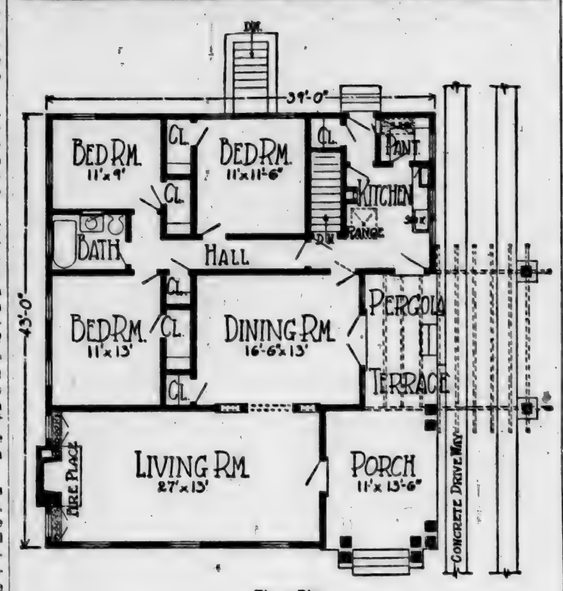
Four members of the bandit gang which held up representatives of a Clinton bank on a highway between Clinton and St. Bernice August 25, and robbed them of the $11,000 pay roll of the Chicago, Milwaukee & St. Paul railroad, are under prison sentences following their pleas of guilty in the Vermillion Circuit court at Newport. The four sentenced are Alonzo Stryker and John Dougherty, who were sentenced to ten years each in the Indiana state prison and fined $1,000 on pleas of guilty to auto banditry, and Mrs. Florence Stryker and Lena Smith, sentenced to the Indiana women's prison for indeterminate terms on pleas of guilty to conspiracy.

The government bureau of the census at Washington estimates the population of cities and towns in Indiana as follows: Anderson, 33,854; Bloomington, 12,589; Clinton, 13,642; Connersville, 12,454; Crawfordsville, 10,530; East Chicago, 45,580; Elkhart, 27,104; Elwood, 10,790; Evansville, 93,601; Fort Wayne, 97,846; Frankfort, 13,051; Gary, 76,870; Hammond, 50,386; Huntington, 15,914; Indianapolis, 358,819; Jeffersonville, 10,098; Kokomo, 30,855; Laporte, 17,540; Lafayette, 23,790; Logansport, 23,120; Marion, 26,274; Michigan City, 20,299; Mishawaka, 16,071; Muncie, 42,491; New Albany, 29,992; Newcastle, 16,955; Peru, 12,683; Richmond, 30,495; South Bend, 80,691; Terre Haute, 71,071; Vincennes, 18,271; Whiting, 12,158.

"I had hoped to escape, but am glad now I don't have to hide any more," Mrs. Clara Carl, fifty-year-old murderess, thus accepted her capture by Columbus (Ohio) detectives.

As a result of a resolution adopted at the annual reunions of the Eighty-fourth and Sixty-ninth Indiana volunteer infantry regiments at Richmond, a marker will be erected near South Ninth and E streets to commemorate the site of Camp Wayne, where hundreds of Civil war soldiers were mobilized before they were sent to Indianapolis

Perfection of Line and Simplicity of Ornamentation Make for Beauty



Floor Plan.

By WILLIAM A. RADFORD

Mr. William A. Radford will answer questions and give advice FREE OF COST on all problems pertaining to the subject of building, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on the subject. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

It is a well-established principle in house design that the smaller the house the less it should have in the way of purely decorative features. Overdoing the decoration will spoil any house no matter how good, otherwise, the design may be. The small house should depend for its beauty upon perfection of line and only the simplest of ornament. If possible the ornament should be introduced in the handling of the essential parts of the building.

Just how this principle can be applied is illustrated in the house shown here. Its lines are simple throughout and the ornamentation of the exterior comprises only the entrance, the pergola over the driveway, two window boxes and the pergola effect over one of the front windows. Of these few features, the first is entirely an essential part of the building, and the others possess some excuse from the point of view of utility. They are all simple in treatment, so that there is no impressionof overornamentation.

This is a simple frame bungalow with shingle roof and with the side walls carried down to the grade level. The porch is set on a concrete foundation and is approached by concrete steps. Front walk and driveway are combined and the pergola over the drive is treated as a shelter for a side entrance from the drive, leading into the dining room. The garage at the rear is neat and unpretentious.

From the front porch there is a door opening into the living room, which occupies the entire front of the house. This is a large room, 27 feet long and 13 feet wide. At the end of it is a broad fireplace with built-in bookcases at each side. These bookcases extend only part way up the wall and have small windows placed over them. At this same side of the house there are two bedrooms, but these are entirely separated from the living room and are reached only from an inner hall back of the dining room.

The dining room is entered from the living room. This room is interestingly positioned in the center of the house space, but opens at one side on a terrace covered by the pergola which extends over the drive. There is a handy closet in one corner of the dining room and the doorway between it and the living room is wide with half-columns which throw the rooms together effectively. Another door at the rear of the dining room opens into the inner hallway giving access to the kitchen.

At the kitchen door there is the stair leading to the basement. The kitchen is small and compactly arranged. It is provided with the usual fixtures, including a refrigerator which is placed in the large pantry, but can be iced through an opening beside the back door. In addition to the pantry, a closet is provided in the kitchen as a convenient storage place for household implements.

Opening off the hall there are the two bedrooms before mentioned, a third bedroom at the center rear and the bathroom. All of these bedrooms are of comfortable size and are provided with large closets. There is also a linen closet in the hall, placed conveniently close to the bathroom door.

Plan Pergola and Lattice With Home

Since the old-fashioned porch on a house has been tabooed there is nothing which so increases the appearance of size in a home as connecting latticework or a pergola.

For example, there is the possibility of connecting up the building with a pergola or the use of a lattice fence so that the whole grounds appear to be a part of the building rather than the grounds and house as units by themselves. The entire outside with these improvements will become veritable outdoor living rooms with the adding of shrubs and flowers.

All of this can be taken care of in the original, but it is just as easily added after the house is built without disturbing in the least any part of the building itself.

Breakfast Nook Still Gaining in Popularity

The breakfast nook continues to gain in popularity, and nowadays few houses of modern design, especially bungalows, are without such a place.

In fact, in many of our up-to-date apartments, the dining room has been left out entirely and the breakfast nook, large enough to seat five persons comfortably, has been substituted.

A breakfast nook is a great aid to a busy housewife. Usually such a corner is worked into the general plan of the residence as near the kitchen as possible, thus saving many steps and much time in the morning, which, in most households, is valuable then.

The wise home builder will put into the breakfast nook at least one electric wall plug above the level of the table. If possible, and the little additional expense will well warrant it, it would be wise to make this wall plug double, so that a toaster or electric grill may be at work while the coffee is bubbling away in the percolator.

Many quaint and charming decorative schemes can be worked out for a breakfast nook.

Some Pointers

Water systems help materially to modernize the old-fashioned building as well as to equip the new one.

Drawing instruments of high quality should be part of the permanent equipment of every progressive builder.

Wall ties, wall plugs, base and corner bead are details of construction where quality is especially important.

Floor surfacing machines save the labor of many men and secure results that are superior to the hand method.

Structural slate is uniquely adapted for use in floors, shower stalls, toilet enclosures, urinal stalls, tubs and sinks.

Stair tile that is slip-proof should be installed wherever hard service is called for or there is slip hazard.

Maple Flooring

Maple flooring is so close grained that it is not advisable to attempt to stain it; but its natural color when waxed or varnished is beautiful and cheerful—a rich golden hue. There are possibly many home builders who have seen maple used in the home only in the kitchen, where it is frequently scrubbed and becomes almost white.

Lesson for October 25

PAUL IN EPHESUS

LESSON TEXT—Acts 19:1-41.

GOLDEN TEXT—"For the love of money is the root of all evil."—I Tim. 6:10.

PRIMARY TOPIC—Paul Tells Idol-Makers About Jesus.

JUNIOR TOPIC—Paul's Preaching Stirs Up a Riot.

INTERMEDIATE AND SENIOR TOPIC—Diana or Christ.

YOUNG PEOPLE AND ADULT TOPIC—Money or Christ.

Apollos, an Alexandrian Jew, an eloquent man and mighty in the Scriptures, had preceded Paul at Ephesus. He had diligently taught the things of the Lord, knowing only the baptism of John. When Aquila and Priscilla heard him they perceived his lack of instruction in Christian truth. Therefore, they took him and expounded unto him the way of God more perfectly. Having thus come into fuller light, the brethren gave him a letter of endorsement as he passed to other fields.

I. John's Disciples Become Christians (vv. 1-7).

These 12 disciples had been taught only the baptism of repentence as a preparation for the kingdom of God Paul taught them to believe on Christ, i. e., to receive Him as the One on the cross who had provided redemption for them. When they received Christ, Paul laid hands upon them and they received the Holy Spirit.

II. Paul Preaching in Ephesus (vv 8-10).

1. In the Jewish Synagogue (v. 8)

Though the Jews were Paul's inveterate enemies, his rule was to go to them first with the gospel. His preaching was characterized:

(1) By boldness. He realized that God sent him, and that His authority was back of him.

(2) By reason. God's message is in accord with the highest reason.

(3) By persuasion. It is not enough to come boldly with a reasonable message, it must be accompanied by persuasion.

(4) By speaking, "concerning the kingdom of God." He did not discourse on current events, literature or philosophy, but upon the message of salvation through Christ.

2. In the Schoolhouse of Tyrannus (vv. 9-10).

The Jews, being enemies of the gospel of the grace of God, were only hardened by Paul's earnest preaching Paul separated the disciples from them and resorted to the schoolhouse of Tyrannus. This was followed with glorious results.

III. God Working Miracles by Paul (vv. 11-16).

Ephesus was noted for its wonder workers. If Paul's ministry was to be successful here, God must in an extraordinary way put His seal upon His work. So wonderfully did He manifest His power that handkerchiefs and aprons brought from Paul's body healed the sick and cast out evil spirits.

IV. A Glorious Awakening (vv. 17-41).

1. Fear Falls Upon All (v. 17)).

News of the casting out of these evil spirits created impressions favorable to Christianity.

2. It Brought to the Front Those Who Professed Faith in Christ, While Not Living Right Lives (v. 18).

They believed but had not broken from sin.

3. Gave Up the Practice of Black Arts (v. 19).

This means forms of jugglery by use of charms and magical words. They proved the genuineness of their actions by publicly burning their books.

4. Uproar of the Silversmith at Ephesus (vv. 23-41).

(1.) The Occasion (vv. 23-24).

This was the power of the gospel in destroying the infamous business of Demetrius and his followers. It was clear to them that idolatry was tottering before the power of the gospel.

(2) The Method (vv. 25-29).

Demetrius, a leading business man, whose business was the stay of others of a similar nature, called a meeting and stated that much people had been turned from idolatry, and that the market for their wares was materially weakened. He appealed to his followers:

a. On the ground of business, saying: "This, our craft, is in danger of being set at naught," v. 27.

b. On the ground of religious prejudice. He said: "The temple of the great goddess Diana shall be despised" (v. 27). His speech gained his end.

Christianity

Christianity is no mere scheme of doctrine or of ethical practice, but is instead a kind of miracle, a power out of nature and above, descending into it; a historically supernatural movement on the world, that is visibly entered into it, and organized to be an institution in the person of Jesus Christ.—Horace Bushnell.

Giving and Receiving

We live in a world of giving as well as of receiving.—American Friend.

makes your food do you more good.

Note how it relieves that stuffy feeling after hearty eating.

"DIAMOND DYE" ANY GARMENT, DRAPERY

Just Dip to Tint or Boil to Dye

Each 15-cent package contains directions so simple any woman can tint soft, delicate shades or dye rich, permanent colors in lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings—everything!

Buy Diamond Dyes—no other kind—and tell your druggist whether the material you wish to color is wool or silk or whether it is linen, cotton or mixed goods.

WHY SHOULD ANYONE SUFFER WITH INDIGESTION OR ANY STOMACH MISERY?

If you want to fix up your dyspeptic, out of order stomach so that you can relish what you eat with not the least bit of after distress, do what tens of thousands of people have already done.

Getting rid of gas, bloating, belching, heaviness and that feeling of near suffocation isn't such a hard matter as you may think—You've been getting hold of the wrong medicine—that's all.

But better late than never—ask your druggist for a bottle of Dare's Mentha Pepsin—a real stomach medicine and a very pleasant one. For acute indigestion one or two doses is enough, but when the trouble is chronic, two or three bottles may be needed to put your disordered stomach in good healthy condition and make life worth living.

Making a start is the main thing, so why not get one bottle today with the distinct understanding that if it doesn't help you the purchase price will be returned.

Getting home to a porcelain bathtub and an electric fan is very inviting.

Modes for Season Offered by Paris

These are the vital features of the autumn openings of the Paris couture—an essentially broader silhouette, a waistline which is definite and distinct and which shows a rising tendency, the back flare, a skirt length which, while little changed mathematically, has added lengthening effects, a generous amount of elaboration in trimming and details, and a direct departure from bizarre boyishness.

Now the word of Paris, as issued at these seasonal openings, says a fashion writer in the New York Herald-Tribune, is no longer uttered in the stentorian tones of pre-war days, when the smartest French designers spoke but to be obeyed. It has become in comparison a still, small voice to be followed or not, according to the inclinations of fashion's new aristocracy, the mesdames of the mode—otherwise known as the penultimate consumers. No longer does an uncritical public accept willy nilly the convention-made dicta of the Rue de la Paix and surrounding avenues, and probably half the themes launched at each semi-annual showing are ruthlessly discarded by the spirited members of the modern haute monde. Wherefore it behooves the followers of fashion to carefully analyze the new themes in order to separate the chaff from the wheat, and in order to ascertain which themes are to be the distinguishing marks of the chic monde during the season.

The Invariable Flare.

The wider silhouette per se offers no problem save in the minds of those who are constitutionally unable to shake off the thrill of the slim straight line. Resistance, of course, is the human element which combats every fashion change, and the long duration of the narrow silhouette made the departure from it more than usually difficult. Last autumn witnessed a few tremulous instances of the flare, always with the straight line offered as an alternate; last spring saw most of the couture converted to the wider outline, and the present season has uncompromisingly declared itself in favor of the full silhouette.

The defined waistline is another theme to which the mode and its followers were predisposed. Long years of tubular iteration had made the waistless outline appear a little jaded even in the eyes of its most ardent adherents, and changes have been

Sleeveless Tunic of Black Velvet Bordered in Bands of Fur.

hinted at occasionally during previous openings. It cannot be said that the defined waistline is anything near as universal or distinct a tendency as the broad silhouette, but the idea has been incorporated into the leading collections and it is certain to gain momentum as the season progresses. Just now it occupies the same position as the flare a year ago—it is not prescribed and it can be omitted, but the forward-looking ladies of the mode will avidly accept it.

Predisposition was the raison d'etre for the back flare. Spring and summer having witnessed front flares and side flares ad infinitum, it was only natural that the designers would seek new havens for their elaborations, and nothing but the back remained. The flat back had been one of the prime essentials of the old outline and it was almost heresy to dare disturb it, but the couture, acceding to the restlessness of the moment, made the attempt. It has not been a particularly happy one and most of the effects achieved have been awkward and inartistic. Unless the Paris salons are able to incorporate the back flare in a more attractive manner it is doomed to pass quickly into the discard. In any case it is not an essential of the mode and its acceptance is purely an individual matter—it is neither a prescribed nor a proscribed element of the new chic.

Moderate skirt length elaborates decoration and the passing of the mode garcon are three effects with but a single cause. Bizarre extremes are at best the vogue of a single season, and the ever-increasing tide of fashion toward normalcy has accounted for all of these three effects. The abbreviated skirt had reached the kneeline in Paris, and whatever physical freedom it afforded its wearer was more than offset by the accompanying mental discomforts suffered by the cultured woman. Moderation is the keynote to taste, and the acutely abbreviated skirt was its direct antithesis. The present skirt length, while not materially different than last season's, has added points and scallops to convey greater length, and most designers have created the majority of their models to give this lower effect. Just as the tendency of the waistline is to go a little higher, the skirt hem is heeded a little lower, and the smart autumnal maiden, while retaining in general the short skirt, will never let it reach the distressful

Brocaded Velvet Frock Which Follows Line of Figure to Knees.

extremes of last season. Fifteen inches off the ground is about the proper length.

Elaboration and a more feminine atmosphere to the new models obviously go hand in hand. The very boyish bob and an inartistic mannishness affected by some Paris extremists during the summer led many to believe that severe mannishness was to be the guiding spirit of autumn fashions. As has been frequently pointed out, the tendency of the mode in smart circles was and is distinctly toward maturer, saner and more feminine styles, and the severe colf was last summer's only real evidence of mannishness, save among some bizarrists who carried little authority. At any rate the autumn offerings are more frilly than in many seasons and there is every indication that increased elaboration will meet with favor among the minions of the mode. For in the ranks of fashion the eternal feminine is steadily replacing the fleeting feminist.

Patou Uses Fuller Lines.

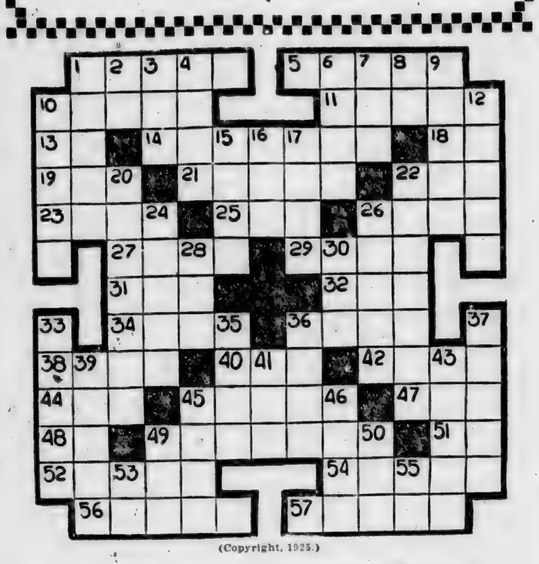
The Patou collection always marks a milestone on the road of fashion. Whenever anything new is to be shown one can be sure of finding the latest interpretation of the novelty in the stately salons of the Rue St. Florentin. This season Patou contents himself with stabilizing the new higher waistline that he introduced in the spring, and even there he temporizingly admits the possibility of other things, for some of his new models have the waistline near the hips, while others raise it so that length of skirt is the main feature on which emphasis is laid.

Both coats and dresses are fuller than before, while jackets are either very long or very short. These, like the wraps, are copiously trimmed with fur which, according to Patou, is the only trimming able to create an effect of richness and comfort in winter time.

Many plain fabrics are used, including the old favorite crepe satin, but the dominating note this winter is silk velvet. There is also a new silk velvet with a straight pile, something like a plush. This velvet falls in a special manner and Jean Patou has retained the exclusivity of the fabric for some months to come, so that models made of it may be considered as characteristic of that house.

Colors are rich and varied. There is, of course, the black, brown and beige that always forms the basis of the winter wardrobe, but much red is used, especially a grenadine shade and a deep corinthian red that has been christened Patou's Corinthian. There are also two new greens, one a yellowish shade, the other a deep moss green, while the gamut of blues has not been neglected

CROSS-WORD PUZZLE



(Copyright, 1925.)

Horizontal.

1—The margins of a watercourse
5—A king whose touch turned everything to gold
10—Any rustic
11—Narrow roads
13—By 14—Earthly
18—A letter in the Hebrew alphabet
19—Part of the foot
21—Hips 22—Anathema
23—Finishes
25—To inspire with reverence
26—Having no hair on the head
27—A particular in an enumeration
29—To give warning
31—A thick, black substance
32—A weapon 34—Spoken
36—A circuit
38—A female horse
40—Native metallic compound
42—Walked
44—An omnibus (slang)
45—To woo 47—Sorrowful
48—A man's name shortened
49—Those who wager
51—A point of the compass
52—An enemy 54—Alleviated
56—Small shells of pastry containing jelly
57—Salamanders

Vertical.

1—A musical conductor's wand
2—Part of the verb "to be"
3—At this time
4—A fastening 6—Ailments
7—A period of light 8—One
9—A leaf or division of the calyx (bot.)
10—Marked with the date
12—Transmits
15—A certain quantity, as of paper
16—The binding custom of the community
17—Sketched
20—Managers of publications
22—Pennants 24—To gaze
28—The force of a blow
29—An epoch 30—Past
33—A clear, light yellow
35—Booty 36—Naught
37—Summed up
39—To examine and adjust, as an account
41—A track worn by a wheel
43—Fertile spots in deserts
45—An individual of a certain racial type
46—A woody plant
49—To keep out 50—Beheld
53—A southern state (abbr.)
55—Street (abbr.)

The solution will appear in next issue.

HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

Statesman Makes Fight on Public Gambling

Senor Adolfo Dickmann, a leading socialist deputy, seeks to suppress horse racing, the national lottery, and all other forms of gambling in Argentina. He has introduced a bill in congress with that end in view. Horse racing in Buenos Aires is maintained by the wealthy and exclusive Jockey club, an important factor in the political and social life of the community. Senor Dickmann asserts that those who really benefit from racing in Argentina are the breeders of the race horse. Such horses, he maintains, are of no economic value, while betting on the races impoverishes the workers who patronize the tracks. Betting last year reached the grand total of $130,000,000. The Argentine lottery, Senor Dickmann holds, is a sop to the poor, and he explodes some archaic theories of the benefits to the state and charitable institutions from the division of the lottery spoils. He presents figures to show that since the lottery was founded in 1896 the Argentine people have paid 1,100,000,000 pesos in trying to win prizes, while less than 125,000,000 pesos have been received by charitable institutions, which, he asserts, are now "devoting their time to caring for deluded persons impoverished by trying to win lottery prizes."

Good Old Mother Earth Likened to Music Box

Underground radio has been heard across the continent. Transmission has been made from underground cables and it is asserted that the earth crust is a more effective medium for sending radio messages than is the air.

The philosophers of old used to believe that the planets and the sun made music as they rolled. They called it the music of the spheres. Once again, as often in the past, fact may outdo fancy if the earth becomes resonant with radio songs and messages. Then indeed it would be a musical sphere, asserts the Minneapolis Journal.

Marvelous as this possibility appears, it is not inconsistent with what is known about radio and the earth. For this old globe is not the thickly solid affair that many of us imagine. Earthquakes cause undulations in the world's structure that travel for miles and are read and interpreted by scientists far distant from the scenes of disturbance. In its mountains and valleys, in the rising and falling of its surface the earth shows that it is not unfriendly to undulation. Instead of being solid and stolid, the earth is in reality plastic and much given to rhythm of various kinds. It lends itself to marvelous transformations and transmutations, such as flower-beauty issuing from muck and mire, heat from rocks and radiant energy from its flaming heart.

Radio messages going through the earth are not more wonderful than these same messages going through the air and through brick and stone walls on the way.

Shelley's Words

His words are as flexible as any words: the rhythm of some modulating air seems to move them into their place without a struggle by the poet, and almost without his knowledge. This is the perfection of true art.—Walter Bagehot.

Not Popular in Practice

Humility is a virtue all preach, none practice; and yet everybody is content to hear.—John Selden.

Those Foreign Diseases

An American physician goes abroad to investigate noted water-cures, and says that when he let it be known he was rich he was speedily invested by diagnosis with all sorts of deadly diseases, with the assurance that the cures plus starchy fees would insure speedy recovery. Well, at that, it is about the best news coming from foreign parts in a long time.—New York Herald-Tribune.

Knowledge and Power

Knowledge is power when applied to purpose, that is, when it is used; for, in and of itself, it is incapable of accomplishing anything. He who uses knowledge wisely is a benefactor to his fellow man.—Grit.

Does No Actual Harm

Giving advice to farmers is a popular diversion and it is perfectly safe because the farmer is too sensible to follow the suggestions.—Miami Herald.

Car Goes Into Ditch Lady Driver is Hurt

Mrs. Emerson L. Brenizer of 201 N. Cass Street, Fort Wayne, was seriously hurt Monday afternoon on the Spencerville road. Rumors are that she attempted to go around a truck and another car was approaching from the south and she did not have time to make the pass, so turned in ahead of the truck and in so doing the car slid and shot across the road, the truck striking the Ford Sedan, crushing the wheels on the right side and turning it over in the ditch. The lady was taken to Dr. Shook's office where her wounds were taken care of. The doctor then took her on to Fort Wayne. The car was ordered moved to the Furnish Garage.

J. E. Foltz and wife spent over Sunday with their parents, Mr. and Mrs. Joseph Cox and Mrs Margaret Foltz, near Continental, Ohio.

WHO SAID

"Every tub must stand upon its own bottom."

THESE are the words of the man who is known to history as the author of the great religious allegory, "Pilgrim's Progress"—John Bunyan. Bunyan was born near Bedford, England, in the year 1628. His father was a tinker by trade, and, as a young man, John Bunyan followed the same vocation. During his youth he served in the great civil war that engulfed his native country and his change of mind which led to deep religious ponderings may be attributed to his experiences as a soldier.

Bunyan returned from the war with a much more serious regard for life than when he had entered in upon the struggle as a carefree young man. He was greatly impressed with the truth and importance of religion, and he shortly joined the Society of Anabaptists at Bedford, where he was soon made a teacher among the sect and achieved considerable reputation as a preacher.

There were, at this time, severe laws against any one who dissented from the established church but these statutes held no terrors for Bunyan. He continued to preach in defiance of them and eventually was apprehended by the authorities and sentenced to serve 12 years in prison. During these years, from 1660 to 1672, he devoted himself almost entirely to religious meditation and to writing. The first part of his celebrated "Pilgrim's Progress" was written in the Bedford jail.

Upon the expiration of his sentence Bunyan was released and became pastor of the community in which his former preachings had resulted in his jailing. As has so often been the case, his jail confinement only served to make him more popular and his preaching services were attended by great numbers and many new converts were secured.

John Bunyan died in the year 1688, while on a visit to London.

OCTOBER

ST. JOE NEWS.

VOL. XXXIX ST. JOE DeKALB COUNTY, INDIANA, THURSDAY OCT. 29, 1925 NO. 43

Obituary

Nellie R Heyman, daughter of Mr. and Mrs. John Benninghoff, was born in Allen county, Indiana, March 16, 1887, and departed this life at her home, 1901 Lawndale Drive, Fort Wayne, Indiana, Oct. 17, 1925, aged 38 years, 7 months and 1 day. On March 18, 1906, she was united in marriage with Arthur F. Heyman and to this union one child, Mary Ellen, was born. At the age of sixteen, she was converted and baptized by the Rev. Albright in the M. P. Church of North Springfield, Allen County, Indiana She was an active member of the Sunday School and being talented in singing and speaking, was sought on many occasions

The greater portion of her time and life was given for her home, her husband and daughter, Mary Ellen to whom she was deeply devoted and where her motherly influence will be sadly missed. She often remarked, "I have two mothers, Mother Benninghoff and Mother Heyman" and each shared equally her love and respect, and though always busy with home cares and ties, she still found time to do for others and gave her untiring efforts wherever sickness or any occasion gave opportunity. She was a member of the Y. W. C. A. and Parent Teacher Association and was interested in any work that carried with it an influence for good

Last February, she became ill and unable to walk, the affliction proving to be carcinoma with little hope of recovery almost from the beginning. For six months she suffered greatly though her indomnitable courage and patience were a wonderful example and every remembrance or act of kindness shown her by her many friends were deeply appreciated.

A soothing thought is the fact that all through her suffering she assured her family of her great faith in a loving Father and her happiness in the anticipation of that home beyond where there is no pain or sorrow and where God in His mercy brings peace and quiet to a tired heart

She leaves her husband, daughter, father, mother, two brothers and a host of relatives and friends

A precious one from us is gone,
A voice we loved is stilled,
A place is vacant in our home,
Which never can be filled.
God in His wisdom has recalled
The boon His love had given,
And though the body slumbers now,
The soul is safe in Heaven.

Card of Thanks

We wish in this manner to express our heartfelt appreciation for the beautiful floral offerings and the many kindnesses shown during our recent bereavement.

Arthur F. Heyman
Mary Ellen Heyman
Mr. and Mrs. John Benninghoff and Family.

Road Bonds Sold Monday

The sale of bonds for four gravel roads in DeKalb county was held Monday, two of which are near St. Joe The Merritt Sechler road bonds sold for $11,900 to Merchants National Bank of Muncie at a premium of $131.30. The Ira Bone bonds sold for $1.900 to the City National Bank, Auburn, at a premium of $10.00.

W. C. T. U. NEWS

Mrs Mary Buchanan will entertain the W. C T. U, Friday afternoon at which time Mrs Mae Miser, state delegate, will give a report of the State Convention held recently at Connersville. Members are urged to be present.

To Make Settlement

All persons knowing themselves to be in debt to the Beams & Co. Store will please call and make settlement as the estate is soon to be closed. 42t3.

John Fretz of Waterloo Dead

Dr. John C. Fretz, of Waterloo, the oldest practicing physician in DeKalb county died Monday morning at 1:15 at his home in that town from heart trouble and complications at the age of 69 years. He was born in DeKalb county and has practiced his profession for 45 years. Burial was made Wednesday afternoon.

LODGE NOTES

The Rebekah Chapter had a pot luck supper and general good time Friday evening at the I O O. F. rooms They were pleasantly surprised when a number of ladies from the Auburn Chapter visited them

Cash paid for false teeth, dental gold, platinum and discarded jewelry. Hoke Smelting & Refining Co, Otsego, Mich.

WHO SAID

"I am not a Virginian but an American."

HAD Patrick Henry lived 50 years later than he did, would we have clung to his assertion that he was a citizen of the United States, rather than of Virginia?

It was on this question of whether the citizens of the United States were citizens of the nation or of the state in which they lived that the Civil war was fought and finally decided in favor of those holding to the theory here enunciated by Patrick Henry.

Of course, Patrick Henry lived before the real development of the nation into states. They were but loosely organized colonies before the Revolutionary war and their structure had not changed greatly before death claimed the renowned orator. Had Patrick Henry lived later in the history of his country it is quite likely that his intense love for Virginia would have caused him to alter the declaration quoted above.

Patrick Henry was born in Virginia in 1736. He was given a good education and in 1760 he was admitted to the bar of his native state. Henry's ability soon became evident. No other public speaker of his time could surpass him in his hold upon his audience and his impassioned addresses played a prominent part in lining up the colonists against the British. He was one of the most bitter opponents of the Stamp Act and it was his repeated speeches against it that made its enforcement practically impossible.

The one declaration best remembered of this orator is the famous one: "I know not what course others may take; but as for me give me liberty or give me death."

Patrick Henry died in 1799.—Wayne D. McMurray.

Radio Carnival, Hallowe'en Entertainment

At Newville school house, Friday evening, Oct. 30. Forty-five minute program beginning at 7 o'clock and then the F U. N.

We are very glad to announce that we have secured several of the leading broad casting stations of the world to favor us with the best entertainment that lies within their power, such stations as: FTC, TYL, SYST, DFLP, OSP, GAG, and GAWK. Instead of girls bringing boxes, they enter their names at Station GAG where the names and prices are recorded under numbers.

The boys secure these names by a way to be made known that evening. The price paid for name entitles couple to plate suppers, no two suppers to be more than $1.50 or less than 50c. One free supper with most beautiful lady.

Plate supper for all those not wishing to be entertained by Station GAG.

At 10:30 all Stations sign off while Station PPG entertains the young people with a program for their special benefit.

Your hearty cooperation is solicited. Teachers, Glen Hart, Hazel Kline

St. Joe Elects Officers Tuesday

On next Tuesday, the voters of St. Joe, men and women. will be called upon to perform their patriotic duty, that of assisting in selecting the officers of their town for the next two years. Like all elections, there will be some who will not have sufficient interest to cast their ballot, but will take advantage of opportunities to condemn the actions of the officials, later on. Let every one vote. It is the only way you can express your wishes.

The Spanish-American war veterans are planning on forming an organization and November 4 has been selected as date. All veterans of the county are asked to be present. This county furnished some 30 volunteers, when the call was made.

AN ABBREVIATED STORY

THE LEAD PENCIL

TWO days ago I was a beautiful, brown pencil, hale and hearty and of full stature, with my name, "Write-easy, No. 6," printed on my sleek side in letters of purest gold. I hadn't a single care in the world, and my heart was full of love for all human beings—for was it not to humans that I owed my lovely shape, my long sturdy bar of unbroken lead and my soft, firm wood?

Today I am a miserable abandoned stump without even a point. My gold name has been cruelly hacked off, even to the capital W.

For a woman tried to sharpen me. If I had been wise I would have struggled out of her hands as soon as she borrowed her husband's penknife—struggled out of her hands and slipped down a crack to an eternal dark oblivion that at least would not have robbed me of my shape.

At the first inch of wood and lead that she hacked off, she said: "Something must be the matter with the wood."

At the second inch she said: "Something must be the matter with the lead."

At the third inch she said: "Something must be the matter with the knife."

At that I fainted from pain and humiliation, and awoke a scraggy cast-off stump of my former self.

And a confirmed woman hater.

Coal! --Coal-- Coal!

Now is the time to lay in your coal. We have always tried to give you the best advise as to best time to buy and we now firmly believe this is the time to get busy and prepare for the winter.

Feed

Mr. Hog Raiser, we have a good line of feeds on hand, also car of ear and shelled corn. If you need any give us a call.

Grain

We are paying highest market prices for all grains and will be pleased to have you bring us your grain.

The Vanishing Men

By RICHARD WASHBURN CHILD

(W. N. U. service)

(Copyright by E. P. Dutton & Co.)

CHAPTER XVI

—13—

Brena Selcosa raised her head from Colby Pennington's desk and stared at Peter's lawyer with an expression of terror in her parted lips, in her eyes, in her white hands, held out as if to ward away a hideous idea.

"You let him go!" she exclaimed in a breaking shaken voice.

"Let him go?" asked the astounded Colby. "Why shouldn't he go? Is there any reason—"

It was evident to Brena that this man had not been in Peter's confidence; he could not know that a call like this had come to the other two men and that Peter might be the third to go. She interrupted him with a gesture of impatience, saying, "He left no word—no address—nothing with which to trace him?"

"Not with me."

Leaning forward he pressed a pearl button on his desk, then seized a cigar, nipped the end off with his large white teeth, looked again at Brena, lovely in spite of her grief and terror, and threw it back into the box. Usually Pennington was the master of any meeting with a stranger, but now something of that immortal personality which was hers, something in her bearing, something in her eyes, something in that calm of distant mountains that she had regained, held Colby silent until the door of his office opened and the chief clerk stepped in from the cork composition flooring outside onto the noiseless padded green carpeting inside.

"Fred!"

"Yes, sir."

"Did Mr. DeWolfe say where he was going—did he leave any word with us?"

"Yes, sir."

"What?"

"Why, if I'm not mistaken, Mr. Pennington, he said that he was going to New Orleans, Fort Worth, and a place called Kremlin Wells, Texas. He was to be there— Excuse me."

The chief clerk picked up from the desk the bronze-framed calendar and moved his pencil on it. He said, "He was to be there on the 24th, but gave no address there. The twenty-fourth is four days from now."

"Kremlin Wells, Texas? I never heard of such a place," said Pennington scowling after the manner of one who dislikes any fact not within the swing of his own radius.

"Nor had I. I looked it up. Not in the geography. But it's in the railroad guide—a way station, probably with a water tank, on the Texas Central and New Mexico—on the desert near the border between the two states, Mr. Pennington. That was all that he said. He left some papers to put in our safe and asked me to open them and attend to them if he was not back in three weeks."

"Thank you," said Pennington. "That's all, Fred."

"Wait!"

Brena had spoken in a low tone, but

"You Let Him Go?" She Exclaimed in a Breaking, Shaken Voice.

with that authority sometimes heard in her voice.

The chief clerk stopped as if her word had been a bullet in his lungs.

"Will you help me?" she said to Peter's lawyer. "I assure you that he would wish it."

Colby looked at her as one would look at a new model of some automobile; at last he nodded.

"I want to know the first train leaving New York for St. Louis and Texas," she said. "I want some one to go for a ticket and reservations to Kremlin Wells or the nearest point. I want a taxicab. I want you to do everything in your power to get me to Kremlin Wells before the twenty-fourth. It must be done!"

Pennington stared at her.

"Very unusual," he muttered. "But I said we'd do it, Miss Selcosa."

Partly because of the assistance of his office force, Brena was on her way to St. Louis without even hand baggage, but within an hour; partly because of it she was on a train that rolled into Dallas through the railroad yards with the shabby wooden settlements, seen again from her berth through the slit of window beneath the curtain as she raised her weight on one elbow. It had not changed completely since she had seen it on her return after Jim Hennepin had disappeared. This morning began the 23d of the month; she had the sense of racing to Kremlin Wells in a contest with death.

At the final junction point of her long journey, tired, nerve-wracked by unremitting heat of night and day and by the strain of suspense, she found it necessary to wait under a train shed, where in the waiting-room or on the platform the mid-day humidity created a smothering steam filled with the gases belched from locomotive stacks and the ear-smashing explosions from engine exhausts and the impact of car couplers. The train for the West was three hours late. She could not leave the station; she walked back and forth, her weary eyes held open wide by will, her jaw firm. And dogging every step she took was the fear that she would be too late, that when daylight came on the twenty-fourth she would not yet be at her destination.

The conductor on the westbound mail was not of the same mind. Beautiful young women traveling alone do not alight every day in "holes in the desert" as he called the Wells; he considered it less desirable to set her down some time in the dark hour between three and four. He said the place consisted of a siding, a water tank, a general store, five houses, two saloons where roulette wheels were going during the sheep herders' season, an adobe ruin and a hotel with three rooms above a bar.

"I am sure it will be all right," said Brena. "But even if it were not I would have to leave this train there."

At about three the porter woke her. There were ten minutes of dressing, and then she heard the whine of the brakes, and with muddy, sleep-thickened senses, with the ache of stiff bones and muscles and nerves after the heat, the inadequate sleep and the strain, she felt out from the lower step with one foot into the bottomless depths of blackness for the boards of the platform.

When the soft night breeze that flowed in a steady stream from the southwest had blown the daze away as if it were a dust that had settled on her, the train had been swallowed in the dark.

She could hear the splash of water leaking from the bottom of the railroad tank and occasionally the heat lightning on the horizon covered the desert toward the south with the white flare of a photographer's flashlight powder, disclosing the vast expanse broken by black patches of desert vegetation. But her attention was now held by a dim swinging lantern that came toward her out of the black plush of the dark, as if it came with volition and movement of its own.

When this light came close to her, she felt an impulse to leap back into the dark as one who is desperate might leap into the depths of black waters; when the light was raised toward her face so that its possessor might see her, she wished that she had fled.

The face on the other side of the light was the essence of brutality—the black pupils in bloodshot eyes, the sun-baked skin drawn taut over immense protruding cheek bones, the thin wrinkled upper lip over a full red drooping under lip, the broad, wide nostrils, the thick gleaming muscular neck of the halfbreed Mexican and Indian.

Brena closed her fingers under cover of the dark and made the pressure of nails in her own palm summon her will to put her face nearer his and to speak before he could speak, so that she might escape from all manner of being on the defensive.

She said in a firm voice, "I came to find some one."

The other grunted incredulously.

"He came here within a day or two."

The Mexican raised one dark hand and pulled the long lobe of one ear; his expression was crafty. He said, "Maybe so, quien sabe?"

"At the hotel," she suggested.

The man with the lantern raised it again to look at her; he was silent, and then suddenly he grinned.

"Oh, at hotel, eh? Ha! I know heem. Certain. At the hotel. He come by big automobile."

"Peter DeWolfe?"

The other shook his head; he did not know. He said in a soothing, coddling voice, "S'all ri', missy. You come, eh?" He beckoned with a finger.

Brena nodded and followed him as he walked on before, the lantern swinging at his knees, the shadows of his dark short bowed legs scissoring on the gravel and the noncommittal dark beyond in every direction squirming and alive with black maggots of fear.

Suddenly the lantern illumined an entrance cut in a high adobe wall. The man, turning around, said in his petting voice, "Come." Brena stepped through into an enclosure without roof; the stars of the sky shone down with their little white needles of light. The lantern, however, now threw its light upon a little two-story wooden building within the old walls. This structure was dark below except for the lantern's light flung from the glass; its faint two squares of windows above were black on either side of a doorway reached by narrow rickety wooden stairs built on the exterior of the house.

"Up," commanded the Mexican with his hand on the rail.

Brena hesitated.

"I take you to heem."

She began to climb, gripping the hand-polished rail to steady her nerves by the force of her own arm muscles.

"In! This my house. I keep for Mister Glaub. In!"

She passed by him as he flattened himself against the door jamb.

Four closed doors, unpainted and covered with pencilled signatures, dates, arithmetic, and scrawled faces and verses, almost filled the walls of the narrow seven feet of square wall. With a grunt, like a pig's, the Mexican opened one of these doors and plucked at Brena's elbow.

"Look! What I say? This heem?"

The lantern's circle of light rose and widened as he held it higher until it

"Look! What I Say? This Heem?"

covered a cot on which a waking sleeper was pushing himself up on one arm and reaching under a pillow with the other hand.

"A lady," the Mexican said, and putting the lantern on the bare boards, he slid out and closed the door.

The man on the cot sprang up, raised the lantern, and at the end of a high exclamation he gasped for another breath and ejaculated, "Brena!"

"Yes, Peter. Thank God, Peter, I came in time."

"Time—time for what? I'm all right, dear. I cabled you to wait."

"I'd started, Peter. I didn't get it."

"They told you in New York?"

"Yes, Peter, they said you'd had a call."

"I didn't say so, dear. I said I had business here."

"I don't care—you forget. You are the third—I couldn't stand it, Peter. It was you—that's different."

"You're tired out." He held the lantern higher again.

"No, I'm not, Peter," she said, with a brisk unconvincing lie. "I want you to be glad I came."

He dropped the lantern; it went out. He put his arms around her and bent her head close to his shoulder as he patted her hair with the open palm of his hand. He said, "Glad? Me? Glad? Brena! I can't say it, dear. The cup runs over at the brim!"

"I've been in mortal fear, Peter," she whispered and shivered in his arms. "I thought I had sent you away to your end—the thing that took the others."

"No," said he.

"Can you tell, Peter?"

"I can't tell—sure. I can guess. I guess I'm going to fix everything. If not, there's something too big—too ghastly—"

"But if you never came back to me—if anything—" She stopped. "Why Peter, I flung myself down sometimes. I prayed to be forgiven for ever having spoken to you. I begged relief from the hideous idea that I had let you start at all."

"Look here," he said severely. "Did you send me that warning—to the steamer?"

She was silent.

"Answer."

"Yes. I thought I must stop you, dear."

"Bad business," he said. "Look here, Brena. For the first time in my life I've been figuring what a real partnership really means. And it can't exist without perfect unbroken truth—playing the game, not separately, but together—all the time—an unbroken record."

She said, "I know. There isn't much to say. My fear. My conscience. And it was you who were going to take the risk. Not anybody else. Peter—and I loved you. I took the paper from a package from the chemist's shop. I wrote."

"It won't do," he said harshly. "It is a bad spot on the fruit."

For a long time she sat on the edge of his cot without a word. At last, "Peter."

"Yes."

"Tell me, Peter. There must have been times when you wondered about me—doubted me—questioned me. Did you keep faith?"

He waited, but his answer was clear. It was not only an answer to her question; in his voice there was more—an understanding of the truth that right and wrong are not readily divided with a high impassable wall between them. There is a teetering, and that which counts is the spirit of the game, that leads one to put weight most often on the right end. All this he said to her in the one word: "No!"

After a moment her hand came through the dark into his.

"I think we are all right, Peter," she said. "If we can ever have each other, dear—forever—I think we could—"

"Do what?"

"Work out something pretty fine."

"We will," he said. "I'm almost at the point where I score, Brena. I've brought a high-powered car here. Two hundred-odd miles into this hell of desert. And tomorrow. I go tomorrow."

He struck a match and relit the lantern.

"Tell me, Peter," she said, brushing the red-gold hair back from her forehead.

"I did tell you. I said I had a theory—a theory about where they went—Hennepin first—and Parmalee. If I am not right, heaven help us! I've not been afraid yet—not in my real self. If I'm right I'll laugh at myself for toting a gun around and for a lot of fool ideas I've had. But if I'm wrong now, I'd be afraid. I'm no coward, but I'd squirm with fear!"

Her eyes were full of a troubled expression.

"But you don't tell me, Peter."

"I can't."

"Why not?"

"Because if I was wrong it would always appear to you that I had been the inventor of injustice. Let me test your faith in me, Brena. Give me three days more."

"Yes, but when you ride off into the desert—to danger, you said, provided you were wrong—I'm going too."

"You can't."

"Yes, I am going with you, Peter."

"It might be too hideous."

"I am going."

The strange authority with which she sometimes spoke was now in her voice and in her eyes; it was as if she were speaking, not out of herself alone, but were one who voiced a decree of those who had willed an inexorable end.

"Let me show you then where we are going," he said with his lips pressed together. "Let me show you a map. Let me tell you how we shall have to steer our way over a trailless waste by compass as if we were at sea! It's a country of terrible distances and heat and thirst. If the car breaks down they'd never hear of us."

"We'd be out there for years," she said in the voice of one who in a great happiness feels sleep pulling down the eyelids, drawing its mists across the mind. "We'd have our hands—like this—together. But very bony, I suppose. I'd rather—do that, Peter—than—not have—each other—"

He picked her up in his arms. He felt her limp weight pulling at his shoulders. He heard her whispering, "I'm not ill, Peter. I'm just tired. And I don't have to pretend with you, do I?" He felt her warm breath.

He put her down at full length on the cot and sitting on the floor beside her he moved his fingertips across her white forehead. Her profile of features, of body, of drapery, made him think of the queens and saints carved in marble on the tops of sarcophagi in ancient abbeys; lying in this sordid little room, her face turned toward the smoky ceiling, nevertheless she had their calm, their suggestion of belonging to great emotions, a season of great deeds and to some grand continuity. Brena had been carved by a great sculptor, and the limp hand that still rested in sleep upon his bare neck was warm with the promise of living expectancies.

CHAPTER XVII

Brena, who had slept long and restfully in spite of the stinging dry heat, had awakened before the sun had gone down to find Peter was attending to the last details of equipping the high-powered car that he had bought in El Paso. It was below the window in the old courtyard with the crumbling adobe wall.

"Hello," he had said, looking up. "You just missed seeing the population of this town. The entire ten were here. They don't know we're going to strike into the desert instead of going eastward."

He had held up his fingers to count on them. "We're all provisioned now—from the general store—gasoline cans, water in demijohns, matches, canned beans and other things, a bottle of olives, guaranteed very old, and one paper napkin. I say—why do you ever do your hair up at all? It's rather wonderful, falling all around like that."

"I didn't take it down."

"No, I did. I ran it through my fingers like a miser with his gold—and his untarnished copper threads, if a miser has them too. Why not braid it? We're going where there are no fashions, Brena."

"Today?"

"Tonight. There'll be a white moon as big as a plate for hours. We'll make a hundred miles at least through the depression that runs along the bed of some prehistoric torrent to the northwest. Thanks to old Father Carlos, the hard-headed Jesuit, it's on the map. Easy to follow."

When the purple crepe of evening had been spread over the baking sands and the stars had been set out in their infinite careless pattern in the high desert sky, the car, with opened muffler, turned her nose out of the trail that followed the line of the railroad and began to kick the sand behind as if she were a hound. It was as if she were leaving forever the sight and memory of mankind.

This country is without mercy to living things. After thirty miles of hard pulling through the bare loose-surfaced plain, tossed gently about as if they were riding in a motorboat over the long rollers of the sea, they saw before them on the crest of a sand wave a running pack of coyotes, who came up suddenly, black against the moonlight like dog fish lifted into sight on a wave. But after that all vegetation and even the cacti which stood like trained seals, their flappers held out as if ready to begin a dance, became sparse, and the emptiness was that of the frontier of death itself.

Peter turned to look at Brena. Her face, illumined by the moon, was lifted a little; with the hair blown back by the hot wind, her eyes glistened like those of one who rides toward battle in a calm spirit. She felt, perhaps, his gaze, and, turning, smiled. She wondered why he had been unwilling to tell her why they went, what he sought, the facts he had found.

"Will you tell me—afterward?" she asked.

"Yes—if I win," he answered. "I will tell you then. Before that I've no particular right to do it—not till I'm sure. The thing is too tremendous!"

When the moon had reached the bottom of the bowl of the sky, DeWolfe looked again at his speedometer.

"Did you notice that our searchlight no longer picks up little insects and turns them into flashes of silver?" he asked.

"Yes."

He stopped the car to fill the radiator.

"We are coming into the most arid land in the world, where no rain falls and there is no dew. It is the country of eternal stillness. There is no life; not even the insects exist here. There is no motion. There is no sound. Listen!"

Brena looked about at the great flat disk of the desert as she stood with her hand on Peter's shoulder; it was like a world of hardened concrete, without flexibility, without a motion. She listened and heard only her heart and the throb of silence that comes only in places of utter stillness.

"I'm glad I'm with you, Peter," she said. "There is a threat here, isn't there?"

He nodded. "We've been seventy-five miles. To a man on foot without water that would be death—a horrible death with the sand dragging at the feet—just like the flies one sees trying to pull their legs along fly paper, with the heat burning all moisture out of the body, with the silence and the stillness inviting him to madness, and his aching limbs gradually turning his footpath around and around in smaller circles to a center of death."

Peter had driven his car over the great flat disk, scarred with irregularity, but nevertheless like a talking machine record with its tiny impressions. The hours had called for endurance of smarting eyes that had stared so long for gullies or chasms, and of aching arm muscles that had held the twists and tugs of the front wheels. He allowed the car to come to a stop and shut off the engine.

"Both of us need a rest and water," he said to Brena. "And you need breakfast."

(TO BE CONTINUED.)

How Cannon Are Spiked

In former times when the old-fashioned type of cannon was used the guns were disabled by driving an iron spike into the opening at the breech through which fire was communicated to the powder. This was called "spiking" the cannon. It was done when it was necessary to leave the guns behind, to prevent their immediate use by the enemy. Such disablement was usually only temporary. The phrase, however, is retained in modern military usage. Spiking a cannon nowadays means breaking or carrying away part of the breech mechanism, making it impossible to use the gun without considerable repair.—Exhange.

Why That Bad Back?

Is backache keeping you upset? Feel all tired out—so nervous and dispirited you can hardly keep going? Then look to your kidneys! Your kidneys rid the body of poisonous waste. But if they lag, impurities accumulate and poison the whole system. Then one is apt to suffer backache, stabbing pains, headaches, dizziness and other annoying kidney irregularities. If your kidneys are sluggish, help them with a diuretic. Use *Doan's Pills*. They are praised the world over. *Ask your neighbor!*

An Ohio Case

Mrs. John Park, 114 Jackson Street, Port Clinton, Ohio, says: "A cold settled on my kidneys. I also had backaches. My back was lame and weak. Severe dizzy spells came on at times and I had to lie down. Two boxes of Doan's Pills cured the trouble. My back has been free from pain and I got rid of the dizzy spells."

DOAN'S PILLS 60c

STIMULANT DIURETIC TO THE KIDNEYS

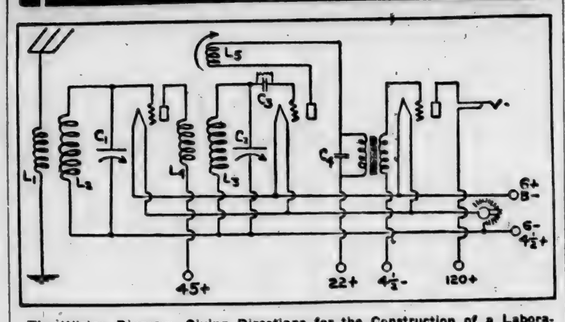
RADIO



The Wiring Diagram, Giving Directions for the Construction of a Laboratory Type Three-Tube Receiver.

By R. C. HITCHCOCK, in New York Herald-Tribune.

Three-tube sets are very popular today; a three-tube set may be said to occupy the middle position between inexpensive outfits, as, for instance, neutrodynes and superheterodynes. One of the reasons for the popularity of the three-tube set is its reasonable cost, and another is that most three-tube sets will operate a loud speaker. To do this the ordinary three-tube set uses a regenerative detector and two audio amplifiers. A more recent tendency, however, is toward radio-frequency amplifiers. The primary cause for this tendency is that there is no troublesome regenerative howl spread throughout the neighborhood of the receiving set, and a secondary cause is the theoretical knowledge that greater distance is possible with a radio than with an audio stage of amplification.

To be perfectly fair, it must be admitted that practical tests seem to show that audio amplification gives greater volume on the nearer stations but will not bring in the far ones; while on the other hand radio amplification gives consistent clearness and distance. The main difficulty with a one-step radio-frequency amplifier is to get power enough to operate a loud speaker with only two other tubes, after hearing the distant station. By using a suitable audio transformer it is possible to get satisfactory loud-speaker volume on the nearer stations with one stage of audio amplification, though it often seems to be rather weak on other stations. The greatest advantage is that much less noise will come through a set which is equipped with a radio amplifier, and at the same time the distance is undeniably greater. If clear reception is wanted at all times, the loud speaker should be used for the nearest stations, and phones for distance; this is a good type of three-tube set to build. Of course, another tube may be added later, but the main part of the set remains unaltered. The following description is that of the three-tube set. This set, then, uses a radio amplifier for distance, a regenerative detector for maximum volume from the detector, and a six-to-one high-quality audio transformer for loud-speaker operation.

Eliminates Interference.

Having the radio amplifier connected to the antenna circuit eliminates the troublesome local interference which is associated with most regenerative receivers. A further improvement over the single regenerative set is noticed in regard to the amount of static received when a radio amplifier is used. This may be explained by saying that there are two separate tuned circuits; first the radio amplifier; and second, the detector circuit. Static, a more or less untuned ether disturbance, is forced to travel through two tuned circuits before being audible, and a great deal of it is thereby filtered out, because tuned circuits respond poorly to waves to which they are not tuned. It is distinctly noticeable that static is less bothersome with this set than with a regular regenerative detector.

Regeneration is used on nearly all stations but some local stations come in with such volume that regeneration is not needed, and this control is then merely left unused—or the regeneration dial may be rotated backward so as to oppose the field of the coil from which it feeds, thereby making a smooth volume control for nearby powerful stations.

The set mounted on a board, which in addition to being less expensive, eliminates the dielectric losses of a long panel and its inclosing cabinet. Bare tinned copper wire is used for wiring—the tin protects the wire from oxidation and corrosion which eventually make poor connections of bare copper wire. As the wire is bare it is air insulated, and this reduces the dielectric losses which are always present with covered wires. The "A" battery leads, not carrying critical radio currents, are heavy rubber-covered stranded wires tacked down to the board out of the way.

The individual panels on which the condensers and other instruments are fastened are "L" sections cut from old storage-battery containers. These containers are of hard rubber, and make excellent panel material. Cut them with an old wood saw, the coarse teeth make a better-looking job than if a hacksaw is used. In finishing, the edges should be squared with a file, and the sides smoothed with fine sandpaper, finally polishing with oil.

The wiring diagram shows the three tubes used in parallel, so that they are run from a single six-ohm rheostat. This set uses the regular 6-volt (storage battery) tubes. The type 200 detector is a very sensitive tube, and the 201A amplifiers are among the best on the market at present. Clarity is secured by using only 45 volts on the radio amplifier, and the loud speaker power is obtained by loading the audio tube to its full capacity—as much as 120 volts of "B" battery may safely be used with a corresponding "C" battery of proper size; for 120 volts of "B" use a 4½-volt "C" battery.

To Add Fourth Tube.

As already mentioned, this set was designed mainly for clarity on all stations using headphones. If loud-speaker volume is wanted for all stations another audio amplifier can be added. The transformer should have a lower ratio than the one suggested for the first audio stage—a four to one is a good ratio for the second audio amplifier. By the addition of this audio amplifier loud speaker operation should be possible at all times. The separate working of all tubes tends to make it easier to operate than a reflexed four-tube set.

No provision was made on the board for a meter, but the use of either a voltmeter or ammeter is strongly recommended. The detector tube is especially critical, and it will be most sensitive when five volts are supplied to it. If a 200-tube is used as suggested, experiment with the "B" battery voltage; sometimes a lower value may be better than 22½. The writer had one new 200-tube that became paralyzed with any voltage over 18, and worked best at 10½ volts. After this tube had been in use for several months the gas content changed, and an increased output of satisfactory quality could be obtained by using 19½ volts. To be sure the correct "B" detector voltage is being used, tune in on some station and try several "B" values on that one station—retuning if necessary each time a change is made—and use the "B" voltage that seems best.

Winding the Coils.

Four of the five coils are wound in the well-known "basket" type, around 11 spikes set evenly spaced on a 3¼-inch circle. Two coils of 60 turns used with low loss .00035 mfd. condensers form the two main tuning units. An untuned antenna circuit coil of 36 turns is wound in the same fashion, and a plate coil of 20 turns feeds the radio energy into the detector tube circuit. If a long antenna is used, it may prove advisable to use an antenna coil of 15 turns. A complete list of coils and condensers, lettered the same as the wiring diagram, together with other apparatus, is given below:

Coil and circuit	Turns, wire, wind'g
L1 Antenna	20 .20 DSC Basket
L2 Radio ampl. grid	60 .20 DSC Basket
L3 Detector grid	60 .20 DSC Basket
L4 Radio ampl. plate	20 .20 DSC Basket
L5 Tickler	40 .20 DSC 2⅛" th.

Condens'r & circuit.	Kind & capacity
C1 Rad. ampl. t'n'g.	Cardwell .00035 mfd.
C2 Detector tun'g	Cardwell .00035 mfd.
C3 Grid	Mica fixed .00025 mfd.
C4 Bypass	Mica fixed .0001 mfd.

Other Apparatus		
Audio transf.	6:1 ratio	Gen. radio
Grid leak	2.5 megohms	
Rheostat	6 ohms	
Sockets	Porcelain	Hvy. springs

Useful Equipment for Fans Who Build Sets

Amateurs who build and repair sets will find the following tools and supplies helpful in the workshop: Long-nosed pliers, short-nosed pliers, long screwdriver and a small one such as jewelers use, flashlight, soldering iron, wrenches for tightening nuts and an assortment of brass machine screws and nuts. A few small spools of magnet wire of 20 and 18 guage, and a supply of spaghetti insulating tubing are valuable parts of the kit. A few testing instruments also are needed, including a voltmeter for testing the "A" and "B" batteries, and also a hydrometer, for testing the storage battery fluid.

Disconnect Battery to Prevent Short Circuit

The instruction sheets which accompany many types of chargers for use on storage "A" and "B" batteries direct that the battery be disconnected from the receiving set while the charger is in use. This is because there is a chance that a short circuit may occur through the grounded circuits of the receiver. The antenna circuit is, of course, insulated from the ground and if you connect a .5 mfd. condenser in series with the ground lead, your whole set will be insulated so that you will not have to disconnect the batteries while you are charging them. The condenser will not affect your reception.

The Old Standby in a New Dress

The New Package

—the same dependable remedy that over a period of more than fifty years has been found so reliable in the treatment of catarrh and diseases of catarrhal nature.

The outside of the package only has been altered. To facilitate packing and reduce breakage in shipping, the paper wrapper which has identified the Pe-ru-na bottle for many years has been displaced by a substantial pasteboard carton.

Pe-ru-na cannot be made any better. Three generations of users testify that Pe-ru-na is the best remedy in the world for catarrh and diseases of catarrhal origin.

The remedy our fathers and grandfathers used with so much satisfaction is still the standby for the ills of everyday in thousands of American homes.

PE-RU-NA

The Original and Reliable Remedy for Catarrh

Sold Everywhere Tablets or Liquid

The Nights were Torment

Now, thanks to Tanlac, Mrs. Bradley "really and truly" feels like a brand new woman!

Mrs. M. J. Bradley had come to the point where she could scarcely do her housework. Two years of suffering from indigestion had shattered her health. What little she ate caused stomach fermentation, gas bloating and pain. She lay awake through the long hours of the night and was tired out through the day.*

"That four bottles of Tanlac should correct my troubles when all other attempts had failed makes it seem altogether wonderful to me. Now I enjoy a fine appetite, good digestion and really and truly feel like a new woman. It is the ideal tonic."

*Authentic statement; address on request.

* * *

You don't have to wait long to see the results from Tanlac. That's the wonderful thing about this great tonic. It works fast.

Like a flash it goes to the seat of trouble. It cleans the blood and drives out the poisons that are tearing down your health. It tones up the stomach and aids digestion—gives you a real appetite for wholesome food.

Don't drag on from day to day putting off the time of reckoning. Start taking Tanlac this very day. Your druggist can supply you.

NOTE: For Constipation, take Tanlac Vegetable Pills, Nature's own harmless laxative.

TANLAC
FOR YOUR HEALTH

Submarine Cables

The submarine cables that supply Penang, Straits Settlements, with current from the new power station at Prai, are the longest ever manufactured in one length, each being four and one-half miles long.

Phones in Esthonia

Reval, Esthonia, is gradually adopting the telephone, 600 instruments having been installed in the last year, and a modern exchange with 10,000 lines will soon be installed at a cost of $400,000.

Children Cry for

Fletcher's **CASTORIA**

MOTHER:— Fletcher's Castoria is especially prepared to relieve Infants in arms and Children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving natural sleep.

To avoid imitations, always look for the signature of Chas. H. Fletcher

Harmless—No Opiates. Physicians everywhere recommend it.

HOW

MOON CAME INTO BEING, AS A SCIENTIST THINKS.— The earth is the parent of the moon in more than a poetic sense, in the opinion of Dr. R. H. Rastall, lecturer in economic geology at the University of Cambridge, who recently announced a theory that our satellite is made of material that was once part of the earth's crust.

Doctor Rastall's theory, however, differs from that of Sir George Darwin and others who have previously made similar suggestions, for he thinks that a layer of the earth's crust, about 41 miles thick and covering about two-thirds of its total area, was peeled off by the attraction of the sun. This tidal action of the sun was effective while the crust was still in a plastic state, and the moon's own gravitational attraction caused it to roll up into a ball of the form that we now see in the sky. The crustal area left on the earth formed the continents.

This theory also accounts for the fact that, while, according to generally accepted ideas, masses of lighter density such as make up the earthly continents should cover the entire surface of the globe, they actually cover only about a third, the missing two-thirds consisting of the moon. Measurements of the moon's density by its effect on the earth show that it is about three and a half times as heavy as an equal volume of water. This is more dense than the average for the continental land masses, but Doctor Rastall assumes that at the time of the disruption some of the heavier underlying material was also torn away.

The new theory also fits in with the ideas recently set forth by a German geologist, Prof. Alfred Wengener, who believes the American continent was originally united with Europe and Africa, and that it floated away to its present place. This would not have been possible, so long as the entire earth was covered with such a crust, but after the moon had been torn away it was possible for the continents to separate from their long embrace.

How Patrol Service Saves Ships From Ice

In 1914 the leading maritime nations of the world came to an agreement that a patrol service to keep a lookout for icebergs should be set up. This conference was the outcome of the sinking of the Titanic with great loss of life after striking an iceberg on the night of April 14, 1912. The United States government was asked to undertake the responsibility of the ice patrol in the North Atlantic.

For about four months each year, when the ice is breaking up into gigantic, treacherous masses, the patrol must be maintained. It begins usually in March, lasting until the end of June. The usual procedure is for the patrol cutters, upon sighting a berg, to allow themselves to drift with the white mass. For days they may have to keep this position, and the monotony is only relieved when the berg finally dissolves or is no longer dangerous. The patrol boats are each fitted with a 2,000-watt telephone and telegraph transmitter, and all the time they are with the icebergs they send out messages of warning at regular intervals.

Both the Tampa and the Medoc, the principal ships of the patrol, are driven by electricity and carry every kind of measuring instrument, so that they can discover the exact size of each berg they encounter.

How Fast Light Travels

Light travels with a speed of about 186,300 miles a second. Scientists have known this fact for years. But Dr. A. A. Michelson, president of the National Academy of Science, who is one of the greatest practical physicists in the world, is not satisfied with this figure. He thinks it is about 20 miles short of absolute accuracy.

If Doctor Michelson's experiments are successful this error will be reduced to as low as one mile per second, a figure accurate enough for practically all scientific purposes. Although Doctor Michelson is confined to his bed in Pasadena, Cal., as the result of an operation several months ago, he is continuing his experiments with the aid of his assistant, Fred Pearson. A reflection mirror on Mt. Baldy, 22 miles from Mt. Wilson, is being used for the light experiments.—Exchange.

How Painted "Light" Helps

"Painting" buildings with light is an inexpensive and effective method invented by engineers in Fresno, Cal., says Popular Science Monthly. The walls are made of cream-tinted terra-cotta and pressed brick, and flood-lighted with colors such as soft magenta, ruby or emerald.

How Long Fish Live

A Swiss naturalist, Konrad Yesner, has recorded the history of a pike two hundred and sixty-seven years old. It had spent its entire existence as a prisoner in a fish pond. Carp are known to live for many years, growing two or three inches a year.

Pauline Starke

This petite "movie" star was born in Joplin, Mo. She was educated in Kansas City, and lived there until several years ago when her family moved to Los Angeles. Miss Starke has been seen in many pictures that have met general approval. This is one of her latest pictures.

"What's in a Name?"

By MILDRED MARSHALL

Facts about your name; its history; meaning; whence it was derived; significance; your lucky day, lucky jewel

SELMA

IF FAIR names should be given to fair women, Selma is a favorite in feminine nomenclature. It is an old Celtic name, meaning "fair," and named the beautiful daughters of Ireland and Scotland for generation after generation. Finally it spread over the border into England and was straightway adopted as a national favorite.

The Bible records a Selmai, which may be taken as identical with Selma, and the name is thus given a religious significance. The Dutch also have a Selmai which is generally regarded as the equivalent of Selma. Otherwise, there is little history connected with the name, which persisted because its sound, as well as its significance, was fair.

In this country, the South adopted Selma; probably because of its association with feminine beauty and equally because its vowels are well suited to the soft, slurring pronunciation of Dixie. Many lovely Southerners, toasts of Virginia and Carolina counties, have borne the name and more than one state has bestowed the name on one of its towns or smaller cities.

It is fitting that the pearl, symbol of beauty and charm, should be selma's talismanic gem. It promises her great fascination and the power of attracting admirers. Monday is her lucky day and 5 her lucky number.

A LINE O' CHEER

By John Kendrick Bangs

THE KINDLY PHILOSOPHER

IF I CAN'T say some good about a feller
I'm goin' to keep my mouth shut good and tight,
And if I know for certain that he's yeller
I'm goin' to try with all my main and might
To dig down deep into the inner Him
To see if there ain't somethin' to unfold
To show that all his yellerness so grim
Is but the sign of streaks of hidden gold.

(© by McClure Newspaper Syndicate.)

WHY

Limit to Airplane Speed Can Be Fixed

What will be the limit of man's speed through the air? According to Science and Invention, experts and engineers have tried to estimate this limit since the Wright brothers made their first successful flight in a power-driven airplane. One hundred miles an hour was once considered an amazing speed limit for airplanes. This, with many estimates that followed, has been surpassed by the rapid advance of aircraft and motor designs, until up to the present time it is difficult to estimate what the maximum speed of future airplanes will be.

There are, however, two conditions to be considered, namely, the mechanical limit and the physical limit. The latter has already shown itself in closed circuit speed trials when making turns, due to the fact that centrifugal force begins acting on the blood, forcing it away from the pilot's head and rendering him temporarily unconscious. While there are practically no physical defects noted in flying a straight course, outside of nerve strain, the mechanical limits are present. This is known as an airplane's speed range, which is the difference between the low landing speed and the highest level flying speed, the definite landing speed desired becoming the point of departure in the design.

At the annual international air races a landing speed not to exceed 75 miles an hour is fixed, so that safety is not sacrificed in the work of science to advance the world's speed records.

As the airplane at present is the most effective weapon of war, due to its speed and maneuverability and with the leading countries of the world striving to attain constantly increasing speeds, it is safe to estimate velocities in excess of 400 miles an hour in the near future.

Why Needles Disappear Explained by Detroiter

The mysterious disappearance of millions of needles every year is partially explained by a Detroiter who just returned from his old family homestead upstate.

Among other things, he found an ancient pincushion, about eight inches square, while exploring an attic filled with miscellaneous junk. With his wife, he ripped open the cushion and spread the sawdust filler on a newspaper. One by one they uncovered 112 needles as bright and shiny as the day they were bought. They estimated that the cushion was at least 150 years old, as it was brought to Michigan from New England shortly after the Revolutionary war. The cushion had not been in use for more than 20 years.—Detroit Free Press.

Why Platinum Is High

The present position of platinum in the industrial and in the commercial world is a peculiar one. It has always been a rare metal, and our modern inventors have made it quite an essential, in perhaps minute quantities, in many lines of industry. The demand thus created has sent it to the top of precious metals—its recent price ranging at four or five times that of gold.

The enormous price has created an abnormal demand among persons fond of display. The United States now "consumes" more platinum than all the other countries of the world combined, and by far the greatest amount of the metal goes into jewelry. For this purpose the demand increased from 2,000 ounces in 1819 to 100,000 ounces in 1923, while the total world output in 1924 was only about 88,000 ounces.—Compressed Air Magazine.

Why Termed "Dowager"

Strictly speaking, every widow in receipt of a dower is a dowager—"dower" implying property which was either brought by a bride to her husband and reverts on his death to her own use, or which has been legally settled by the husband to his widow's use. In practice, however, all widows so situated are not called dowagers, but only those whom it is necessary to distinguish from the "reigning" wife of the same name and, even then, the word is confined chiefly to ladies of high rank. Thus in a titled family we may hear of the duchess and the "dowager duchess," the latter, by the way, very often living in the "dower house," a small establishment near the big mansion put aside for the use of the widow by the late lord.

Why Rings Are Worn

The finger ring dates from ancient times. In the early periods when the art of writing was known to but very few it was the custom for men to wear rings on which some distinguishing sign or badge was engraved so that they could use them as seals for letters and other important documents. As a pledge of good faith, a promise and as a symbol of authority finger rings were in use before the Christian era.

Why Compass Changes

A perfect and accurate compass today will not be scientifically reliable 40 years from now, it is maintained, because a compass point is constantly changing its direction. When observations were made in 1580 "north" was in reality 10 degrees east of north. A hundred years ago it had moved over to 24 degrees west of north, and in 1924 the needle moved or varied one-fifth of a degree.

Good News for Radio Fans:

This is the only Dictionary published which devotes a Special Section to Radio. About one thousand words most commonly used in this popular science are here defined. Newspaper and Magazines carry items concerning Radio in practically every issue. Here for the first time is presented a source of information regarding that which you read about and makes words readily understood—the words and terms used in Radio. This one vocabulary alone is worth more than the price of the book.

MOST WELCOME

By DOUGLAS MALLOCH

FAME, pass me by, and, wealth, elude
My eager grasp, and what's all that?
The stare is often only rude,
And greatness only wondered at.
I would be great another way,
So great that other men would say,
"I never knew a man so kind,
For such a friend you seldom find."

Yes, wealth, elude my eager hand,
And will it matter, after all?
Who builds upon the golden sand
May only build a house to fall,
I would be rich another way,
So rich that other men would say,
"Though little is the wealth he spends,
No mortal has so many friends."

Yes, wealth, elude, fame, pass me by,
Though both a man may well desire,
But let me know that always I
Am welcome at another's fire.
I would be famous in a way,
So famous other men would say,
"Though Croesus come, a king be host,
He is the one they welcome most."

SOMETHING TO THINK ABOUT

By F. A. WALKER

MENTAL ATMOSPHERE

WHATEVER it may be with regard to your idea of peace of mind, quite apart from wealth and position, you will soon or late discover that the mental atmosphere in which you move from day to day has a great deal to do with your happiness.

You cannot experience those delightful seasons of peace, joy and harmony which come frequently to the souls who habitually indulge in right thinking, unless you, too, live and work in a spiritual and mental sunshine, attuned to the glorious harmonies which are all about you, waiting for you to clasp them in your hands, press them to your heart and accept them as your own.

You may grope for a solution of life's problems year after year, but you will not find it until you climb to the hilltops and get in a cleaner atmosphere which has a mystic way of its own in clearing the vision and lightening the heart, even when the skies all around you are hung with sombrous gray curtains.

All that is good and glorious in life comes from right thinking.

Superb paintings for which fabulous prices are paid; masterful music which stirs the soul and carries it away into the land of bright dreams; beautiful buildings with exquisitely blended proportions and pleasing lines, and even the human face with its beaming eyes and cheerful countenance come into being through right thinking—through living in a higher mental atmosphere, where mind substance is purified and molded into unusual forms, which in their simple grace and beauty arouse the admiration of the world.

You may have priceless talents, but they cannot long survive in a tainted atmosphere, for like the peach and the rose, they must have the helpful sunshine, the pure rain and dew, to develop their full sweetness; they require an atmosphere suitable to their proper growth and development.

You may have a wonderful mind, but unless you live in the right atmosphere, keep it in touch with other minds and burnish it by constant use and rubbing, it will sicken, mildew and perish among the vanities on which life turns from exultation to despair.

If you would have understanding, a frank interest in accomplishment, two or three good friends and success in heaping measure, you must live and work continuously in an uncorrupted mental atmosphere, otherwise your little journey through this world will terminate in disappointment and sorrow.

THE YOUNG LADY ACROSS THE WAY

The young lady across the way says she always has stood and always will stand for the open window in China.

(©, 1934, McClure Newspaper Syndicate.)

HOW

VARIOUS KINDS OF BIRDS HAVE FORMS OF SPORT.—The members of an exploring party in the Far North tell of having had a lot of fun with a party of auks—or, rather, the auks had fun with them, I'd say; for a crowd of these ungainly birds would waddle up one side of the tent in their heavy, awkward way, until they reached the ridge pole, and then, what do you think they did? Tobogganed down on the other side! So writes Hallam Hawksworth in his article, "Work and Play in Birdland," in St. Nicholas.

Crows have a game that's really interesting. I don't know just what to call it. It's a kind of handball, I should say, the "hands" being the bills of the players. You'll see a whole crowd of crows in the air and one will have something in his bill—a white flint pebble, maybe—and fly away with it as hard as ever he can, with other crows in hot pursuit. Presently some of the other fellows will overtake him, fly around in front of him, flap their wings in his face and do everything they can to make him drop it. (That's what we call "interference," isn't it?) Then there's a rush and a scramble to catch the ball before it falls to the ground, and the lucky boy is, in turn, chased about.

All of the kinds of play I've been telling you about so far are just plain play, as far as we can see, and have nothing to do with the business of life, differing in that respect with the play of the kitten with the ball of yarn. The kitten is really pretending that ball is a mouse. But the birds also, some of them, have forms of play that are directly related to their future professions. For example those poetic cousins of the crows, the ravens, have a game of solitaire with sea-urchins. A sea-urchin is a little shelled sea creature and is a part of the raven's bill of fare if the raven happens to possess a villa by the sea. The raven's way of preparing his little friend for dinner is to drop him from a height on some convenient stone so that the urchin's shell breaks open. Then, in the language of the well-trained butler, "Dinner is served, sir!"

Yet you will often see a raven carry one of these sea-urchins aloft, drop it, and then flap down and catch it before it can reach the ground; and he will do this over and over again. The kitten's game, you see, played by a raven.

(I have called this little game "solitaire," for although the sea-urchin takes a part in it, in a way, the raven really does all the playing.)

Hawks have a game of catch in which two take part. Mates will play in the air in this way with a snake that one of them has caught. Flying to a great height, the possessor of the tidbit will drop it and the other will catch it. Then the two will change places, the pitcher becoming the catcher and the catcher, pitcher.

How Nature Provides for Seeds "Traveling"

Most people would be surprised if told that the dandelion growing on their back lawn had its origin in Africa. Yet this might easily be so, for seeds do travel in the most remarkable way.

How then, do they do it? One way is by air. Those that travel in this manner have a kind of wing or parachute attached to their seed, by means of which they can be carried by the wind for miles before they finally come to earth and grow.

Others with the aid of a light float take a sea voyage and travel with the current of the water for great distances. But by far the most interesting way of all is the seed that travels with animals and birds. This is done with the help of a hooked attachment which clings to the animal's fur.

Charles Darwin once took from the foot of a bird a small fragment of hardened earth; this he moistened and warmed, and waited with curiosity to see whether or not anything would grow from it. To his great surprise no fewer than 80 plants sprang from this small portion of soil.

How Diamonds Are Judged

The color of a diamond is the most important thing. Diamonds of the finest quality are colorless, perfectly clear and are said to be of the first water. Some varieties are green, orange, red, yellow and blue. These are the most valuable in which the tint is decided and equal throughout. The commercial value of the diamond is affected by the slightest tinge of a different color. The way a diamond is cut is also important.

How Sky Writing Is Done

In the airplane used for sky writing the instrument board is cluttered with some 15 controls and recording devices and half a dozen dials, levers and indicators controlling smoke gear, all of which the flyer must watch.

Good Old Mother Earth Likened to Music Box

Underground radio has been heard across the continent. Transmission has been made from underground cables and it is asserted that the earth crust is a more effective medium for sending radio messages than is the air.

The philosophers of old used to believe that the planets and the sun made music as they rolled. They called it the music of the spheres. Once again, as often in the past, fact may outdo fancy if the earth becomes resonant with radio songs and messages. Then indeed it would be a musical sphere, asserts the Minneapolis Journal.

Marvelous as this possibility appears, it is not inconsistent with what is known about radio and the earth. For this old globe is not the thickly solid affair that many of us imagine. Earthquakes cause undulations in the world's structure that travel for miles and are read and interpreted by scientists far distant from the scenes of disturbance. In its mountains and valleys, in the rising and falling of its surface the earth shows that it is not unfriendly to undulation. Instead of being solid and stolid, the earth is in reality plastic and much given to rhythm of various kinds. It lends itself to marvelous transformations and transmutations, such as flower-beauty issuing from muck and mire, heat from rocks and radiant energy from its flaming heart.

Radio messages going through the earth are not more wonderful than these same messages going through the air and through brick and stone walls on the way.

Statesman Makes Fight on Public Gambling

Senor Adolfo Dickmann, a leading socialist deputy, seeks to suppress horse racing, the national lottery, and all other forms of gambling in Argentina. He has introduced a bill in congress with that end in view. Horse racing in Buenos Aires is maintained by the wealthy and exclusive Jockey club, an important factor in the political and social life of the community. Senor Dickmann asserts that those who really benefit from racing in Argentina are the breeders of the race horse. Such horses, he maintains, are of no economic value, while betting on the races impoverishes the workers who patronize the tracks. Betting last year reached the grand total of $130,000,000. The Argentine lottery, Senor Dickmann holds, is a sop to the poor, and he explodes some archaic theories of the benefits to the state and charitable institutions from the division of the lottery spoils. He presents figures to show that since the lottery was founded in 1886 the Argentine people have paid 1,100,000,000 pesos in trying to win prizes, while less than 125,000,000 pesos have been received by charitable institutions, which, he asserts, are now "devoting their time to caring for deluded persons impoverished by trying to win lottery prizes."

To Save Would-Be Suicides

In Berlin the number of suicides has become so alarming that a proposal has been made to create special relief stations where persons contemplating self-destruction might go and receive the help they need. The causes of suicide are most often lack of money, illness, neurasthenia and unrequited or obstructed love. Could the sufferers receive good advice, a little money or the intervention of the proper person it is thought their intention might be shaken and their lives saved. Pastors, laic confessors, psychanalysts and regular physicians might be drafted into service. The question remains whether intending suicides could be induced to have recourse to such life-saving stations.

Restaurants of Tokyo

No one needs go hungry while in Tokyo if one has the price of a meal, as there are more than 5,000 foreign restaurants, places where the food common in other countries may be found, in many places the cooking being done by individuals who have been cooks in the foreign countries. In the same city there are more than 1,000 Chinese restaurants and more than 16,000 strictly Japanese eating places. —Ohio State Journal.

Couple Hook Same Bass

While fishing in Swift Run pond near Piqua, Ohio, recently, says the Toledo Blade, Walley Gensiinger and Miss Belle O'Brien both hooked the same bass. It is believed that the two minnow baits were within a few inches of each other and the fish got them both at one strike.

The Right Answer

"Should wives be paid wages?" asks a writer in a recent article in a magazine.

"Certainly!" says a married man of our acquaintance. "What do you think I send my wife out to work for?"—Judge.

SPENCERVILLE

Ivan Reasoner of St Joe spent Sunday in the Herman Reasoner home.

Mrs. Marcella Zimmerman spent the weekend with relatives at Ft Wayne.

McCall patterns are ordered through The News. Phone us your order.

Mrs. John Bachmann spent several days last week with relatives in Ft Wayne.

On Sunday evening, Nov. 1, revival meeting will begin at the Methodist church.

Miss Margaret Lake, who has been working in Fort Wayne, returned home Sunday.

Mrs. Florence Silberg and daughter, Orpha, were guests several days last week of her mother, Mrs Sopha Mille.

Rev. and Mrs. Fisher of Fort Wayne, Miss Edna Griff and Jas Reed and wife, were Sun ay dinner guests in the J S. Hollabaugh home

Mr and Mrs George Beams and son, Howard, visited Forest and Garnet Beams at Wittenberg College, at Springfield, Ohio, Saturday and Sunday

The Methodist Missionary society began the first chapter of their new study book, at the home of Mrs. A J Smith. Pictures will be shown to illustrate the chapter.

Lee VanMyers of Fort Wayne, spent the weekend with James Valieu. On Sunday all motored to Newville accompanied by F. H Myers and wife of Fort Wayne, visited Orla Woodring and family.

The Methodist Sunday School invites its members to join with them on Thursday evening in a Get-together, get acquainted meeting at the Community Hall. Supper will be held from six to seven, masquerade from seven to eight The rest of the evening will be spent in games and contests.

The C. C. Club was very pleasantly entertained Friday evening in a hard time Hallowe'en party Mrs Maud Beams and Mrs. Flossie Rhoades winning prizes for the hard time contest. Other prizes were won by Mesdames Cleo Reed, Zelpha Steward, Georgia Jenkin and Ada Bowser. The guests were Misses Alene Rhodes, Clarice and Esther Hahn, Ada Bowser, Doris Rhoades, Mrs Sharp and Mrs. Storer.

A delightful surprise was given Sunday at the home of Mr. and Mrs. J. F. Baltz, in honor of Mr Baltz's seventy-ninth birthday anniversary The party also honored William Summers of east of Spencerville, and Ray Rhodefer of Auburn, whose birthdays occur within the week. The day was spent socially and at noon a basket dinner was served. A large birthday cake with candles formed the centerpiece on the table. The honor guest received many beautiful gifts. The guests were Mr. and Mrs Rhodefer, Mr. and Mrs. R. F Moffett and Mr. and Mrs. Wm Rhodefer all of Auburn; Mr. and Mrs Frank Baltz and children, Albert and Irma and Mr. and Mrs. William Summers of near Spencerville and Mr. and Mrs Paul Adams of Fort Wayne.

Supper October 31st

Annual Hallowe'en Supper will be given by Ladies of the Lutheran Church in the basement of their church, Saturday evening, October 31. The public is invited to attend.

Especially Cold Mornings

"Any fool can go to bed," asserts the Higginsville Jeffersonian, "but it takes a man to get up."

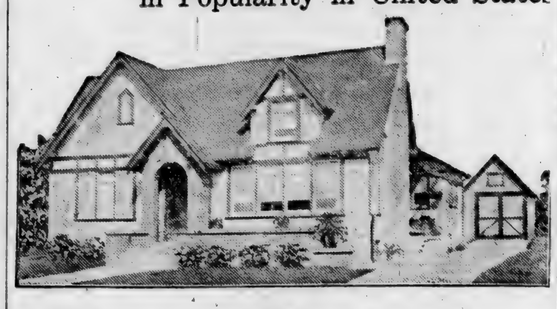
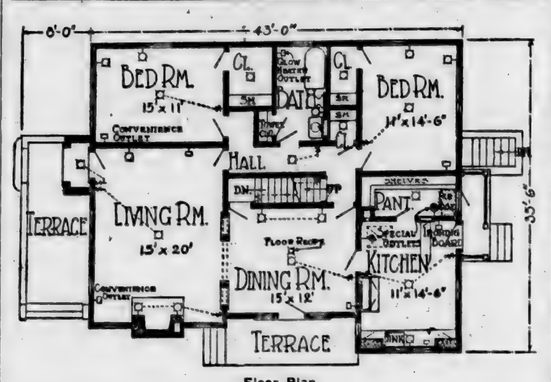
English Style of Home Increasing in Popularity in United States





Floor Plan.

By WILLIAM A. RADFORD

Mr. William A. Radford will answer questions and give advice FREE OF COST on all problems pertaining to the subject of building, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on the subject. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

On all sides we hear a great deal of talk about the development of an American style of architecture and much conjecture as to what influences will be most felt in such a development. It is not easy to foretell with any accuracy what this development actually will be, but it seems safe to say that one of the principal influences will be that which is known as the English style. We are most closely related to England in our national characteristics and the English influence has always been felt in our building. That this influence still is strong is proved by the great and increasing popularity of the English-style house today. Right now it is "the thing."

The manner in which this influence affects our homes can be seen in the accompanying photograph. This shows a modern American home which clearly follows the lines of the English cottage. This house is finished in stucco with porch and entrance of brick and with timbering used around the window openings and as a belt at the ceiling line. The timbering is also seen in the projection of the eaves. The wall is carried down to the grade level without suggestion of a foundation, but the ground line is broken at the front by the porch and the planting of bushes. A simple garage at the rear harmonizes with the house and is approached by a driveway from which there are steps leading onto the front porch.

The front entrance is particularly inviting and the open vestibule leads from the terrace porch directly into the living room. At one end of this room there is a large fireplace at either side. There is a small door opening into the central hall and another, a very broad one, opening into the dining room. This doorway practically throws the two rooms together. From the dining room there is a doorway opening onto a side terrace giving access to the driveway, a door to the basement stairs, another to the hall at the approach to the stairs to the upper floor, and a fourth door into the kitchen.

This kitchen, in a rear corner, is very fully equipped with built-in cupboards, ironing board and electrical outlets, and there is a door opening onto a back porch. The ice box, which is installed in a large pantry, can be supplied from the porch without entering the kitchen. The pantry is completely surrounded with shelves for the storage of supplies.

Sleeping quarters are all on the opposite side of the house and are reached through the central hallway. There are two bedrooms, one at the front and the other at the rear corner. Each bedroom has an exceptionally large closet, and there are also a linen closet in the hall and a towel closet in the bathroom. The bathroom is placed conveniently between the two bedrooms and is well separated from the living rooms, as is the entire sleeping part of the house.

A striking feature of this home is the ample electrical wiring. Every room is equipped with plenty of electrical outlets well located for the effective lighting of the house and the utilization of electrical appliances. Each of these is plainly indicated on the floor plan, and in building it will be found that by following the specifications a large amount of comfort will be achieved.

No plan is shown for the upstairs portion over the front part of the house, but there is space on the second floor which might well be utilized. Perhaps at a later date the owner of such a house would want to finish this as a play room for the children, a billiard room, a study or a general recreation room where the young people could have home dancing and entertain their friends.

Home Owner Easily Can Make His Own Screens

For the handy man who wants to make his own screens proper materials are readily procurable. Your lumber dealer and hardware man can furnish the best accessories.

Stock for wood frame screens should be well seasoned and free from knots and shakes. Your lumber dealer can advise you on a proper selection of woods from his available supplies. Plain or grooved stock may be had, according to the character of the finish you desire to put into your screen workmanship.

Bronze or copper screen cloth will be supplied by your hardware man to meet any requirement. If screen cloth is tacked to frames, only copper or brass tacks should be used.

Style of Draperies and Curtains Is Important

The style of the curtains and draperies stamps a room with individuality and character, and, accordingly, should be selected with the greatest care. In this there are no set rules that one style is more suitable for a bedroom than for a living room or that another style will look better in a dining room than in a library. Nor should any consideration of what the Joneses are using in corresponding rooms carry any weight. The problem here is to consider the window itself, both as a separate thing having a certain shape and size of its own, and as an integral part of a larger scheme in which every object in the room has a place.

It may be laid down as a general rule that the tendency of the day is toward simple curtains and valances. The old appliqued, gaudily shaped valances and elaborate draperies are things of the past. The first thing to settle is the form of the valance, since this, more than anything else, determines the character of the curtain. The next question to decide is whether the draperies will hang to the floor or reach just over the window sill. Draperies reaching to the floor tend to carry the eyes in a vertical line and should be generally used only in rooms with high or moderately high ceilings and in those of the formal or semi-formal sort. On the other hand, draperies reaching over the sill lead the eye in a horizontal direction and should be used in rooms with moderately low ceilings and in those of the more informal type.

Useful Hints

Hoists are valuable equipment to have on the job.

Flooring is more than a mere detail in the well-built, modern house.

Mortar colors of tested quality enhance the effect of mortar and stucco.

Wall board of approved type is finely suited for quick alteration and repair jobs.

Porches and sun rooms add appreciably to the charm and value of the house.

Conductor pipe formed of copper-bearing steel and then coated with zinc, is well calculated to withstand the ravages of weather.

Specification writing, estimating building costs and contract writing are forms of knowledge essential to the thoroughly equipped builder.

Roof With Care

When you begin to cut costs in the construction of your home, sacrifice something else beside the roof. Here is where the chief wear comes and where inferior quality will cost you much more in the end.

INDIANA BREVITIES

Dr. G. O. Ernl, sixty-three years old, a physician of New Albany forty years, died suddenly of heart disease while at the bedside of a patient.

Mrs. Stanley of Liberty was elected state president of the W. C. T. U. at the annual convention held at Connersville. It was the sixth time she had been elected to the office.

Architects, contractors, engineers and building craftsmen will meet at Purdue university in Lafayette October 29 for the third annual state building conference. Gov. Ed Jackson and state officials also will attend.

Mrs. Anna Skibo was convicted of first-degree murder by a jury in the Laporte County Circuit court at Laporte. Life imprisonment was the jury's recommendation. Mrs. Skibo was convicted of the slaying of her husband.

Henry Beemer, age seventy-six, retired farmer of Floyd county, living at New Albany, who has been eking out an existence in New Albany, had $14,107 on his person, a commission named to investigate his sanity found. A $10,000 Liberty bond and $4,107 in bills were in a sack sewed inside his clothing.

The case of Mary Helen North against Margaret North, administrator of the estate of William North, suit to set aside the will of William North, came to a close at Winchester when the jury returned a verdict in favor of the plaintiff, setting aside the will and giving the plaintiff judgment for $15,000.

Mrs. Frank J. Sheehan of Gary was elected president of the Indiana Federation of Clubs at the close of the convention held at Hammond. About four hundred attended the anniversary dinner, which marked the close of the convention. It was voted to change the time of the convention from fall to spring.

Walter Hughes, jailed in connection with his efforts to hold the office of auditor of Blackford county against Miss Ruth Werber, was released. The court's order restrains Mr. Hughes from further interference with Miss Werber's efforts to discharge the duties of the office and also holds up payment of salary to Mr. Hughes for the time he served.

The body of Senator Samuel M. Ralston was laid to rest in the cemetery of his old home town of Lebanon. Rev. Jean Milner, Presbyterian minister, conducted brief services in the Ralston home at Indianapolis. Thirteen United States senators and many state officials attended the services. Immediately afterward the funeral cortege came to Lebanon by automobile.

The third annual builders' conference, a meeting of architects, contractors, engineers and craftsmen, will be held at Purdue university at Lafayette, October 29, and men prominent in the building field and a number of state officers, including Gov. Edward Jackson, will attend the one-day meeting and appear on the program. The purpose of the gathering is to discuss building.

The state board of tax commissioners set the tax levy for the Indianapolis city sanitary district at 5.5 cents on each $100 of taxable property and reduced levies set by officials of seven other taxing units in various parts of the state. Tax levies reduced were those of Monroe county, the city of Bloomington and Perry townships, Monroe county; Boone county, Boonville and Boone township, Boone county.

Leaders of patriotic organizations in Indiana, Ohio and Illinois attended a dinner at the Hotel Severin in Indianapolis, the Federated Patriotic Societies of the G. A. R. being host, with Mrs. Catherine McBride Hoster, national president, and Mrs. Edna Pauley, national instituting and installing officer of the Woman's Relief corps, as honor guests. Heads of various Indiana organizations also attended the affair.

Long faces were much in evidence in statehouse circles in Indianapolis following the announcement of the new salary schedule in which many substantial salary reductions were provided. Numerous members of the state's official family whose salaries fell under the pruning knife in the new schedule called at the office of the state board of accounts, where the committee had held its sessions, and sought to console others in the same plight.

A World war veteran of the Canadian army shot and killed the wife of his best friend, with whom he had made his home for fifteen years, and then killed himself in their home in Indianapolis. The dead woman was Mrs. Lydia Stroud, thirty-two years old, wife of William G. Stroud. She was the mother of two children. The man who killed her and later committed suicide was Clarence Peterman.

Following a spirited contest at South Bend in which Lafayette was opposed by Crawfordsville, the former was chosen as the 1926 convention city of the Indiana Young People's conference. Lafayete won by a margin of 221 votes.

Isaiah P. Watts, age eighty-five, died at his home in Winchester of a complication of diseases following a long illness. He was a veteran of the Civil war, served as representative in the Indiana legislature one term. He was doorkeeper of the United States senate from 1906 to 1910.

Lesson for November 1

THE FIGHT AGAINST STRONG DRINK

(Temperance Lesson)

LESSON TEXT—Eph. 6:10-20.

GOLDEN TEXT—"Be strong in the Lord, and in the power of his might."—Eph. 6:10.

PRIMARY TOPIC—Loving and Obeying Our Parents.

JUNIOR TOPIC—How to Be Strong.

INTERMEDIATE AND SENIOR TOPIC—Strong Armor for a Hard Fight.

YOUNG PEOPLE AND ADULT TOPIC—The Fight Against Strong Drink.

This is not a temperance lesson in the usual sense that it deals with intoxicants, but in the sense that it has to do with the believer's walk in conflict with the devil. Perhaps there has been no time when the evil one has made such a terrific fight as he is now doing in his attempt to nullify the Eighteenth amendment. The Christian has been saved by grace. Though his redemption is free, between its beginning and consummation there is a real, severe and protracted conflict. This conflict is most difficult and dangerous because it is not with flesh and blood, but with principalities, powers and spiritual hosts of wickedness in high places. Though the conflict is severe and painful, we should bravely battle on because the issue is sure if we go forth in the panoply of God.

I. The Source of the Believer's Strength (v. 10).

It is in the Lord. Only as the branch is united to the vine, or as a limb is united to the body, is there strength of life. We dare not attempt this conflict in human strength and wisdom.

II. The Enemy (vv. 11-12).

The enemy is the devil, a personal malicious being, with his many subordinates. His personality is proven by the names given him, and actions predicated of him. He has an exalted position, and is mighty in power, and all unsaved men are under his power. He is the original sinner, and is extremely cunning. He has power over death; enters into men; blinds their eyes; lays snares for them, and sifts God's servants. In carrying on his work, he has his churches and ministers. However, he is resting under a curse. The death blow was given on the cross, and he will receive his doom in the lake of fire.

III. The Christian's Armor (vv 13-17).

This means that his weapons of offensive and defensive warfare are not of man's devices. Just as his strength is from the Lord, so is his armor. The believer dare not act merely on the defensive. He must attack his spiritual enemies as well as resist their spiritual attack.

1. A Girdle of Truth (v. 14).

The truth of God, sincerely and honestly embraced, alone will avail in this conflict. Reason, tradition, speculation and dead orthodoxy will fail in the crucial hour.

2. The Breastplate of Christ's Righteousness (v. 14).

As the metal plate covered the vital organs of the warrior, so the righteousness of Christ protects us from the enemy's assault.

3. Feet Shod With the Preparation of the Gospel of Peace (v. 15).

This suggests the firm foothold of the soldier and his alacrity—readiness to proclaim the message of peace.

4. Shield of Faith (v. 16).

By this he is able to quench all the fiery darts of the wicked. Christ is the object of that faith.

5. The Helmet of Salvation (v. 17).

Consciousness of salvation enables a man, knowing that he is a child of God, and fellow-citizen with the saints, to lift up his head with confidence and to vigorously assault the enemy.

6. The Sword of the Spirit (v. 17).

This is the Word of God, the Christian's offensive weapon; with it he can most effectively put his enemy to flight. This Christ used in the temptations in the wilderness, Matt. 4:4, 7, 10, 11. The church of Christ has won all her triumphs by the Word of God. Where she goes on using this, she goes on conquering, but when she falls back upon reason, culture, traditions, science, or the commandments of men, she goes down in defeat before the adversary.

IV. The Way to Get Strength to Use the Armor, and Courage to Face the Foe (vv. 18-20).

This is by prayer—and prayer alone.

1. Every Variety and Method of Prayer Should Be Employed (v. 18).

2. He Prays for His Comrades, "All the Saints" (v. 18).

He sees all the believers standing shoulder to shoulder against the enemy.

3. He Is Persistent (v. 18).

Some Things to Beware Of

Beware of idle moments! Beware of the beginnings of evil! Above all, and more than all, beware lest you once admit the fatal intrusion of evil thoughts. In solemn and awful earnest I would say to you, "Watch and pray lest ye enter into temptation."—Farrar.

Eloquence

Eloquence is the appropriate organ of the highest personal energy.—Emerson.

Conquers Bad Breath and is Popular Again

"The day I started taking Carter's Little Liver Pills," says Mr. John A. Perry of New York City, "my habitual bad breath and bad stomach stopped. I strongly recommend them to all those afflicted with these nasty troubles. I assure you that my own case was a bad one, causing me untold embarrassment, and Carter's helped me right from the start."

Bad breath comes from sour stomach and can usually be relieved quickly by Carter's Little Liver Pills.

They are wonderful for constipation, sick-headache and indigestion and they physic the system in a mild and gentle manner, no bad after effects.

Recommended and for sale by all drug stores.

Fish Valued at $300

A sturgeon recently caught off the North Carolina coast measured over nine feet in length and had a market value of $300.

COLOR IT NEW WITH "DIAMOND DYES"

Just Dip to Tint or Boil to Dye.

Each 15-cent package contains directions so simple any woman can tint soft, delicate shades or dye rich, permanent colors in lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings—everything!

Buy Diamond Dyes—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.

The cynical bachelor observes that at twenty-five any girl is apt to marry the fellow she used to make fun of.

Some writers have a fine flow of other writers' thoughts.

To err is human; also to lie out of it.

HOSTETTER'S CELEBRATED STOMACH BITTERS

Feel Young—

Take care of your stomach and preserve your health.

HOSTETTER'S Celebrated Stomach Bitters tone up the digestive organs, stimulate the appetite and promote a feeling of physical fitness. *At all Druggists.*

MRS. WM. BUTTS WAS VERY SICK

Gives Full Credit to Lydia E. Pinkham's Vegetable Compound for Remarkable Recovery

Wellston, O.—"I took Lydia E. Pinkham's Vegetable Compound to make me strong. I was troubled with my back and sides hurting me till I could not do my work, and whenever I caught cold it made me irregular. Since I have taken the Vegetable Compound my side and back don't bother me and I can do my housework and care for my children now, where before I did not feel like doing anything or going around. After my first child was born about four years ago I saw an advertisement in the paper about the Vegetable Compound. I knew it would help me, but I was afraid to try it because people said it would help you to have children and I knew I was having children fast enough. But I thought if it would help me it would be better to have a whole house full of children and have good health. I became stronger from taking it and my husband says I look like a live woman instead of a dead one. When Spring comes I am going to take your Blood Medicine as I am very thin. I will answer letters from any woman who wishes to ask about your medicine."—Mrs. WILLIAM BUTTS, Wellston, Ohio.

WAKE up your sleeping youth! Look younger! Be younger!

Age has little to do with your looks or your feelings. It's the condition of your blood that counts!

And blood will tell! It tells in a hundred ways. If your system is starving for rich, red blood, you may look and feel old at thirty. But if you build up the red-blood-cells with S. S. S. you'll quickly see the wrinkles fade away—the sagging pouches give way to firm, solid flesh—and the fresh, glowing beauty of youth take the place of a skin sallow and disfigured with blemishes.

Rich, red blood means youth, vim and energy! S. S. S. helps Nature build red-blood-cells by the millions. For generations S. S. S. has been keeping people looking and feeling young.

Fresh, cleansing, purifying, rich, red blood that S. S. S. helps Nature build, nourishes every muscle, organ and tissue of the body. Pimples, blotches and blackheads disappear. Boils, eczema and rashes dry up. Your face—your body—your whole being takes on the look and power of youth.

Wake up your system with S. S. S. Build red blood and you rebuild youth!

Get S. S. S. from any druggist. The larger bottle is more economical.

S.S.S.

Common Practice

The Girl—Oh, don't some people get offensive when they own a car?

The Man—Well, some certainly do get a habit of running other people down.

Fresh, sweet, white, dainty clothes for baby, if you use Red Cross Ball Blue. Never streaks or injures them. All good grocers sell it.—Advertisement.

Persia, with an area of 628,000 square miles and 9,000,000 population has only 150 miles of railroad lines.

The doorbell always operates more surely when you are in the bath tub.

From School Teacher to Great Eminence

A young man who was brought up on a farm, qualified for district school teacher, then managed to save enough money to put him thru medical college.

Later, he moved to Buffalo, N. Y., and today the name of this man, Dr. R. V. Pierce, is known throughout the world. His Golden Medical Discovery is the best known blood medicine and tonic. More than fifty million bottles have been sold. If your dealer does not sell the Discovery, in liquid or tablets, you can obtain a pkg. of the tablets by sending 65c to the Dr. Pierce Clinic, in Buffalo, N. Y.

DON'T BROOD OVER STOMACH DISTRESS

Don't lay awake nights and feel miserable all day—there's one right way to fix up your gassy, rebellious disordered stomach in such a short time that your heart will be gladdened.

Today Dare's Mentha Pepsin is the one remedy supremely efficient where acute or chronic indigestion or gastritis is making your days and nights miserable.

Reports of its mighty power to overcome unbearable, near suffocating stomach agony have swept the land until today its sales are marvelous.

Get one bottle of this pleasant speedy acting medicine today with the distinct understanding that if it doesn't help you—your money will be returned.

Formalism About to Re-Enter Mode

Formalism is about to re-enter the mode as a result of the unprecedented extension of the sports vogue. Every new fashion begins as a heresy and ends in the midst of its apparent heyday, when it becomes known far and wide as an "essential." Glance back, says a Paris fashion writer in the New York Herald-Tribune, at the history of the mode as you remember it and notice how invariably tomorrow's vogue has been ridiculed the day before and principally by those who later became its most feverish exponents. What would your Victorian mother have said of the corsetless figures and short skirts of this enlightened day?—and don't you shudder when you think of the anguished comments of the pater familias. More recently consider the case of the straight line and the flare—the narrow silhouette had become a religion with couturier and milady alike, and it was bruited over the universe as the prime essential of the modern mode. Its

Lanvin Frock of Scarlet Kasha Which Emphasizes Scallops.

freedom, its simplicity, its youth were destined to make it the basis of every new style—it was the only logical outline for the moderns, if you listened to the orations of its overenthusiasts. Despite all of which relentless logic the straight and narrow line has been succeeded by the flare, just as its companion-in-arms, eternal youth, which might better have been named perennial puerilism, has gracefully surrendered to the charms of post-adolescence. And now a third movement, a result of these preceding two, but more tangible and more significant, is impending. Formalism, not yet Chesterfieldian, but at least heading toward that gracious ideal, is slowly but distinctly replacing informality from the regions of fashion, and the sports mode is being retired to the limitations of its own field.

Sports Clothes.

Sports clothes originally were imposed upon Paris from the outside—they were only the foster children of the French couture, the result of a demand from London and New York. Yet they attained the quickest and widest vogue in the history of modern fashions, and the sports spirit quickly sought wider spheres than its own. And found them. At first it reached and conquered the domain of informal daytime clothes, after which formal afternoon frocks, and occasionally the mode du soir succumbed to its irresistible infection. You may remember Palm Beach and those Riviera villas, Nice, Monte Carlo and Cannes of last winter. The chic demoiselles at these rendezvous wore the identical costume at the afternoon dansant or at dinner as they would wear and did wear at the tennis court. So similar were the styles worn at the different functions, so widespread had the spirit of informality become that the haute monde wardrobe boasted a half dozen dresses of a single design, and it mattered little which was worn where. Informality had become an essential, and that is the dangerous age of a vogue—the moment before the bubble bursts.

Last spring, in response to the ceaseless demand for change, which is the essence of fashion, the business of mending the broken barriers of differentiation was started, perhaps unconsciously. Maturer styles, more subtle outlines, elaboration in place of simplicity—all these augured a lessening of the sports vogue. And with the crystallizing of these themes at the recent autumn openings, the return to formality at least, and perhaps formalism later, is definitely under way. Lines again are being sharply drawn between the afternoon dansant and the sportslike morning stroll, and the absolute ornatism of the evening mode precludes even the faintest spirit of the sports mode from the dinner, theater or dance.

We have selected Jeanne Lanvin to illustrate this newest tendency of the mode because that eminent designer never lost her sense of differentiation even in the most rampant moments of the sports vogue. Her anchor was the famous robe de style and it stood out in charming relief in last season's mode du soir.

New Swinging Silhouette.

In the Lanvin versions the flare translates itself into the new swinging silhouette, aptly called kinetic by the ingenious Lucien Lelong. The beauty of the swinging silhouette is revealed when its wearer is in motion, when the frock or coat swings with all the majestic grace of the lordly late-Victorian. There is not the accompanying swish which characterized that much-petticoated lady, but the gracefulness of the moving frock is easily greater than that of its prototypes of two decades ago. It doesn't belong in any part of the sports category, and so the flare may be considered one of the most eminent of the differentiators of fall fashions.

The hip-length peplum on dresses the shoulder flare, the unusual use of metal lames, bead and metal embroideries, all of these featured on day time costumes—emphasize the distinctly formal note. Even the perennial jumper is matured and sobered by being developed in metal lames and laces. And as a final distinction between this new formality and the informality of last season, the manne quins wore black stockings.

Obviously even a Lanvin cannot make the mode and we merely cite this collection as a straw that shows which way the modal winds are blowing. Resistances will inevitably develop and the march toward formalism may be slow and often impeded, nevertheless it requires no clairvoyant to sense its coming.

Gabrielle Chanel's Ideas of Fur Trimming

The full-skirted silhouette, the rising waistline and the replacement of embroidery by fur are prominent details of the collections which are outlined below. The first described is that of Gabrielle Chanel.

The details of the Chanel collection are unusual, and there are many new points in the outline. The latter shows a comfortable fullness in the skirts, back as well as front, but a liberal interpretation of the mode permits many things, even the straight line with a straight, slim corsage sometimes arranged in a zouave effect that is infinitely becoming and suggests a higher waistline.

Coats, whether straight or flared, are trimmed with fur. Many of them have a shaped fur flounce and wide collar and cuffs. Others are fur lined with still another suggestion of fur appearing on the outside.

Drecoll has long been justly celebrated for rich, dignified gowns such as are worn by women of unquestioned taste, and the present collection lives up to this reputation in every way. Dignity, restraint and good taste are its marked characteristics with a distinct novelty in the tight-fitting corsages and strongly flared skirts that are a feature of several models.

Like most houses that study closely the requirements of modern existence, Drecoll is showing the jumper dress only for sports and morning wear. He makes it with a short full skirt into which circular godets are inlet all around.

The high collar is being tentatively launched in this house but it remains to be seen whether women will be prepared to adopt it though it is in full harmony with the actually fitted corsage from which only the bones are lacking to make it an exact counterpart of the style that prevailed in 1880.

Coats are often fitted to the waist but are sometimes draped round the figure when cut straight.

Flowered Collars

Flowers of velvet or georgette crepe finish the collars of the new chiffon coats and capes.

Sunken City of Legend to Be Sought in Cylinder

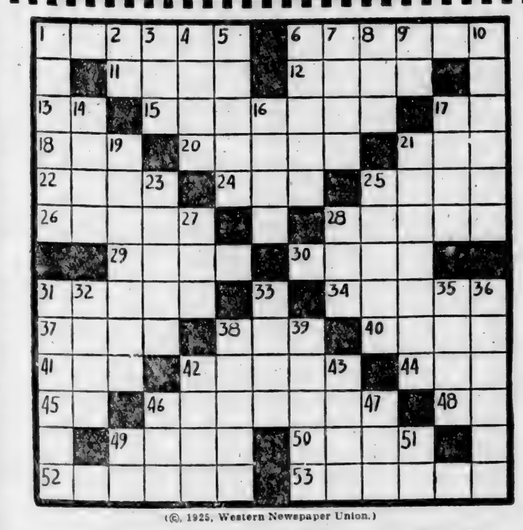
Rome.—Dr. Hans Hartman of New York arrived here on his way to Naples, where he will experiment with his deep sea diving cylinder. He plans to go down off the island of Ischia, near Naples, in an attempt to discover the ancient city which, according to legend, was engulfed there.

Doctor Hartman says the diving cylinder is strong enough to resist the pressure at a depth of five miles, making it possible to search for another and more famous submerged area of legend, that of the lost continent of Atlantis.

His invention, he believes, will bring to light new flora and fauna, with the possibility also of uncovering mineral riches.

The ancient Romans had systems of shorthand.

CROSS-WORD PUZZLE



(©, 1925, Western Newspaper Union.)

Horizontal.

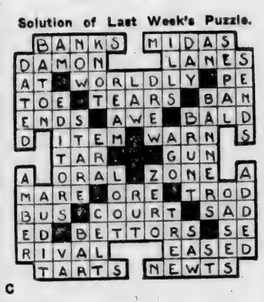
1—A part of America
6—Gardener's implements
11—Is indebted
12—Has an illness or ache
13—Above
15—To advance or heighten
17—An exclamation used to frighten
18—To put on
20—Principle
21—Because
22—An exclamation of distress
24—Neither
25—A woody perennial
26—A person having a loathsome disease
28—Soothsayers
29—An excursion
30—To go at a certain pace, said of a horse
31—A title given to Europeans by Indians
34—An old province in Japan noted for pottery
37—A tribe or family group
38—To do wrong
40—To cancel (printer's mark)
41—Royal Agricultural Society (abbr.)
42—A combination of ice and rain
44—Rested
45—East Side (abbr.)
46—Members of a team
48—Mountain (abbr.)
49—An article of food
50—Profound
52—To direct
53—Arranged in seats

Vertical.

1—Pertaining to the tail
2—A negative
3—To inspire with reverence
4—A depression
5—Gray as ashes
6—More sensible and normal
7—An early inhabitant of the British Isles
8—A beverage
9—Doctor of Science (intl.)
10—Keeps account of the points made in a game
14—One of the extremities of a sphere
16—Soon (English)
17—A colonist of South Africa of Dutch or Huguenot descent
19—A petroleum product (pl.)
21—Turns into ice
23—A white crystalline substance (chem.)
25—Luke warm
27—Part of an umbrella
28—To weep convulsively
31—To shriek
32—An exclamation of distress
33—To pilfer
35—An ancient kingdom in the mountains east of Babylonia
36—Produced as clear profit
38—To exalt the spirit of
39—Stems of certain grasses
42—Dross of a metal
43—A woody perennial
46—A vegetable
47—A large body of water
49—Two letters preceding "o" in the alphabet
51—Point (abbr.)

Solution will appear in next issue.

Solution of Last Week's Puzzle.



HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

FAIR'S BIG STRIDES IN POPULAR FAVOR

In 1810, one fair; in 1925, 2,000 fairs.

In 1810, an attendance of about 5,000; in 1925, an estimated attendance of approximately 25,000,000.

These figures in a nutshell tell the story of the marvelous growth of the American fair from the humblest beginning to its present-day status as an important factor in agricultural education, says the Frankfort Evening News.

While the fair idea has been taken hold of tremendously in the United States, it is not native to this country. Fairs run back to ancient days, but in the olden times they were more after the manner of the bazaar or market, only held with less frequency, very much like the fairs in vogue in Germany and other European countries today.

The American fair traces its ancestry back only to about the middle of the Eighteenth century, when a group of progressive farmers in the Tees river valley in northwestern Britain joined to bring their live stock together for comparison. It has been termed the first agricultural fair and was the model after which were patterned the hundreds of county fairs both here and in England.

Cloth From Bean Fibers

A process for making coarse cloth from the fibers of string beans has been patented at Budapest, Hungary, recently, and is being exploited commercially in Austria. The bean shells are treated like hemp, and the fiber that results can be spun, making a hard but very strong yarn. This new material is expected to offer competition to hempen products. It is adaptable for making materials for which cotton has been used heretofore, and it can be used in making carpets, curtains, upholstery and saddlery after it has been bleached and printed.

Gave Name to Fur

Mandel fur is a trade name used in the fur industry. In reality it is the pelt of a species of Asiatic sheep. This fur was first put on the market by a man named Mandel, and has retained his name.

Bad Effect on Trade

In England the trade in black silk was once ruined for a generation because a notorious murderess elected to be hanged in her black silk dress.

Snoring Acquaintanceship

At a fashionable London club the chairman of the membership committee took occasion to congratulate an ambitious member.

"You're getting pretty chummy," declared the chairman, "with the duke of Whoozis."

"How can you say that?" demanded the other in an aggrieved tone. "We have both been members of this club for 20 years and the duke has never spoken to me."

"Never mind, old boy. You're coming along. Yesterday you were both asleep in the smoking room and you were snoring in unison."

Machinery in History

Civilization and progress are closely allied with the increased application of power, but engineers are inclined to believe that the prehistoric builders were not without mechanical devices. It seems almost impossible that those massive blocks of stone which face the pyramids could have been placed entirely by hand.

Used Cars in France

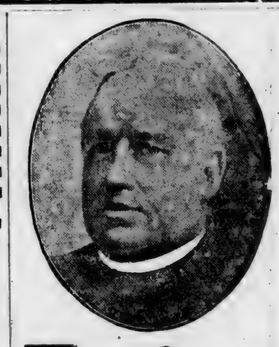
Used cars, with one French dealer, are merely sold for the previous owners. If they can't be sold in ten days, the owners get the cars back and no new cars are sold to them. But not a single new car has been lost by this method.

Miserly Family as Paupers

After the death in the Southampton, England, workhouse of Philip Remer, whose father and mother had been buried as paupers, $1,365 in gold, silver and securities was found hidden in the home where the three had lived together.

Philosophical Thought

Life is like a game of whist. I don't enjoy the game much; but I like to play my cards well, and see what will be the end of it.—George Eliot.



Father John's Medicine

Best for Colds

Bronchitis, Asthma and all throat troubles. Builds new Strength

NO DANGEROUS DRUGS. GUARANTEED

Ancients Were Advertisers

In ancient Greece certain spaces on the outer walls of homes were used for advertising purposes, either to offer real estate or homemade articles for sale or to designate a place of residence or barter. In Pompeii, when it was uncovered, many such walls were found and Roman ruins revealed that real estate especially was offered in that way. The first newspaper advertisement did not actually appear until about 1647, it is said. The cost was about $1 for 2 inches per person reached. In big dailies now the cost is about 1 cent per page per home reached.

DEMAND "BAYER" ASPIRIN

Take Tablets Without Fear If You See the Safety "Bayer Cross."

Warning! Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians for 25 years. Say "Bayer" when you buy Aspirin. Imitations may prove dangerous.—Adv.

A golden plover on the Pacific coast flies 2,000 miles from Alaska to the Hawaiian Islands.

Mother! Don't "Physic" a Child

DR. CALDWELL AT AGE 83

To Dr. W. B. Caldwell, of Monticello, Ill., a practicing physician for 47 years, it seemed cruel that so many constipated infants and children had to be kept constantly "stirred up" and half sick by taking cathartic pills, tablets, salts, calomel and nasty oils.

While he knew that constipation was the cause of nearly all the children's little ills, he did not believe that a sickening "purge" or "physic" every little while was necessary.

In Dr. Caldwell's Syrup Pepsin he discovered a laxative which regulates the bowels. A single dose will establish natural, healthy bowel movement for weeks at a time, even if the child was chronically constipated. Dr. Caldwell's Syrup Pepsin not only causes a gentle, easy bowel movement but, best of all, it is often months before another dose is necessary. Besides, it is absolutely harmless, and so pleasant that even a cross, feverish, bilious, sick child gladly take it.

Buy a large 30-cent bottle at any store that sells medicine and just see for yourself.

Dr. Caldwell's SYRUP PEPSIN

FOR OVER 200 YEARS

haarlem oil has been a world-wide remedy for kidney, liver and bladder disorders, rheumatism, lumbago and uric acid conditions.

November—Theme, Thanksgiving.

Sunday morning, Nov. 1.

9:30 Call to Worship, "Praise Him, Praise Him," by Orchestra.

Scripture Lesson, Luke 17: 12-19 Derwood Ridgway.

Scripture Talk, Mrs. Grace Dilley.

Song, "O' Worship the King,,

Prayer J. P. Buckingham.

Selection by Orchestra while classes take their places, "Take Time To Be Holy."

Lesson Study 30 Minutes.

Secretary's Report.

Announcements.

Song "Theres A Wideness."

Benediction.

The sermon Sunday evening will be the, "Ten Lepers," by the Pastor.

We would like to have your attendance at the services.

S. D. Steffey, Pastor
Stanley Means, Supt.

NEWVILLE

Miss Belle Crum has been on the sick list

The Newville school is preparing to give a Hallewe'en entertainment.

Mrs. Mag Griest and Mrs. Anna Griest of Hicksville, spent last week at Newville.

Wm. Hensinger and wife of Chicago, are guests of Miss Belle Crum and Mrs Minnie Hatch.

Mrs. Ruby Krabill of near St. Joe, called on her mother, Mrs. Mary Mitchell, Friday.

Miss Redena Richmond is attending school at St. Joe and clerks in the J. H. Benner Grocery evenings and Saturdays.

HERE AND THERE

Rev. P. W. Boxwell of west of Marion, filled the pulpits on the M. P. Circuit, Sunday.

Dr. Sheffer and wife have taken up their winter home with their son, Craig and family. The health of Dr. and Mrs. Sheffer makes it necessary for someone to look after them. They will take their own home in the spring.

Compare ... *these Better* BUICK *Sedans with "Coaches"*

These finer closed cars are built on the famous Buick chassis with the 21-year-proved, 60 and 75 horsepower Buick Valve-in-Head engines. Extra power!

And they have the famous "Sealed Chassis" and the new "Triple Sealed Engine." No other car, regardless of price, furnishes this completeness of protection for driving parts.

And these Buicks have the characteristic Buick charm of body profile. They are finished in Duco. They seat five full-grown people in roomy comfort. They have the Fisher VV one-piece, ventilating windshield, automatic windshield wiper, and a host of light necessities. Buick's exacting closed car standards prevail in their Fisher-built bodies.

Come in and see how much superior these Better Buick Sedans are to "Coaches" before you spend your money.

ST. JOE NEWS.

VOL. XXXIX | ST. JOE DeKALB COUNTY, INDIANA, THURSDAY NOV. 5, 1925 | NO. 44

In Society

The L. L. C. held their annual Hallowe'en party at the home of Mrs. J. C. Hull. The committee in charge was Mrs. Paul Curie, Mrs Harry Randall, Miss Pauline Wasson and Mrs. Meade Baker, and the entertainment they furnished was thoroughly enjoyed by all. After the spooks had played all kinds of pranks and conducted the guests through all kinds of creepy places they were returned to earth to be treated to a fine lunch consisting of sandwiches, pickles, coffee and pumpkin pie with whipped cream. All agreed it was one of the most pleasant evenings ever enjoyed by the club

Spirits, ghosts, witches! Shades of the dead past! Grinning pumpkins, frosty air and rustling leaves! Whispers low and vague blowing round and round the home of Mrs Earl Smith told of a Hallowe,en party given for the Culture Club last Wednesday evening.

Inside the home all was lovely with soft lights and beautiful decorations. Each lady came masked and the rooms soon assumed the appearance of a properly arranged setting "where east meets west"

Costumes varied from beautiful to ridiculous but it was generally conceded that Mrs. Ray Reasoner, masked as the debonair Jiggs, was the winner for she fooled 99% of the ladies.

Games and contests were enjoyed followed by a delicious lunch consisting of doughnuts, pumpkin pie, with whipped cream, and coffee. The hostess was assisted by the following committe: Mesdames Grace Sheffer, Edith Sailer and Maud Jenkins.

Fish And Game Meeting

The Fish and Game Club will resume activities with the November meeting, on Friday night, November 6th. If you are not a member come and join, if you are a member, be sure to come.

Arrangements will be made for the annual hunt also other things of importance will be discussed.

Daniel Thomas, oldest resident of the county, age 94, died Sunday morning at the home of his son. Milo J at Corunna, after a short illness. He was born in Stark county, Ohio, October 30, 1831, settling in Richland township in 1849 His father died at the age of 100 years and 9 months. The funeral was held Tuesday morning with burial at Corunna.

Loaded With Sunshine

The Time May Come; Let It Be Soon.

We've been thinking it over, and we've come to the conclusion that the day may yet come when the old timers around Ashley will not view with alarm the goings on of the younger generation; when modern magazines will think up some way of attracting attention without the use of nakedness in pictures; when a man will actually work as hard as he leads his wife and friends to believe he works; when professional reformers will admit that the world is O. K., and quit their jobs; when somebody will not always be longing for the good old days; when the butcher will return to his old custom of throwing in a piece of liver for the dog with every meat order—and when all good citizens will lay everything else aside along about this time to make the needed repairs to streets and sidewalks that they promised themselves all last winter that they were going to make before another snow came.

Alcohol for your Car at Curie's.

Who loses all the fault some people find?

Worked Ruse On Doctor

A young man who worked a ruse on Dr A G Goll at Stryker Saturday night is believed to have robbed the doctor's office safe of $90 and a bottle of morphine tablets.

The stranger called at the physician's office early in the evening and said his mother was ill and bought medicine. Shortly after the physician was called by telephone. Apparently the same young man said his mother was worse and asked the doctor to the "Miller place" four miles north. Dr. Goll drove out but was unable to find such a family.

Sunday morning when Dr. Goll went to the office he found the safe open with the combination worked. The money and drug were missing. —Edgerton Earth.

See Furnish for Batteries.

Cash paid for false teeth, dental gold, platinum and discarded jewelry. Hoke Smelting & Refining Co., Otsego, Mich.

The liquor industry in 1914 held seventh place in the industries of the United States. In 1921, reports show it held fifty sixth. How the mighty have fallen!

Independent Ticket Takes Clean Sweep

Election day has come and gone and St Joe voters are now at rest for two years more The weather was ideal, after the haze of the morning cleared away and people turned out in good numbers to exercise their great American right and privilege of casting their vote.

Much more interest was shown in this election. In 1923 not enough interest was shown to even nominate a ticket. Two good tickets were in the field this year and from all reports some campaigning has been going on

Politics does not cut much of a figure in small town elections, but personal prejudices and dislikes are the pre-eminent points in the arguments, and each voter has a perfect right to his views along either line.

The board was composed of Mesdames Ada Bassett and Ada Berry Clerks; M T. Bishop and Durwood Ridgway, Judges; Frank Curie, Inspector and D. C. McCann, Sheriff.

The report of the votes cast is as follows:

Trustee, Ward 1.	
F. M. Monroe, C	53
H. A Kees, I	90
Kees Majority	37
Trustee, Ward 2.	
F. R Bowman, C	59
J. C. F. Abel, I	84
Abel Majority	25
Trustee, Ward 3.	
Earl Smith, C	61

Sheffer Majority	21
Clerk.	
B. S. Sheffer, C	89
No Candidate, I	
Treasurer.	
Leslie Meek, C	67
Mrs. Mae Miser, I	74
Miser Majority	7
Votes Cast	143

C—Citizens Ticket.
I—Independent Ticket.

At Fort Wayne, Wm. C Geake, defeated Wm. J. Hosey for Mayor by 3,150 votes. Democrats name but two councilmen. Republicans to control city council.

M. P. Church Notes

Announcement has been made that Rev. Roscoe Walter of Butler, will preach at the Methodist church Sunday evening The public is invited to this service.

It seems that the only man eligible for service on a murder case jury these days is one who never reads the newspapers or discusses current events with his neighbors Why not import a dozen good jurors from Hawaii or some other distant island?

Mother's Cook Book

Is life worth living? I think that question has been answered for good and all. The cost has been more than doubled, and we still hang on.—Louisville Courier-Journal.

SAVORY FOODS

A FLANK steak, when carefully prepared, makes a most appetizing dish. Pound the meat until the fibers are well broken, rub with three tablespoonfuls of butter or cooking oil; when the oil is absorbed fry in a hot iron frying pan. Place the browned meat in a casserole, rinse out the pan with two tablespoonfuls of boiling water and pour it over the meat. Add one bayleaf, one clove of garlic, two teaspoonfuls of salt, two tablespoonfuls each of minced celery, green pepper and carrot. Add two cupfuls of boiling water and in the last half hour of cooking six medium-sized potatoes. Cook two and one-half hours. Thicken with a tablespoonful of flour mixed with a little cold water.

Savory Casserole of Mutton.

Cut a slice of mutton from the middle part of the leg of a yearling—have the slice two inches thick. Remove the bone and fill the cavity with minced onion or celery. Dredge with flour and salt and pepper. Prepare in the bottom of casserole a rich gravy of one cupful of brown stock, one-half cupful of currant jelly, a dozen chopped olives, six peppercorns, three whole cloves, one tablespoonful of lemon juice. Thicken when boiling with one tablespoonful of flour mixed with a little water, to a paste. Lay into this the round of mutton, spread the top with beef marrow, cover the casserole and bake for an hour and a half in a moderate oven.

Chicken and Spinach Soup.

Wash and pick over two pounds of spinach and cook in one-half cupful of butter until tender. Add one-half cupful of flour, mixed with salt and pepper to season. When thick rub through a colander and add two quarts of chicken stock. When it comes to a boil serve in cups garnished with whipped cream.

YOUR Last Name

IS IT BEDLOW?

ANY one who knows the Statue of Liberty, as Bartholdi's statue in New York harbor is called, probably recalls that it is built upon a small piece of land known as Bedloe's Island. The usual spelling is Bedloe, though it was named for a former owner whose name was spelled Bedlow. It is said that the difference of spelling was due to a little error in a certain document recording the sale of this island.

The first of the Bedlows here was Isaac Bedlow, a native of Holland and son of George Bedlow, physician to William Prince of Orange. Isaac emigrated from Leyden, Holland, in 1639, and made his home in New Amsterdam. Five years he served as alderman of the city of New Amsterdam and acquired by purchase the island that bears his name.

A descendant of this Isaac Bedlow was William Bedlow who was postmaster of the first United States post office in New York city. This was in 1783. His wife was Catherine, daughter, of Colonel Henry Rutgers. Henry Bedlow, a member of the same old New York family, was one time mayor of Newport with an interesting record as United States diplomatist.

WARNER—This is a usual English name derived from a one-time popular first name, Warner.

The Vanishing Men

By RICHARD WASHBURN CHILD

(W. N. U. Service)

(Copyright by E. P. Dutton & Co.)

CHAPTER XVII—Continued

—14—

She did not talk to him as he fixed the car, nor when, having looked back along the slight cut of the old prehistoric torrent bed now filled almost to its old banks with drifting sands, he squatted over a map, measuring and consulting a pocket compass. His anxiety was evident.

They went forward again, however, under the full light of day into a trackless waste where there was not even a depression to guide them and where Brena, holding the compass in her hands, gave directions to him as he moved the wheel. At the end of twenty miles more Brena uttered an exclamation.

"What is that on the desert?" she asked. "Peter, look! There! to the left."

A little point of light shone on the sand as if a diamond had caught the sunlight and had extracted from it a bit of its essence to outshine the sun himself. Peter, steering toward it, looked down over the edge of the car as one might look over the edge of a boat at some piece of strange flotsam sighted in midocean. This was strange flotsam indeed. Peter having stopped the car again to pick it up, showed it to Brena; it was an empty vial of white glass.

Peter sprang out of the car, and, walking about in widening circles, searched the ground. He appeared excited. Time and time again he looked at the little glass vial.

"Some one has been here," said Brena. "I'm just Irish enough to say that, Peter."

"Hush," he said. "I've seen more than you have seen. It means everything to us!"

He bent over her as if he were going to take her in his arms, but he tossed his head at some thought that had restrained him, and took the wheel once more.

At nine o'clock they came within sight of a great mound on the desert; it appeared as if it were the fat round back of some gigantic creature that had buried itself for a sleep of centuries in a sand wallow of vast area.

"There it is!" exclaimed DeWolfe. "Look, Brena. Look to the west. Somewhere up there is the Llano Estacado—the Staked plain—as the Spanish explorers called it. And there's the haze on the horizon—the haze that the Jesuit missionaries told about. It comes from the colder air of the Mescalero ridge!"

"And it means that we have found our way?"

"Yes, found our way. There's ninety miles more."

"Where are we going?"

"To the oldest city, Brena, in America. To a city at the base of a high cliff, built of clay which crumbled centuries ago into dust. The wall is left perhaps as it was two centuries ago. A dry well. A carving upon the rock. A windless place occupied only by horned toads and perhaps one other misshapen thing."

At three o'clock they had stopped again to eat; they were able to see in the west the tops of distant mountains marked by a deeper, duller blue than the thin cloudless rotunda of the sky. An hour later they came within sight of the tableland upon which these mountains were set like piles of food upon a giant's doorstep. And this step up—this mesa—with its precipitous edge, marked the end of the desert.

"The cliffs that rise to that tableland are impassable," said Peter, with his eyes alight and his voice filled with excitement. "The city was built below their protection around a great well and walled in front with thick fortifications. We shall see them, Brena!"

He looked at the opening in the high wall as if it were the maw of Destiny opened to belch forth upon them a sentence.

"Tell me, Peter—are there dangers there? Do you know?"

"I only guess," he answered. "I think there are none. I think, Brena, that beyond that wall there is freedom for us—life for us—a message for us."

"I must go with you."

He nodded.

At the entrance he stopped, gazing down at the ground—the film, the blanket of fine dust. He uttered an exclamation.

"What do you see, Peter?"

"I see a record in the sand."

"What record?"

"We shall see more," he said grimly. "Come."

Toward this memorial of tragedy, of death, of decay, of the insignificance of time, of the inconsequence of an age of man, Brena and Peter, like two creatures of a moment of life, walked with solemn, awed faces.

"Look!" said Peter suddenly. "Have you your nerve? Look!"

He pointed to a pile of charred bones lying close to the well. Among them was a piece of human skull blackened as if by fire.

"Wait," Peter commanded.

He went forward, bent over the ghastly pile, kicked the sand that surrounded it, stooping down each time and lifting it, and uncovered a number of objects into the cup of his hand.

"This was no prehistoric man," he said solemnly. "See! The eyelets and the nails of shoes. The leather long ago vanished. Here are two mother of pearl buttons, a pocket knife, coins, the snap on a wallet. This man lost his life, Brena, many years ago."

She tried to speak, wetting her dry lips with the tip of her tongue.

"There are things of gold, too," said Peter. "Keep your nerve, dear. Look at this!"

He held out in his trembling fingers a signet ring with an H deeply engraved upon it.

"That!" exclaimed Brena with horror. "It was his!—Jim Hennepin's. This is—him?"

"Yes."

Brena moved toward the pile of bones half consumed by fire; then she stopped and looked away.

"He was killed," she said. "He was shot or stabbed."

"No," replied Peter grimly. "It was worse than that—more ghastly. He was killed. But it was not by human hand."

CHAPTER XVIII

—

"Brena, I want you to stand here by this old well without walking away from it a moment," said Peter, taking her by the shoulders and looking squarely into her dark eyes. "I'm going to leave you alone a minute. It's not pleasant. I want you to do it just the same."

"Where are you going?"

"Outside the wall again. I've seen something there that you did not see."

Brena shivered.

"Don't be afraid, dear," he said. "We have had—both of us—the lesson of futile fear. Once we told each other that fear was a crime—a terrible waste. We are on the verge of learning how terrible a waste it can be."

She put her hands in his; with a smile she said, "You see, Peter, I am in the dark, dear. But just the same I'll do as you tell me."

As he walked away from her, his head bent forward as if meditating, she leaned back against the hot, flat face of one of the huge stone blocks of the well curb, following him with her steady gaze. He disappeared outside the old wall, and as he vanished, so vanished all that attached her to the living world. There was no sound, no motion within the range of the senses; the place of death was still.

From the tablelands above, a lonely buzzard had come swooping down on wide black wings, dipping and turning, with one eye cocked down, as if sometime before he had picked bones in this inclosure and had returned to the scene of gruesome feasts. Black, ill-omened, carrion creature that he was, Brena felt glad that he had come—a thing of life and motion—into this place of vast dimensions filled by the silences and rigidity of death. She

"It Is There—Here in the Sand—a Record," He Said. A Ghastly Record."

watched the magnificent grace and power of his flight until Peter's voice broke the silence again, and, flapping toward the west, the bird began to circle up whence he had come.

"Brena," said Peter, who came to her with an expression drawn as if with some stress within.

"Yes?"

"Sit down with me here where these blocks cast a shadow, dear. I will show you what I have found—a thing like the writing of a giant finger of justice—here in the desert. But first I want to tell you a tale, Brena—true, revolting and terrible."

"Tell me," she said, sitting with her elbows on her knees.

"It is of surprising brevity, Brena," he asserted. "Its simplicity is the thing that makes ridiculous the many things I expected, all the nightmares of the unknown. I told you, dear, that I was no Master Mind—no Great Analyst in capital letters. I was right. I stumbled onto the trail. I used my head. That's all."

He stopped to think.

"And yet the simplicity is hideous!" he said.

Brena glanced toward all that remained of Jim Hennepin of Virginia—the blackened fleshless relics of his existence.

"He deserved it, perhaps," said Peter pointing. "He tried to cash in his knowledge."

"You told me last night of the superstition of buried treasure here," she said. "You mean that?"

"No, not exactly," said Peter. "I picked up the trail in the house where Parmalee took you. Two old books; and maps of this country and of this place were missing from both. One Parmalee took when he went away. The other? Well, I began to wonder about the other."

"You thought it must have been used—before."

"Yes. It had been used and probably destroyed. It was used by one man to toll another to his death."

Brena leaned forward.

"I began to be sure, Brena, when I found that expert knowledge pronounced that the writing on a check made out by the one man who led the other to his death here was written by the same hand that, with an attempt to disguise, had written the words, 'This Sign,' on the scrap of paper Jim Hennepin left with you and that you gave me. I'd better tell you that when I first took that check it was because your indorsement was on it. I wasn't sure, Brena—of anybody."

"I understand," she said. "I understand. And the scrap of paper was a part of the bait?"

Peter raised his hand as if to say that he wished to go on in his own way. "It was chance too that led me to the motive for ridding the world of Hennepin. That miserable man had become a menace. He knew too much. He knew of a long series of embezzlements from a certain estate in Texas. A capitalist had bought vast quantities of something—on speculation—and his agent after his death deceived the executors as to the extent of his holdings. I have had a clew from an old account book sifted to the bottom."

"And Jim Hennepin knew?"

"Knew and began a merciless blackmail, threatening ruin. I can see him now, insatiable, hungry, losing in speculations, asking for more, hounding a man who was balancing between success and failure and always hinting at bankruptcy and the penitentiary."

Peter went on. He told of the probability that Compton Parmalee, the hounded man, a physical coward, but resourceful and ingenious, had come upon an old volume describing this lost city of the desert. There were traditions of vast wealth hidden there. Parmalee had pretended to the possession of knowledge confirming it. He had shown old letters, the scrap of paper with the Kuk-ul-can symbol. He wanted to take the blackmailer to a place from which he would never come back.

"To kill him?" asked Brena.

"No," replied Peter. "He hadn't the courage. He feared that. He feared the work. He feared the result. He had a better way."

"And how?" she asked.

"It is all there—here in the sand—a record," he said. "A ghastly record. Seven years have gone, but in this deep fine dust, Brena, there still remains the story."

He paused; he lit a cigarette; went on. He said, "There around the entrance are the marks of horses' hoofprints—almost lost—but still readable—three horses, two saddled and one carrying the packs. They came in two horses abreast, and the pack horse led behind. Two men in the saddles. Night came on. One man slept. The other crept to the animals and he rode away."

"Rode away? Left Jim Hennepin here?"

"Yes, beyond hope—no horse, no water."

"How do you know?"

"Because, Brena, when the three horses went out into the desert their footprints are in single file—one man led the other two. I will show you. It is in the sand—a record and a good guess."

He was silent and he broke his silence with a cry.

"I can see him—Hennepin—awakening, realizing, seeing far away the little galloping specks in the pale moonlight with the treacherous man upon the leader—a tiny bobbing figure. I can hear the curses hurled after them. And he—the one left—alone under the moon, alone under the sun, alone under the moon again—without a drop—rushing out into the desert, only to be driven back to the shade after weary marches dragging through the sand, hunting among the rocks, crazed with thirst, gone mad, cursing, blittering mad—his tongue black—the end—perhaps a thought of you—the cur!"

He looked up at Brena; he set his jaw.

"I'm sorry," he said. "But I can see it so clearly—the terrible retribution in this place of silence. His screams echoing back from the rocks, his curses rising into this thin pale-blue sky and the vultures swing overhead."

"Seven years ago," she whispered.

"Yes, seven years. And four years of torturing fear—that was the pay of the one who rode away."

"Compton Parmalee?"

She said it without any external sign of emotion.

"Yes," said Peter. "He had succeeded in wiping out one blackmailer. But another, more terrible, sprang up—fear."

"He feared discovery?"

"Yes, and something else. He could never feel sure that Hennepin was dead. That was the curse upon him—the fear the murderer feels, twisting and alternating with the fear of a physical coward who ever hears those threats, those curses, those promises of vengeance coming across the moonlit desert as he rode away that night."

She shuddered.

"Yes," said Peter. "That was why Parmalee destroyed the map. He had probably ridden back to some other settlement after shooting Hennepin's

"I Can See Him—Hennepin—Awakening, Realizing."

horse in some gully and he wanted to wipe out all evidence. For months he resisted the temptation—that burned and scorched inside—to see you."

"To find out whether I had been told anything about Hennepin's destination? And then when he wasn't sure—when there was that scrap of paper not accounted for—! Peter, it is too horrible; he proposed that strange marriage agreement in order to go away and take me with him. He was afraid I might remember some word—give some clew."

"No," replied Peter. "It was that of course. But that was not all. The spark of real man that you saw in him was there, Brena. Terror put it out at last, but the real tragedy of Parmalee was that he had that redeeming spark."

He waited for her to look up again; she had been staring down at the yellow-gray dust.

"I suppose you can see," he went on. "I suppose you can see now what was in his mind. Two pictures. One was the picture of Jim Hennepin alive—that great muscular athlete who drank hard, who had the false traditions of the South, the love of death oaths, the degenerate temper, the sly smiling ways of carrying a vengeance through. He saw him escaping from the desert. Brena—heaven knows how—but escaping by some desperate effort, some chance, some miracle, some way that Parmalee's brain could not conceive, but yet couldn't be put out of range of possibility. He saw Hennepin seeking him. Yes, he saw it—a picture—a thousand haunting pictures—Hennepin with his malicious, desperate, haunting eyes and his terrible muscles. He saw him smelling along the trail for his quarry. He saw him walking about a quiet picture gallery, and, suddenly seeing your portrait and realizing that Parmalee had taken you, turn red with renewed wrath which would send him out for a knife."

"At last that imaginary Hennepin became almost a reality," said Brena. "He shot at him once—at a reflection in a piece of glass. He kept Paul because Paul was a brute who would fight. He was afraid Hennepin would send some assassin to get employment as a servant. He never knew when Hennepin might come—and kill."

"But he saw the other picture too. He saw the buzzards hovering over what was left of Hennepin, he saw a whitened skeleton grinning up at the sunlit sky and at the stars, Brena. That's what he saw. And some day some one would somehow come there. Perhaps some one had been there already. Perhaps at the very minute a prospector, dirty and unshaved, or some accursed archeological explorer from a university was in that very town where they had bought the horses and was telling of the skeleton and of finding the skeleton of the riderless horse with the bit still held between the white teeth. He might have that bit in his pocket. Some one recognizes it. Somehow the chain once started never ends until—"

"There comes a hand upon the shoulder," said Brena, as if in a dream, "and a voice saying, 'We have looked a long time for you.'"

"Yes. There wasn't one fear," Peter said, marking two lines in the sand with his forefinger, "There were two fears. They fought each other and their battleground was Parmalee's soul. It was trampled into a wallow of terror, of questioning, of doubt. Do you know, Brena, that somehow there creeps into me a great pity for him?"

"If he had been able to put his finger upon some button that would have blown him to bits he would have taken that way," she said. "But he had an exaggerated instinct for self-preservation. It threw him back from any approach to suicide."

Peter, getting up, came to her and put his hand upon her shoulder as if to give her strength. She had spoken with a voice too evenly measured to deceive him as to the strain she felt. It had been a long pull for her, he thought. The last steps, though they might lead out into the sunlight of freedom, were upon rough ground—rough even for a man. He was wondering how he could save her from pain. He wanted to have this surgery over, and to have it over there was only one way.

"It was inevitable that he would come here—in the end," he said. "He had to see. He had covered his terrors by a cowardly process of trying to make you believe that some mystery that clung to you was the cause of them. He began to fear disclosure. He feared that he would allow you to know in some mad moment. He was coming to the end of his rope."

"Yes, the end of his rope."

Peter stopped and looked up at the ugly symbol of Kuk-ul-can carved on the rocks.

"He procured a copy of Father Carlos' map a second time," he said. "He had to have it to find the way. After four terrible years he revisited the Pueblo Mesculero, two hundred miles from nowhere. It called him back. He had to come."

He stopped again, looking at Brena, whose palms were pressed against her knees, whose face with its wonderful profile was still held uplifted looking into the vast distances of the desert, her lips closed, her eyes unseeing, like some carved diety who had been sitting thus for centuries.

"He bought a high-powered car Brena," said Peter. "And all alone he came."

"And where is he now?" she cried out at last, in sudden disclosure of her pain. "Do you know? Where is he now?"

She looked searchingly at Peter's sun-bronzed face, where upon the surface of youth lines of strength had been engraved by war, and lines of tenderness perhaps by a great new understanding of love and life.

"He is here again," he answered "He is here. . . . Do you understand?"

CHAPTER XIX

—

"I understand," said Brena.

"Then come with me," Peter said holding out his hands. "I will show you all that remains—the record—the story written on the sand and dust.

He led her again toward the charred bones; he found no resistance in her.

"Look there, Brena. Do you see the footprints? Here are yours and mine. But look again on the sand. There are others, too. A thin veil of dust is over them. They move here and there; they criss-cross and move away. They are the footprints of Compton Parmalee. He has come to stand gazing down at the white skeleton—white as oyster shells."

"Blackened," she said.

"Wait!" Peter said. "There are the spots where he stood looking down. He had his answer; no living Jim Hennepin of Virginia would ever fill him with lead. And as he stood, Brena, perhaps gazing down for a long, long time—because his footsteps are lost in that stew of impressions—he was filled with all the concentrated terror that I suppose only a murderer can know. He went into a crazy wild panic of fear. These bones were his—the grinning skull. They must be hidden."

"How do you know all this?"

"Because he has moved toward this old well. He reached the stone well curb. He sprang up. Do you see the marks? He found the mouth choked with massive blocks. Nothing could be hidden there! His track moved back."

"Go on," said Brena.

(TO BE CONTINUED.)

Dangers to Gems

As pearls consist of carbonate of lime, vinegar and other acids will eat away the polished surface in a short time. Hot water is fatal to an opal, destroying its fire and sometimes causing it to crack. Soap is a deadly enemy of the turquoise. If a turquoise ring is kept on the hand while washing in a short time the blue stones will turn to a dingy green.—Popular Mechanics Magazine.

Elephants of Africa do tremendous damage to native farms.

All Other Remedies Failed

The Test of Time Proves the Value of

PE-RU-NA

Under the date of March 6, 1902, Mrs. Maggie Durbin, 139 Riverside Ave., Little Rock, Arkansas, has this to say about her experience: "I was troubled for five years with a chronic disease. I tried everything I heard of, but nothing did me any good. Some doctors said my trouble was catarrh of the bowels, others consumption of the bowels. The medicine I took did no good. A friend advised me to try PE-RU-NA. I did. After taking two bottles I found it was helping me and continued. Am now sound and well."

A letter from Mrs. Durbin, dated December 12, 1923, shows that, even after twenty-two years, she is in the best of health: "I still recommend PE-RU-NA to my friends who need a good medicine and everybody is pleased. I thank you many times for what PE-RU-NA has done for me."

There is nothing strange in this experience of Mrs. Durbin. It has been repeated thousands of times by sufferers from catarrh and catarrhal diseases.

For sale everywhere in tablet or liquid form

Send 4 cents postage to the PE-RU-NA COMPANY, Columbus, Ohio, for booklet on catarrh.

RADIO

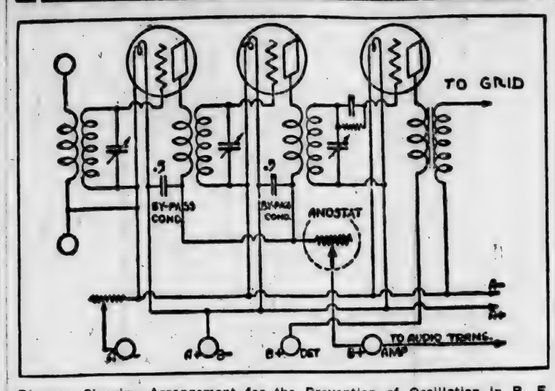

Diagram Showing Arrangement for the Prevention of Oscillation in R. F. Sets, Using the "Anostat" Combination Control.

By HARRY J. MARX, in New York Herald-Tribune.

Resistance is an inseparable factor in all electrical circuits. It may not be there in the form of a rheostat, potentiometer or other piece of resistance apparatus, but every part of the circuit, whether it is just copper wire, connections, condensers, coils or any other unit, has some resistance value. It may be great or small, as the case may be, but it exists and is a factor in the circuit. Copper wire is a good conductor, meaning its resistance is low, while a noncondenser simply means something that has a very high resistance.

Present-day radio apparatus is so designed as to reduce as far as practical all resistance in the tuned circuits.

Oscillation.

This elimination of surplus resistance permits much sharper tuning and, therefore, improves selectivity. But in radio-frequency circuits it multiplies the tendency of tubes to go into oscillation, producing the assortment of squeals, howls and whistles which not only come out of the loud speaker, but back up and go out in the air to play havoc with the neighbors' reception.

The old and incorrect practice was to add a potentiometer in the secondary circuit of the radio-frequency stages. This was equivalent to replacing the resistance back into the apparatus. It reduced the oscillation tendency, but it likewise killed the selectivity that was desired and in addition materially reduced the volume. Resistance should not be added where it becomes an integral part of the radio-frequency circuits.

The fundamental cause of oscillation is due to a great extent to the amount of voltage across the plate circuit. If this voltage is controlled so that it can be adjusted to a value just below the point where oscillation starts then radio-frequency amplification can be used to full advantage. But this control must not be such as to add resistance in the tuned circuits.

Plate Voltage Control.

Oscillation can be effectively prevented if a variable resistance is connected in series between the plate or primary coils of the radio-frequency transformers and the "B" battery to prevent oscillation by reducing the plate voltage on the radio-frequency tubes. Now, by connecting a one-half mfd. condenser between the "B" terminal of the primary on the radio-frequency transformers and the filament terminal of the tubes, this artificial resistance can be shunted out of the tuned circuit. This condenser closes the plate circuit to the filament of the tube for the radio-frequency currents. In other words, on account of the condenser these currents do not have to pass through the resistance—hence the resistance does not affect the tuning and selectivity.

This variable resistance provides a means of reducing the plate voltage and therefore controls oscillation. This means of controlling oscillation was first utilized commercially by E. F. Andrews in the deresnadyne receiver.

The "Anostat."

Engineers have now developed the use of this by-passed plate circuit resistance as a volume control, as well as an oscillation control. This is done by using an extremely high variable resistance having a maximum value of several megohms. The circuit is just the same as for the control of oscillation. The first part of the resistance can be used for oscillation control, and the high resistance part for controlling volume. Volume can thus be adjusted without the slightest distortion, and with great saving in "B" battery current.

A combination control which may be used for this purpose is known as the "anostat."

Things for Radio Fan to Know About His Set

Radio receiving troubles are caused by installing unmatched parts.

An aerial that is badly corroded can be cleaned with a rag saturated with gasoline.

All circuits must be at least slightly regenerative to obtain maximum distance and volume.

When working about the set, always throw off the switch and disconnect the battery wires from the batteries.

Spliced wires should be soldered, to insure a permanently good electrical contact. The wire corrodes in time, making the contact less conductive, and causing loss of signal strength.

To find the positive and negative posts on a storage battery, dip the wires in a dilute solution of salt in water. Bubbles will form most copiously on the wire attached to the negative terminal of the battery.

Tube Is Not Governed by Brilliancy of Filament

The effective operation of any vacuum tube is not governed by the brilliancy of the filament. As a matter of fact, one should never use the brilliancy of the filament as an indicator that the tube is working properly. Modern vacuum tubes have a coating placed over the filament which greatly increases the electron emission. The filament merely serves as a heater to generate the emission of electrons. One will find that with tubes using the coated filament the life of the tubes is not governed by the filament burning out, but by the loss or deterioration of the coating on the filament. When this happens the tubes will remain lit, but no signals will be heard.

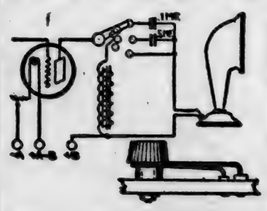
Should Drill Panels in Horizontal Position

While the radio builder naturally places his panel flat on the bench while he drills it, sometimes the bench is so cluttered up with tools and miscellaneous parts that it seems more convenient to clamp the panel vertically in the bench vise. This practice should be avoided because there is always a tendency for the holes to drift downward away from the center punch mark just as the drill starts to cut in. The error produced in this way is usually less than 1-32 of an inch, but this is often enough to prevent, for instance, the mounting of a condenser.

Speaker Connections That Will Vary Pitch

Many radio listeners find that the pitch of the music received is above or below normal. An impedance placed in the speaker circuit will raise the pitch. With a switch to cut in condensers of different sizes as shown, the pitch may be varied at will.

Three changes are shown, the upper position with the smallest condenser giving the higher pitch. The lower position with impedance and condensers cut out and battery feed through the speaker gives the lowest tone. The switch requires two arms, the contact edge of the lowest being filed down to give clearance from the upper. The inner contacts should be smaller than the outer and spaced as close as possible to each other.—Radio Digest.



Switch to Cut in Condensers to Control Pitch.

"Kilocycle" Is Taking Place of "Wave Length"

A new word, "kilocycle," gradually is taking the place of the word "wave length" in the vocabulary of radio fans.

The Department of Commerce has explained that the marking or logging of dials is found to have certain advantages in the new term "kilocycle," which means frequency, or the number of waves per second.

"Just as a musician," the department said, "can vary the number of oscillations of his vocal cords, but cannot control the length of the sound waves, so a radio station can vary the number of oscillations per second, and let the wave lengths be what they will.

"To obtain the frequency when the wave length in meters is known divide 300,000 by the wave length in meters. The answer is in kilocycles. Likewise, the other way round, divide 300,000 by the number of kilocycles to get meters."

HOW

STATIC ELECTRICITY CAN SET MOTOR CAR ON FIRE.—Do you ever wonder why it is that gasoline trucks have a chain hanging down to the ground when they travel along and when they stop? This is done, says the accident prevention department of the Chicago Motor club, to get rid of static electricity, which otherwise might set fire to the tank.

Static electricity in connection with gasoline is a subject which should be more familiar to motorists, as an element of danger is involved. In proof of this the accident prevention department cites the case of a naval surgeon whose automobile was destroyed and its owner severely burned through the firing of gasoline by a spark produced by frictional electricity. The surgeon had walked some distance to his garage in his overcoat and rubber boots. The friction of the flopping coat against the boots generated the electricity, while the rubber insulated him from the ground and allowed his body to store it. The spark therefore went through the grounded automobile, igniting the gasoline.

Another case is cited of a chauffeur who hung an ordinary five-gallon can on the iron hook of the gas pump. The gasoline had been pumped when a spark jumped from the can to the pump and fired the gasoline. They put out the fire, and as the car was waiting to be filled they repeated the process and the gasoline caught fire again.

How Sounds on Steel Can Now Be Recorded

A man sitting in an office in Berlin, Cape Town, or Peking may soon be able to dictate a letter that will be heard and taken down instantly by a shorthand writer in an office in London.

This is one of the startling results of an invitation perfected in a Berlin laboratory. The invention, which has taken 18 years to perfect, consists of recording and storing sounds on steel. The sounds are recorded on a steel wire by electro-magnetic means, so that the wire bears no surface markings of any kind and can at any time be "emptied" of its sound contents in readiness to receive others.

The wire can be connected with any telegraphic cable, which conveys the sounds farther. It is predicted that within a short time every newspaper correspondent in the world will be able to dictate his articles direct to his office.

To empty the wire is a very simple matter: one simply reverses the process and re-transforms the magnetic waves into ordinary sound-waves.

Instead of being "emptied" for further use, says a writer in Science, the charged wire may be disconnected and stored up, when it will, on being reconnected, repeat its sound contents as often as desired. The life of such a sound wire, unlike that of a phonographic plate, is limitless.

How Winds Are Caused

Winds are produced by a disturbance of the equilibrium in some part of the atmosphere; a disturbance always resulting from a difference in temperature between adjacent sections. Thus if the temperature of a certain extent of ground becomes higher, the air in contact with it becomes heated, it expands and goes toward the colder or higher regions of the atmosphere; whence it flows, producing winds which blow from hot to cold countries. But at the same time the equilibrium is destroyed at the surface of the earth, for the pressure on the colder adjacent parts is greater than on that which has been heated, and hence a current will be produced with a velocity dependent on the difference between these pressures; thus two distinct winds will be produced—an upper one setting outward from the heated region, and a lower one setting inward toward it.

How Old Egyptians Lived

In the tomb of Antefoker, vizier of Sesostris I, one of the great pharaohs of ancient Egypt, found at Thebes in 1916-17, there are two drawings showing how the Egyptians between the years 1980 and 1935 B. C. cooked and how they warmed their rooms. One picture shows butchers slaughtering a bull, carving it into parts like those displayed in a modern butcher's shop, and the manner in which the meat was cooked. The meat was held in a frame by spikes and hung in front of a charcoal grate, to which a bellows was attached. This cooking appliance resembled a modern roaster used for the cooking of game and poultry.

How Rain Is Formed

Water vapor—i. e., water in an invisible gaseous form—is the only atmospheric gas that plays a distinctive part in the production of weather, says Nature Magazine. Besides being the source of clouds, rain, snow, dew, etc., it influences the temperature of the atmosphere in several important ways. The amount of it found in the air varies greatly from place to place and from time to time, ranging from a small trace to more than 4 per cent of the volume of air.

Among the NOTABLES

NELSON MILES

NELSON A. MILES, one of our greatest soldiers, was born in Massachusetts August 8, 1839, and lived through some of the most wonderful events the country has ever seen.

When he was in his 'teens, he went to Boston and found employment in a crockery store—a tame enough occupation. But he had studied military science and, when the Civil war broke out, he raised a company of volunteers and enlisted with them as their commander. That ended his mercantile career and began an extremely illustrious military one. He fought through the war, though wounded a couple of times, and steadily rose in rank, being decorated for services at Chancellorsville and at Fair Oaks. By the end of the war, he was in command of an army corps.

But there was more work left for a man of his abilities. He was sent out to subdue the Indians—indeed, he got the nick name of "Indian Fighter Miles." He brought the Cheyenne and the Comanche Indians to terms, chased the famous Sitting Bull over the border into Canada, and conquered the terrible Apaches. He was sent abroad as the country's representative to attend Queen Victoria's diamond jubilee, and, a year later, was nominally in charge of the military operations in the Spanish-American war. Actually, though, he directed the almost unopposed Porto Rico expedition, doing some very wonderful sanitation work in the islands afterwards.

(© George Matthew Adams.)

Time's Heavy Hand Had Made Changes

Two brothers, who thirty-nine years ago in their home in Germany looked so much alike that their friends sometimes confused them, met recently in Massillon and failed to recognize each other until they were introduced, says the Canton (Ohio) Repository.

They were Henry Laschinske, of Canton, and his brother Carl, who had just come to this country with his family. When the former came to America thirty-nine years ago he was twenty-two years old and left his nineteen-year-old brother, Carl, at home in Germany. The arrival of the latter and his family in this country was unannounced. When the two met at the home of Miss Mary Kutrib, of Massillon, neither knew that he was face to face with his brother.

They chatted for some time before Miss Kutrib introduced them to each other as brothers. Then they lost no time in calling up boyhood memories.

THE KITCHEN CABINET

(© by Western Newspaper Union.)

There are two worlds; the world that we can measure with line and rule and the world that we can feel with our hearts and imagination.—Leigh Hunt.

MEALS IN THE OPEN

With the auto at the door of nearly every family, meals out of doors are so much enjoyed that the work of packing a basket for the family is little compared to the enjoyment it gives. If tired mothers would do this more often, it would bring rest and refreshment. Let the children help; doing things for a picnic will be play for them and it will teach them responsibility and helpfulness. More children and husbands, too, are spoiled by too much waiting on; take a little for yourself, before a breakdown comes.

If there are dishes to be washed, let the family take them to the brook or lake and wash and dry them. Now, with such a variety of paper dishes, one need carry very few heavy dishes. A small bonfire will dispose of all rubbish and leave everything tidy for the next picnic party. Of course, a true sportsman pours water over a fire even if it seems well burned down; that is the only safe way to leave a fire—entirely extinguished.

For the meal, it may be just as simple as one desires, or as elaborate. Roast potatoes and frankforts are wholesome and hearty and not hard for a novice to prepare. Beefsteak is delicious, broiled over a wire broiler or cooked on a camping stove.

Scrambled eggs need a frying pan, hot sandwiches may be toasted on the sheet iron, hamburg steaks may be fried, and any number of things cooked on it, besides making a place to cook coffee.

Fresh salad prepared at home and carried in sealed jars, is always a welcome addition to any outdoor meal.

Thermos bottles are another great convenience; they will carry either hot or cold drinks.

The real fun of an outdoor meal is having the fire and doing the cooking over it.

Green peas, cooked and seasoned with cream, carried in a sealed jar, will always be eaten to the last pea. Green onions with plain bread and butter, with the peas, will make a good meal.

WHY

People Attach Value to "Bits of Stone"

What is the most valuable jewel?

What effect has fashion on the price and cutting of gems?

What stones need the most care?

How should people take care of their jewels and will water harm them?

How may a pearl be restored to its original luster and shape?

These are questions often asked of experts, writes R. Clifford Black in an article in Popular Science Monthly in which he tells of a number of facts about jewels astonishing to the layman.

Just what causes people to attach such value to gems is one of the mysteries of human nature. Money has changed during the centuries, but the value of jewels has remained fairly constant. In times of uncertainty fortunes sometimes are saved by converting money into jewels.

Nine persons in ten, if asked to name the most valuable jewel, would say "diamond." The fact is, though, that in a table ranking gems in the order of their value, carat for carat, the diamond has fourth place. Both emeralds and rubies are much more valuable, while the pearl, because of the difficulty in matching, is far above all others.

Increased demands for precious stones and changes in the mode of dress influence both the price and cut of gems. At present the style is to cut in the square or emerald shape. Twenty-five years ago, when curves were fashionable, round jewels were most popular.

Pearls need far more care than any other gem, for they are an animal product, and easily destroyed. The opal also requires great care. Made of silica and water, it is very fragile. It was probably because of this that the superstition of bad luck is associated with it.

Water as a rule does not injure precious stones. Diamonds, rubies and sapphires can pass through fire without injury. It is comparatively easy, though, to destroy both diamonds and emeralds. They will shatter to bits if struck sharply. Face powder is bad for pearls. It clogs up the pores of the pearl's skin, just as it does those of the human skin. One should never wear pearls when sleeping, either. At night the largest percentage of acid is thrown off the body and this dissolves the pearls.

Pearls are restored to their former luster and shape by a process known as peeling. A pearl is made in layers, like an onion, and these outer layers can be removed until the pearl has become round again. The peeling process is a most delicate task. It is done with the fingernails and a sharp knife, and only a few men in the world know how to do it.

Why Nature Has Made Difference in Ankles

Why is an elephant's ankle so thick, and a mouse's so slender? The answer is bound up with the same facts that would make it impossible for a human giant 60 feet tall to take two steps without breaking both his legs. Explanations of some of the riddles of size and proportion in animals were set forth by Dr. J. B. S. Haldane, one of the most famous of English scientists, and author of the well known book of scientific prophecy, "Daedalus," addressing the British Association for the Advancement of Science.

The 60-foot giant imagined by Doctor Aldane would weigh about a thousand times as much as an ordinary man—say, ten tons—while the space on his thigh bone where muscles could be attached would be increased only a hundred times. The poor ogre would thus be vastly too heavy for his legs, and would infallibly collapse from sheer overweight. So that when we have a really heavy animal, like an elephant or a rhinoceros, he must have his bones and joints greatly thickened and strengthened to support his weight.—Science Service.

Why the Sea Is Blue

Holiday-makers are sometimes disappointed to find that the sea is not colored that beautiful azure blue which we love. A glass of sea water is perfectly transparent and colorless, yet the ocean is often colored any shade from yellow to purple.

It is the salt in the sea water which causes the blue color, for all the innumerable small particles of salt in the water filter the sun's rays and reflect the blue light. Seas which contain a large proportion of salt are colored the deepest blue. The Mediterranean, for example, which is rich in salt, is perhaps the deepest blue known. And the Pacific ocean is dark enough to be called indigo.

Why Moon Affects Hair

"Has the moon any effect upon the growth of human hair?" asks a correspondent. A well-known astrologer declares that it has. He states that if the hair is cut when there is a new moon it grows twice as quickly as if cut when the moon is a dying one. Although this authority has a luxuriant growth of hair, he has it cut only four or five times a year, always when there is a dying moon.

Why Bright Easter Colors

The use of bright colors at Easter is symbolic of the rays of the aurora and the dawning hues of the Easter sun. Purple is largely used because from a very early period it was one of the most highly prized of all colors.

Every Day In the Year

Good News for Radio Fans:

This is the only Dictionary published which devotes a Special Section to Radio. About one thousand words most commonly used in this popular science are here defined. Newspaper and Magazines carry items concerning Radio in practically every issue. Here for the first time is presented a source of information regarding that which you read about and makes words readily understood—the words and terms used in Radio. This one vocabulary alone is worth more than the price of the book.

FLYING FLASHES

To err is human; also to lie out of it.

Sufficient unto the day is the evil of yesterday.

Hunger is the mother of impatience and anger.

One doesn't mind being lied to if it doesn't matter.

If you find a horseshoe these days you are lucky.

Duty takes a good deal of enjoyment out of existence.

Earth has no sorrow that heaven cannot heal.—Moore.

Successful life is doing the best you can with the circumstances.

The charity that begins at home is too often expended on ourselves.

Half the spirit of a minority is enthusiasm and the other half, fury.

To be of use in the world is the only way to be happy.—Hans Andersen.

The guilty are alarmed and grow pale at the slightest thunder.—Juvenal.

Being tolerant toward opinions that you hate requires a strong sense of fair play.

The worm turned and lost out, while the tortoise continued straight ahead and won out.

When our hatred is violent, it sinks us even below those we hate.—La Rochefoucauld.

In the superheated summertime, why can't we condense and pack down this heat for use in winter?

In this rich and well-ordered world, there are so few times that you can bestow a favor on anyone.

Would Seem Last Word in Submarine Travel

Mr. Harold J. Dartnall, a naval architect of Southampton, England, has invented a submarine investigator, a form of craft similar to a submarine. It is, however, much smaller, and can be constructed at a small cost.

It possesses the power to run on the surface, to dive to any desired depth and run level there, and return to the surface at will.

The necessary illumination for seeing objects at such depths will be provided by powerful electric lights on the outside of the "investigator." One for examining the suitability of the sea floor for resting will, of course, be inside, and show through the glass observation floor at the bottom of the vessel.

Telephone communication with the towing vessel will be provided.

It is claimed that the craft will be of great value in obtaining marine photographs, specimens of life by means of trap nets, and in directing salvage operations beyond the depths at which divers can work.

"Hungry Hearts"

I had been writing and starving for years. My stories, which appeared in the magazines from time to time, had been gathered together and published in a book called "Hungry Hearts." Although reviewers praised it, my royalties were so small that it brought me little money and almost no recognition. People who read a book little know what small reward there is for the writer while he is still unknown—of his often solitary, starved existence. A book read in one evening may have taken the author years and years of the most agonizing toil to create—Anzia Yezierska, in Hearst's International-Cosmopolitan.

Found Treasure in Dive

One of several boys who went swimming in Dry creek, near Dobbins, Cal., diving to the bottom struck his head on a pail. With the aid of his companions he dived again and brought up the pail, which was found to be filled with nuggets and gold dust. On the side of the pail was the illegible name of a miner and the date "1868." The top of the pail was caked with dirt, holding the treasure intact.

Brobdignagian Rights

Formation of the Association of Tall Men, who want longer sleeping accommodations when traveling, has won approval from London, where it is remembered that Lascelles, "the Magdalen giant," crossed the Atlantic in two cabins converted into one so that he might stretch himself in bed.

Fat Boy

A boy who died recently in France at the age of fifteen was 5 feet 2 inches tall and weighed 375 pounds, and his shirts required seven and one-half yards of material.

Planes on First Stage

Airplanes have entered their first stage of progress as compared with automobiles. They take reliability flights just as automobiles used to take reliability runs.

Marital Maze

Peter Jersen of Hammersmith, England, recently married Miss M. Chandler, whose sister and brother were married to the groom's brother and sister.

GEORGE MARSH

This author-lawyer-soldier, native of New York state and distinguished resident of Providence, R. I., brought the lovers of wild life and romantic fiction pertaining to the same, to strict attention with his fine story of the northland, entitled "The Whelps of the Wolf." Prior to that he had written a number of unusual short stories of the Hudson Bay district and the rugged, adventurous people who dwell there. He has recently registered his greatest success with "The Valley of Voices," a truly remarkable tale of farthest outposts of the fur trade.

Mr. Marsh is a graduate of Yale university and of Harvard Law school, and he can write; indeed, he can! During the war he served as an officer both in the infantry and the air service, principally in the Meuse-Argonne campaign. He was a member for the U. S. A. of the aero convention of the peace conference. But his great forte is novelist, and we are pleased to have the privilege of introducing him to our readers through "The Valley of Voices," which will run as a serial in this paper.

MICKIE SAYS—

Stray Bit of Wisdom

The heart that is soonest awake to the flowers is always the first to be touched by the thorns.—Moore.

One "Wonder" Remains

Only one of the "Seven Wonders of the World" survives, that being the pyramid of Cheops at Ghizeh.

All-Powerful Love

If we love one another, nothing, in truth, can harm us, whatever mischance may happen.—Longfellow.

Latvia Forests Unexploited

Forests of Latvia are not exploited but the government auctions the privilege of cutting trees in various sections.

Christian Church Notes

Bible School at 9:30; communion service immediately following.

The Loyal Happy Hustlers Class had a very interesting Hallowe'en party at the home of Mr. and Mrs L. B. Meek, Saturday evening. Seventeen members and guests of the class besides eight children were present. The evening was spent in contests and games. The following luncheon was served: Doughnuts, pumpkin pie, fruit salad and cider. The rooms were beautifully decorated.

Dressed Weinies

A young lady who recently returned from a European tour was relating some of her experiences.

While in France, or Norway, or some place like that, she got so tired of fish she thougyt she'd die.

Imagine the thrill she had when, upon passing a delicatessen she spied some American sausages—regular honest-to-gosh weinies. She bought some and took them to the chef and told him to fry them—just like fish.

When she sat down to the table the waiter reported that her supper soon would be ready.

"We got along just lovely," the waiter said, "only you'll find there is not much left after we took the insides out."

Why shouldn't she be glad to get back to this side, where she can pick up this paper and glance over it, always finding the ad of our popular meat market, with all kinds of meats and everything—and—fish—if—she wants any more

HERE AND THERE

Receipt books on sale at News office.

People rich in experience are often poor in spot cash.

Unless your ashamed of yourself now and then you're not honest.

Mr. and Mrs H. M. Widney attended the dairy demonstration at Garrett Monday afternoon.

S. S. Widney went to Harlan Thursday to visit his sister and family indefinitely. His business will be cared for by Ye Editor.

Some days ago in the Biology class the teacher asked the class "What insect lives on the least food? One of the "Bright Pupils" responded: "The moth. It eats holes."

The chicken supper at the home of Mr and Mrs. Roy Koch last Saturday night was well attended, and the Friendly Bible Class of the M. P. Sunday School, wish through these columns, to express their appreciation for the generous response.

Penalty of Civilization

Heathen people are those who need fewest padlocks.—Baltimore Sun.

SPENCERVILLE

Jason Keyes and wife are now residents of their own property.

Dr. Baumgartner spent Monday and Tuesday at Peoria, Illinois.

McCall patterns are ordered through The News. Phone us your order.

Mrs. Zimmerman of Harlan, spent several days last week in the Jayson Keyes home.

Geary Glovd was an over Sunday guest of his uncle, James Dickson and family at Angola.

Daniel Bice, wife and daughter, of Fort Wayne, spent the weekend in the William Vallieu home.

Prizes were won Saturday night at the skating rink by Ada Bowser, Lucile Miller and Ralph Beams.

Mrs. Beatrice Miller is ill at the home of her parents, Gerry Wasson and wife. She is slowly improving.

Mr. and Mrs O. K. Shull and children and Ethel Mae Freeburn of St. Joe, were Sunday guests of Mr. and Mrs William Lucas.

The Studebaker automobile belonging to James Vallieu, which was stolen about two weeks ago, was found Saturday at Indianapolis.

Roy Zimmerman and family, who resided on the Graham farm west of town, were burned out and have moved on Mrs Cora Steward's farm near the depot.

Revival meeting began Sunday evening at the M. E Church. The leaders for the week are Ray Farver, Harvey Beam, Edwin Guthrie, Sol Goldsmith, George Watson, John Koch and Frank Odle.

Rev. and Mrs. Steffey and daughter, Miss Lillian, were called to Kokomo Friday morning on account of the serious illness of their daughter, Mrs John Rider. Later word came that she passed away on Saturday evening.

A party was given Friday evening to the members of the High School Glee Club by Mr. and Mrs. Ashby. Those present were Gale and Ada Bowser, Marjorie and Helen Furnish, Howard Beams, Irene Webb, Helen Volkert, Ercile Steward, Frankie Allen and Janice Wade.

A very pleasant surprise party was given Janice Wade Sunday when a number of friends went to her home to remind her of her fourteenth birthday anniversary. Those present were: Irene Webb, Galen and Virginia Goldsmith, Gladys Agler, Marcella Zimmerman, Frankie Allen, Erma Agler and Ada Bowser.

NEWVILLE

Rev. Lilly preached at the U. B. Church Sunday morning.

Mrs. Minnie Hatch spent a few days in Auburn last week.

Mesdames Vada Wyatt and Laura Washler and two daughters, spent Saturday afternoon at Hicksville.

John Miller and family spent Sunday in Garrett guests of Harry Fuller and family. In the evening they called on their son, Dewey and family at Auburn.

Mack Hatch of Lansing, Mich., were here the first of the week and his wife and her brother accompanied him to Lansing where the latter hoped to find employment.

The Hallowe'en entertainment and social given by the Newville school was quite a success. A large crowd was present. The pupils had on their Hallowe'en toggery and the program was fine. The proceeds are for the benefit of the school.

Aunt Julie Wyatt spent Saturday afternoon with Mrs. John Miller. Neighbors and friends came in to see her. Mrs. Wyatt has been sick for over two years. She expects to go to Cleveland, O., soon to spend the winter with her daughter, Mrs. Effie Burrows and husband.

Vital Changes in Season's Fashions

Timid negativism is the complex which seasonably distinguishes the chic from the not so chic. Semiannually it attacks each phase of the mode—couturier and critics and milady herself—and it is the saddest and most reactionary force in fashion. It is the quality which resists progress and attempts to translate radical changes into merely variations of old themes. When you read that the flare is merely a variation of the straight line, that the new elaboration is merely complicated simplicity, you are reading the timorous words of the pussyfooters whose negativistic comments turn daytime into darkness, asserts a Paris fashion writer in the New York Herald-Tribune.

There are seasons, of course, when the reactionaries ride high in their saddles, when the mode remains motionless and static, when the silhouette changes not a bit and the waistline rests smugly satisfied with its former habitat or status. You may remember the monotonous iteration of youth, straight line and simplicity in the days when the quiescent mesdames of the mode remained in a state of beatific somnolence. Those were the nurturing days of negativism, and they generated a reactionary attitude among the minions of fashion which still persists in many quarters no matter how strong the evidence of progress.

As a matter of fact the mode has completed and is now in process of consummating four vital changes and no woman who aspires to march with fashion's advance guard can afford to disregard any of them. First, the static line has been replaced by the flare—and do you remember the cautions of the standpatters last fall when the hemline flare was first introduced? That was a splendid example of the impending timidity to which we are referring.

Secondly, puerilism, misnamed youth eternal, has been banned from the ranks of the mature where it achieved some grotesque results during the several seasons of its dominance.

Simplicity Passes.

Thirdly, elaboration is now combating simplicity, which has been carried too far and continued too long, and while no modern maiden will ever swish through the avenues accompanied by anything like the encumbrances of her Victorian forbears, there is, nevertheless, a distinct trend among the creative spirits of fashion toward greater decoration, particularly in the evening.

Fourthly, a counter move against the overextension of the sports vogue has just been inaugurated, and while you may hear from many sources that

Brick-Red Velveteen; Gold Lace Collar, Cuffs; Sable Bands.

the sports mode is the essence of modern fashions, the handwriting on the wall is faint but unmistakably in contradiction. The sensitive leaders of the mode are headed in the direction of greater formality and the smart modern demoiselle will not continue to intrude the sports spirit into formal affairs.

Keep in mind this background when you select your new wardrobe. Inevitably you will see many models which incorporate the passing spirit as well as that which is about to come, and the selection, and your consequent degree of smartness, depend entirely upon your choice. Remember that the day of radical fashion changes is over—that the mode moves now in a subtle and more insidious manner and that it requires far more concentration to foresee and interpret its smartest moods. Where yesterday each new season sponsored a keynote that was easily apparent to all, the slower development of today's mode and the tremendous resistance to every new idea makes modern fashions extremely simple to follow but [illegible] difficult to lead.

Among some of the interesting costumes which have already been accepted in Paris is a model contributed by Captain Molyneaux, from which you may understand the tendency away from simplicity—consider the details and it will be quite obvious. Here is a dress of brick-red velveteen with a collar and cuffs of metallic lace and sleeves which puff from the elbow. Around the nether portion of the flared skirt—which incidentally portrays the swinging silhouette—there are luxurious and ample bands of sable. And the lady carries a muff, a singularly feminine performance.

A Renee Ensemble.

A typical Renee ensemble is not overelaborate and yet it has none of that affected simplicity which characterized the era of the chemise frock. The flare is present but dormant and only becomes assertive when the wearer walks. The dress portion is developed in chestnut brown satin with cloth bands of the same color interspersed. Numerous buttons

Mustard Yellow Crepe de Chine Worn Over White Silk Slip.

on sleeves and the front portion of the dress are covered with self-colored satin.

The coat portion of this ensemble is a decidedly more elaborate affair and it expresses the new themes of fashion in a bolder manner. Its flare is flaunting and its elaboration is smart and uncompromising. Compared with the mannish coats one will immediately sense its chic distinction. Developed in brown mixed kasha, it has a luxurious beaver collar, beaver cuffs and sleeve trimming as well as a circular beaver border.

A Chantal model emphasizes the distinctive qualities of the new season. Developed in mustard yellow crepe de chine of the heaviest quality, it is a splendid transition model for the girl who is still faithful to the sports tradition. The skirt flares moderately at the bottom, the waistline is marked and the sleeves puff from the elbow to right before the wrist. The embroidery which appears at the bateau neckline and reappears on shoulders, sleeves, waistline, bodice closing, and around the skirt consists of interlocking rings of the same color as the frock. A dress of this type should be worn over a white slip.

Built-in Elaboration.

The definite formality of the mode du soir is expressed in a Poiret dinner gown. There is an instance of built-in elaboration as distinguished from the elaboration which is imposed by means of trimming and various other appendages. Built-in elaboration is obviously a step in advance of the imposed sort, and it evidences the fact that the evening mode has almost recovered its ancient ornateness. No doubt the Paris Exposition des Arts Decoratifs had a great influence on the new mode, and you will see many instances of its effect in autumn fashions. A Poiret model is developed in black velvet and has an "ancien regime" bustle back formed by huge draperies of velvet which are held in place by diamante crescents. Diamante and pearl bands sound the solitary trimming note.

Have in mind the fledgling themes of fall when you proceed to acquire your costumes and do not be misled by any timorous comments to the effect that the new styles are no different from the old.

As usual, Worth's coats and wraps are particularly interesting. He shows them long, three-quarter and semi-three-quarter length and either straight or circular. Some of those which show the newest cut have a godet inlet under the arm that widens in a circular movement as it nears the hem, giving a graceful fullness to the skirt. Satin, cloth, kasha, cheviot, burafyl and suede are used for these coats and most of them are trimmed with fur.

Hoosier News Briefly Told

Rev. Flavian Larbes, O. F. M., widely known Franciscan missionary and author, died at St. Elizabeth hospital at Lafayette of a complication of diseases.

Methods of conducting township and county institutes and the future of this feature of educational work were the chief topics discussed at the opening session of the semiannual meeting of the Indiana County Superintendents' association at the Claypool hotel in Indianapolis.

An injury to his left ankle, received in the first quarter of the football game at Madison, probably will keep Capt. Harold Harmeson, Boilermakers' triple threat man, out of uniform for the rest of the season, it was learned at Lafayette. "Harmie" has a broken bone in the ankle.

Samuel P. Baird, age eighty-three, a lawyer, and dean of the Tippecanoe county bar, died unexpectedly at the family home in Lafayette, following an attack of pneumonia. He is survived by a son, Rochester Baird, Lafayette city attorney, and a sister, Annie Baird.

Four persons, all of Thorntown, were killed at a Big Four railroad crossing at Danville, Ill., when the automobile they occupied was demolished by a west-bound passenger train. The dead: Mrs. Grace Smith of Thorntown, Jean Smith, a daughter, six years old; Alberta Smith, a daughter, eight years old; Byron Bowles, twenty years old, of Thorntown.

A site containing 100 acres, lying between Forty-second and Forty-sixth streets in the northeastern part of Indianapolis has been approved by the air port committee of the Indianapolis real estate board as being suitable for a municipal air port landing field to encourage the establishment and development of commercial air transportation lines with other cities.

A call for a special session of the grand jury to indict Charles Fairchild, forty-one years old, farmer, confessed slayer of Andrew Stouse, forty years old, bachelor recluse, at his farm in Huntington county near the Whitely county line, was issued by Judge Kenner at Huntington. Fairchild said he killed Stouse because he talked about his family.

In annual business session at the Cadle tabernacle, Indianapolis, the Indiana State Teachers' association elected Miss Martha Whitaker, a high school classroom teacher, of Richmond, president, by unanimously adopting the report of its nominating committee. She will begin her term with the opening of the 1926 convention. Miss Whitaker's election was unanimous.

Dr. James M. Sample of Connersville was found guilty by Judge Edward S. Roberts in Jefferson Circuit court at Madison of the grand jury indictment charging him with administering poison to his father-in-law, James C. Reed. Hanover, with intent to commit murder. Pronouncement of sentence was postponed by Judge Roberts. The law provides a sentence of three to fourteen years.

Agriculture, industry and urban realty are about evenly balanced in their shares of Hoosier wealth, according to Dr. Lionel G. Edie, director of the bureau of business research, school of commerce and finance of Indiana university. Doctor Edie has just completed a study for the Indiana State Chamber of Commerce and affiliated organizations, surveying Indiana's economic situation.

With every indication that all present time records for obtaining a jury to try a criminal case will be broken in the case against D. C. Stephenson, Earl Klinck and Earl Gentry, charged with the murder of Miss Madge Oberholtzer of Indianapolis, Judge Will M. Sparks of Rushville, presiding as special judge at Noblesville, ordered a fourth special venire of 100 men drawn for jury service.

Major crimes have increased in Indiana during the last decade, a comparison of statistics obtained from the board of state charities at Indianapolis shows. Latest available figures indicate there are nearly twice as many men in the state prison as there were ten years ago. The state reformatory population has increased one-third and there are a few more at the woman's prison than in 1915. Maintenance costs have increased proportionately.

Arthur R. Robinson, appointed United States senator to succeed Samuel M. Ralston, is now on the senate pay roll at Washington. Under the rules of the senate an appointee does not have to wait to be sworn in at the bar of the senate before becoming a senator. The appointee will take his seat in the senate when the congress convenes Monday, December 7, and that day will go through the formality of taking the oath of office administered at the bar of the senate by Vice President Dawes.

The growth and development of the grange, its enlarged fields of service in the interest of farming, and the close relation of agriculture to the economic and business interests of the nation were emphasized by L. J. Taber of Columbus, Ohio, a master of the National grange, in an address at the fifty-fifth meeting of the Indiana State grange, held at Seymour.

The state armory board at Indianapolis approved the purchase by the state of Indiana of the Lebanon armory, for use of National Guard troops.

Lesson for November 8

PAUL'S FAREWELL AT MILETUS

LESSON TEXT—Acts 20:18-38.

GOLDEN TEXT—"Ye ought to support the weak, and to remember the words of the Lord Jesus, how He said, It is more blessed to give than to receive."—Acts 20:35.

PRIMARY TOPIC—Paul a Loving Friend.

JUNIOR TOPIC—Paul's Farewell at Miletus.

INTERMEDIATE AND SENIOR TOPIC—An Example of Faithfulness.

YOUNG PEOPLE AND ADULT TOPIC—Responsibilities of Church Members.

After the uproar at Ephesus, the Jews laid wait for Paul to destroy him. This plot obligated him to retrace his steps through Macedonia instead of taking a more rapid sea voyage. He tarried with the disciples at Troas, meeting with them around the table of the Lord, and speaking words of encouragement to them. In order to be at Jerusalem on the day of Pentecost, he did not go to Ephesus, but sent for the elders of the church at Ephesus to meet him at Miletus. The picture of Paul's farewell to the Ephesian elders is a very touching one. His object in this address was to impress upon them their responsibilities. The analysis of his address has been so well made by Doctor Stifler that it is substantially reproduced here.

I. Paul Reviews His Three Years' Ministry at Ephesus (vv. 18-21).

1. The Spirit of His Ministry (v. 19).

(1) He was humble, "serving with all humility of mind."

(2) He was tender, working for them in tears.

(3) He was faithful in the face of trials which befell him because the Jews were lying in wait for him.

2. The Diligence of His Ministry (vv. 20-21).

(1) He made known everything which was of profit unto them. This every true minister or teacher will do.

(2) He taught both in public and in private. A minister's work is not done when his pulpit ministrations are over. The effectiveness of his public work is sometimes determined by his touch with the people in their homes.

(3) He neglected no class, whether Jews or Greeks. The Christian minister must be exceedingly careful here.

3. The Theme of His Ministry (v. 21).

This was repentance and faith. Men and women need to repent of their sins and believe on the Lord Jesus Christ.

II. Paul Presents the Present State of Things (vv. 22-27).

1. His Immediate Purpose (v. 22).

This was to go to Jerusalem. The constraint of the Spirit moved him to go forward though he did not know the things that should befall him there.

2. The Shadows Lying Across His Path (v. 23).

Though bonds and afflictions awaited him, he went forward to his work with undaunted courage.

3. His Fixed Purpose (v. 24).

This was to complete his ministry, which was to testify the gospel of the grace of God which he had received from the Lord Jesus Christ.

4. A Sorrowful Prediction (v. 25).

Those among whom he had labored should see his face no more.

5. He Leaves No Debt of Obligation Behind (v. 26-27).

He was pure from the blood of all men.

III. Paul Sets Forth the Ephesian Elders' Responsibility (vv. 28-35).

1. Motives to Duty (v. 25).

(1) They received their call and commission directly from the Holy Spirit.

(2) The flock for which they must care was purchased with the precious blood of Christ.

2. Perils Ahead (vv. 29-30).

(1) Grievous wolves would enter the flock and mercilessly devour them.

(2) False teachers would arise from among their number.

3. Incentives to Watch (v. 31).

Paul's own example. For three years he watched night and day with tears.

4. He Commends Them to God, and His Word (v. 32).

He knew that this Word was able to build them up.

5. He Was Unselfish in His Service (vv. 33-35).

(1) He did not covet any man's silver, gold or apparel.

(2) He labored with his own hands and taught.

IV. Paul's Prayer (vv. 36-38).

Having spoken these words he knelt and prayed with them all.

Patience

Patience is a beautiful trait, but it is not worn oftenest by those who walk on life's sunny side in silver slippers. It is the product of days of adversity. "The trial of your faith worketh patience."—Evangelical Messenger.

No Room for Hatred

With a constraining love for Christ there is no room left in the heart for the hatred of any person for whom Christ died.—Presbyterian of the South.

A COVINGTON, KY., WOMAN

Makes Remarkable Recovery

Mrs. Harry Ashcroft Tells How Lydia E. Pinkham's Vegetable Compound Relieved Her of Severe Illness and Pain

MRS. HARRY ASHCROFT
632 BEECH AVENUE, COVINGTON, KY.

Covington, Ky.—"I was so weak and nervous I could hardly do my housework as I could not stand because of the bearing-down pains in my back and abdomen. I sat down most of the time and did what I could do in that way—as washing dishes, etc. One day a book describing Lydia E. Pinkham's medicines was put in my mail box. I saw how the Vegetable Compound had helped others so I gave it a trial. I had to take about a dozen bottles before I gained my strength, but I certainly praise this medicine. Then I took Lydia E. Pinkham's Blood Medicine for poor blood. I was cold all the time. I would be so cold I could hardly sit still and in the palms of my hands there would be drops of sweat. I also used the Sanative Wash and I recommend it also. You may publish this letter and I will gladly answer letters from women and advise my neighbors about these medicines."—Mrs. HARRY ASHCROFT, 632 Beech Avenue, Covington, Kentucky.

Mrs. Boyer Also Found Help

Gilman City, Missouri.—"I was in such a condition that I could not eat nor sleep to do me any good and I felt draggy all the time. My head ached, my right side and back would almost kill me at times, and I could be on my feet only a short while at a time. I was irregular and so nervous, irritable and despondent that I thought I could not stand the strain much longer. I had been this way more or less for ten years, but the last two years was just terrible. I took medicines, but got little relief until I began to take the Vegetable Compound. I took three bottles before I could see any change at all. I have taken seven in all and am improving right along. I have used Lydia E. Pinkham's Sanative Wash and take the Liver Pills. I can do most of my work now, and I live on a farm and there is lots of it to do. I wash, iron, hoe the garden, raise chickens and tend to the milk."—Mrs. T. M. BOYER, Gilman City, Missouri.

If you are hard to please, few will try.

Bad habits are sometimes discarded after they are worn out.

DR. W. B. CALDWELL AT THE AGE OF 83

"Age is not the time for constantly whipping the bowels into activity. A lash can not be used every few days."
—DR. CALDWELL

If Past Forty, Adopt a Regulating Laxative

Most men and women past forty must give to the bowels some occasional help, else they suffer from constipation. One might as well refuse to aid weak eyes with glasses as to neglect a gentle aid to weak bowels.

Is your present laxative, in whatever form, promoting regularity for weeks and often for months—or must you "purge" and "physic" every day or two to avoid sick headache, dizziness, biliousness, colds, or sour, gassy stomach?

One dose of Dr. Caldwell's Syrup Pepsin will establish natural, healthy bowel movement for weeks at a time, even for those chronically constipated. Dr. Caldwell's Syrup Pepsin not only causes a gentle, easy bowel movement but, best of all, it is often months before another dose is necessary. Besides, it is absolutely harmless and pleasant to take.

Buy a large 60-cent bottle at any store that sells medicine and just see for yourself.

Dr. Caldwell's SYRUP PEPSIN

His Luck

"Did you husband have any luck in his garden?"

"Oh, yes. He got sunstroke and collected $200 from a health insurance."—Boston Transcript.

American Trucks Favored

Automobile trucks from America predominate in India.

WRIGLEY'S

AFTER EVERY MEAL

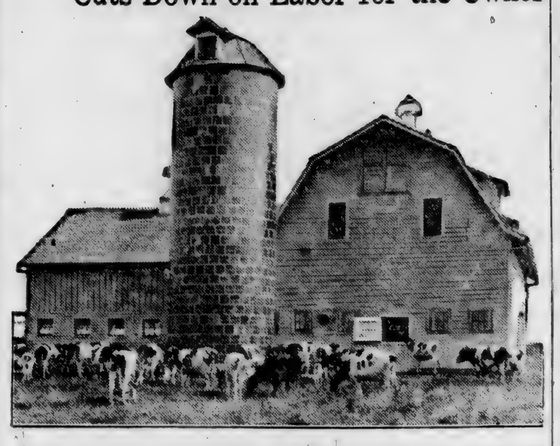
THE FLAVOR LASTS

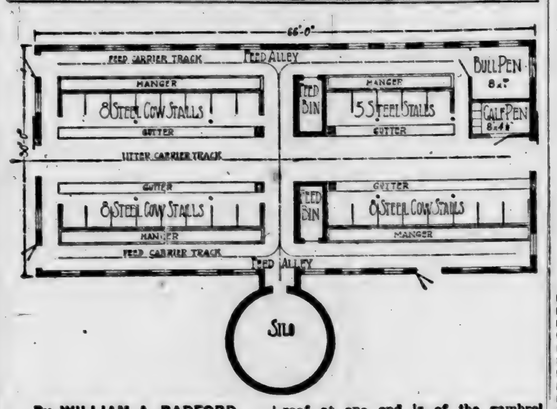
Probably one reason for the popularity of WRIGLEY'S is that it lasts so long and returns such great dividends for so small an outlay. It keeps teeth clean, breath sweet, appetite keen, digestion good.

Fresh and full-flavored always in its wax-wrapped package.

P-122

Gives Best Housing for Cows and Cuts Down on Labor for the Owner





By WILLIAM A. RADFORD

Mr. William A. Radford will answer questions and give advice FREE OF COST on all problems pertaining to the subject of building work on the farm, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on the subject. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

At the very best there is a lot of work connected with taking care of a herd of dairy cattle, but the sort of equipment one has for doing the work will make a big difference in the amount and the drudgery of it. It is possible to build two barns, costing the same amount of money, being equally fine appearing and apparently equipped in about the same way, in which the daily work will vary greatly. For this reason it pays to give very careful consideration to every possible detail when planning the new dairy barn.

The barn which gives the best housing for the cows and requires the least labor of their owner is always the most profitable investment. The first of these requirements means that it must be dry, warm and well ventilated. This is a matter of good construction and there is never any excuse for failure to take care of these points.

Getting a barn which reduces the labor to the minimum is a somewhat more complicated problem, however, and, even for the person who is widely experienced in farm work, expert advice is valuable. Expert advice is always available to the man who wants it. Good barn plans have been worked out by specialists and special advice is given wherever needed.

The principles of good barn planning are well established and they are illustrated in the building shown here. Outwardly this barn presents an appearance quite different from the typical long, narrow building with a silo at one end, but the floor plan is very much along the regular lines. The roof at one end is of the gambrel type, but with the ridge running across instead of lengthwise, while the roof at the opposite end forms a hip with the ridge running lengthwise. This part of the roof is also lower. The silo is placed at the center of one side just at the point where the two parts of the roof join.

This silo is a large structure of tile construction and furnishes ample capacity for feeding a large herd of dairy cattle. It is well placed for easy handling of feed which is carried to the mangers by a feed carrier on an overhead track.

The floor of the barn proper is arranged in the familiar manner with a central driveway down which there is a litter carrier track by means of which manure is, with the least effort, deposited at the dump outside one end of the barn. On each side of this central drive is a row of steel cow stalls which are built in four sections, separated by a passage across the middle of the building.

At one end there are eight of these stalls on each side while at the other end there are eight on one side and five on the other. The balance of the space on the latter side is used for a bull pen and a calf pen. At the center end of these sections there are feed bins for dry feed, placed most conveniently for serving all the stalls.

The feed carrier track from the silo extends through the center passage across the barn and down each side between the mangers and the side walls, making it possible to supply the mangers with only a short haul.

Well drained, concrete gutters are provided behind the cow stalls so that it is possible to keep them always clean and sanitary. The barn is amply lighted by windows running along both sides and ends and roof ventilators keep the air always fresh and clean, carrying off all the odors and stale air. Ample loft space is provided under the roof and this also is well lighted, dormer style windows being used at the end of the building.

Free Farm Building Helps

"Concrete Around the Home" tells in everyday language how to use concrete for building drives, walks, steps, porches, and other permanent improvements which every home needs. Complete instructions make it easy to estimate the materials and to mix, place, and finish the concrete for these improvements.

"Permanent Repairs on the Farm" tells you how to repair old buildings quickly and easily, and at low cost. The information on Concrete Barn Floors and Feeding Floors will help you add many a dollar to your net profits.

"Plans for Concrete Farm Buildings" contains supplies of blue prints, and shows you, step by step, how to put up Concrete Silos, Dairy Barns, Hog Houses, Milk Houses and many other forms of Concrete Construction.

Whether you are going to build a new building, or repair an old building, these free booklets will show you how to do the job for all time. Send for them today.

Good Plumbing and Good Health Go Hand in Hand

Good health, happiness and comfort are closely linked, in American homes, with good plumbing. The luxuries of yesterday are the necessities of today and no home is now considered complete without its glistening white bathtub and lavatory, often set in a bathroom lined with white tile wainscot and floored with mosaic tiling.

As a matter of fact, the American people are accumulating material wealth rapidly enough to justify adopting conveniences which a generation ago would have been considered unnecessary, or which, it was then thought, only the very rich could afford.

Once accustomed to the comfort, convenience and cleanliness provided by a good plumbing system, the average citizen shudders when he remembers the Saturday night bath in the wooden tub set up in the kitchen near the range, and the morning ablution made agonizing by use of the tin pan at the hand pump on the back porch.

Plumbing systems were in use fifty years ago, but the crude, simple hand-wrought equipment bears but little resemblance to the accurately made fittings of today. Open plumbing, the continuous venting principle and modern traps were unknown to our grandfathers.

Progress is further illustrated by the advent of pressure regulators, sewage ejectors, cellar drainers, pumping machinery, automatic hot water heaters, pneumatic water storage tanks, water softening and filtration plants, sewage disposal plants, as well as the remarkable improvements that have taken place in the design and manufacture of bathroom equipment.

Grand Halls of Old Are Now Seldom Seen

Halls are now merely entries and the grand hall of our grandfather's day is gone forever, except, of course, in the homes of wealthy people.

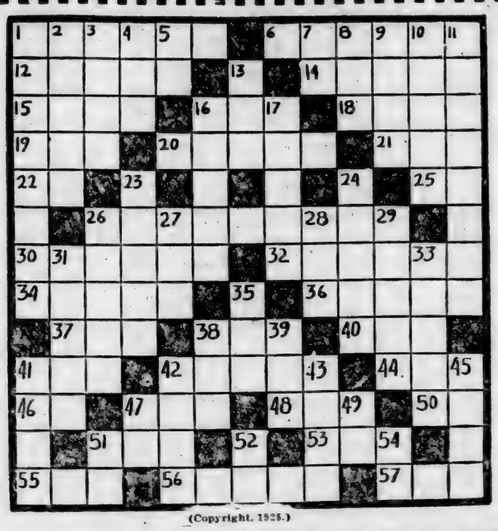
In the interior of the house, if it is a one-floor house, or apartment, there may be a small hall serving the bedrooms and bathroom, in order to guard some privacy for those who may wish to retire when visitors are around.

These halls are not expected to be larger than is positively necessary to serve as a sort of switch-point, so to speak, and this calls for much study in so locating them that they will not interfere with the proper layout of the rest of the rooms.

Location

The location and orientation of the house are of course determined by the size and shape of the lot, and every competent architect will take advantage of any "features"—trees, shrubbery, or any unusual topography—that his study of the lot may disclose. The well designed small home is often a simple rectangle, with its porches, bays and perhaps a small wing as the minor feature. Avoid above all things a mixture of materials and colors; this is not good in the large house and is anathema in the small one.

CROSS-WORD PUZZLE



(Copyright, 1928.)

Horizontal.

1—Pale
6—To recount
12—A character in "The Tempest"
14—A street urchin
15—To go at a certain pace
16—Common level
18—Part of a bird
19—Went quickly
20—Started
21—One of the Roman gods
22—Part of the verb "to be"
25—Tin (symbol)
26—Acts of causing to exist
29—A kind of fish
32—To signify by a visible sign
34—A beer mug
36—To direct attention
37—A color
38—Stout
40—To butt against violently
41—A kind of hat
42—Place of evil spirits
44—To look furtively
45—Either
47—A means of fastening
48—To seize suddenly
50—Tellurium (abbr.)
51—Assistance
52—A masculine descendant
53—Finish
54—Sends forth
57—To possess

Vertical.

1—Those loyal to their country

48—An exclamation used to startle
51—An advertisement (abbr.)
52—Two (Roman numerals)
54—A negative

The solution will appear in next issue.

Solution of Last Week's Puzzle.

C

HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

ROYAL WHIM RETURNS SHAWLS TO FAVOR

Shawls are to be fashionable in England this fall because Queen Mary has made up her mind to do the women of the North Scotland islands a favor. The queen follows with great interest the fortunes of the island folk and has become much perturbed that poverty among the women there has resulted from the decreased demand for Shetland shawls.

In society circles the word has gone around that the queen intends to bring about the shawl revival as soon as possible. To do this, all that is necessary is for the queen, Princess Mary and the duchess of York to wear shawls on a few occasions. Then the shawl will come again into its own, helping to make the Shetland weavers happy once more.

Played Golf in Old New York's Streets

One doesn't as a rule think of the Dutch of old Nieuw Amsterdam as sportsmen. Washington Irving has left us an indelible picture of a stout person, smoking an enormous pipe, or at most, playing at bowls with much puffing and straining. As a matter of fact, however, they were ardent sportsmen. They raced, boated, skated, even golfed, with zeal.

It is a matter of record that in 1650 Peter Stuyvesant had to issue an edict forbidding the followers of the grand old Scotch game from playing their balls on the streets of the town. It appears that in their zeal, the burghers had been using the thoroughfares as fairways, and great was the danger of life and limb of the innocent bystanders.

Imagine driving a golf ball from Taylor's east on Petticoat lane during the noon hour! And then they talk about motor cars.

Glorious Liberty

Liberty is tranquil because she is invincible, and invincible because she is contagious. Whoever attacks, gains her. The army sent against her rebounds upon the despot. That is why she is left in peace.—Victor Hugo.

"Horse Sense"

Yes, Chlorinda, it is true that the old buggy horse of other days would stall, but he always had sense enough not to do so when he was straddling a rail[illegible]—New Orleans States.

Whimsical Whistler

"Many things Whistler did," Sir Edmund Goose told Walter Tittle, the portraitist, "he did for effect only, laughing in his sleeve if he succeeded in hoodwinking his auditors. One day in his studio he languidly approached his easel, drew a single line on a canvas, with a movement of exquisite grace, put down the brush, and said: 'That is enough work for one day.'"—Boston Transcript.

Dollars "Shaved"

Large numbers of "shaved" American dollars are passed out as change to American travelers in oriental ports. Milled edges of some of the coins have been entirely trimmed away. Chinese employees on passenger liners are said to be responsible for the mutilation. They sell the silver shavings in Shanghai and Hongkong and return the money to circulation.

Meteors Travel Fast

Meteors flying through space in the vicinity of the moon attain a speed of 40 miles a second because there is no appreciable atmospheric resistance around the moon. A. G. Gifford of the Hector observatory at Wellington, New Zealand, believes that meteors hit the moon and explode with great violence, and are responsible for the craters on the moon which can be seen through the telescope.

Fish and Fish

In the Philippines there are fish that climb trees, fish that squirt poison through syringes, fish so small that 10,000 of them, matured, make a light breakfast for a native, and fish that live on dry land and drown when placed in the water.

Too True

"What's one man's get-rich-quick scheme," said Uncle Eben, "is often a git-poor-sudden scheme for a whole lot o' folks."—Washington Star.

BROUGHT RELIEF AFTER 2 YEARS SUFFERING

"The makers of Tanlac will always have my warmest thanks, for I don't consider it any exaggeration to say I owe my life and present good health to Tanlac," is the striking statement of Andrew Groeschner, fireman.

"Words simply can't express the misery I endured for 2 years from indigestion. At times gas pains would catch me around the heart and almost cut off my breath. These awful pains would last two and three hours. My nerves were all unstrung. I slept poorly and got in such a bad way that my days seemed to be shortening rapidly.

"I tried everything, but disappointment was my only reward until I began taking Tanlac. I have been taking Tanlac off and on for a year now and feel so different that there's no room for comparison. I eat good and sleep good and feel that Tanlac has given me a new lease on life."

Tanlac is for sale by all good druggists. Accept no substitute.

Tanlac Vegetable Pills recommended by the manufacturers of Tanlac.

St. JOE FILLING STATION
KEESLER & YEISER

Hallowee'n Pranks Were More Mild

The Kiddies did quite well this year with their Hallowe'en pranks, only soaping of windows and piling of trash in street. The destroying of property was not carried out as before and everyone has a more kindly feeling toward the youngsters A number of towns had celebrations which furnished entertainment for the young and thus eliminated the necessity of doing unpleasant things St Joe ought to do something next year.

Visited Zion Broadcasting Station

B E. Widney and wife report a very pleasant visit at Zion City, last week, with Hiram Reasoner and Wilbur Potter and their families They visited the great church and their new broadcasting station, recognized as one of the best today Many other places of interest were visited

Game Warden Makes Affidavit

Victor Brown paid a fine of $5 00 and costs amounting to $19 40, in the Justice McClinock court, Sunday morning, Oct. 25th. The charges were made by W. I. Pence, game warden, stating that the defendant failed to have hunting license when asked to show them

M H. Andress was fined $19 40 Monday of this week for hunting without license and failing to show license on demand

Hunting Party Departed Last Sunday

Merritt Hull is the only St Joe sportsman that joined the Maine hunting party, that left St Joe Sunday evening over the Wabash, for a three weeks stay in the woods. Sherwood, Garrett and Ft. Wayne men joined in the party making 13 to be camped together. When the train arrives at Greenville Junction the hunters will make up their seperate parties and make for their camps. Those to go from Garrett are Mayor George Schulthess, O. M. Rankin, Russell Rowe and Frank Bvanski. The others going are F Smith of near Columbus, Ohio; John Fleming of Butler, L. B. Heller of Mishawaka, John Koons of Sherwood, Ohio, Dr. Burns, Mr. Huffman and Mr Barber of Bryan, Ohio, and C. B Widdifield of Columbia City.

Notice of Administrat'n

NOTICE IS HEREBY GIVEN, that the undersigned has been appointed by the Judge of the DeKalb Circuit Court, of the State of Indiana, Administrator of the Estate of John B. Haifley, deceased, late of said County.

Said Estate is supposed to be solvent.

ROSCOE WALTER,
Administrator.

WHY

Macedonians Are Haunted by Fear

There are many other lovely mountain districts in Europe, and in some respects Macedonia recalls the scenery of the Scottish highlands. But there is nowhere else in Europe where you are conscious of the same strange brooding human spirit.

It is partly fear and partly poverty. But there is also an element of menace and savagery never far behind. You see it in the eyes of the passers-by, of the little village groups. You hear grim stories of banditry, now ominously reviving after a pause of half a century.

That is, I suppose, why the Greek government insisted that we should enjoy the company of ten gendarmes, cheerful men, but generally so far in the rear that we had to rely upon their spiritual support alone, says Harold Spencer in the London Telegraph.

Fear—that is at the base of this spirit that pervades Macedonia—the inherited fear of a population that has been harassed and ravaged for centuries, and expects to be harried and ravaged again. That fear has become defensive, and it is expressed in the behavior of the sheepdogs—animals that come from afar across the fields rushing swiftly at your motor and almost leaping into the car with deep bayings, only giving up the pursuit when they are quite exhausted. Those dogs remind one of the wolves of Russia.

This Macedonian fear becomes an alarmed curiosity as the people watch your car. What are you there for? What honest purpose could bring a man possessed of his senses to this forlorn land? What kind of oppressor are you? A landlord, a taxer, or an evictor? Do you come to sell weapons? To kidnap men?

Those are the fleeting shapes and forms taken by the fear of Macedonia. Remember that it is only twelve years since these people were subject to the caprices of any passing Turkish pasha or bey, and that since then, they have been bandied about between the ambitions of new Christian states. Even today they are being visited by murderous bands. No wonder there is fear in Macedonia.

Why Gold Is Getting Scarcer Every Year

The world's annual output of gold is enormous and is greater at the present time than it was 20 or 30 years ago. Even so, there is not enough to go around as the basis of sound money or exchange. The reason for this is the large quantity of the precious metal used in arts and crafts, and hoarded or lost.

Jewelers are the heaviest consumers. Every year they work up nearly 150 tons of gold, scarcely an ounce of which is ever recovered for other use. Goldleaf also absorbs huge amounts, vast quantities being used for plating other metals and for ornamenting pottery.

But it is in China and India that gold is most largely withdrawn from financial use. A form of piety in India is to regild the dome of some religious building. Such an operation often absorbs $50,000 worth of gold. Not long ago an India rajah used 17,000 English sovereigns to form centers to each minute pane in the windows of his palace.

Between £2,000,000 and £3,000,000 sterling in gold vanish yearly in India, and quite as much in China. This is all buried, and as a rule the owner dies without revealing the secret of his hiding place; consequently the gold is lost, sometimes forever.

Why Wisdom Teeth

Nature arranges that the apparatus of our body shall be supplied to us in accordance with our needs and development. And so the baby first grows its "milk teeth," a temporary set just strong enough to enable it to take the soft food natural for its age and digestion, and light and small enough not to inconvenience its mouth.

As we grow older and need harder food, these teeth fall out and our real set appears, not all at once, but with additions according to our needs and the growth of our jaws. Last of all come some teeth which today our habits hardly need, and which therefore are held back till last, and when our jaws have room to receive them. Often, indeed, they fail to come at all.

Why Sounds Go Upward

A famous scientist who made many experiments on the audibility of sound at various heights from the ground as he ascended in a balloon gives us the following information: A man's shout was heard at 1,600 feet; the sharp note of the mole cricket at 2,500 feet; the croaking of frogs in a marsh at 3,000 feet; the roll of drums and music of an orchestra at 4,500 feet; the crowing of cocks and notes of church bells at 5,000 feet; the report of a rifle and the barking of a dog at 5,900 feet; the noise of a railway train in motion at 8,200 feet, and the whistle of a locomotive at 10,000 feet.

Why Noses Are Flat

Eskimos and coast African tribesmen have broad, flat noses. This is due to the fact that the mothers of these races carry their babies snuggled against the shoulder or breast at the time when the nose is in its most plastic state, the frequent pressure making the nose a rather shapeless blob.

Search Your Attic For Old Stamps

Fortunes Have Been Found on Old Envelopes

Many old stamps, both U. S. and Confederate, are worth from $50 to $5,000. The hobby of stamp collecting is of far greater importance nowadays than in times past when it was generally considered as a pastime for schoolboys only. Today collectors eagerly seek out and pay huge prices for those stamps which are scarce to the point of being worth hundreds or even thousands of dollars. Last year in Paris at a stamp sale one stamp of British Guiana was sold for $32,500—this being the highest price ever paid for a single stamp. People who make a bonfire of "grandfather's letters" do not realize they may be burning rare stamps, which if sold might make them rich.

Make a thorough search through attics and storerooms for old letters mailed from 1845 to 1870. Keep the letters if you wish, but send the envelopes (or folded letters) to Mr. Harold C. Brooks, Box 323, Marshall, Michigan. Mr. Brooks, who is mayor of his city, is a private collector and is said to pay better prices than a dealer. During the past twelve years he has paid thousands of dollars for envelopes bearing old stamps. He specializes in United States and Confederate stamps, but also collects Canadian and other foreign issues, provided they are on the original envelopes and mailed not later than 1870. Later stamps he does not buy except very early issues issued or mailed to collectors formed before 1870. Revenue stamps such as found on old photographs, mortgages, deeds, etc., are not wanted. Other things like old coins, Confederate money, old relics, may have value, but he is not interested in these.

Shown below are illustrations of a few rare stamps and the amounts Mr. Brooks agrees to pay to anyone who may find them. Beside these are many others of equal value.

Alexandria, Va., 1846
$5,000.00

Millbury, Mass., 18..7
$2,500.00

St. Louis, Mo., 1845
$1000.00

Athens, Ga., 1861 (?)
$500.00

Beside the rarities, Mr. Brooks buys many of the common stamps, so nothing should be thrown away even though many stamps appear to be exact duplicates. Stamps should not be cut off as any stamp on the original envelope is worth more, collectors being interested in the postmark as well as the stamp. Nothing should be written on the face of the envelope. When making up a bunch of envelopes, be sure they are well wrapped and protected with cardboard to prevent their becoming mangled in transit. If you have reason to believe your envelopes are of special value send them by registered or insured mail. The advertising manager of this paper has known Mr. Brooks for many years, and you may place fullest confidence in his integrity. On receipt of envelopes he will examine them and report promptly their value. If they are not purchased, he guarantees to return them in good order.

If you have no old letters written during or before the Civil War, show this notice to your friends—especially those whose families have lived in the same house for several generations. Many old families, old banks and law firms still have stored away hundreds of letters, waiting either to be burned or sold for large sums. Before destroying such envelopes or folded letters *investigate their value.* Mr. Brooks' address is as follows:

HAROLD C. BROOKS,
Box 323, Marshall, Mich.

L914 0365

NOVEMBER

ST. JOE NEWS.

VOL. XXXIX | ST. JOE DeKALB COUNTY, INDIANA, THURSDAY NOV. 12, 1925 | NO. 45

Tour of County With Five Meetings

The DeKalb County Council of Religious Education has planned another tour of the county, beginning Sunday evening, November 15t, at the Waterloo United Brethren church. Harry G. Rowe of Indianapolis, state worker in the Young People's and Adult Divisions, will be the leader and speaker. The schedule is as follows:

Grant, Union, Smithfield and Fairfield townships uniting at the Waterloo meeting with Mrs. Harry Beidler as chairman.

Jackson, Spencer, Butler and Concord townships at the Rehobeth M. P. Church on Monday the 16, afternoon at 2:30, evening at 7:30, Ed Peters chairman

Wilmington, Stafford and Newville townships, Tuesday the 17th in the Butler U. B Church at 2:30 and 7:30. E A. Eakright chairman

Franklin and Troy townships meet in the Jerusalem U. B. Church Wednesday the 18th at 2:30 and 7:30 Chas. Jennings chairman

Keyser and Richland townships will meet in the Garrett Christian church, Thursday the 19th at 2:30 and 7:30. Mrs. B. H. Eastes chairman.

The afternoon meetings will be more of the nature of conferences with the Sunday School officers and teachers with the object of trying to build more efficient schools. The evening sessions will be of an inspirational nature, and all DeKalb county people who have heard Harry Rowe know that he can give this type of an address better than any other man in the state

Parent-Teacher Association

The following program has been arranged for the second P. T. A meeting to be held at the school house on Friday evening, November 20:

Community Singing led by C. A. Woodcox.
Reading - - Miss Bangs
Mens' Chorus arranged by Meade Baker.
Solo - - - Miss Bray
Observing Educational Week—St Joe Public Schools.
Business Session

Everybody welcome to these meetings. Come and see what the P. T. A. is doing.

Accounts Must Be Settled Soon

In closing the Henry Beams estate, notice is hereby given all persons indebted to same, to call and make satisfactory settlement by cash or note by December 1, 1925.

Frank Beams, Adm.

Bringing in the Turkey

Obituary.

Estelle G., oldest daughter of Rev. and Mrs S. D Steffey, was born at Rural Retreat, Virginia, December 24, 1889.

She was baptized in infancy by Rev. J. B. Greiner, D. D. and catechised and confirmed as a member of St. John's Lutheran Church at Concord, North Carolina, April 7. 1900, by her father. At the time of her death she was a member of Redeemer Lutheran Church at Kokomo, Indiana. She was ever a faithful and consistent christian.

She was married at Dongola, Illinois, June 11, 1911 to John W. Rider and to them four children were born, three of whom with the husband are living. The youngest aged 6 days, died on November 1, 1925 and was buried with the mother.

The immediate cause of her death was quinsy which she contracted one week before her death. She died at her home at 1316 South Jay Street, Kokomo, Indiana, October 31, 1925 at 1:35 P. M., surrounded by her family and friends. She was buried on Monday, November 2nd., at 2 P. M. in Crown Point Cemetery at Kokomo. The funeral service was conducted by Rev. Walter G. Lobeck, her pastor. Rest in peace.

Card of Thanks

We desire to thank our parishioners and friends at St. Joe and Spencerville for their prayers, kind words of sympathy and the splendid flowers furnished us in our sad hour of trial at the passing of our dear daughter and sister.

Rev. and Mrs. Steffey
The Children.

Celesta Shenberger, daughter of Baltzer and Leah Shenberger, was born in Ashland county, Ohio, March 9, 1856 and died at her home near St. Joe, Indiana, November 8, 1925, aged 69 years and 7 months.

She came from her home in Ohio to DeKalb County, Indiana when about nineteen years of age and has resided here ever since.

She was united in marriage to Chalmers Reasoner, December 9, 1876 and to this union five children were born, all surviving her except one daughter, Mary Leah, who died at the tender age of 13 years, 6 months and 22 days.

She is survived by her husband and the following children who will miss her watchful guidance and true christian advice: Herman Franklin Reasoner of Spencervilie, Ind.; Raymond Reasoner, St. Joe, Ind.; Clarence Bertrum Reasoner, Fort Wayne, Ind., and Mrs. Effie Luella Collins of St. Joe, Indiana. There are eight grandchildren, two brothers and four sisters and many other relatives and friends.

She joined the Lutheran church at Mifflin, Ohio, when a young girl and later in life transferred her membership to the Lutheran church at St. Joe of which she remained a faithful and consistant member to the end of her life. She belonged to all of the different societies of the church and Sunday School and was a hearty and loyal supporter of each one. She was sick and disabled in body for many years but always remained the same sweet, trusting soul who looked to Jesus for aid and comfort in all of her sufferings and patiently awaited the time when she could go home and be forever with the Lord. Peace.

The funeral was conducted by the pastor, Rev. S. D. Steffey at the Lutheran church in St. Joe, November 10th., at 2 P. M., after which interment was made in Riverside cemetery

Fillmore Shull Secures Release

Fillmore Shull of Concord township, secured his release Monday from a charge of obtaining credit by making false representation without the necessity of going to trial.

Shull was arrested last June on an affidavit signed by Raymond U. Bowser of Spencerville, and was released on bond. His attorneys, W. W. Sharplees and Russel R. Ridenour, afterward attacked the affidavit on the ground that it had been sworn to by Charles S. Smith as notary public, contending that Mr. Smith could not act both as deputy prosecuting attorney and notary public, both being lucrative offices under the statute.

To avoid this question, a new affidavit was filed by the state. Then the counsel for the defendant charged that the statute of limitations had run against the alleged offense and it was found necessary to dismiss the case. The alleged crime took place in August 1923, and in the date of the new affidavit was November 6, 1925. Under the law, prosecution cannot be started after two years.

Mr. Bowser accepted Shull's note for $174 after Shull had signed a statement setting forth that he owned a farm in LaGrange county worth $6,000 on which there was a mortgage of $1,800 and another farm in DeKalb county worth $5,600 on which there was a mortgage of $3,900 Mr. Bowser said he found that soon after making this statement Shull sold the La Grange county farm for $1,850 and that the records showed there was a $4,400 mortgage on the DeKalb county farm. Shull also claimed he owned $500 in personal property above his $600 exemption, Mr Bowser declared but as a matter of fact he did not own more than $100 in personal property, Mr Bowser said.

The $174 note has never been paid.

Lutheran Notes

Sunday School 9:30.

The regular services will be held next Sunday at 7:00.

Prayer meeting Thursday eve at 7:00 o'clock.

The Aid Society will meet Thursday afternoon with Mrs. Mary Bowman.

The Hicksville schools started on a new time schedule Monday which will add one-half hour extra work each day to teachers and pupils.

Alcohol for your Car at Curie's.

Eighty-eight years old and still quite active—G. W. Woodcox celebrated his birthday last Friday. Mrs. Viola Erick of Fort Wayne, presented him with a beautiful birthday cake. Mr. Woodcox is sexton of the cemetery and is still able to care for his duties as such, digging of graves this week.

Next Monday a change in time will go into effect on the B. & O. effecting No. 37, now due here at 11:48, but under the new schedule will arrive at 2:28 P. M. This will allow more time for passengers going east at 8:06 A. M. and will also make a shorter wait at Garrett for persons going west, as a short lay over at Garrett now will bring them to the arrival of No 9, a fast train.

Harcourt Miser represented the local postoffice at a meeting of 275 postal employees in this district, at Fort Wayne Saturday evening at the Y M C A. Congressman, David Hogg was the main speaker, declaring he would put forth every effort in the next congress to obtain an appropriation for the erection of the long-sought postoffice building at Fort Wayne A number of prominent speakers of the department were present.

Coal! --Coal-- Coal!

Now is the time to lay in your coal. We have always tried to give you the best advise as to best time to buy and we now firmly believe this is the time to get busy and prepare for the winter.

Feed

Mr. Hog Raiser, we have a good line of feeds on hand, also car of ear and shelled corn. If you need any give us a call.

Grain

We are paying highest market prices for all grains and will be pleased to have you bring us your grain.

FATHER JOHN'S MEDICINE

BUILDS NEW STRENGTH and REAL FLESH

NO DRUGS

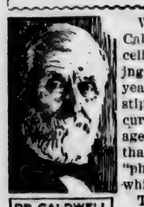
OVER 70 YEARS OF SUCCESS

How He Discovered Best Constipation Relief

Mr. Joseph F. Glus of Brooklyn, N. Y., writes "In the past 20 years I have been constantly troubled with constipation. Every remedy I tried would work O.K. for a while—but soon failed. The only remedy I have been able to use steadily with good results have been Carter's Little Liver Pills. I don't guess when I take them—I know I'm going to feel relieved." 25c at all druggists.

The man who is superior to his clothing usually wears mighty poor clothes.

Old Folks Must Not Use "Physics"



DR. CALDWELL AT AGE 83

While Dr. W. B. Caldwell, of Monticello, Ill., a practicing physician for 47 years, knew that constipation was the curse of advancing age, he did not believe that a "purge" or "physic" every little while was necessary.

To him, it seemed cruel that so many constipated old people had to be kept constantly "stirred up" and half sick by taking cathartic pills, tablets, salts, calomel and nasty oils every day or two.

In Dr. Caldwell's Syrup Pepsin he discovered a laxative which regulates the bowels of old folks. A single dose will establish natural, healthy bowel movement for weeks at a time, even for those chronically constipated. Dr. Caldwell's Syrup Pepsin not only causes a gentle, easy bowel movement but, best of all, it is often months before another dose is necessary. Besides, it is absolutely harmless and pleasant to take.

If past fifty, buy a large 60-cent bottle at any store that sells medicine and just see for yourself.

CHAPTER XIX—Continued

—15—

"Now he goes running out along the walls searching for something. Look! Here! He ran out along the base of the wall searching."

"For what?"

"For bits of wood—for anything that would burn—for fuel. He must have a funeral pyre. He has been crazed by fear again. But he finds nothing, Brena. There is no wood here, no paper, no grass. There's nothing but sand and stone. Let him run about till he drops. There is no mercy for him. Nothing that will burn. Nothing within a half a hundred miles. Like Hennepin, he too now screams and the scream comes back from the cliff with a terrible mockery."

"But he did find fuel, Peter," she said. "He must have found something."

"Yes, he found something that would do—not very well, as we can see. He had hoped for better results than he got. Come."

On the way toward the gate of the fortification walls Peter stopped and kicked at a blackened spot on the sand. He said laconically, "Their fire. Where they ate their last supper together—the vanished men."

The sun had dropped below the mountains above the mesa; its needled fire had settled down into a hot layer of dull, sullen heat. But beyond the wall where their car stood the open desert, bare, cruel, with the heat waves running like endless herds of sheep along the quivering horizon, was a relief from that strange spell of the dried well, the ruins, the fine yellow-gray dust, and the silence.

Brena filled her lungs as one does who has come from the interior of a mortuary.

"Peter," she said.

"Yes, dear."

"I want to tell you, Peter, that you need not worry about me. I am all right. It is necessary for me to know. And I'm going to know, Peter, without any weakening. We've come too far for that."

He took her hand.

"I'm not willing to let this make a scar on me, Peter," she said. "I've paid in full before this. So show me. And then let's turn toward the earning of our ways."

"Our way," he insisted, correcting her. "Not ways. The earning of our way, together."

She shook her head a little as if some doubt had stirred within, but they were outside the wall now and Peter's eyes were upon that which he had seen before.

He dropped behind her and turned her body so that she faced toward the bend in the southern end of the fortification wall.

"There," said he. "You did not see it as we drove in."

Standing on the desert, like a ragged unkempt impropriety, was the ruin of a touring car. All that was left of its top was hanging in wispy strips on the metal frame, its paint and varnish had almost gone, the tires had hardened and crumbled on the wheels, shreds of dry rotted leather dangled from the cushions. Motionless, dead, silent as all else, the car, as if it were a shabby outcast thrown out to die, appeared disconsolate, ready to send forth a wail of loneliness into the emptiness. It had turned its back upon Pueblo Mescalero, as if it had wanted to go away but could not.

"He came in that, Peter?" Brena asked.

"Yes."

"But never took it away. Did he kill himself?"

"No," Peter answered. "A great abstract justice—a great equity from which there was no appeal—sat in trial of him here. I tell you, Brena, the thing is of magnificent, awe-inspiring dignity. It's a tremendous thing—an unforgettable majesty of inexorable dealing out of sentences. The place of his crime was the scene of his trial, his conviction and sentence. He died as Hennepin had died—of thirst."

Brena started to speak.

"No, not yet," Peter said. "As Hennepin had suffered, so he suffered. More, perhaps, because in his car—just as we have—he had a two-days' supply of water. Do you see that black thing out there on the desert? It is a metal container for water. He was so crazed that he had tried to drag it along with him on a hopeless journey through the sand. When he lost hope after many miles he dragged it back, tapping its contents to wet his cracking lips until the last drop was gone."

"But the car?" she asked. "What happened to the car?"

"The car was all right," replied Peter. "Come this way. Don't go in front of it. Look behind it—the tracks it had made from the enclosure extraordinary. But here it stopped. Oh, I tell you, it is a thing of stateliness—as if some great hand had come down."

Brena stared at him in open-eyed wonderment.

"He was the instrument of justice—he himself," Peter went on. "A man who would save his life, lost it. The madness of fear brought all that he had to fear—and more."

He paused.

"Brena, I will tell you," he said in a hushed, awed voice. "The man was mad, irresponsible, without power to reason. He was in a panic of fear. He wanted to hide his crime at any cost. He had filled his gasoline tank for the return journey. Look!"

Peter pointed to the hole in the back of the car into which the gasoline is poured. The screw cap had gone. A bent copper pipe still dangled out of that hole.

"He wanted a hat-full of gasoline. That was the fuel, Brena—the fuel to burn the remains of Jim Hennepin."

He wet his lips.

"He used a siphon. This bent copper pipe taken from his tool chest—a spare length of oil feed pipe! And with that he filled his hat and ran back."

Peter looked up into the sky. He went on quietly. "And the siphon ran on. He had forgotten it. It ran on with its little stream saturating the sand until the tank was empty and the heat of the day was evaporating the last drops at the bottom. Parmalee had condemned himself to death! He had lost the fuel he had put in for the return journey!"

Brena pressed her lips tightly together and for many moments looked into the great fanlike spread of the sunset. Then suddenly she turned toward the car and took several steps.

"No," said Peter firmly. "You mustn't."

"I must know, Peter, beyond a shadow of a doubt."

"He is there—nothing for you to see, dear. He must have had the delusion at last that he could drive the car. He's there—at the wheel—fallen forward. And so—"

She looked up.

"And so—to be sure—I took the watch—a gold one—this one. Is it his?"

He held it out on the palm of his hand.

"Yes, it is—his, Peter."

He looked down at it a moment; then tossed it into the sand as one tosses aside a poisonous fungus.

"Peter."

"Yes."

"We mustn't let this go with us when we go—following us away. We must leave them both—here."

She took his hand.

"I am sure. For myself I can answer. I know the desert has served some great Will. The book is closed."

* * * * * * *

They slept upon one great square blanket spread on the open desert beneath the stars while the pale moon moved on its great silver arc across the heavens. The Pueblo Mescalero was far behind; from it they had ridden for miles in awed silence. And when they had reached a stopping place upon a rise of ground, neither had dared an expression. Aching with weariness they had looked at each other mutely and flung themselves down.

Now the second morning, like the first, came over the desert's edge with a host of golden lances; again the air of the desert became a haze of luminous violet hanging above the red and yellow sands and waiting for that clang when the yellow glare was flung forward again over the plain.

Brena awoke, sat up, unbraided her hair and tossed it loose with her fingers. Something within her, that had been growing with the slow growth of stalwart long life, that had suffered no blight, that subconsciously she had protected and nurtured for an unseen end, that had been made ready to withstand assaults by tragic winds, that had lived apart and immune from taint, was now free. As she threw out her arms toward the sun, so now this thing within her for the first time came forth from its depths to greet a dawn of its own.

It was not a thing asking for dramatic crises or for summits of joy; it only asked for the ultimate romance—that of the continuity of a full, strong, human life—the adventure of adventures into which the soul throws mind and body, thought and flesh, nerve and will. And because she had found her mate in this ultimate romance, Brena bent over and kissed Peter's lips.

He smiled in his sleep, and slowly his body moved and his eyes opened.

"Where are we going, Peter?" she asked.

"Somewhere with you," he said, sitting up. "Somewhere with you. I suppose we'll have to be married, dear one. But I feel that we were something more than that a long, long time ago."

He turned toward the east and the first flood of golden light illumined his face.

"Do you know, Brena, that there is something not weighed by science and the philosophies, not reckoned by governments nor laws nor customs. It is something that is ours—some newborn thing without material existence, some immortal spirit that we have created—you and I—long ago."

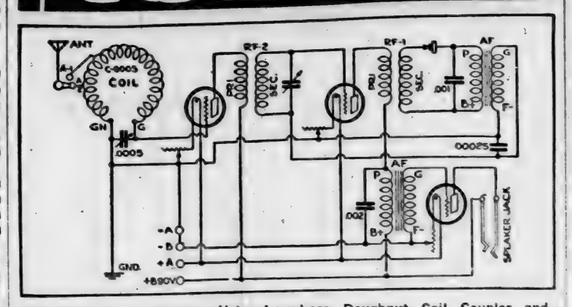
Brena moved her head up and down in silent assent. She sat with her hands clasped in her lap, her dark eyes moist, and a calm smile upon her sensitive, flexible lips.

For now she knew that he too understood the way to the greatest of all the mysteries.

[THE END]

African elephants have been known to scent men at 1,000 yards.

RADIO



Three-Tube Reflex Receiver Using Low-Loss Doughnut Coil Coupler and Tuned Radio Frequency Transformer. Second Tube Is Reflexed So That It Amplifies Current at Both Radio and Audio Frequencies.

By FRANK REICHMANN, B. S., E. M.

The perfection of the low-loss doughnut type of inductance has made possible the increase in efficiency of many circuits. Due to the fact that losses are lower than in any other type of coil available at the present time, substitution of the doughnut coil for the conventional type of variocoupler in the reflex receiver makes a good circuit much better.

Tuning is sharpened and stability improved considerably as the radio frequency resistance of this form of winding is at a minimum and the magnetic field is confined to the inside of the coil winding, eliminating intercoupling and its consequent effects. The coil is stagger-wound to reduce distributed capacity losses to a point seldom reached with other types of inductances.

Uses Reflex Principle.

Pickup of energy from local stations is practically eliminated in the receiver described in this article, due to the fact that the coil shape is such that energy picked up on one side is neutralized by the energy picked up on the other side. This fact makes it possible to tune in distant stations without the background of local stations interfering.

In this connection it is advisable to keep the leads from the batteries and the set wiring as short as possible to avoid the additional pickup that might offset the good effects of the low-loss doughnut coil, which are truly remarkable when properly utilized.

The receiver here described makes use of the reflex principle which further increases the value of the set for the number of tubes that are used. Although but three tubes are used, the current is passed through five stages, being amplified twice in the form of radio frequency, rectified by the crystal detector, and then amplified twice in the form of audio frequency, reflexing taking place in the second tube.

The set can be made very compact, with two tuning controls, and equaling, or out-performing, other receivers using five tubes in a straight circuit. Reception is clear and undistorted, lacking the characteristic regenerative distortion noticed in so many circuits where the tubes are operated near their oscillation point.

Material Needed.

To build the receiver you will need the following list of material:

One low-loss doughnut coupler.

Two reflex radio frequency transformers. (Low-loss doughnut coils, of the transformer type may be used here in the first stage.)

Two .0005 mfd. variable condensers, preferably straightline-frequency type.

One fixed mica condenser each of the following sizes: .001 mfd., .002 mfd., and .00025 mfd.

Low ratio audio frequency transformers, suitable for reflex.

One fixed or adjustable crystal detector.

Three tube sockets and rheostats for the type of tube to be used. Twenty five-ohm with the UV 201-A or C 301-A type, is recommended.

One single-circuit telephone jack.

One 7 by 18-inch panel with a 7 by 17-inch baseboard of ½-inch soft wood.

Binding posts, wire screws, etc.

No grid leak and condenser is required for this type of receiver as a crystal detector is used. Mount the apparatus so that short leads and wiring between the various parts can be made.

TOMMY RADIO

By ROBERT SUTLIFFE

I WENT into a barber's shop to have him cut my hair,
The barber said "Just come right in, be seated over there."
Three other men were seated and the last one winked his eye,
"'Twill take too long, I'll take a sneak," unto myself said I.

Oh, it's radio this and radio that,
it's radio night and day,
The barber plugged into a set and a band begun to play,
All thoughts of going from the place were soon gone from my head,
"I thought that that would hold you, boy," the radio barber said.

I took my girl one night with me, we thought we'd have a dance;
We like to wiggle round a bit and twist and hunch and prance,
We waited there, there was no band, I said, "Come, let us go."
But pretty soon the crowd began to dance by radio.

Oh, it's radio this and radio that, it's radio night and day,
You hear a band a thousand miles from where the spielers play,
You hear a man in Canada that talks in Tennessee,
And a fellow out in No Man's Land your neighbor's got to be.

On Sunday morn you stay at home, you needn't miss your psalms,
For through the air comes plain the Word, perhaps some chap sings "Palms."
You needn't even miss the plate when time comes to chip in,
A lot of folks are sending checks to kill long-distance sin.

Oh, it's radio this and radio that, it's on the land and o'er the lakes,
It climbs the mountains, makes the deep, o'er all the land good cheer it takes,
A million things lost yesterday, today you've come to know,
A rain of radios everywhere, we'll soon have radio snow.

(© Science and Invention.)

Mail Stations

The United States air mail service is being regulated through radio stations at principal points in the country.

Better Service Over Your Friendly Crystal

Increased power output of many broadcasting stations now makes it possible to obtain good reception with a simple crystal set if within a 25-mile radius of a broadcaster. This particular circuit tunes sharp because of a combination tuner and wave trap. Coil "A" consists of 50 turns of No

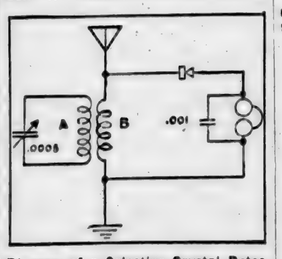


Diagram of a Selective Crystal Detector Circuit.

22 double cotton-covered wire wound on a tube 3½ inches in diameter. Coil "B" is 12 turns of the same size wire wound on top of Coil "A" but insulated from the windings by a layer of paper.

Effect of Increasing Wave of the Antenna

Two simple principles applied to the average receiving set will enable the operator to keep in tune with all waves from 200 to 600 meters. If a coil of wire is placed in series with the antenna, it has virtually the same effect as increasing the wave of the antenna, thereby making it possible to pick up higher wave lengths. The larger the coil the greater will be the increase in wave length. If a variable condenser is placed in series with the antenna or ground wire, the wave length range of the set is reduced. The smaller the capacity of the condenser the greater will be the cut in wave length. To place a coil in series with the antenna, connect the lead-in wire to one end of the coil and run a wire from the other terminal of the coil to the antenna binding post on the set. A series condenser is connected the same way.

Enamel Aerial Wire

Enameled wire has been proven by many tests to be the best for use in building aerials. Bare wire becomes coated with soot, which causes certain electrical losses, and fabric covered wires absorb moisture that also causes losses. The wire used should be of the best grade copper. Stranded wire of the same size as ordinary round wire is theoretically better, but in actual receiving practice it is hard to tell its superiority.

Those Jolly Deer

The fresh air children in Center Hall were entertained at a dinner and supper on Thursday at Sunset clubhouse. Most of them saw from one to four deer, and it appears the little animals came out especially on dress parade for the benefit of the new invaders of their fields of sport, for they blinked their eyes until the children clapped their hands and waved an adieu with their bushy tails.—Center Hall Reporter.

DEMAND "BAYER" ASPIRIN

Take Tablets Without Fear If You See the Safety "Bayer Cross."

Warning! Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians for 25 years.

Say "Bayer" when you buy Aspirin. Imitations may prove dangerous.—Adv.

Pleasure is the reflex of unimpeded energy.

Women, Why Not Enjoy Health?

Racine, Wis.—"I used Dr. Pierce's Favorite Prescription and it was a most wonderful benefit to me, because it gave me health and strength. It is an excellent tonic and nervine and should be given a fair trial, I believe, by every woman who is not enjoying the very best of health."—Mrs. Eleanor Pagel, 822 Racine Street.

All dealers. Large bottles, liquid $1.35; Tablets $1.35 and 65c.

Write Dr. Pierce's Invalids' Hotel in Buffalo, N. Y., for free advice.

Eloquent Pause

"I suppose you don't approve of the dappers?"

"I say so publicly. But—"

There is nothing more satisfactory after a day of hard work than a line full of snowy-white clothes. For such results use Red Cross Ball Blue.—Advertisement.

If you want anything told, tell it to a woman and tell her not to tell it.

Her Rheumatism Vanished!

After two years of agony, this woman thanks Tanlac for restoring lost health

*For two years, *Mary Arpentigny, had rheumatism in her right arm and hand so bad she couldn't lift a comb to her hair. Indigestion made matters worse.*

Finally her brother urged her to try Tanlac and improvement came with the first bottle. "Now," writes Mrs. Arpentigny, "my appetite is fine, my indigestion is gone and every sign of rheumatism has left me. I only hope others will profit by my experience."

*Authentic statement; address on request.

* * *

More people have been helped back to health by Tanlac than by any other tonic. Physicians testify to that. Our files are crammed with letters of grateful thanks from every part of the world. Isn't this evidence enough for you?

Don't go feeling worse and worse each day. Head off that sick spell. Start the Tanlac treatment today,

Ask for a bottle of Tanlac at your druggist's. Take it according to directions and see how much better you feel. We know what it can do for you because we know how it has brought health to thousands like you. It's folly not to make the test.

NOTE: For Constipation, take Tanlac Vegetable Pills, Nature's own harmless laxative.

TANLAC
FOR YOUR HEALTH

Some people tell the truth more for the sake of convenience than for truth's sake.

Seven thousand car wheels were recently ordered by the Argentine state railways.

BAYER — *Genuine* **ASPIRIN**

SAY "BAYER ASPIRIN" and INSIST!

Unless you see the "Bayer Cross" on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians for 25 years.

DOES NOT AFFECT THE HEART

Safe — Accept only "Bayer" package which contains proven directions.

Handy "Bayer" boxes of 12 tablets
Also bottles of 24 and 100—Druggists.

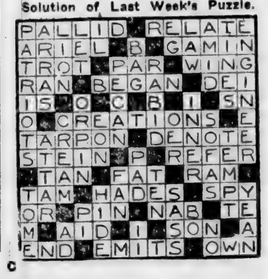
38—A fastening device
41—To annoy in fun
43—To elevate
46—Pleasant
48—Eggs of fish
50—The general direction of sunrise
52—A southern state (abbr.)
54—Meshed twine
55—Provided that
57—To exist
59—To perform

The solution will appear in next issue.

Solution of Last Week's Puzzle.



HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

HARD TO RECOGNIZE NATIONAL PASTIME

Sports writers in Calcutta call the pitcher a bowler and the bat a truncheon. "The wicketkeeper is a cross between a fencing master and a deep sea diver." So appeared mask and helmet to India's argus-eyed reporter.

The bowler "literally threw the ball with all his force at his aggressor"—which seems to make Hornsby our foremost aggressive American citizen on the diamond.

"There appeared to be as much merit in missing the ball as hitting it, provided it was done a certain number of times."

It seemed, moreover, that those navy "batsmen waggled their truncheon in a most aggressive manner." Besides which, the "batsman was advised to keep an awful watch on the ball."

"It happened that the ball and truncheon met with resounding whacks. This electrified the elders, who had hitherto been shouting weird words to the bowler."

Notwithstanding which, Secretary Kellogg is expected to carry on international amenities as if nothing had happened.

Sincerity Keystone of Real Architecture

Architecture, like the other arts, can never flourish, much less produce works of permanence and beauty, unless there is genuine and widespread interest, first, in building as such, and, second, in the uses to which it is to be put, for without genuineness of emotion no talent, however winning and adaptable, can secure the enduring respect of men. A great architect, like any other great artist, speaks and acts for his fellow men. Sincerity is the cornerstone of all good architecture. The lastingly precious temples, churches and civic buildings of the world are those built by men who professed a faith in which they believed. The architect of this sort of building is a people's spokesman, even though, in name, he serves a despot. His real interests are their interests, but because of superior ability, genius and devotion . . . he manages to embody their interests in a way that rightly represents them, and their culture, at their best, and himself at his best.—Alfred Mansfield Brooks, in Architecture.

Shakespeare's Lost Play

"Love's Labor Won," a play by Shakespeare, which was printed in 1600 and entered in the Stationers' Register August 23, 1600, has been lost. It may have been the original of "Much Ado About Nothing."

Uncle Eben

"De Man dat's lookin' foh trouble," said Uncle Eben, "generally brings a supply dat's mo' dun enough right 'long wid him.—Washington Star.

With Webster's Help

"I guess my daddy knows just everything," bragged little Walter to his playmate. Half an hour or so later he asked his father a question which the latter could not answer. Walter felt that he must fix it up somehow with his playmate, who was standing by, so he said, "Well, of course, my daddy doesn't know everything; but we got a dictionary that knows all the rest."

Cigar-Box Materials

The following woods are used for cigar boxes: Tupelo gum, redwood, basswood, yellow poplar, Spanish cedar, sap gum and red gum. These species are listed in the order of quantities used. For many years the best cigar boxes were made from Spanish cedar. However, within the past few years a number of these other woods have been substituted for Spanish cedar.

Dependent on One Another

Individual independence is a delusion and a snare. No one does or can live unto himself alone, but is dependent on others as they are on him. In all planes of life there is mutual dependence, and obligations cannot be ignored.—Grit.

Not to Be Hurried

It is by a constant series of new starts that the spiritual life is carried on within us. Sanctity is not the work of a day, but of life.—Goulburn

When he left the Tustison home he started for Butler

Thanksgiving Praise

Alone, dear Lord, of all my nights and days,
I cannot sing Thy goodness, far too vast
For my weak utterance. Let me humbly cast
Upon the sweep of universal praise
My single tribute; let the morning raise
My anthems for me; let the storied past;
In varied hallelujahs nobly massed,
Exalt the infinite story of Thy ways.
Where'er the blossoms glad in loveliness
Reflect Thy beauty, or the bird's bright song
Has holy skill the Father's love to bless,
Or where the shining stars through ages long
The soul of worship silently express,
Grant me a lowly place in that thanksgiving throng.
—Amos R. Wells, in the Continent.

THE ARTIST OF THE DAY

A BOY'S OPINION of THANKSGIVING

by Mary Graham Bonner

WHEN I go out to parties
I never eat all I can,
Yet they say that I must grow
So I'll become a strong man.

When I go out to dinner
I have to be too polite
Yet if I don't grow a lot
I'll be a miserable sight.

Once a year I get a chance
And add strength and height this way.
I don't think boys could ever be men
Were it not for Thanksgiving Day!

(Copyright, 1925, Western Newspaper Union)

WHAT THANKSGIVING SHOULD MEAN TO US

Pilgrim Men and Women at Plymouth Set Example.

THANKSGIVING is a day unique in the list of holidays—not perhaps, so unique in its conception as in the meaning which the day has come to have. We think of it as a day of getting together. The dinner is its symbol. Faith in the goodness of God and a reverent and formal prayer of thanksgiving for His bounty is its avowed purpose.

But its greatest profit to us may come from the thoughts it invokes of that little band of hardy men and women who knew what it meant to face hunger; to know hunger and stick to an appointed task. That task happened to be the opening up of that new land which was destined to provide so bountifully for you and me who have inherited it.

They were stickers—those from whom this heritage has come down. Hardy? Yes; but with a ruggedness that was not alone a physical attribute. They experienced the primal lessons: want, fear, and the need of strife. But they stuck. And they won. That first Thanksgiving day was for them a solemn rite. If they—that band of Pilgrim men and women—could feel so honestly thankful for God's bounty as it was measured out to them at Plymouth in 1621, what one of us in this day and generation but needs be ashamed to feel less. It was a solemn occasion, but how could they else but be happy? Let us be happy on this Thanksgiving day. But, too, let us not forget.—Frank H. Sweet.

"The Store that Does Things" Wayne and Harrison

SPENCERVILLE

Frank Balts was pleasantly surprised at his home, west of town Sunday, the occasion being in celebration of his forty-fifth birthday anniversary. The day was spent socially and at the noon hour a basket dinner was served, a feature of which was the large frosted birthday cake. The guests included Mr. and Mrs Ray Rhodeffer and Mr. and Mrs. William Rhodeffer of Auburn; Mr. and Mrs. J. F. Balts of Spencerville, Mr. and Mrs. W. A. Sommers of St Joe and Mr. and Mrs. Paul Adams of Fort Wayne

Mrs. Ada Berry of St. Joe, was a weekend guest of her daughter, Mrs. Hazel Steward.

Ralph Wise and family of Toledo, spent Saturday and Sunday in the James Vallieu home.

Mrs. Ethel Bowser spent Tuesday at Fort Wayne the guest of her sister, Mrs. Minnie Crabb.

The C. C. Club will be entertained Friday afternoon at the home of Mrs. Minnie Ulm of south of St. Joe.

Miss Leone Widdifield, who has been employed at Cincinnati, O., for some time, is spending a few weeks at the home of her parents, Mort Widdifield and wife.

Alcohol for your Car at Curlo's.

Miss Marcella Zimmerman was a weekend guest of relatives at Ft. Wayne.

Mr. and Mrs W. O. Lake and children spent Sunday in the Laten Lake home at Butler.

James Reed and wife and Miss Ida Reed were Sunday guests of their parents, Mr. and Mrs. Wm. Reed at Rehobeth.

The Freshman class of the high school was entertained on Friday evening at the home of Mr. and Mrs. Charles McCrory.

Mrs. Florence Barr, of Fort Wayne, who spent several days last week in the Jerry Markle home returned home Friday accompanied by her sister, Ada.

The revival meeting still continues with the following ladies as leaders, Mesdames Golden High, Louie Beam, Hazel Steward, Ethel Bowser, Mrs. Guthrie, Lina Odle and Emma Smith.

Mrs. Harley Wearley and two children, Samuel Kelley and Mrs. Frouie Wearley of Woodburn, were Sunday dinner guests in the Vol Hay home. Guests of Mrs. Tressie in the same home on Sunday afternoon were, Mrs. Lena Zimmerman and son, Dallas.

In the settlement of the Henry Beams estate at Spencerville, Frank Beams will become owner of the Beams store and other buildings. He is now operating the business, having made the purchase on contract, pending the settlement of the estate.

Goodrich ZIPPER BOOT

We have this Boot for Ladies and Misses-It's easy to fasten, Comfortable and Good Looking Just ZIPP and it's fastened.

It's one of our Sellers.

WINTER FOOTWEAR

Is now one of your problems and as our stock is larger than ever, we feel sure of being able to help you select your winters need.

UNDERWEAR: We are well stocked, but its selling fast—Better get yours while we have it. Come In.

Fine assortment of Blankets ranging in price from $2.75 to $5.50—Sold only 75 pair this season. Big values.

Plenty yard-wide Outings.

Beams & Co.

Spencerville

Russel R. Reidenour

ATTORNEY

Auburn, Ind.

Home Bureau Activities

The Women's Home Bureau Club entertained their families and some other guests on Saturday evening at the school building.

The program was given as follows:— Piano solo, Mrs. Pluma Hamilton; welcome announcement, Mrs. Howard Borthwick; readings by Marguerite Milliman, Margaret Hamilton, Harold Baker, Virginia Shull and vocal solo by Joe Woodcox; these were followed by an amusing play entitled, "The Old Maids Association," which was very lively and so smartly rendered that it was exceedingly entertaining. All the actors in this farce were quaintly dressed in very odd and old fashions, which was a whole show by itself and the production was so well handled that it showed much work and patience in the preparation, and was given rapt attention by a large audience. Those who took part in the play were Mesdames Howard Borthwick, John Woodcox, Howard Krise, Joe Foltz, H. M. Widney, George Baker, Vernie Monroe, O. K. Shull, Lorne Means, Del Draggoo, Monte Storer, Ira Bone and the Misses Edith Widney and Marguerite Milliman.

After this a great banquet was given in the dining room by the ladies of the Bureau, and this was a great feast. The whole affair was a success especially for such a rainy evening.

Special mention is made of Mrs. Borthwick's efforts in gathering the paraphernalia and leading the practice and of the Pres. of the association, Mrs. Woodcox.

Radio Fans To Hear Dedication

St. Joe radio fans will have the opportunity of hearing play-by-play radio reports of the Indiana home-coming memorial stadium dedication exercises and Purdue-Indiana football game, Nov. 20-21 at Bloomington.

The new 5,000-watt super power broadcasting station WLS, Chicago, one of the strongest sending stations in the world, will broadcast the Indiana program. The wave lenght is 345 meters.

A leased long distance telephone wire will connect the I. U. campus with the Chicago studio, so that the cheering and battle cry of old grads, band music, addresses and other features of the program can be clearly heard.

The Friday evening radio program opens at 8 p m, and the Saturday afternoon program at 1 p. m Indiana grads in the far corners of the country are planning radio parties for the pep session and game. Owing to the extremely high power of the Chicago station, the Indiana radio program is expected to stand out above all others the weekend of Nov. 21.

Game Wardens Nab Another at Newville

Grant Cupp of Defiance, was given a heavy fine Tuesday by Justice E. A McClintock, when game wardens found three muskrats, one oppossum and a rabbit in his possession. The total amount of the fine and costs was $178.65. Another charge of having game in his possession is still pending. Cupp was fined on 15 different charges of setting as many traps along the river at Newville, on the lands of Walter Miller and Harry Smith, without the consent of the landowners. Cupp is in jail awaiting trial on the possession charge.

See Furnish for Tires.

Get that Furnace repaired before winter. Bowser and Read.

Your subscription may be due and we would appreciate you sending us the money.

Organized for Roll Call Drive

Red Bross Roll Call activity will begin November 11th, "Armistice Day". Workers will be in the field at that time.

The following named persons have been appointed as managers for the places indicated:

Auburn—W. H Willennar and W. H. Schaab.

Union Township—Larry Brandon.

Garrett and Keyser Township—Harry Brown, W. H Mounts and Lyons Club

Butler and Wilmington Township—Earl Brant and Dr Shoemaker.

Waterloo and Grant Township—D. L. Leas and Mrs. Dr Showalter.

Corunna and Richland Township—Estell Dawson and Mrs. Ollie Blackman.

St. Joe and Concord Township—Frank Milliman

Spencerville and Spencer Township—Clyde Rectenwall

Ashley and Smithfield Township—Mrs. Wm. Zurbrugg.

Butler Township—Mrs. Hawver.

Franklin Township — Prudence Ratts.

Jackson Township — Mrs Lola Carper and Philip Carper.

Newville Township—Dr. Brunson.

Stafford Township—Chas. Arford.

Troy Township—Mrs. Claud Holinger.

Fairfield Township—Mrs. Geo. Harms.

In addition we will have some volunteer stations in the business houses of the towns of the county.

I hope the time will come when our people will feel the necessity of joining the Red Cross so keenly that they will seek the opportunity to join rather than be pursued—this will be a good time to start—Volunteer this year.

C. M. Brown,
Roll Call Chairman

F W Silberg, D V M

Frank Silberg Heads Loan Association

Frank W Silberg of Butler, has been selected president of the new Peoples Savings and Loan association which is being organized in DeKalb county. The company is capitalized at $1,000,000

The primary purpose of this association is to furnish the people of DeKalb county not only a safe place in which to place their savings and capital while earning a maximum interest consistent with good business, but also for the purpose of lending this same money to those desiring to buy or build homes.

Under the laws of Indiana this association is restricted to the loaning of money placed with it to first mortgage security only. No money can be loaned on personal security of any kind.

The personnel of this association is made up of well known DeKalb county men who believe an institution of this kind to be a valuable asset to the community and are lending their names and efforts largely from a civic standpoint in behalf of their home community. Offices where members may make deposits will be distributed throughout the county wherever it is deemed advisable, the home office being located at Auburn.

Sunday School Report.

Fur Coat Problem Is Hard to Solve

The fur coat problem is a little different from any other perplexity that the mode supplies and a lot different from what it was in the earlier years of this enlightened century. There was a day, observes a fashion writer in the New York Herald-Tribune, when the distinction of the fur wrap depended merely on it particular skin—when the expressions "my chinchilla," "my sable," or "my seal" immediately classified the speaker in the ranks of the haute monde, entirely regardless of the silhouette or details of her epochal acquisition. The life of any particular model was measured by the durability of its pelt and the same fur coat would appear and reappear for several sensons, serenely disdainful of fashion's severest evolutions.

Granting that the fur coat has fallen completely under the dominion of the mode, what general principles are to govern its selection and what are the specific details to be considered this season? Surely it is unsound economically to add a new fur wrap to each winter's wardrobe and yet, if fashion dictates seasonal changes, what is the alternative?

The ladies who light-heartedly acquired straightline coats last winter are weeping and wailing this flaring autumn and what warranty is there that this year's modish wraps may not be consigned to the dim indubitable past in the winter of 1926-'27.

The Invariable Flare.

The problem can only be solved in one way. A skilled analysis of the situation must be followed by a carefully worked out compromise—and this is the single instance where fashion permits a compromise. It is not so much a question of the moment's mode as it is of the current style cycle. Tomorrow is quite as important as today and with this consideration in mind we shall forthwith point out the middle path to pelted smartness.

The silhouette is far and away the most important consideration when acquiring a new fur wrap because it does not lend itself easily to the skill of the remodeller and because all through the mode it is the first detail to attract the eye. Last year in our fur coat analysis, we advised forsaking the straightline in favor of a moderate flare and at the same time predicted that the flare would entirely dominate the fur wrap of 1925-'26. That forecast has been sweepingly realized and the flare is the inalienable mark of furred chic this season. Clearly no model that is to bear this year's vintage can omit the flare or even adopt it in a half-hearted imperceptible version. And yet it is questionable whether the extremely flared interpretations will not look the least bit jaded when next autumn comes.

A Compromise Verdict.

So for your new fur coat we counsel the flare with a grain of discretion which means that you are not to adopt the extreme or bizarre models and that you are to concentrate more on general fullness than sudden width at any specific point. Last year when we suggested the moderate flare it was considered radical advice; this year it has become conservative. But while

Natural Krimmer, Tight at Waist, Flaring at Sides.

careful analysis leads definitely to the conclusion that graceful width is to dominate fur coats next season, as well as this, it may take a distinctly different form. And so it would be unwise to commit yourself to any extreme translation of the flare. Choose the middle path and you will combine smartness and security for a happy compromise.

There is a single exception to the flared idea in fur wraps and that is in the sports or trotteur models. Every other type indorses some species of flare. Some of these originate at the shoulders and simulate a cape back but mostly they swing from a narrow hipline into front and side godets. Cape effects are most popular for the afternoon—the mode du soir, although not disdaining the cape silhouette, shows a distinct preference for sleeved models.

The fur coat flare is effected in as many ways as it is on dresses and cloth coats. The flare may be achieved by the godet, by the circular flounce or by the gathered straight flounce. The flounce may appear at the front the back, at one or both sides, or all the way round the coat. Then, too, the distended effect may be arrived at through patches of fur applied to the coat in such a manner that a flare results. Less usual methods are through gathered in-set sections, inverted plaits, inset panel sections which extend into a border or the cutting of the coat on graduated circular lines.

Length of New Fur Coats.

The next consideration concerns the length of the new fur coats. The models of the current season reach either to the hemline of the dress or terminate an inch or two above. Either is satisfactory this year, but, delving once more into the future, which is preferable? There has been a tendency

Coat of Muskrat Pelts. Irregular Hemline Is Featured.

this autumn away from bizarrely short skirts and there are indications that by next autumn that tendency may be further accented. Furthermore the flare in a longer model adds more dignity to the general effect and inasmuch as there are sign posts which point to a return of at least the ghost of the old-time elegance, our suggestion is that you choose the longer models, everything else being equal. The ideal fur coat length should be about thirteen inches off the ground.

Collars, cuffs, and the various other details that differentiate this winter's fur coats may be adopted with no fear that next year shall find them demodes. Collars and cuffs each show a predilection for the flared silhouette and they are invariably full. Among the former, shawl collars and chin effects share the spotlight while flared cuffs often add the finishing touch to a liberally constructed sleeve.

Further smart details that mark the fur wrap of 1925-'26 are the cape-back, either in one piece or slashed at the center back, all-around cape effects, front borders that form a long trimming from collar to hemline, bolero effects, scarf collars, standing collars and wide revers of contrasting fur—the revers cut in one with the collar—a wide flounce that continues up the center back of the coat, gradually becoming narrower until it disappeared underneath the collar.

Fur Coat Linings.

Fur coat linings may be very ornate or quite sober. Smart sports coats of fur are frequently lined with kasha while more formal models often feature hand-embroidered silk linings or hand-painted linings depicting jungle scenes.

The reversible coat composed of cloth on one side and fur on the other and the fur-lined coat play an important part in this winter's models. Leopard, gazelle and burunduki are the furs most in evidence with this type of wrap.

So far as the pelts are concerned you may choose from this year's offerings with perfect equanimity and assurance that you will remain in the picture next year—and if necessary for several following years. There are, of course, certain sharp distinctions drawn in the character of the skins to be worn for the different occasions. For afternoon wear, flat furs are easily smartest and moleskin and caracul are the two outstanding leaders in this class. The first is bleached and dyed in numerous colors, leaning principally to beige, golden brown and mahogany. Caracul comes in the more sedate hues of grey, black and brown. If you will invert that order you will have about the correct order of color frequency for the fall and winter seasons. Grey is newer than either brown or black but we suggest that the frugal budgetaire confine her spectral fancy to those two ancient favorites. And of the two our preference is for black. Mink, broadtail, baby lamb and antelope are also en regle for daytime wear.

Second Floor Plan.

By WILLIAM A. RADFORD

Mr. William A. Radford will answer questions and give advice FREE OF COST on all problems pertaining to the subject of building, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on the subject. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

Every once in a while one sees a house that makes him think, "There is just the sort of a place that I would like to have." We cannot always put our finger on what it is that makes us feel this way, but we never fail to recognize the feeling. Such a house is illustrated here and, as so often is the case, the feeling defies analysis. Most likely, however, it is created by a combination of things.

First of these might be mentioned the setting in which it is placed. A house built, like this, in the midst of fine old trees has everything in its favor at the very start. The trees suggest cool shade on hot summer afternoons and shelter from the bitter winds of midwinter. And then, too, there is always something friendly and inviting about trees, an appeal which has been handed down to us through the centuries from our earliest ancestors, perhaps.

After the setting, the general lines of this house should be mentioned. They are low and comfortable without the least suggestion of squattiness, and the overhanging eaves, white shutters, low roof line and lantern-lighted entrance give a homelike appearance. Nor does the interior fail to carry out this first impression.

From the terrace one enters this home through a vestibule and French doors and finds himself in a large reception hall. Here he may hang his hat in a convenient coat closet with a mirrored door and ascend to the upper floor or pass into the living room or dining room. The former, which is at the right, extends entirely across one end of the house. At the center of one side is a large fireplace with built-in bookcases beside it, while at the opposite side French doors open onto a private porch. The room is lighted on three sides by attractive casement windows.

The dining room is smaller, but of ample size and is provided with French doors to shut it off from the reception hall. Behind it is the kitchen with a breakfast nook, pantry, cases and every modern convenience built into its compact space. It opens onto a rear entry which in turn gives onto the back porch and is connected with the reception hall. Off of this entry there is also a toilet, provided with a large closet. The basement stairs are placed just behind the stairs leading to the second floor.

On the second floor there are one large bedroom, three smaller ones and a bathroom. The large bedroom, placed directly over the living room, also extends across the entire end of the house and is provided with two large closets. Each of the other bedrooms has a large closet and the one at the front of the house has a fascinating seat built in beside the front windows.

The bathroom, at the rear of the house, is conveniently located in relation to all of the bedrooms but well separated from them. Inside of it there is a linen closet and it, as well as all the rooms, is well lighted by outside windows.

Closet Doors Give Place to Portieres

Closets are necessary in every house, especially if bedrooms are too small to accommodate a wardrobe. In many houses a new type of closet is used, one that has no door but is closed by portieres. It is open for the full length, thus doing away with a door, and giving the maximum space possible, access to which is always easy.

In the design of apartment houses for people usually called "poor" it is becoming increasingly common to have no closets. It is considered that such people have very few extra clothes and those they have can well be hung from nails or hooks in the walls. In this way dust-collecting corners are eliminated and vermin-breeding spaces are reduced.

This is not such a hardship as it might be considered at first thought, for there are drawers sold today for the storage of clothing that are arranged to be hung on the side rails of beds and slide under the mattress, thus utilizing a space that has to date been lost.

Lack of closet room in olden times led to the built-in bed with its chest below and shelves above. It is to be hoped that such a piece of furniture will not be revived.

Fireproof Floors

Thus far the concrete houses which have been built and classed as fireproof have been of the monolithic construction and the block and tile houses should now have a fireproof floor, either cast in place resting on the concrete block walls or by the use of the precast concrete floor joists. The latter method probably is the cheaper and more easily installed.

Small House

A good working adage for the builder of the moderate-priced home should be "Don't attempt too much!" The fundamental principle of the small home should be simplicity. The attempt, too often made, to crowd into it all the features of a large mansion invariably ends in disaster both to convenience and artistic effect.

Seen and Heard In Indiana

Republicans won most of the battles for city offices in western Indiana towns in Tuesday's elections.

Old Gold day, one of the most cherished traditions of DePauw university, attracted hundreds of the alumni and other visitors to Greencastle to join in the cefebration of the nineteenth annual home-coming.

More than thirty inmates of the Indiana reformatory, near Pendleton, are being deported in connection with parole conditions requiring that they return to native homes. Ten will be sent back to Mexico.

The children's school building at the state sanatorium for tuberculous patients near Rockville was destroyed by fire with a loss estimated at $40,000. The building was built less than a year ago at a cost of $47,000.

Rev. Willis D. Engle, retired rector of the Episcopal church, dean of the Masonic fraternity in Indianapolis and veteran secretary of Mystic Tie lodge, No. 398 A. F. & A. M., died at his home in Indianapolis.

Eight men, soft-drink proprietors and employees, were arrested at Jeffersonville by federal prohibition officers. Michael Wall, former chief of police of the city, was one of those arrested on charges of violating the prohibition laws.

Lincoln C. Andrews, assistant secretary of the treasury, Washington, D. C., approved appointments by prohibition administrators, including that of Ansel R. Harris, assistant administrator in charge of enforcement, Indianapolis.

A central gymnasium and civic auditorium has been assured Gary through a gift of a $75,000 downtown site by Elbert H. Gary of the United States Steel corporation. The building to be erected on the site will be constructed by the Gary public schools at a cost of $150,000.

Checks for $300,000 from the United States Steel corporation, representing the final half of their city taxes, were received by City Treasurer John Lane. Payments from the various steel company subsidiaries at Gary with the $300,000 already paid into the city treasury, represent approximately half of the total tax collections in the city.

Taxpayers of Indiana will be saved $1,291,212 on next year's tax payments, as a result of reductions in tax rates ordered by the state board of tax commissioners at Indianapolis in fifty-four taxing units in twenty-six counties. The reductions, ranging from ½ cent to $1.05, were ordered by the board during the last few weeks.

A temporary structure replacing the wrecked Gosport bridge on State Road 12 is now open to traffic, according to the bulletin issued at Indianapolis by John D. Williams of the state highway commission. The large steel bridge over White river, west of Martinsville is closed to traffic while a new floor is laid. New joists will be laid under the floor, as the old bridge has become unsafe.

Former Mayor Roswell Johnson of Gary returned home from the federal penitentiary at Atlanta, to which he was sentenced for violation of the national prohibition law. More than a hundred friends greeted Johnson at the railroad station in Gary. Of the seventy-five persons convicted in the Gary liquor conspiracy case, only two are still in prison. They are D. M. Kinder, former prosecutor of Lake county, and Attorney B. S. Lucas.

The cost of maintenance and operation of the general departments of the Indiana state government is growing, according to statistics made public at Washington, D. C., by the Department of Commerce. For the fiscal year ending September 30, 1924, the cost was $22,928,956, or $7.57 per capita. In 1923 the per capita was $7.02 and in 1917 $4.28. The total 1924 expenses, including interest and outlays, were $30,889,363. The total revenue receipts in 1924 were $37,475,218, or $12.36 per capita.

Floyd Williams won over his Democratic opponent for mayor, Thomas Mullenix, in Gary. C. M. Greenlee was a similar victor over John G. Capouch, Democrat, for city judge, and John R. Lake and John Dwyer, candidates for city treasurer and city clerk, respectively, were returned by big majorities over Cassius Carpenter and James Cory. At Hammond, Adrian Tinkham, klan-supported Republican, won over Dr. D. W. Weis, Democrat. A victory in Whiting for the Independent Citizens' ticket was the only Lake county loss for the Republicans. Walter Schrage defeated Frank Paskewietz, Republican, and T. Joseph Sullivan, Democrat, on the same ticket, was elected city judge. Dr. Raleigh P. Hale, Republican candidate for mayor, and his entire ticket, won in East Chicago. Mayor Edward Glover, Republican, was re-elected in Crown Point with no opposition.

Lying in a pool of blood, with the top of his head virtually blown away, Dr. James D. McDowell, age fifty-two, widely known physician and twice mayor of Vincennes, was found dead by his mother-in-law, Mrs. Samuel A. Jordan.

Judge W. A. Kittinger of Circuit court has granted A. W. Brady, receiver of the Union Traction company at Anderson, permission to buy 33 new automobile busses that will cost an aggregate of $271,000. This purchase will give the company thirty-nine busses

ACHES AND PAINS ALL OVER BODY

Mrs. Proctor Reports Great Benefit by Taking Lydia E. Pinkham's Vegetable Compound

Sharpsburg, Pa.—"I recommend Lydia E. Pinkham's Vegetable Compound to all suffering women. I have taken four bottles of it and I feel 100 per cent better. I was dizzy and weak with no appetite, no ambition and with a tired feeling all the time. I had aches and pains all over my body and had the headache a good deal. I saw your advertisement in the 'Pittsburgh Press' and thought it might help me. I have been greatly benefited by its use and highly recommend it for all ailments of women."—Mrs. J. H. PROCTER, Box 1, East Liberty Station, Pittsburg, Pa.

Such letters prove the great merit of the Vegetable Compound. These women know by experience the benefit they have received. Their letters show a sincere desire to help other women suffering from like ailments. Let these experiences help you—now.

In a recent canvass of women purchasers, 98 out of every 100 report beneficial results by taking Lydia E. Pinkham's Vegetable Compound. Sold by druggists everywhere.

They break up colds and regulate the bowels. *Used and recommended by Mothers for over 30 years.* Sold by Druggists everywhere. Trial package FREE. Address, Mother Gray Co., Le Roy, N. Y.

FOR OVER 200 YEARS

haarlem oil has been a world-wide remedy for kidney, liver and bladder disorders, rheumatism, lumbago and uric acid conditions.

GOLD MEDAL HAARLEM OIL CAPSULES

correct internal troubles, stimulate vital organs. Three sizes. All druggists. Insist on the original genuine GOLD MEDAL.

It takes a woman with a good constitution to pose as a chronic invalid.

GASTRITIS IS DANGEROUS STOP IT QUICK

When your stomach is bloated—when it is so distended with gas that pressure on the heart almost suffocates you

What are you going to do?

Take a chance or get rid of the gas quick?

The one big selling stomach medicine today is Dare's Mentha Pepsin and its mighty power to relieve terrible gastritis, acute or chronic is a blessing to tens of thousands of people who have been unable to get help from any other source.

It's splendid for any stomach trouble—is Dare's Mentha Pepsin.

So when your food won't digest or gas, bloating or shortness of breath cause you to become nervous or dizzy or have a headache always remember that you can get one bottle—of Dare's Mentha Pepsin from your druggist and if it doesn't help your disordered stomach—your money will be returned.

ECZEMA

Dries right up!

If you just realized how easy it is to stop fiery, itching, burning eczema by simply building up the red-blood-cells in your blood with S. S. S., you wouldn't waste another minute trying to do it any other way.

That's the only way to relieve irritated, broken out skin of any sort. You lack rich, red blood. Impurities are in your system. The blood is so weak it can't fight back and overcome the enemy, so the impurities break out through the skin.

S. S. S. builds the blood back—builds millions of new red-blood-cells. Eczema dries right up. Boils, pimples, blackheads, ugly blotches and irritating rashes all disappear.

Clear up your skin. Get S. S. S. All druggists sell it. The larger bottle is more economical.

Quick Safe Relief

CORNS

In one minute—or less—the pain ends. Dr. Scholl's Zino-pad is the safe, sure, healing treatment for corns. At drug and shoe stores.

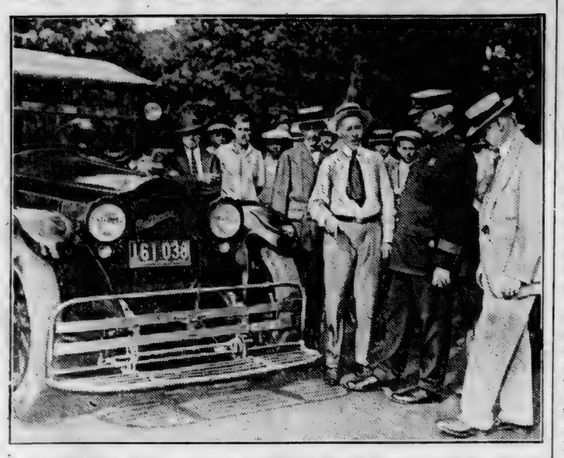
SAFETY AUTOMOBILE FENDER IS INVENTED



Traffic heads of the national capital are shown inspecting an automobile safety fender during a recent demonstration. A. A. Roth, the inventor, is shown pointing to the fender. Traffic Director M. O. Eldridge is shown closely observing the same and Captain Brown of the traffic office is also interested.

PARTNERSHIP IN STREET TRAVEL

One Cannot Afford to Be Reckless in This Age of Automobile Perils.

By C. B. AUEL, President National Safety Council.)

The motorist and pedestrian are partners in the street. Like in a commercial partnership or a marriage partnership, the failure of one partner is the hardship of both.

Do unto your partner as you would have him do unto you, is the Golden Rule of the street.

In this age of motor perils one can't afford to be reckless. Twenty thousand persons, the young and the old, the sprightly and the feeble, were killed in the streets and on the highways of our country last year. Some of these were killed because they didn't respect the rights of motorists, and some were killed because motorists didn't respect the rights of pedestrians. The same causes apply to the deaths of many of the automobile passengers.

Right-of-Way Question.

A lot of people say: "Well, who has got the right-of-way?" That question has not yet been answered by lawmakers as between the motorist and the pedestrian.

Since all of us are pedestrians at times, we have first-hand knowledge of the feelings of those who walk, as well as those who ride.

It is sometimes aggravating to stand on a corner waiting to cross a street without ever a motorist stopping his car to give you the right-of-way. And if an automobile driver does stop and wave to you to cross the street, you hail him as "one man in a million."

Partnership Affair.

The motorist does not own the road. Long before there were automobiles, pedestrians traversed our streets and highways. But pedestrians don't own the road, either. It is a 50-50 partnership based on respect of one for the other.

If you are driving an automobile, give the pedestrian a safe chance to cross the street, and if you are a pedestrian, do not thoughtlessly jeopardize yourself and the motorist by carelessly thrusting yourself into his path, in the hope that he may stop.

If you conduct yourself courteously whether pedestrian or motorist, you are doing your part to prevent accidents, and remember that an ounce of prevention is worth a pound of cure.

When Car Sticks in Mud Don't Speed Up Engine

When the car becomes stuck in the mud do not try to put on speed to get out, for this will only spin the wheels and make them sink deeper. Put the engine in low, go slow, and do not try to turn from side to side. Keep straight ahead. If the front wheels are turned ahead the engine must push the car against the weight of the mud ahead.

If the wheels start spinning put on the emergency brake just enough to stop the spin. That will frequently enable them to take hold. If it is possible, get any old rope, board, bushes, sacks, or even a quantity of paper, and put it under the wheels to help give traction. It is also advisable to apply chains before tackling wet or muddy roads.

World's Automobile Bill

The world spent $3,360,000,000 for new motor vehicles in 1924, a survey by the United States Department of Commerce shows, says the Popular Science Monthly. On January 1 of this year there were in operation in all countries 18,615,000 passenger cars, 2,892,000 trucks and 1,262,000 motorcycles.

Watch Back Curtain

An open car with the top up and the back curtain out, or with the celluloid broken, is very dangerous to passengers. Carbon monoxide gas from the exhaust will come into the car from suction. The faster the car travels, the more dangerous the condition becomes.

Wooden Jacks Will Keep Tires Off Garage Floor

It is easy to make a set of wooden jacks that will keep tires off the floor.

The jack illustrated is designed on the "knuckle joint" principle, using an ordinary strap hinge as a knuckle. A 4-by-4-inch block serves as a base held to the lower member by spikes. To prevent the length of ¾-inch pipe

Simple Jack to Keep Tires Off the Ground When the Car Is Stored.

used as a detachable handle, from hitting the hub cap when the jack is raised, a space block is attached to the front of the lower member.

The jack is shoved under the wheel, back of the hub cap, as shown in the illustration. Then the pipe handle is inserted in the hole and the top end of it pushed toward the car, and the wheel is raised to height desired.—Popular Science Monthly.

Blow-out Patch Handy for Use in Emergency

The importance of the emergency blow-out patch as a part of the motoring equipment is understood by all experienced motorists. When the motorist discovers a clean-cut fabric break, stone bruise or a small cut entirely through tread and fabric, he simply applies the patch, inserts and inflates the tube and continues his trip.

But it must also be understood by the tourist that this patch is for emergency, not for permanent repairs. At the end of the trip during which an accident has occurred necessitating the use of the emergency patch, the tourist should see that the patch is taken out and the casing repaired properly at any vulcanizing shop. In this way the emergency patch will have served the purpose and the mileage-giving qualities of the casing are not impaired.

On the other hand, as the tire causes him no further trouble, the motorist is likely to forget the patch he applied for emergency purposes. The result of this neglect would be that by the natural flexing and bending of the tire the patch is forced into the cut or break, wedging the fabric apart until it becomes too weak to resist the inside air pressure and a blow-out occurs, ripping the fabric apart to such an extent that it is beyond repair. With careful treatment the emergency fabric patch has saved the life of many a casing, but it has also brought more than one casing to death by thoughtless neglect.

Back-Seat Driving Going Out of Fashion Rapidly

"In the old days when a car was going to make a turn or come to a stop, it was no unusual sight to see arms extended from the car in every direction," says Charles M. Hayes, president of the Chicago Motor club. "Back-seat driving has gone out of fashion to a great extent, but a reaction in the matter of signaling has set in. Today the back-seat passenger refrains from signaling, but in too many cases the driver also neglects to signal.

"Many motorists are of the opinion that this is merely a courtesy of the road, whereas it is a definite obligation imposed by law. The motor vehicle act in Illinois, says: "No driver of a vehicle shall suddenly stop, slow down, or attempt to turn around without first signaling his intentions with outstretched arms or otherwise to those closely following in the rear.

"In Chicago a city ordinance requires drivers moving out from the curb to signal their intentions. This is a common-sense regulation in effect in most cities, and one which would prevent many accidents."

Stonework in the Garden

Next to the flowers themselves, there is nothing that gives so much charm to a garden as a little rough stonework, to my way of thinking. A low, irregular stone wall against a little bank, two or three curving stone steps around a bend, stepping stones set in the grass, or a built-in pile of stones holding a bird-bath in their laps—all these add immeasurably to the garden's lovableness.

To suburban dwellers such effects are not difficult. Smallish stones are generally to be had, and the children may drag them in a stout wooden cart, which they may make themselves. As to the builder of the walls or steps, I know one office man who attributes his splendid fitness and hard muscles to the outdoor work he does around his place on week-ends and holidays.

Autumn is the ideal time to get such work done. The air is cool and crisp, and one may work outdoors without getting heated and perspiring. Then, too, the stones get a sort of settled look before next spring, and when the new grass comes in March, it will grow up around the stones and make

them look as if they had been there for years.

It is not only country dwellers who may indulge in decorative stonework. I know a city back yard—the tiny garden of a famous painter—that has wandering cobblestone paths, a low stone wall with vines clambering over it, and a semicircular flight of stone steps leading from the house to the garden. He did all the stonework himself, in moments of relaxation and play, when he laid his busy brushes down and went out to get some muscular work in the open.

If stones are not to be picked up in your immediate neighborhood, a cartload can be delivered to you at a price low indeed for the amount of beauty you can pile up!

To Spend or Not to Spend

"I'm going to take you to luncheon at the Ardsley-Blenheim," said the young matron, linking her arm in that of an out-of-town friend.

"My goodness, aren't you awfully extravagant?" responded the friend; "Gertrude says she could feed her family a whole week on what one luncheon costs her at that gorgeous hotel. She goes there every now and then, just the same, I notice."

"Of course she does—but only now and then, you'll notice. And I think she is quite right to go there occasionally. You see, women generally divide up into two classes—the extravagant and the economical. Your extravagant woman likes to wear the most elegant clothes, go to the most exclusive restaurants, and use a taxi instead of the street car. Your economical woman is miserable when she buys a really expensive coat, eats in the cheapest of little lunchrooms or cafeterias, and would blanch at the mere thought of indulging in a taxicab.

"Now the trouble with both these classes of women is that they almost never do the other thing. If the de luxe lady would go once to a high-priced place to every five times at a modest little tearoom, she would have just as good a time and save her husband much money—and perhaps some worry. On the other hand, the little economical lady acquires a cheap outlook after a while. She is not at ease in a really expensive place and doesn't behave as if she belonged there. She gets a middle-class, dull look by wearing only middle-class clothes and visiting middle-class shops.

"Now I believe in being an all-round woman, who is at home wherever she goes. By having one good gown or coat, in which she feels well dressed anywhere, she can now and then visit the haunts of fashion and wealth—if only to know what it's like. But she can economize all she wants to on house clothes, and in return for one seat in the orchestra at the opera she can go ten times in the balcony to see a play, and still not feel inferior. We mustn't get rusty and awkward just because we can't live expensively all the time. You know the old saying: 'One can wear old worn shoes without shame, provided one has a handsome pair at home!' If we feel at home in a luxurious setting, we can go cheerfully to unluxurious places."

NORTH AMERICAN ELK

"We love the autumn," said one elk to another elk.

"We do," said the second elk.

"You're not talking, my friend, about anything I don't know. You're telling me nothing new," he added.

"All of us know it," said the first elk, "for we all know that we love the autumn so much and think such a great deal of the scenery that we look our best then too."

"What do you mean by scenery?" asked the second elk. "I know that in the autumn we look our best, but I do not know just what you mean by scenery.

"Now you are telling me something I don't know. In fact I can readily see that there are some matters I do not understand."

"Scenery," said the first elk, "means the scene or picture around us."

"There is no picture or scene around us," said the second elk.

"There is no picture around, but there is a scene," said the first elk.

"But I thought from the way you spoke that they meant one and the same thing."

"Not exactly," said the first elk. "I mean that scenery is something one can see, just as one can see a picture."

"But how can I see a picture?" asked the second elk. "There are no pictures about."

"You can see the scene, and that is a picture," said the first elk.

"I am becoming more confused every moment," said the second elk.

"Well," said the first elk, "I do not know how to explain it so very well, but I will do my best.

"Sometimes it is said that no one

"I Understand," Said the Second Elk.

really understands anything they can't explain to some one else.

"I understand scenery and so I must try to make you understand it too by my explanation."

"Try," said the second elk. "Try now."

"I will," said the first elk.

"In the autumn," he continued, "we see beautiful trees turning into all sorts of golden colors, and reds and oranges and browns. In fact we see glorious colors."

"The trees don't turn," said the second elk, "the leaves do that.

"I've never noticed the trees turning around and moving themselves about."

"I meant that the leaves turned color," said the first elk. "The leaves about us turn into such glorious flame colors and all sorts of beautiful shades. So we look our best in the autumn to show that we want to add our good looks to the beautiful scenery, or picture that is all about us.

"Scenery is the scene—of what is being looked at, or what can be looked at, in the way of nature. In that way scenery is more than a picture. It is a picture because it is lovely to look at, just as a beautiful picture is nice to gaze upon.

"But as you say, pictures are not always about us. Scenery isn't cooped up in picture galleries or in people's houses.

"It is out-of-doors, it belongs to out-of-doors. It is for everyone who loves out-of-doors to see, quite free of charge, and without much trouble."

"I understand," said the second elk. "Yes, what you say is true. And I've heard that people think more of us and like us and admire us. They wish to have us live and so they don't want to have us killed."

"Ha, ha, ha," said the first elk.

"What's the matter?" asked the second elk. "What are you laughing at?"

"You said that the people want to have us live and so they don't kill us. Naturally if they want us to live they won't kill us," said the first elk.

"Maybe I am not fussy in the way I put my words together, but ah, it is nice to be a great North American elk, to dress up in the autumn and look our best with our new antlers."

For in the autumn the North American elk look their best and they have new antlers in place of the old ones which they drop off in the spring.

Easy

The teacher was trying to convey an idea of devotion to the members of her class. "Now suppose," she said, "a man working along the river suddenly fell in. He could not swim and would be in danger of drowning. Picture the scene—the man's sudden fall, the cry for help. His wife knows his peril, and, hearing his summons, rushes to the bank. Now, who can tell me why she does?"

PAUL'S ARREST IN JERUSALEM

LESSON TEXT—Acts 21:18-23:22.

GOLDEN TEXT—"If any man suffer as a Christian, let him not be ashamed."

PRIMARY TOPIC—Paul Is Brave in Danger.

JUNIOR TOPIC—Paul and the Jerusalem Mob.

INTERMEDIATE AND SENIOR TOPIC—Paul Faces a Mob.

YOUNG PEOPLE AND ADULT TOPIC—The Spirit of the Mob.

I. Paul's Vow (21:18-26).

Upon Paul's arrival at Jerusalem representatives of the church there gave him a most cordial reception. In order that the brethren in Jerusalem might graciously receive him, it was proposed to him by the elders that he take a Jewish vow to prove that he was in no way opposed to the law. The effort was to remove prejudice. They recognized that such an act would in no way compromise or involve the Gentile brethren. Furthermore this would not compromise his own principles of action, viz., to the Jews he became a Jew, and to the Gentiles, a Gentile; all things to all men in order to gain them for Christ.

II. Paul's Arrest (21:27-40).

How far this act conciliated the Jews we are not told, but it only enraged the unbelieving Jews, causing them to resort to mob law. These maddened Jews on the basis of a supposition seized him and dragged him from the temple and beat him mercilessly intending to put him to death. Paul was rescued from the mob by the Roman guard. The chief captain, not being able to get any information from the howling mob, bound Paul and started for the castle. In order to protect him from the murderous frenzy of the mob, the soldiers lifted him upon their shoulders and bore him up the stairs. Paul kept himself under control, and politely asked permission of the captain to speak to the people. When he addressed him in Greek and quoted his Roman citizenship, the captain granted his request.

III. Paul's Defense (22:1-27).

Paul's chief concern was not his own safety. He used this opportunity to witness unto them of Christ.

1. His Claim for a Rightful Hearing (vv. 1-3).

(1) His birth (v. 3).

He was a Jew born in Tarsus, a city of no mean reputation.

(2) His Education (v. 3).

He was educated under Gamaliel and instructed "according to the perfect manner of the law of the fathers."

(3) His Zeal (v. 3).

He was as zealous toward God as those Jews who were trying to destroy him.

2. His Attitude Toward Jesus (vv. 4-5).

"I persecuted this way unto the death," so that his attitude was one of hatred as was that of the Jews.

3. How His Attitude Was Changed (vv. 6-16).

While on his way to Damascus with authority to bind the Christians at Jerusalem, he was smitten to the ground by a light from heaven, and the voice of the Lord said, "Why persecutest thou me?" When Paul inquired what he was to do, he was told to go to Damascus where he would be told what to do.

4. The Lord Commissioned Him to Go to the Gentiles (17-21).

IV. Paul Before the Sanhedrin (23:1-10).

The Roman officer, in order to learn why Paul was arrested, commanded the chief council to assemble, and brought Paul before them.

1. Paul's Earnest Look at the Council (vv. 1-2).

This was a solicitation of their honor to give him a fair hearing, and also a look of conscious integrity and unfaltering courage.

2. Paul's Stern Rebuke of the Head of the Council (v. 3).

"God shall smite thee, thou whited wall."

3. Paul's Appeal to the Pharisees (vv. 6-10).

Seeing that he could not get a fair hearing, and perceiving that the body before him was made up of Pharisees and Sadducees, he appealed to the Pharisees hoping to get their attention, for his preaching had something in common with their belief.

V. The Lord Stood by Paul (v. 11).

This assured him that his course was right, and thus comfort was brought to him.

VI. The Conspiracy to Kill Paul (vv. 18-22).

More than forty men placed themselves under a curse to abstain from eating and drinking until they had murdered him. God defeated their plan without a miracle.

Darkness

The darkness which is the result of the absence of the light which others ought to shed is bad enough; but how great is the darkness of disbelief and unbelief into which some will voluntarily plunge!—The Mennonite.

The Stream of Life

The stream of life for the broad-minded man flows steadily forward without rush and roar in ways of peace and good will.—Western Christian Advocate.

Where the Luck Came In

Little Billy tripped over the edge of the carpet and dropped the dish of tapioca he was carrying. Picking himself up, he remarked, cheerfully, "That's lucky!"

His mother was indignant.

"What's lucky, I should like to know?" she asked.

"Why, it's lucky I don't like tapioca," replied Billy.

"DIAMOND DYES" COLOR THINGS NEW

Just Dip to Tint or Boil to Dye

Each 15-cent package contains directions so simple any woman can tint soft, delicate shades or dye rich, permanent colors in lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings—everything!

Buy Diamond Dyes—no other kind—and tell your druggist whether the material you wish to color is wool or silk or whether it is linen, cotton or mixed goods.

Club Work News

From Concord Boys and Girls

Oh You Pests

Last year the Pest hunt put on by the Pest Club of St. Joe High proved such a headliner that another one is on the way.

This hunt will be a contest between the Junior and Senior High and starts November 16 and ends December 14 with a good time.

The Pests will be:
Rats 50
Hawks 50
Crows 50
Woodchucks 50
Moles 50
Weasels 50
Sparrows 5
Mice 5.

Now is a good time to get rid of the rats and mice and any one being bothered send word to the high school boys and they will be sure to get them.

Last year's results were:
Sparrows 1,796
Mice 740
Rats 254
Weasels 2
Owls 4.

Let's go and Beat the record set.

Coming

The round up of the Corn and Potato Club for the St. Joe Club will be held in St. Joe November 19-20.

The winners in the clubs will be given a trip to the Club Congress at the International Live Stock Show at Chicago in December.

An open class for farmers has been forme and for the best ten ear sample the Vocational class at St. Joe offers to test six bushel of seed corn free; four bushel, second; two bushel, third and one bushel, fourth.

Another class for boys not in club work can exhibit and prizes will be given.

The Vocational classes are counting on a good show, so let's GO.

Samples are to be in by Wednesday evening at eight o'clock. Bring them in or send them i and the committee will take care of them.

Farmers Institutes For DeKalb County

Four hundred and seventy-one farmers' institute meetings are scheduled in Indiana from November 17 until February 27, according to an announcement of the agricultural extension division of Purdue university.

The following dates are scheduled for DeKalb county:

Corunna, January 8—O. L. Norris of Corunna, chairman; R. A. Ogg, of Greencastle and Mrs. Bertha Ratcliffe, of Newcastle, speakers.

Butler, January 9—Daniel Brown of Butler, chairman; R. A. Ogg and Mrs. Bertha Ratcliffe, speakers.

Spencerville, January 28—Clyde Hart of Spencerville, chairman; G. C. Berg of Mt. Summit and Mrs. Morton Fordice, of Russellville, speakers.

Ashley, January 29—Jess H. McClughen, of Ashley, chairman; G. C. Berg and Mrs. Morton Fordice, speakers.

Gleaner Hall, January 30—M. A. Watson, of Waterloo, chairman; G. C. Berg and Mrs. Morton Fordice, speakers.

Jackson Center, February 5—B. W. Carper, of Auburn, chairman; M. P. Shierling, of Saratoga and Mrs. Bessie Zigler, of Somerset, speakers.

Butler Center, February 6—G. W. Burtsner, of Garrett, chairman; M. P. Shierling and Mrs. Bessie Zigler, speakers.

ST. JOE NEWS.

VOL. XXXIX | ST. JOE DeKALB COUNTY, INDIANA, THURSDAY NOV. 19, 1925 | NO. 46

Death Came Sudden to Angelia Wolff

Mrs Angelia Wolff died suddenly Sunday morning between 7 and 8 o'clock at her home in Spencer township, near St. Joe, from heart trouble with goitre as the contributing cause. Mrs. Wolff was 55 years of age. She was born February 15, 1871.

Coroner A. N. Adams was called to the Wolff home Sunday and took the testimony of the husband, Sherman Wolff, the only witness. Mr. Wolff informed the coroner that his wife arose about 7 o'clock, started a fire, swept the snow from the well platform and was preparing breakfast and setting the table. Mr. Wolff inquired why she had not called him and she replied that he needed the rest as he had been up late the night before. He washed and was combing his hair when he observed his wife falling backward as she reached for a platter of sausage which was on the warming oven of the stove. Catching her in his arms, he laid her down on the floor and endeavored to revive her by blowing his breath into her mouth. She was past help, according to Mr. Wolff and he summoned a physician.

Mr. Wolff stated that his wife had been subject to heart trouble and that often he would have to take her to the door to get some fresh air in order to breathe. She has been in poor health for thirteen years. She also suffered from a goitre.

Coroner Adams gave his verdict as death from valvular heart trouble with goitre as the contributing cause.

Angelia Wolff, daughter of Jacob and Alvira White, was born on a farm near St. Joe, February 16, 1871. She died very suddenly Sunday morning while preparing breakfast, November 15 at her home one mile west of St. Joe.

She united with the M P. Church at Fairview, when quite young, under the pastor Rev. Stanton. October 27, 1898 she was married to Sherman Wolff. Being a good wife and kind neighbor, ready to do good wherever she couid. For several years owing to her illness, she was not permitted to attend church services as she like to.

Her father, mother and brother preceded her in death several years ago.

She leaves husband, one sister, Mrs. Ella Gill, three brothers, Martin, Eugene and Roy and a host of friends to mourn their loss.

The House of Plenty

by William Herschel
In Indianapolis News

I KNOW a house where Plenty seems to practice magic arts,
Though humble is this house I know, and humble all its hearts.

Within this house a Mother dwells whom Plenty gives the skill
To make a little grow to much that all may have their fill.

I've seen her lay the table, with but two or three to fare,
But bread had not been broken when a legion came to share.

Came Mary with her prattling tribe; came John with children four,
A knock—a word of welcome—Parson Pray was at the door.

No, Parson Pray just couldn't stay—he had not time to eat—
But was there not some soup to tempt a sick man down the street?

"Come, rest a moment, Brother Pray, and have a little bite;
I'm glad you thought about the soup—I'll tend to that all right."

By magic came some steaming broth from out a magic pan;
"I saved this broth for such as he—we'll send it to the man."

Came ham from off the pantry shelf, came jam and marmalade;
A cackle at the kitchen door announced eggs freshly laid.

Ere Parson Pray could utter grace new knocks were at the door;
"Can you spare just a little bread? They've none down at the store."

"For pity's sake! That shows the way some grocery stores are run;
I've biscuits baking in the stove! Just wait—they're nearly done!"

Glad House of Plenty, glorified, you seem somehow to know
Where loaves and fishes can be found—as in the long ago.

You seem to make Thanksgiving Day abide throughout the year,
So bounteous are your feasts, so mother-blest your cheer!

Home Bureau Activities

The Home Bureau Club of Concord township met in regular session at the home of Mrs. Hattie Draggoo, Friday afternoon, Nov. 13, with an attendance of twe ty-eight members. One visitor was present

Meeting was called to order by the president, Mrs Hattie Widney After singing America, a letter was read from County Agent, Stinson, reminding the Clothing Project leaders of the meeting to be held in the assembly room of the court house, Auburn, Thursday, Nov. 19. Miss Meta Martin, State Extension Specialist, will be present to instruct in the work Featuring the afternoon session was the parliamentary drill given by Mrs. Alice Lewis, of Auburn, County Parliamentarian. This work was given in an efficient and instructive manner

Offices for the coming year were elected:

President—Mrs. Millie Shull
Vice pres —Mrs Hattie Draggoo
Secretary—Miss Edith Widney.
Treasurer—Mrs. Gladys Hull.

A short business session was held. After this delicious chicken sandwiches, pumpkin pie, pickles and coffee were served by the following hostesses: Mesdames Hattie Draggoo, Diadem Bone, Katie Murphy, Nelia Morr, Carrie Morr and the Misses Gazelle Baker and Beulah Sbrader.

The club adjourned to meet at the home of Mrs. Grace Dilley, Dec. 11. This will be an all day meeting Potluck dinner. Husbands for guests.

We wish to make note of the November meeting held at the home of Mrs. Mable Baker, where in Mrs. Stella Goldsmith was present and gave a most interesting talk on Poultry Diseases. Choice plants and their care was ably given by Mrs Anna Tustison. An apetizing lunch was served by the hostesses.

Card of Thanks

We desire to thank our many friends and neighbors for their helping hands and words of sympathy in the illness and death of our wife and mother.

Charles Reasoner and
Children.

Alcohol for your Car at Curie's.

Coal! --Coal-- Coal!

Now is the time to lay in your coal. We have always tried to give you the best advise as to best time to buy and we now firmly believe this is the time to get busy and prepare for the winter.

Feed

Mr. Hog Raiser, we have a good line of feeds on hand, also car of ear and shelled corn. If you need any give us a call.

Grain

We are paying highest market prices for all grains and will be pleased to have you bring us your grain.

The St. JOE ELEVATOR

Samuel Keesler, Mgr. Grain Dept. **Bert Jackson,** Mgr. Coal Dept.

NOTE—Pay your accounts. They are due now.

A Mighty Mean Man

We heard tell of a man the other day who was so mean that he called his wife "Radio" because she broadcasted all the news.

Some cranky old fellow, no doubt, who never lets his wife get in a word edgewise. We often wish this bank had a real radio broadcasting station so we could tell all the people the good features of our reliable bank. The nearest we can come to it is by advertising. If you are not already a patron, please take this as an invitation

The St. Joe Valley Bank, A STATE BANK

Services were conducted from the Methodist church, Tuesday morning at 10 o'clock, Rev. C O. Johnson, of Tippecanoe, Indiana, officiating. Burial in Riverside, E. R. Kinsey in charge.

CARD OF THANKS.

Thanks to our many friends and neighbors for their sympathetic words in our sad bereavement, and for assistance rendered.

Sherman Wolff
Brothers and Sisters.

Grading On Road Started.

County officials were here last Friday and completed arrangements for the new road at the Wabash railroad, purchasing a strip of land 60 feet wide from D. D. Burley.

The change in the road is made to cut out the Wabash crossing south of the S. S. Wolff home. The road will be built on the east side of the railroad from the Depot south until it intersects the north and south road.

The changing of this road has been hotly contested and caused a delay. Two sets of viewers were appointed before the commissioners could act on the petition.

Dogs Make Raid On Sheep.

Robert Morr lost two sheep Friday night as the result of raid made by dogs, this was discovered Saturday morning During the night the Morr family were awakened by the barking of dogs and they thought coon hunters were busy, but an investigation the next morning, proved the contrary. One sheep had been killed and another mangled.

Sale of Baked Goods Saturday.

The F. B Class of the Methodist Church will hold sale of baked goods and eatables of different kind at the News office, Saturday, Nov. 21st., beginning at 10 o'clock. Your patronage will be appreciated.

Box Social at Lockwood School, 2 miles west of Jackson Center, Friday evening, Nov. 20th.

Miss Harriett Wasson Chosen Leader

Miss Harriett Wasson, of near St. Joe, was elected president of the Young People's Council at their annual convention held in Garrett, last Saturday and Sunday. One hundred and eighteen young people registered for the convention, and the deep interest and enthusiasm in the council work, surpassed anything ever held in DeKalb County. The type of young folks here was different from most gatherings, as they were serious, not trifling and wanting to be entertained, but were eager to know what they might do to help their local church school Harry G. Rowe, state superintendent of the Young People's Division, guided the affairs of the convention by his fatherly advice, his jovial spirit and his seriousness of his task.

Most of the program was made of addresses by young people of the County. On Saturday evening, Garrett young folks gave a play entitled "The Rich Young Man"

Next year the meeting will go to Waterloo. Miss Alice Tustison is the retiring president. The council officers are supervised by Stanley Means, who holds the office of President of the Young People's Division of the DeKalb County Council of Religious Education.

M. P. Church Notes

Rev. Otis Jones, the new pastor for the St. Joe and Concord M. P. Church, will arrive this week, and arrangements for services next Sunday will be:

Concord, morning, 10:45
St Joe, Evening, 7:00

The public is most cordially invited to be present and greet the new pastor.

Annual Missionary Service at Spencerville

The annual Thank offering meeting of the Lutheran church will be held at Spencerville next Sunday evening, November 22nd, at 7:00 P. M. A short program will be given by the children and the principal address will be given by Rev. Richter of the U. B. Mission in Tiberia, Africe, who is in this vicinity on a furlough This is a fine opportunity to hear about foreign missions first handed. The public is invited.

Lame, Tired, Achy?

Are you tired, lame, achy—worried with backache? Do you suffer sharp pains, headaches, dizziness and disturbing bladder irregularities? Perhaps your kidneys need attention. When the kidneys fail to properly filter the blood, body impurities accumulate and cause poisoning of the whole system. Such a condition may lead to serious sickness. Don't neglect it! If you suspect your kidneys, why not give *Doan's Pills* a trial? *Doan's* have been used successfully over thirty-five years—are recommended the world over. *Ask your neighbor!*

An Ohio Case

G. E. Bennett, prop. restaurant, N. Liberty St., McComb, Ohio, says: "My back was stiff and I had knife-like pains in my back. My kidneys acted frequently and I had to get up at night. I felt tired and nervous, too. After using Doan's Pills, the pain left my back and my kidneys acted regularly."

DOAN'S PILLS 60c

STIMULANT DIURETIC TO THE KIDNEYS

Both Obese

"I am taking reduction exercises, Robert," said Mrs. Winkley.

"I wish you could induce the household expenses to join you," responded her worried husband.

When You Catch Cold Rub on Musterole

Musterole is easy to apply with the fingers and works right away. Often it prevents a cold from turning into "flu" or pneumonia. It does all the good work of grandmother's mustard plaster without the blister.

Musterole is a clean, white ointment, made of oil of mustard and other home simples. It is recommended by many doctors and nurses. Try Musterole for sore throat, cold on the chest, rheumatism, lumbago, pleurisy, stiff neck, bronchitis, asthma, neuralgia, congestion, pains and aches of the back and joints, sprains, sore muscles, bruises, chilblains, frosted feet—colds of all sorts.

To Mothers: Musterole is also made in milder form for babies and small children. Ask for Children's Musterole.

The Valley of Voices

By GEORGE MARSH

Author of "Toilers of the Trail," "The Whelps of the Wolf"

(W. N. U. Service.) (Copyright by the Penn Publishing Co.)

THE WINDIGO

You never saw a windigo; that's sure. The chances are that you never heard one. But have you ever heard a superstitious Indian or half-breed of the Canadian wilds tell of its horrors? He certainly makes a blood-curdling thing out of the windigo. Anyway, this is the story of a windigo that was real enough to leave tracks like those of a great bear and to kill a big bloodhound. It is also the story of a factor's daughter and an American naturalist. The girl is beautiful and educated and a wonderful violinist. The man is brave and strong. And when Brent Steele gets into the "Valley of Voices" and sees the charm of Denise St. Onge and realizes that the mysterious windigo is working for her destruction—why, he drops everything else and starts in to solve the malign mystery. There's a fierce rivalry between trading posts—which complicates the situation. And Denise, to save her father, has been forced into a promise of marriage. So Brent Steele's job is a he-man's job. But he does the job—and gets his reward.

CHAPTER I

—1—

Steele stopped in his tracks. With his right hand he freed his ear from the head-piece of his tump-line and stood listening. Surely, he thought, those were the unmistakable notes of a violin, clear above the noise of the rapids. Curious, he continued up the steep portage; now convinced that faintly through the beat of broken waters, which the trail paralleled, floated eerie music, now doubting his senses. At length his alert ears failed to capture the strains of the magic violin and he dismissed his illusion as the vagary of nerves overtense from the toil of the trail over which he had come.

For a space he went on, engrossed in other thoughts, when through the roar of the waters a violin sobbed up to a wild crescendo . . . then ceased.

Easing the top bag to the ground, Steele swung the lower pack, with its attached tump-line, beside it, and waited. These were no fancied melodies of summer whitewaters. It was no wraith music which a shift in the August breeze had brought him—this mad playing.

Again the notes of the violin were audible; clearer now. Some magician out there on the neighboring shore was baring his soul. It was unbelievable—here, in this lost valley of the north—pure wizardry. Enchanted, Steele listened as the violin sang of yearning and despair, unutterable, which genius has voiced to the world through the magic of its strings. And as he listened he wondered what tragedy lay behind that playing, what trick of fate had buried this master of the bow in a fur-post on the Wailing river.

"W'at you hear, de Windigo seeng in de strong-water?"

Turning, Steele smiled at the blocky figure of the speaker standing in the trail, his head and shoulders bent under a canoe.

"No, David, but I've been listening to the violin of a shaman—a medicine man conjuring up the spirits of the rapids. Someone at this French post is a sorcerer."

"Maybe you hear Windigo all de same," dryly suggested the half-breed, easing the stern of the canoe to the trail to uncover a broad, swart face wrinkled with amusement. "Up at Fort Hope de people' scared of dis river for sure. Dey tell me de strong-water by de French post bad place for de devils an' de Windigo."

"Yes, I heard that too, the valley has a bad name on the Albany. Francois, at Martin's Falls, says it was called the Wailing river because of the moaning of the rapids here in winter. I told him it was only the wind, but he wouldn't have it—insisted that the place was 'bad-country,' bewitched."

"Dey say plenty people' drown there, long tam ago," gravely added David.

"So old Pierre once told me, down at Henley house. He was traveling from Ogoke to the Albany one winter and struck this gorge about sunset. But the spirits scared him so with their wailing that he drove his dogs ten miles before he dared to make camp. I can't understand why the French built a place on a tabooed river. They must have known its reputation."

"Wal," replied David with a grimace, "I nevaire hear one of dese Windigo howl een de night, but eef I see him now I eat heem for sure. I call dis de Starvin' riviere."

Steele laughed loudly at the remark of his hard-headed companion, whose legacy of superstition from an Ojibway mother had been heavily diluted by the blood of a Scotch father.

"I could eat a caribou myself," he said, "but we'll have a big feed at the post tonight. You take the canoe over while I find out who's playing that violin. Who would guess that there was a man within a thousand miles of these bad-lands who could play like that?"

The half-breed started over the portage while Steele turned into the thick scrub toward the river. From the foot of the rapids the trail had swung away from the broken flanks of the gorge, but shortly Steele saw patches of foam through the spruce. He stopped to listen, and again the notes of the violin shrilled above the monotone of the broken waters. Slowly he worked his way along the shoulder of the shore, then, forced back to circle a gash in the eroded cliff, stumbled upon a trail, and following it a short distance, suddenly stiffened.

The path led to a huge, flat-topped bowlder thrusting out into the stream. On the rock, her dark head nestling a violin to her cheek, stood a woman.

Surprise held the man motionless. To eyes which for months had not looked upon a comely white woman, the picture of the lithe figure of the musician, a crown of dusky hair half masking the face turned to the river, was a delight he hesitated to cut short by a betrayal of his presence.

From the passionate hopelessness of Massenet's "Elegie" the violin swung into a deathless lament of Grieg, grim with the eternal tragedy of his own gray north sea. As she played, the girl turned, exposing her face. On her cheeks were tears. But she did not see the listener for her eyes were closed.

She ceased playing. With a sense of awe at having heard the cry of

"I Come Here to Play, Monsieur—Often," She Replied in a Tense, Uneven Voice.

stark despair, the trespasser, conscious of sacrilege, had turned to retreat when he was stopped by:

"Qui vient la? Who is there?"

Caught, the eavesdropper faced about, hat in hand.

"Mademoiselle," he began, reddening under the questioning gaze which swept him from moccasins to tattered shirt, then fearfully searched his eyes as if seeking a sinister meaning in his sudden appearance, "I am packing up the carry to the post. I—I heard your marvelous playing—and came. You will pardon my listening?"

The dark face of the girl in turn flushed. The guilty man humbly awaited the revelation of her just anger. That meant for the forest and waters only—the naked anguish of a soul—a stranger had heard. It was right that he should pay.

"I come here to play—monsieur—often," she replied in a tense, uneven voice. "I was startled! We see no more—but the Indians. There is nothing—to pardon."

She spoke in English, with a flavor of accent which Steele had heard before, but not in French Canada.

Relieved at his reprieve, he hastened to explain his presence on that bush-grown portage of the Wailing river.

"My man David and I are bound from the Albany to Ogoke lake and the Nepigon. We've been in the bush since May," he laughed, painfully aware of a three-days' growth of beard, with a deprecatory gesture toward his frayed clothes, "and have some trading to do at the post, as you see. Is it far?"

"Only a short distance, monsieur. My father will welcome the sight of a white man; for him it is so lonely here."

"But surely," he protested, "it is more lonely for a woman." So she was the daughter of the French factor, and he wondered what force of circumstances had driven the father of this talented girl into the fur trade as an employee of the French company; this girl with the somber eyes who came to the white-waters with her violin—and her grief. Was it tragedy he had chanced upon, or mere loneliness?

"Lonely here for a woman? Surely, monsieur, you speak as a man of the world—with understanding." The sensitive mouth of the girl shaped a faint smile, but the dark eyes did not change as she continued: "Yet I have my father and my violin, while he—he has only his memories."

"But," he gallantly protested, "your father, mademoiselle, has the companionship of a very"—he hesitated and finished weakly—"his daughter."

She laughed in his face. "Ah, monsieur, you have French blood in your veins. But the very—his daughter," she mocked, "is a dull substitute for a 'world of men,' as your Browning says. My father will be much pleased at the coming to Wailing river of Monsieur—"

"Steele," he prompted, "my name is Brent Steele. I am in the field for the American Museum of Natural History."

She bowed low with mock gravity.

"Monsieur Steele, my father, Col. Hilaire St. Onge, will be honored in offering the poor hospitality of Wailing River to a learned American scientist."

Smilingly Steele raised protesting hands at her characterization. How charmingly, he thought, this strange girl, whose violin had sung so poignantly of despair, whose face had reflected fear of the stranger, now lapsed into raillery.

"Oh, pardon, monsieur," she went on, "I forgot myself; I am Denise St. Onge. Now that the conventions have been satisfied, will you follow me to our chateau—of logs?"

"Thank you!"

Her simple muslin gown and beaded moccasins seemed but to authenticate the stamp of race in the figure and carriage of the girl who led the curious man over the river trail to the carry. At the portage she stopped.

"My packs are below here, where I left them to follow the Lorelei of the Wailing," he said smiling.

Her face swiftly sobered.

"Ah, Monsieur," she replied almost inaudibly, "do not make jest of this terrible river." Then, with a shrug, as if ridding her mind of an oppressive weight, added, "I shall not wait for you, the post is very near," and walked swiftly up the portage, followed by the quizzical eyes of the man.

He stood in the trail watching the retreating figure of the girl until a bend shut it from sight.

What eyes and hair, he mused, and what playing! It was clear she was breaking her heart over something; the look in her eyes proved that. To think of such a glorious creature buried in this country! Her father probably was a retired French officer. Heaps of them marooned between Labrador and the Peace! But why, he asked himself, didn't they mention her over at Hope—this charming daughter of the factor at Wailing River?

Yes, he decided, she certainly had been frightened at his appearance—had looked him over as if he were a ghost. Then she had seemed superstitious; but she couldn't really believe in this tradition of the valley—this Windigo and spirit stuff. That was inconceivable. She was not afraid to come here alone and yet she called the river terrible. What had happened here anyway? Whom could she fear, and why?

Thus speculated the intrigued Steele. Then swinging his bags to his back, he started for the post known as Wailing River.

As Steele left the forest to cross the clearing the dogs of the post started the usual uproar. Half way to the group of log buildings he was met by an Indian, sent by the factor, and relieved of his packs.

Evidently Wailing River has a mystery and one that challenges a brave man and the girl!

(TO BE CONTINUED.)

Nicotine in Tobacco

Nicotine is a colorless, intensely poisonous liquid. If exposed to the air, it absorbs oxygen and becomes brown and ultimately solid. The quantity of nicotine contained in tobacco varies from two to eight per cent, the coarser kinds containing the larger quantity, while the best Havana cigars seldom contain more than two per cent, and often less. Nicotine does not appear in tobacco smoke. It is split into pyridine and collodine. Of these, the latter is said to be the less active and to preponderate in cigar smoke, while the smoke from pipes contains a larger amount of pyridine.

Marvelous Precocity

The precocious infant was being submitted to the psychological tests in order to determine the degree of his genius. He had already picked out numbers, arranged blocks and distinguished colors. Then came the supreme test, the identification of various coins. The investigator tossed a nickel on the floor. The precocious infant bent over it while the proud parents held their breath.

Then the precocious infant winked at his dad and cried exultantly, "Heads!"—Pathfinder Magazine.

THE DANGERS OF MILK

MILK is a product of the animal body and, like all such products, is affected by the diseases from which the animal suffers. Man in different lands and times has used the milk of many animals for food, principally cows, goats, asses, mares, camels, and buffaloes. In this country, cow's milk is universally and almost exclusively used.

Cow's milk may be contaminated in two ways: by some disease of the animal itself making the milk dangerous when the animal produces it, or by being polluted in some way in transit, from the time it is milked until it is consumed.

Raw milk, drunk just as it comes from the cow, may cause tuberculosis, Malta fever, foot-and-mouth disease, milk sickness and several other rather rare diseases. Milk which is pure and harmless when milked, may become polluted with typhoid germs by dirty pails, dirty stables, dirty hands of milkers or handlers, or dirty bottles. Milk may also carry germs of diphtheria, scarlet fever and septic sore throat. Whether the germs of these diseases come from the cow or from the human handlers is uncertain. There is a cow disease, caused like scarlet fever, by a streptococcus, which may cause a similar disease in man. Whether cows ever have diphtheria, and, if they do, whether the diphtheria germs can get into the milk direct from the cow, is an unsettled question.

But it doesn't really matter whether the germs in milk which cause disease come direct from the cow or from outside the cow. Contaminated milk if drunk raw may cause any of these serious diseases.

If all milk could be given by perfectly healthy cows and could be transported and sold in perfectly clean buckets, cans or bottles and handled only by perfectly clean people in perfectly clean surroundings, then raw milk would be a perfectly clean food. But it isn't, and until all the people in the country are perfectly healthy, it's rather too much to expect all the cows to be. Tuberculosis is about as common in cows as it is among human beings.

But if pure milk is impossible, safe milk is very easy to have. It is only necessary to heat milk to 148 degrees for 30 minutes, to kill all the disease germs and make the milk perfectly safe. This can be done in a rice boiler or any kind of a double boiler. It doesn't harm the milk or make it any less good to drink. It simply turns live germs to dead germs. Which would you rather do, put the milk on the fire for 30 minutes or put the child to bed for 30 days?

WHAT A NURSE NEEDS

WHAT should be the qualifications of a good nurse? I don't mean a trained nurse. The authorities of the training school can take care of that. But for the home nurse, for caring for the sick child, what sort of a person should be selected?

The first necessity is that the nurse herself should have good health. Unless a woman is strong and well, she cannot stand either the physical or the mental strain of caring for another in sickness. For a weak, sickly person to undertake the responsibility of caring for an invalid only means that in a short time there will be two sick persons in the family instead of one. Too often mothers who are barely able to care for themselves insist on nursing their sick children, with the result that the child does not get satisfactory care and the mother is soon completely worn out. Many frail but conscientious daughters date their complete invalidism from the time they attempted to care for their mothers in time of sickness. So whatever your relation to or interest in the invalid is, unless you are strong and well and able to stand the strain of caring for an invalid through weeks of illness, get some one else. A strong and healthy stranger is a better nurse for an invalid than a weak and sickly relative.

The second necessary qualification for a nurse is common sense. The sickroom is no place for sentiment. A clear mind, good judgment and self-control are all needed there. Common sense is valuable in all of life's activities, but nowhere more than in the sickroom. The nurse must be able not only to follow the doctor's directions accurately and effectively, but also to act in an emergency in his absence and to do what the doctor would want her to do if he were present.

The third requirement for the nurse is resourcefulness, the ability to take what she has in the way of equipment and make the best use of it possible. Few homes are prepared for sickness. When it comes, the household is generally demoralized. Perhaps it is the mother herself who is ill. The nurse must take things as she finds them, secure order and quiet in the house and see that her patient gets the necessary care and attention with the least possible disturbance for the rest of the family.

These things are not easy to do, especially in time of sickness, but the way in which they are done marks the true nurse.

"THE FOUNDATION OF HIS HEALTH"

Among the thousands who have publicly expressed indebtedness to Tanlac for normal weight, health and strength, is A. R. White, who recently said:

"The foundation for my present excellent health was laid by Tanlac. For months I had been run-down. I had lost all enjoyment for food and suffered great discomfort from indigestion. My liver was sluggish and that tired feeling was on me all the time.

"Three bottles of Tanlac relieved my troubles and started me off with a system so thoroughly toned up and renewed that I soon found myself feeling like a new man."

Tanlac is for sale by all good druggists. Accept no substitute.

Tanlac Vegetable Pills for constipation; made and recommended by the manufacturers of Tanlac.

The Old Standby in a New Dress

The New Package

—the same dependable remedy that over a period of more than fifty years has been found so reliable in the treatment of catarrh and diseases of catarrhal nature.

The outside of the package only has been altered. To facilitate packing and reduce breakage in shipping, the paper wrapper which has identified the Pe-ru-na bottle for many years has been displaced by a substantial pasteboard carton.

Pe-ru-na cannot be made any better. Three generations of users testify that Pe-ru-na is the best remedy in the world for catarrh and diseases of catarrhal origin.

The remedy our fathers and grandfathers used with so much satisfaction is still the standby for the ills of everyday in thousands of American homes.

PE-RU-NA

The Original and Reliable Remedy for Catarrh

Wonderful Creature

A strange and beautiful creature with a body somewhat like a zebra and a horned head resembling that of a giraffe, has been obtained at Irumu, in the Belgian Kongo, with the aid of pygmies.

FOR Rheumatism

BAYER

ASPIRIN

Proved safe by millions and prescribed by physicians for

Rheumatism Colds Neuritis Neuralgia
Headache Pain Toothache Lumbago

DOES NOT AFFECT THE HEART

Safe — Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

Big Job

Little Ella Latham was trying to read and at the same time take care of the twins while her mother was downtown shopping. Finally she had to give up her reading, and looking at her two noisy charges exclaimed in disgust:

"Twins is just naturally too much!"

Plenty of Them

If placed end to end the 2,500,000 freight cars in use on railroads in the United States would make a solid train long enough to reach from New York to Denver.

Study will really swell the head—especially over the eyes.

DR. W. B. CALDWELL AT THE AGE OF 83

"No girl or woman should 'purge' and 'physic' herself every few days. This is very injurious. Besides, it isn't necessary."
—DR. CALDWELL

Tells Girls and Women to Avoid "Physics"

To Dr. W. B. Caldwell, of Monticello, Ill., a practicing physician for 47 years, it seemed cruel that so many women had to be kept constantly "stirred up" and half sick by taking cathartic pills, tablets, salts, calomel and nasty oils.

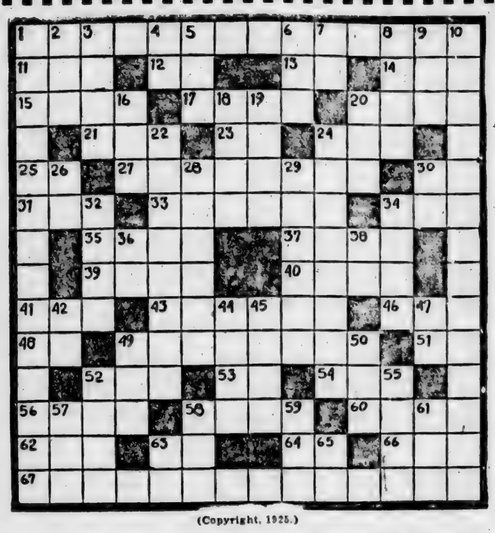
While he knew that constipation was the cause of nearly all headaches, biliousness, sallow skin, indigestion and stomach misery, he did not believe that a sickening "purge" or "physic" every day or two was necessary.

In Dr. Caldwell's Syrup Pepsin he discovered a laxative which regulates the bowels. A single dose will establish natural, healthy bowel movement for weeks at a time even for those chronically constipated. Dr. Caldwell's Syrup Pepsin not only causes a gentle easy bowel movement but, best of all, it is often months before another dose is necessary. Besides, it is absolutely harmless and so pleasant that even a cross, feverish, bilious, sick child gladly takes it.

Buy a large 60-cent bottle at any store that sells medicine and just see for yourself.

Dr. Caldwell's SYRUP PEPSIN

CROSS-WORD PUZZLE



(Copyright, 1925.)

Horizontal.

1—One who believes in the Eighteenth amendment
11—A bar
12—Therefore
13—Newfoundland (abbr.)
14—To deface
15—A musical instrument
17—Parts of plays
20—A sound made by babies
21—A tatter
23—Credit (abbr.)
24—To butt against violently
25—Therefore (init.)
27—Made by a tailor
30—Exists
31—To weep with a convulsive heaving of the breast
33—Joins
34—A mountain in Switzerland
35—To tear
37—To distribute
39—To stake
40—Snakelike fish (pl.)
41—Equipment of a ship
43—Put forth leaves
46—To possess
48—Steamship (abbr.)
49—One who saves
51—A Latin and French conjunction
52—A domestic animal
53—Upon
54—Split pulse (East Indies)
56—A metal
58—Insects
60—To make a signature
62—A common article of food among the Hawaiians
63—Price (abbr.)
64—A printer's measure
66—A drinking vessel
67—Those whose native language is a certain one used in parts of central Europe

Vertical.

1—Positions of academic professors
2—To steal from
3—Smell
4—Exists
5—A long, round scarf of feathers
6—Opposed to "outs"
7—A preposition
8—A Mohammedan priest
9—Sorrowful
0—Acts of removing and planting in another place
16—To chew and swallow
18—Two hundred and sixty-one (Roman num.)
19—To go at a certain gait, said of a horse
20—Father
22—A glove
24—Sowed over again
26—To move
28—Certainly
29—To repurchase
30—Independence league (abbr.)
32—To boast
34—Besides
36—A printer's measure
38—A nickname for Albert
42—Exists
44—An immeasurable period of time
45—To give passage or outlet to
47—You and I
49—Went quickly
50—A short, napped fabric
52—A material taken from coconuts to make cord
55—A kind of bean
57—Eggs of fish
58—Part of a circle
59—A large body of water
61—A weapon

HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

LONDONERS PRAISE AMERICAN WOMEN

Many American women have visited London this fall on strictly business trips. They came to see the Bond street shops rather than Westminster abbey, the great stores along Victoria street rather than the tower. They illustrate, according to British comment, a remarkable indication of women's growing tendency to occupy prominent places in international business life. According to English manufacturers, who have dubbed them "the merchant princesses," they pay out money lavishly, make quick decisions, and in many ways are superior to men as commercial agents. Besides, they have a more intimate knowledge of the goods in which they deal—perfumes, wraps, furs and the like. Other professions honored by the visiting American women are insurance, advertising and land. The manager of the Savoy hotel announces with something akin to awe that one of them recently presided over a luncheon given to London business men of her profession and that she handled the difficult function with "all the keenness and precision of a man."—London Telegraph.

Mosquito at Home in All Countries

The mosquito is perhaps of all insects the most widely distributed throughout the world. There is absolutely no known land that is not infested with at least one variety of it—and there are at least 150 varieties. England has, indeed, claimed to be free from them, but that is only because they are called gnats, though they are mosquitoes, all the same.

It is stated on scientific authority that not only the eggs but also the larvae of mosquitoes—the familiar "wigglers"—may be frozen solidly within blocks of ice and thus kept for an indefinite time, only to be as vital as ever when they are thawed out. The entire life-cycle, from the laying of the egg, through the various larval and pupal stages, to the laying of eggs by the new generation, comprises only a few weeks. Complaints have been made by miners and others in the Yukon region and at Cape Nome, of the almost intolerable plague of those insects in northern Alaska.—Detroit News.

Too British for Senate

William Blount, elected United States senator from Tennessee in 1796, was expelled from the senate in the following year for having persuaded the Creeks to help the British drive the Spanish from West Florida.

From Knees to Feet

Many a fellow proposes to an heiress on his knees in the hope that she will put him on his feet.—Illinois State Journal

Backgrounds for Furniture

Sturdy pieces of furniture take rough plastered walls, stippled effects or wallpaper with peasant or quaint designs. Delicate slender-line furniture requires walls of smooth plaster finished in soft shades or wallpaper with more refined patterns.

Too Salty for Fish

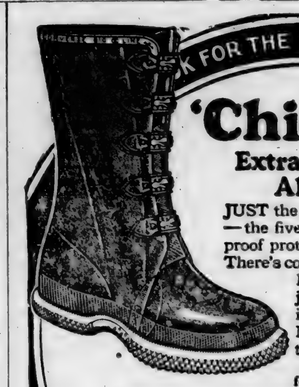
The Dead sea contains nearly 27 per cent salt. There is no known fish that is able to live in so strong a salt solution.

Not to Be Thrown Away

A man is not a well, whose stones are crushed upon the road, or a pipe, whose fragments are thrown away at a street corner. The fragments of an intellect are always good.—George Sand.

Removing Grease Stains

Grease stains on leather may be removed by applying benzine or pure turpentine. Wash the spots afterward with well-beaten white of an egg or a good leather reviver.



LOOK FOR THE WHITE TOP BAND

'Chief'
Extra High-All Rubber Overshoe

JUST the shoe you have been looking for—the five-buckle height is added waterproof protection in mud and snowdrifts. There's cozy warmth in the thick, fleece lining. No need to scrape and injure the uppers—they're cleaned in a jiffy under hose or pump. No odors or soil are brought into the house.

'Nebraska' is the same shoe in a four buckle height.

'Caboose'—called the "World's Best Work Rubber" because it actually outwears two and three pairs of ordinary rubbers. The biggest rubber value on the market—built like all Converse Shoes for extra wear. Look for the 'Big C' on the sole—it will mean a real saving this winter.

Ask your local dealer

Our Thanksgiving

by Emily Burks Adams

WE HAVE all heard remarks similar to the following: "Well, I don't know what I have to be thankful for! Just think of the money we have lost, and then we had to give up our dear one. It just seems like our lot is worse than anybody's!"

One, on hearing such, feels like singing, "Look all around you, find some one in need, help somebody today." We thankless creatures! The only thing that occasions such a remark is the fact that we are all blessed with too much. We are all millionaires, if we would but take into account our wonderful opportunities and the grand privileges with which God has endowed us. When one has a feeling that his is a sorrowful plight, he has only to look around to see many in worse circumstances. We are too prone to count money a great asset, and if we do not figure a large bank account on which to draw, or live in a mansion, like unto our neighbor, we are inclined to feel that our blessings are few. Money never made a home. A mansion oftimes shelters that which falls short of being a home.

What is a home? Home is the abiding place of man, where contentment is, and love abounds. A place where children make you glad; where children play and laughter resounds; where friends may come and take away some kindly thought to help each day.

The one great thing for which we can all be thankful, and it reaches hovel and palace, and is more pronounced than at any period since the days of our Pilgrim fathers—is the great love being manifested by humanity. We have all learned that we cannot exist, one without the other.

Water never rises above the source. The home is the source of civilization, and we have awakened to the fact that the humblest home, the vilest hovel,

"Home Is Where Contentment Is, and Love Abounds."

have a place in the great scheme of American civilization. Truly we are our brothers' keeper; we cannot live unto ourselves nor can we rise above the source—the nucleus of civilization—the home. All our great leaders have come to this realization. The ministers are advocating social and community service—the government is backing it. The nation has failed to become christianized from within the four walls of churches, and so on every hand is a cry for social betterment—a call for the best of our talents to be used for the development of boys and girls socially. Back to the home is the slogan, for unless our homes are perfected, our community bettered and our love for humanity strengthened, our nation cannot attain the highest standard.

So for this great move we are thankful, and as we render our thanks to God, let us pledge ourselves anew, realizing more fully our responsibilities to our home, to our community and to God.

(©, 1929, Western Newspaper Union.)

A CHEERFUL GUY

I have absolutely nothing to be thankful for. You can be thankful you're not dead, can't you? What! And me carrying a big life insurance.

We're Thankful

We're thankful for Mayflower Pilgrims—
Those people of sturdy stock
Whose ocean was thirty thousand miles
When counted by the clock.

Those travelers came with high purpose,
"The Book" they brought along,
And they've given us, as inheritance,
God, and the Freeman's song.
—Rebecca F. McKay, in Chicago Post.

God's Goodness

God's goodness hath been great to thee. Let never day nor night unhallowed pass. But still remember what the Lord hath done.—Shakespeare.

Emergency Pantry Meets Home Need

By META H. GIVEN
(Home Economist.)

Efficiency and economy go hand and hand in the home as well as in the business world. The emergency pantry, latest innovation in the cuisine of the modern housewife is particularly indicative of the truth of this statement.

Meta H. Given.

This new sort of pantry—it may just be a shelf in the regular larder—does away with that bugaboo of the home maker, the surprise guest. Every woman has had the experience of welcoming an unexpected visitor when supplies were at low ebb and has searched high and low to find something presentable to put on the table. The emergency shelf in the pantry does away with such worries in short order.

A can opener and—presto—a veritable banquet can be prepared in a few minutes. The housewife may have her choice of many excellent meats, corn, tomatoes, mushrooms. If she is short of milk or cream, a can of evaporated milk, which is simply fresh cow's milk sterilized in the can and with sixty per cent of the water removed will do the trick. In fact she may have two hundred or more savory dishes ready to her hand.

When the surprise guest does arrive the hostess naturally wishes to be hospitable. She doesn't want to be tied to the kitchen range half the afternoon. She wants to entertain as she has been entertained.

It isn't possible if she has to phone frantically for the butcher, the grocer and the baker.

But that's only one of the places where the emergency pantry comes in. Backed by a well-stocked emergency shelf, the wife can get together a splendid luncheon or dinner in a jiffy. The spontaneous wish that comes at the last moment to informally invite a few friends for lunch can be gratified at once with the aid of the new pantry.

Afternoon tea for the bridge club is an equally easy matter. A glass of preserves or jelly, a platter of bread and butter, tea, and a dish of cookies will meet the ordinary demands of the casual caller and a can of evaporated milk will answer the milk or cream need.

Be a Milk Tippler, Says Dr. Schireson

Peaches and cream complexions of American women have their foundation in a milk diet, according to Dr. Henry J. Schireson, famous Chicago dermatologist and facial plastic surgeon.

Dr. Schireson.

Doctor Schireson has won fame by beautifying motion picture, musical comedy and vaudeville stars and many society women of America. He transformed Fanny Brice's nose, rejuvenated Eva Tanguay's face, removed sixty-four pounds of adipose tissue from Truly Shattuck in one operation, straightened the cross eyes of the leading lady of Singer's midgets, and has performed other corrections for making people young and beautiful.

Doctor Schireson has one infallible prescription for the attainment of beauty. It is: "One quart of milk a day, one hour of sunshine, and repent ad libitum."

"Beauty specialists and cosmetic makers," says Doctor Schireson, "would be driven out of business in a few weeks if all the women of America would drink their quart of milk a day.

"Babies and children have complexions of angels for the reason that they are fed largely on milk. Milk used externally or internally is a beautifier. Anna Held, I believe, was the first actress who adopted the milk bath. While this was a novelty at the time, and her press agent undoubtedly made the most of it, the principle in itself was sound. But a beauty secret of even more value is the daily quart of milk taken as a part of the diet.

"The milk-fed girl is easily distinguished by the velvety texture and the healthy color of her skin. Milk is a wonderful body builder, because it contains every structural element. It is, in a way, an elixir of life.

"Authorities agree that milk is the most nearly perfect food but it is an extremely delicate one as well. Heat sufficient to kill all bacteria is the essential of absolutely pure and sterile milk. One of the advantages of evaporated milk, which is simply fresh cow's milk with sixty per cent of the water removed, is that it is entirely sterile and is more easily assimilated than ordinary market milk.

"Milk is mentioned forty-seven times in the Bible. The Promised Land of the Israelites was said to flow 'with milk and honey' and Ovid graded milk as second only to nectar, the drink of the gods."

Caloric Requirements of the Child

DIETITIANS declare that the average boy or girl of four years should receive about forty calories a pound of body weight per day. The average weight of a child of four years is forty pounds. Therefore the total caloric requirement would be approximately 1,600 calories. Calory is merely the name for a certain measure of heat derived from the burning of food.

Necessarily, the caloric requirement of the child is dependent on his temperament, since a child who plays hard and long requires more nourishment than one who leads a quieter life. Rate of growth also has a bearing on caloric requirements. The child who is growing rapidly should be given more food to meet his caloric needs than the boy or girl whose growth is normal.

Mothers know the daily diet should consist of the essential foodstuffs, protein, carbohyrates, fats, minerals and water. The important thing for her is to learn the foods that contain these essentials in a balanced diet. Below is a well-balanced menu for any child six years old compiled by an authority on home economics.

ONE DAY'S MENU FOR SIX-YEAR-OLD CHILD.

Breakfast.

6 stewed prunes	120 calories
½ cupful cream of wheat	85 calories
Served with half cream (6 tbsp.) and half evaporated milk	140 calories
1 slice buttered toast	150 calories
1 cup cocoa made with evaporated milk	150 calories
	645 calories

Luncheon at School.

Baked potato and butter.	200 calories
½ cupful spinach	25 calories
1 baked apple (1 tbsp. sugar, ½ tbsp. butter)	200 calories
1 glass milk	160 calories
1 slice bread buttered with ½ tbsp. butter	100 calories
	685 calories

Afternoon Luncheon at School.

1 orange	100 calories

Dinner.

1 small piece broiled steak (2½ x 2½ x ½)	75 calories
½ cupful mashed potato	100 calories
2-3 cupful lima bean soup made with evaporated milk	75 calories
1 glass milk, orange drink	160 calories
	510 calories
Total	1,840 calories

Children often become wearied of drinking plain milk. Mixing their milk with fruit juices is a welcome change. Following is the recipe for a refreshing milk drink: Mix ⅓ cupful orange juice, ¼ cupful evaporated milk, three teaspoonfuls of sugar, ½ teaspoonful of lemon juice and a few grains of salt. Shake well in a fruit jar before serving.

Housework Worth $900 a Year, but—

Nine hundred dollars a year is the value of the average housewife's services in the home, and statistics show there are 20,700,000 women engaged in housework, according to Mrs. Leonora Z. Meder, prominent Chicago woman lawyer and economist.

Leonora Z. Meder.

"The wife," said Mrs. Meder, who was formerly commissioner of public welfare of Chicago, "is an executive, purchasing agent, budget expert, and producer rolled into one. The successful home maker studies food values. She arranges her budget so that the food she buys will have all the necessary body building qualities.

"The woman who would keep down her food bill will do better to spend her money on milk and green vegetables than on butter, though butter is one of the best sources of the essential food element, vitamin A. There are butter substitutes, but nothing can take the place of milk and vegetables.

"Milk, food experts say, is the most nearly perfect food. Science solved the problem by inventing evaporated milk, which is simply fresh cow's milk sterilized in cans and with sixty per cent of the water removed. Because evaporated milk is of double the richness of ordinary market milk, many housewives dilute it half and half with water for cooking purposes. Keeping longer than ordinary milk, there is no waste from souring. Then, too, it is cheaper.

"Savings also can be made on meat. Cheaper portions of beef skillfully cooked are highly nutritious and often better tasting than portions which cost more. The shoulder, breast and stew meat of lamb are excellent. Pork shoulders, feet, tails, heart, spareribs and hocks are in the same category."

SPORTING GOSSIP

Spencerville high school won the first basket ball game of its season from LaOtto at Spencerville last Friday night by a score of 25 to 16. The game was played very cleanly only eleven personal fouls being called in the entire game. No one was disqualified on account of personals, nor was any substitution made. The first half ended with the score 9 to 8 in Spencerville's favor. However during the second half the Spencerville team ran away from LaOtto and scored two points for each one LaOtto made. Spencerville plays Corunna on its home floor next Friday night.

Silhouettes That Are in Limelight

The passion for slenderness will not down, and every one of the accepted silhouettes of the season pays homage to the willowy line, observes a Paris fashion correspondent in the New York Herald-Tribune. There were many predictions last summer to the effect that pulchritude was about to return to the haunts of the mode, that the marked waistline and the full and flaring silhouettes were paving the way for the revival of a sort of modified Amazon, statuesque to the point of being plump.

When the Paris couture first blared its fall message to a palpitant world, these prophecies seemed in a fair way of being realized. The predominance of the flare and molded bodice, the princess silhouette du soir, the defined and higher waistline all seemed inclined to lift the ban against the long harassed embonpoint and the outlook was dark indeed for the daily dozen.

The chic Parisienne, however, was otherwise inclined. She accepted the flare, she gave a hearty welcome to the princess silhouette and the waistline, but in every instance with the reservation that her hard-earned slenderness was to remain the basis of the new styles. And her verdict has been eagerly echoed by smart society on these distant shores. Eat, drink and be merry is deferred to a later day.

Yet if the general effect of the outline has remained slender, the silhouette has otherwise undergone some vital changes, significant enough to inspire prophecies of a new fashion cycle. The mobile silhouette, which has also been called kinetic, swinging and floating has generally succeeded the immobile, by contrast, straightline. This new outline, which becomes a lissome, graceful fantasy when its wearer is in motion, has got to incorporate some species of flare in its makeup. It can be at the front, the sides or the back, it can concentrate below the knees or it may be inaugurated at the waistline and even as high as the shoulders, but somewhere it must be the moving order of autumn, 1925.

Flare Runs Clockwise.

It is interesting to note the various manners in which the leading Paris designers arrive at the new outline. Captain Molyneux, for instance, using either the flare or circular cut on his robes du soir, concentrates fullness below the knees.

Jean Patou, on the other hand, inaugurates the distended effect above the knees. Lucien Lelong, apostle of the kinetic silhouette, employs a tucked flounce which has its origin above the knees and which flares widely and suddenly. The molded bodice is Paul Poiret's contribution, and its exceptionally high waistline overshadows the moderate skirt flare. And there is the cape-back flaring from shoulder or hips—from the former in this instance—characteristically exemplified in Chanel model of black mousseline de soie. Even the old order is

Shimmering Silver, Featuring Gracefully Knotted Sash.

represented in the straight-line street dresses of Patou and Molyneux. If you will add to these themes the back flare, the bolero effect, the bustle drape, the jacket ensemble and the princess outline, you will have a fairly complete catalogue of the broadening methods of the new silhouettes.

Which of these various flares you select for your own is not of great consequence. It is important to remember, though, that the flare increases in width and significance as the day grows older. The informal morning frock may be quite straight, the street dress should preferably flare in a moderate manner, formal afternoon clothes must always broaden distinctly and without compromise while the evening mode should climax its new elaboration by the widest of possible flares. The flare, in a word runs clockwise.

Welcome Waistline.

There was a lot of early-season skepticism concerning the clearly marked waistline, and even now that prodigal stranger is a little uncertain of his welcome. But any one who has seen the attractive models which stress the waistline will doubt no more. In our own opinion it is the most esthetic theme in the new fall and winter mode. On the young it creates an impression of enervating youth, doubly welcome after these banal years of sophisticated tubularity, while for the matron it substitutes a graceful natural line for the imposed pencil silhouette. The waistline has threatened to return so often that it sounds like another cry of wolf to predict it again. This time, however, the wolf is really at the door—the distinctly defined waistline has its place in every chic wardrobe of autumn and winter, and its return means that the flat-chested woman is no more as far as the Paris mode is concerned. Apart from the

Brown Crepe de Chine and Threaded Lace in Gold.

simple two-piece jumper suit, which still permits the straight line, the figure is clearly defined in all of the latest models. This is one of the logical developments of the higher waistline. As the waistline creeps up it arrives at a point where the natural body curves in, and so the corsage above it must mold the figure in order to look in keeping.

Several of the most famous houses are using the waistline that is fairly low on the hips at the back and slopes up in front to finish in the center with a jeweled motif or buckle. With this line the skirt below usually has a full flare at the front and sides. This silhouette is particularly approved by Lucien Lelong, who fits in with his conception of the kinetic or moving outline. The front and side flares are used with impartiality by this house and several others, while still others favor all-round godets or a group of plaits or other kind of fullness at the back to give the new back flare that forms the bird-like silhouette sponsored by Premet, Martial et Armand and some of the more conservative houses.

Explaining the Choker Neck.

The high neckline, offered originally with some show of virtue by the Paris couture, is one of the interesting phenomena of the current season. It is not the sole smart neckline of the autumn models, as the bateau and V lines have also made frequent appearances, but in popularity it easily leads all the rest.

The principal reason for the high neckline, according to its sponsors and wearers, is to preserve the symphony of the silhouette. What with short skirts and the hemline flare, a low neck would create a silhouette grotesquely short and totally unfitted for any but the most willowy types. They point it out, too, as a symptom of the rising tide of fashion—high hemline, higher waistline and the choker neck. Both are logical enough reasons.

We have a suspicion, however, that milady's attraction for the new neckline has a more psychological basis. Here is a mode which is a long, indiscreet step ahead of its pre-war predecessors. And a notable percentage of the ladies who exploit it were once steeped in the inhibitions of a decade and more ago. Along comes the high neckline, which would have been modest even in those prim days—and what more natural than that milady should succumb to the habit and training of her earlier days. "Call me immodest," she tells the ghost of her Victorian self—"look at this choker neck and forever hold your peace." It's the philosophy of the ostrich who buries his head in the sand and thinks thereby that he is entirely hidden, but it is thoroughly sufficient unto this day.

Seen and Heard In Indiana

Reuben R. Carr, judge of the Fulton Circuit court, appeared before the State Supreme court at Indianapolis to explain his recent action in charging members of the state board of tax commissioners with contempt of court.

Maj. Gen. Hanson E. Ely, commandant of the United States of American War college, Washington, D. C., has accepted an invitation to speak at stadium dedication exercises of Indiana university at Bloomington November 21.

One of the largest home-operated distilleries ever taken in Allen county is in possession of Henry Marlin, sheriff, and Fred Foreman, living southwest of Fort Wayne, faces charges of possession of stills, and the manufacture of liquor.

Organization of the campaign for a memorial to Dr. W. W. Parsons, former president of the Indiana State Normal school, who died recently, and for Prof. Howard Sandison of that institution, was completed at a meeting of the committee of alumni at Indianapolis.

William F. Davis, eighty-seven years old, last of the "conductors" on the "underground railway" system by which slaves were smuggled from the Ohio river to Canada in the period before the Civil war, died at his home in Fountain City, the old Quaker town nine miles north of Richmond.

Thomas Bledsoe, police sergeant; Ed Russel and Edgar Updyke, all of Indianapolis, are in the Lake View hospital at Danville Ill., suffering from injuries received in an automobile accident at Covington, when their automobile skidded and turned partly over. Ralph Updyke, congressman from the Seventh congressional district, escaped injury.

It was learned at Terre Haute that negotiations are under way for the purchase by the Sisters of Providence, a Catholic order, of the Laurel Hall estate, northeast of Indianapolis, formerly the home of Stoughton A. Fletcher, where it is understood the sisters plan to establish a girls' school similar to St. Mary-of-the-Woods, six miles west of Terre Haute.

The Pike's Peak and Ocean-to-Ocean highway (state road No. 33 from Illinois to the Ohio line via Covington, Crawfordsville, Lebanon, Noblesville, Anderson, Muncie and Union City) promises to become a cross-state route equal in some respects to the National road, it was asserted at the annual meeting of the association fostering its improvement held at Anderson.

Senator Arthur R. Robinson, who will make his debut in the United States senate when the congress convenes December 3, announced the appointment of two more members of the official family which will accompany him to Washington. They are Miss Gretchen Smith, of Valparaiso, and Miss Aileen Loveland, of Peru, who were appointed to clerkships in his office.

During the fiscal year, which ended September 30, the game wardens of the fish and game conservation department arrested 1,854 persons on charges of violating game laws. Of that number, 1,705 were convicted and paid fines amounting to $33,709.50, according to the annual report of George N. Mannfeld, head of the division, to Richard Lieber, director of the department at Indianapolis.

Clarence Kirschner, Solon B. Freeman and William H. Sheldon, Terre Haute real estate dealers, were convicted of using the mails to defraud by a jury in the United States District court at Indianapolis. They were charged with swindling John and Emma Honn, an elderly couple, by inducing them to exchange their homestead in Montana for a 40-acre "ridge farm" in Martin county.

Twenty-one of thirty-nine defendants indicted by a special session of the federal grand jury on charges of conspiracy to violate the prohibition law in connection with the "milking" of the Jack Daniel distillery, St. Louis, of 891 barrels of whisky, were arraigned in Federal court at Indianapolis before Judge Robert C. Baltzell and all pleaded not guilty. Judge Baltzell set December 14 as the tentative date for the trial.

Signed confessions obtained by detectives of Indianapolis have revealed, they said, a murder plot in which a young woman planned to cause the death of her husband, with the help of another man and her fifteen-year-old sister, that she might get "the house, the automobile and $10,000 life insurance, and marry the other man." The victim of the plot is Albert Betschey. The plan was, according to the confessions, for the other man, Coy Chapman, to enter the Betschey home, pretend he was a holdup man, and shoot Betschey. The plot went through, according to the police, but Betschey is in the City hospital and Mrs. Betschey, Chapman and the sister, Elizabeth Kato, of Cleveland, are under arrest.

Arthur Carson, chief of police of New Albany, voluntarily tendered his resignation to Mayor Robert W. Morris. It was accepted.

Crazed by religion and excessive Bible reading, Harry J. Noe, thirty-seven years old, Washington township farmer, shut two of his younger children in an unheated stove, aroused three other children from sleep, waded with them into the cold waters of a stream near his home to await the second coming of Christ. The children were rescued by neighbors. Noe was found insane by a commission.

IMPROVED UNIFORM INTERNATIONAL

Sunday School Lesson

Lesson for November 22

PAUL BEFORE FELIX

LESSON TEXT—Acts 24:1-27.

GOLDEN TEXT—"Herein do I exercise myself, to have always a conscience void of offense toward God, and toward men."—Acts 24:16.

PRIMARY TOPIC—Why Paul Was Not Afraid.

JUNIOR TOPIC—Paul Before Felix.

INTERMEDIATE AND SENIOR TOPIC—Paul Before Felix: A Contrast.

YOUNG PEOPLE AND ADULT TOPIC—How to Have a Good Conscience.

I. **Paul Accused** (vv. 1-9).

Paul was now in the hands of Felix who determined to hear his case after his accusers had come from Jerusalem. Ananias, the high priest, and elders came with Tertullus, perhaps a Roman barrister, who formally made the accusation according to Roman law. He began with flattery. He gave Felix the fullest praise when he and all the people knew that he lied, for Felix was one of the worst governors, destitute of morals and justice. He brought a four-fold charge against Paul:

1. "A Pestilent Fellow" (v. 5).

This would indicate a fellow utterly base and corrupt—a plague.

2. An Inciter of Rebellion, a Mover of Sedition (v. 5).

This they hoped would bring him in to conflict with the Roman power.

3. That He Was the Ringleader of a Sect—a Schismatical Party—a Heretic (v. 5).

This was designed to throw contempt and suspicion upon the Christians, by this means to bring Paul into deeper trouble.

4. That He Had Profaned the Temple (v. 6).

In this charge we see the wickedness again, they wilfully suppressed facts.

II. **Paul's Defense** (vv. 10-21).

This is a splendid example of the strength and dignity of a man whose life is controlled by a noble purpose and who has nothing to conceal, and will not distort or suppress facts.

1. Paul's Frankness and Courtesy (v. 10).

Flattery is entirely wanting. He gave recognition of the fact that Felix had been ruler of this people long enough to be able to judge justly, as the habits and ways of the Jews were familiar to him; he then in a dignified manner assumes that Felix will render a just decision based on the facts of the case.

2. The Charge of Sedition Denied (vv. 11-12).

He flatly and scornfully denied this charge, showing its utter falsity since the time was too short, it being but twelve days since he went to Jerusalem, and half of that time had been spent as a prisoner of the Romans.

3. The Charge of Heresy (vv. 14-16).

This he met by a concession and a denial. He admitted that he was of this "way" which they called heresy but denied that Christians were schismatics. He showed clearly that his actions were in keeping with the Hebrew religion.

(1) He worshiped the same God (v. 14).

(2) He fully believed in the same Scriptures (v. 14).

(3) He had the same hope of a coming resurrection of the dead (v. 15).

He declared that he had as the principle of life a conscience void of offense before God and man.

(4) The Charge of Sacrilege or Profanation of the Temple (vv. 17-21).

This charge he refuted by showing:

(1) That he had come all the way from Greece (v. 17), to worship at the feast.

(2) That he did not come up empty-handed but had brought alms for his nation (v. 17).

(3) That there were not competent witnesses present to testify of his behavior in the temple (v. 19).

(4) By challenging his enemies to testify as to his conduct in the council (v. 20).

III. **Felix Trembles Before Paul** (vv. 22-27).

This is a sort of a sequel to the trial. Wicked as Felix was, Paul's manner somehow won his favor, though he did not release him. His sentence was indulgent imprisonment, which kept him free from his enemies while under Roman protection. Felix sent for Paul that he might hear of Christ from him. Paul behaved himself aright before these sinners in high life. He reasoned of righteousness, self-control and of judgment to come, before Felix and his sinful wife with such power that Felix was terrified, and declared that he would hear Paul further at a convenient time. This was a most flimsy excuse for not changing his life and granting justice to Paul.

Increasing Burdens

The man who increases the burdens of his brother will find his own load growing heavier.—Western Christian Advocate.

Revenge

Revenge is sweet to the taste but bitter in the heart.—Western Christian Advocate.

Faith

Faith means surrender of the will.—Western Christian Advocate.

Conquer Constipation *with* Yeast Foam!

For constipation try this: drop a cake of Yeast Foam in a glass of water; let stand for five minutes; stir with spoon; let settle and drink the milky water, including the white precipitate.

Do this *regularly* and your constipation—no matter of how long standing—will be a thing of the past! Yeast Foam is equally effective for indigestion, boils, pimples, lack of weight and strength.

Or, if you prefer, eat the yeast with a cracker or a piece of butter.

Free Farm Building Helps

"Concrete Around the Home" tells in everyday language how to use concrete for building drives, walks, steps, porches, and other permanent improvements which every home needs. Complete instructions make it easy to estimate the materials and to mix, place, and finish the concrete for these improvements.

"Permanent Repairs on the Farm" tells you how to repair old buildings quickly and easily, and at low cost. The information on Concrete Barn Floors and Feeding Floors will help you add many a dollar to your net profits.

"Plans for Concrete Farm Buildings" contains supplies of blue prints, and shows you, step by step, how to put up Concrete Silos, Dairy Barns, Hog Houses, Milk Houses and many other forms of Concrete Construction.

Whether you are going to build a new building, or repair an old building, these free booklets will show you how to do the job for all time. Send for them today.

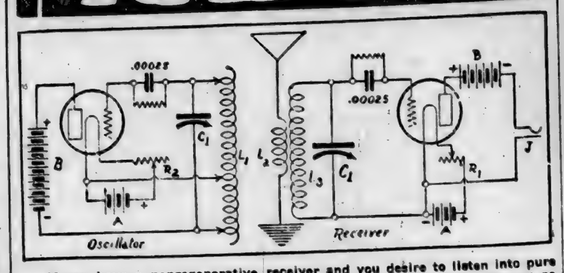
RADIO

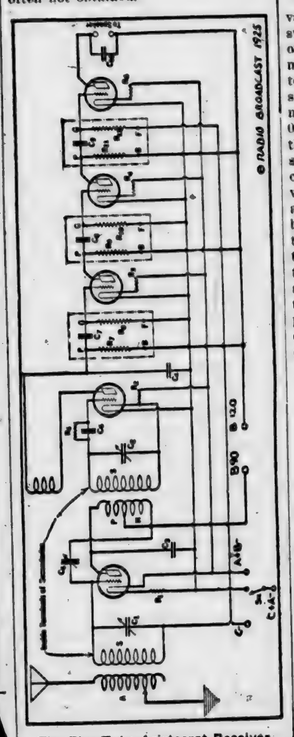


If you have a nonregenerative receiver and you desire to listen into pure CW code signals, the above method will be the solution. L1 consists of 50 turns of No. 22 DCC wire wound on a 3½-inch tubing and tapped at every third turn. C1 is a .0005 mfd. variable condenser. The arrow coming from the A minus is the only variable portion of the coil and goes to the 16 taps. By varying these taps, closer or looser coupling between the plate and the grid can be obtained. Use a UV 201A tube with 67½ volts on the plate.—Radio World.

Sixteen Stations in Three Minutes

Ideal Radio Receiver With but One Main Tuning Control.

One of the chief problems of the home constructor is that of trying to combine sensitivity with quality. It is generally admitted that the superheterodyne represents the utmost in sensitivity but then, on local stations the quality is not what it might be. Possibly this accounts for the fact that many set manufacturers are no longer making a superheterodyne model but are going back to straight radio-frequency amplification. Many receivers on the market only employ a single state of R. F. which will be found quite sufficient for general purposes. Two stages will only complicate tuning, or if single control is employed, the full value of the two stages is often not obtained.



The Five-Tube Aristocrat Receiver.

"For a very long time we have been looking for the kind of receiver which would be easy to build, easy to operate and at the same time be comparatively economical," writes Arthur H. Lynch in the new Radio Broadcast Magazine. "In the receiver described here will be found what we consider a solution of the problem. There is but one main tuning control which makes the finding of stations so simple that a child can secure surprising results. In an actual demonstration, we have been able to show that by means of this single control and no other adjustments whatever, it was possible to hear sixteen stations in less than three minutes, with a single turn of the tuning dial. When other adjustments were made—and where is a DX fan who will not want to be certain that he is getting the last drop of energy out of his set?—we have been able to procure distance with volume, which few receivers other than a superheterodyne could have accomplished. And above all, we have been able to secure tone quality which has been described by many of the radio designers and enthusiasts who have come to witness the performance of our new outfit, as being far superior to most receivers they have seen or heard. We believe this receiver will do much to endear radio to those music lovers who up to the present time have felt that radio reproduction was not sufficiently free from flaws to produce the music they love with true fidelity.

Famous for Tone Quality.

"In the Radio Broadcast 'Aristocrat' there is one stage of tuned, neutralized, radio-frequency amplification, a regenerative detector, and three stages of resistance-coupled amplification. Before going, let it be said that the resistance-coupled amplification employed should not be confused with similar systems described in the past because it is now possible to maintain tone quality, for which this type of amplifier is famous, together with great volume, due to the foresightedness of some of the tube manufacturers who are now marketing what are known as high-Mu tubes. These tubes are specially designed for resistance-coupled amplification and the amplification per stage which is obtainable with them is far greater than has heretofore been generally possible.

"As was mentioned above, tuning is accomplished by a single dial. This dial is used to control a Hanscom single-control unit and is the main tuning control. It is a unique arrangement of two Remler condensers, geared together in a manner which makes tuning of the antenna and radio-frequency circuits simultaneous. The panel is 7 by 18 inches and there is plenty of room on it for all the equipment necessary, when a sub-base is employed.

"The tuning inductances and the variable condenser assembly, antenna switch and battery switch are mounted on the main panel, while all the remaining equipment is either on the top or bottom of a 2½ by 17½-inch subpanel, which is suspended from the main panel by means of Benjamin No. 000 brackets. On the upper side of the subpanel are mounted the five tube sockets, three resisto-couplers, the grid condenser and leak mounting, and the variable neutralizing condenser. It is also possible to find room for all the binding posts, including those for the three connections for the C battery, if they are thought to be desirable. On the under side of the subpanel there are five mountings which are used for the filament ballast resistors. All these points are clarified by the illustrations of the original article in Radio Broadcast Magazine.

Lists of Parts.

The list of parts used is as follows:
One 7 by 18 panel.
One 2½ by 17½ subpanel.
One Hanscom S. C. condenser unit.
One set Eastern knockout coils.
One Carter filament switch.
Two Apex knobs.
Five Benjamin sockets.
Three Daven resisto-couplers with three .1 megohm resistors and one each 1 meg., .5 meg., and .25 meg. resistors.
One Hammarlund neutralizing condenser.
Two .004 Sangamo fixed condensers.
One Dubilier .5 microfarad by-pass condenser.
Six Daven No. 50 mountings.
One Daven lenkandenser (a new unit which combines the grid condenser and leak).
Five Daven ballast resistors (the capacity of these resistors depends on the type of the tubes used).
One Belden standard color, five wire cable.
Two Benjamin No. 000 brackets.
Two to six Eby binding posts.
Two dozen 6 or 8-32 round head brass machine screws, ¾ inch long.
About six 2-foot lengths of bus bar.

"The five ballast resistors are shown in the diagram as R1-2-3-4-5. The selection of these will depend entirely on the types of tubes employed. The ideal combination of tubes consists in the use of two ordinary six-volt storage battery tubes for the radio-frequency amplifier and the detector, two high-Mu tubes for the first two stages of audio, with a semipower tube in the first stage. Some tubes will work satisfactorily without any resistance in the filament circuit when used as amplifiers."

How Sunset Blights Radio Communication

Next to static electricity, sunset is the greatest deterrent to efficient transatlantic radio telephone communication that nature exerts. During the past two years daily tests across the ocean have been made.

Summarized these show that during the winter months satisfactory conversation can be carried on all hours of the day with the exception of that period when sunset is making its progress across the 3,000-mile expanse of water separating the old and new worlds. During the summer months commercial telephone communication is possible during the morning, evening and night hours, exclusive of heavy static periods, the tests show.—Collier's.

The House of Plenty

by William Herschel
In Indianapolis News

I KNOW a house where Plenty seems to practice magic arts,
Though humble is this house I know, and humble all its hearts.
Within this house a Mother dwells whom Plenty gives the skill
To make a little grow to much that all may have their fill.

I've seen her lay the table, with but two or three to fare,
But bread had not been broken when a legion came to share.

Came Mary with her prattling tribe; came John with children four,
A knock—a word of welcome—Parson Pray was at the door.

No, Parson Pray just couldn't stay—he had not time to eat.
But was there not some soup to tempt a sick man down the street?

"Come, rest a moment, Brother Pray, and have a little bite;
I'm glad you thought about the soup—I'll tend to that all right."

By magic came some steaming broth from out a magic pan;
"I saved this broth for such as he—we'll send it to the man."

Came ham from off the pantry shelf, came jam and marmalade;
A cackle at the kitchen door announced eggs freshly laid.

Ere Parson Pray could utter grace new knocks were at the door;
"Can you spare just a little bread? They've none down at the store."

"For pity's sake! That shows the way some grocery stores are run;
I've biscuits baking in the stove! Just wait—they're nearly done!"

Glad House of Plenty, glorified, you seem somehow to know
Where loaves and fishes can be found—as in the long ago.

You seem to make Thanksgiving Day abide throughout the year,
So bounteous are your feasts, so mother-blest your cheer!

The MOST POPULAR THANKSGIVING BIRD

WITH apologies to the bald eagle, it is appropriate to refer to the turkey as the great American bird. The association of this species of fowl with the Thanksgiving day festivities places it upon the highest pinnacle of fame. The few specimens taken back to Spain by Christopher Columbus aroused the greatest curiosity and interest in that country, and subsequent imports of the bird within fifty years stirred Europe to its center. The turkey—pavo or peacock in Spain, dindon in France, trutkahn in Germany, and kalkun in Scandinavian countries—was found by millions in the forests of North America, Central America and Mexico when the white men came to the western shores.

The name given to the turkey is a little obscure, but it seems to have arisen in London from an almost trivial circumstance. It appears that about the time of the birth of Queen Elizabeth a hardy navigator brought a consignment of these birds from America to the London market. Purveyors of the aristocratic houses of London found them, bought them, tried them, and then wanted more. London tradesmen were asked the name of the fowl, and, because everything then was brought from Turkey, those asking for the information were told that they came from Turkey, and they were known for many years in the London markets as those "Turkey birds." This is one of many tales told to account for the strange naming of the American bird, and is probably as good as any. The turkey has been domesticated, as far as it is possible, and long ago became a large factor in domestic commerce.

At Thanksgiving and Christmas He Is King of Birds.

Once Turkey State.

Rhode Island for many years held chief prominence as the turkey-raising state.

Now Tennessee, Missouri, Iowa, Nebraska and Kentucky dispute supremacy and literally send millions of these birds annually to market to be consumed largely at Thanksgiving and Christmas feasts.

The scientific name given the turkey is Meleagridae. Meleager, in an ancient Greek legend, was leader of the Calydonian hunt, who saved the beautiful Princess Atalanta from the savage attack of a wild boar, and thereby gained fame. This scientific name seems just about as applicable to the great American bird as turkey, but it has the approval of science, and that is enough. Three varieties made up the original stock of wild turkeys on this continent. They were the galiopavo of New England and the greater part of North America, the ocellata of Honduras and the mexicana of Mexico. A fourth variety is supposed to have inhabited the West India islands, from which the birds taken to Spain by Columbus were obtained. From these, in the course of 400 years, six varieties have been evolved, known as the bronze, Narragansett, buff, slate, white and black. The white and black birds are "freaks" from the three original species.

The turkey has never been more than half domesticated. It is still essentially a wild bird. It roams the fields in flocks, feeds upon insects and stray grains during the late summer and fall months and only seeks the shelter of the barnyard when the food supply fails. Young turkeys seem to distrust man and all his works, and each generation of turkeys has to be tamed. The birds do become quite docile under careful management, but the hen turkey forever seeks the wild in which to steal her nest and rear her young. Testimony is not lacking that it costs less to raise a turkey than any other fowl, and to the ultimate consumer in the Thanksgiving and Christmas period they cost more than any other fowl, so that somebody makes a good profit on the annual product.

One of the Oldest Birds.

The turkey is doubtless one of the oldest birds in America and always occupied an important place in the domestic life of the Indians. The Pilgrims at Plymouth learned the value of the turkey from the Massasoit Indians. Columbus found it in the West Indies. Cortes was feasted upon turkey in Mexico and Peru. The Maya people embodied the turkey in their oldest hieroglyphics and the scientists of the Smithsonian, delving among the ruins of Arizona, found a mummified turkey, and the remains of nearly all the cliff and cave dwellers in the Southwest give up the bones of the turkey. It was a staple food among the red men from the earliest times, as it has come to be in civilized lands around the globe.

Benjamin Franklin desired to make the turkey the national bird, but was outvoted by others, who seemed to find a truer connection between the bald eagle and the indomitable spirit of the American republic. It may be the screaming eagle better suits the ways of war and poets' dreams, but the turkey occupies a specially warm place in the affections of the American people. At Thanksgiving and Christmas time he is king of birds, and will so remain to the end of time.
—Washington Star.

Thankful

SICK WOMEN ATTENTION!

Read this Remarkable Testimony Regarding Results from Taking Lydia E. Pinkham's Vegetable Compound

Norfolk, Virginia.—"If you only knew how many women and girls have taken your medicine by hearing my testimony, it would seem wonderful to you. Every day and every chance I have I advise some one to try it. It was in June, 1904, when I had given up to never get well, that I wrote to you. My husband went to the drug-store and brought the Vegetable Compound home to me. In a few days I began to improve and I have often taken it since. I am now passing through the Change of Life and still stick by it and am enjoying wonderful health. When I first started with your medicines I was a mere shadow. My health seemed to be gone. The last doctor I had said he would give me no more local treatments unless I went to the Hospital and was operated on. That was when I gave the doctors up. Now I am a healthy robust woman. I wish I could tell the world what a wonderful medicine Lydia E. Pinkham's Vegetable Compound is. I will be only too glad to answer letters from anywhere. I wish all sick women would take it."—Mrs. J. A. JONES, 317 Colley Avenue, Norfolk, Virginia.

"Go Up Head"

Teacher—Who can tell me what Shylock was?

Willie (sitting in a draft)—Ah choo!

Teacher—Correct.

WHY SHOULD ANYONE SUFFER WITH INDIGESTION OR ANY STOMACH MISERY?

If you want to fix up your dyspeptic, out of order stomach so that you can relish what you eat with not the least bit of after distress, do what tens of thousands of people have already done.

Getting rid of gas, bloating, belching, heaviness and that feeling of near suffocation isn't such a hard matter as you may think—You've been getting hold of the wrong medicine—that's all.

But better late than never—ask your druggist for a bottle of Dare's Mentha Pepsin—a real stomach medicine and a very pleasant one. For acute indigestion one or two doses is enough, but when the trouble is chronic, two or three bottles may be needed to put your disordered stomach in good healthy condition and make life worth living.

Making a start is the main thing, so why not get one bottle today with the distinct understanding that if it doesn't help you the purchase price will be returned.

In Society

A complete surprise party was given last Tuesday evening at the home of Mr. and Mrs. Harry Randall, when the members of the Bunco Club, with their husbands and sweethearts, walked in on Mrs. Chas. H Rice, who had stopped in to spend the evening with Mrs. Randall. The affair was a farewell party in honor of Mr and Mrs. Rice who are leaving soon to make their home in Fort Wayne

The evening was spent playing Bunco, the prizes being awarded Vernie Monroe, Paul Curie and Harry Randall respectively. Contests and initiations for the husbands were other features of the evening's entertainment.

The lunch, which was served after the ladies found partners by matching cut up post cards, was a most delicious one, consisting of pressed chicken, creamy potato salad, pickles, rolls, dark and light cakes, fruit salad with oodles of whipped cream and coffee

Those present were the Messrs and Mesdames Ed Leighty, Harry Hursh, Virgil Perry, Vernie Monroe, Wm. J. Staman, Merritt Barney, Paul Curie, F. D. Tope, Harry Randall, Charles Rice and Miss Edna Jackson and Carl Perkins Mrs. Harmon was a guest also.

Another farewell party for Mrs. Rice was a masquerade given recently at the country home of Miss Edith Widney who was assisted by Mrs Avis Staman and Mr. and Mrs. Sam Mumaw, in entertaining the members of the Choral Society. The guests were ushered into the basement via a wide board down the cellarway where an old witch greeted you with her broom. After all had arrived they were led thru dark rooms, up, up, up, dark stairways, past ghosts and after an occasional boost and a shower of water, they were finally led back down to the living room where masks were removed and a jolly good time was enjoyed by all playing Spoof.

The rooms were tastefully decorated in Hallowe'en colors, cats, owls and witches and the table where the cafeteria lunch was served was very beautifully arranged. Nut baskets filled with nuts and red candy were given as favors. The lunch consisted of chicken sandwiches, pickles, pumpkin pie with whipped cream and coffee

Those present were Mr and Mrs Frank Baltz, John Woodcox, William Staman, Merritt Sechler, Joe Woodcox, Mrs. Jean Curie, Blanch Leighty, Jessie Rice and Edith Widney. Mr. and Mrs. Sam Mumaw were guests also.

Parent-Teacher Association

The following program has been arranged for the second P. T. A meeting to be held at the school house on Friday evening, November 20:

Community Singing led by C. A. Woodcox.
Reading - - Miss Bangs
Mens' Chorus arranged by Meade Baker.
Solo - - - Miss Bray
Observing Educational Week—St Joe Public Schools.
Business Session

Everybody welcome to these meetings. Come and see what the P. T. A. is doing.

A Sheepskin Coat for winter at $9.95 at Beams store, Spencerville. Come in and see. We can save you money.

Our Hired Man

"That cow-tester's one man I like to cook for," says the hired girl.

Well, he's one man who knows something about feeding.

I always enjoy helping the women folks around the house—like, for instance, pickin' the Thanksgiving goose.

Now's when the cockle-burs assert themselves in the cornfields that was slighted in June.

That silo of ours has saved us lots of motions picking corn.

Maybe long nights cost a little more for light, but the boss says they pay big every time he reads a good article on farming or dairying.

The boss says the articles show more practice and less theory, nowadays.

PERSONAL PARAGRAPHS

Patronize the advertisers.

Alcohol for your Car at Curie's.

Farmers are busy hauling gravel on the stone road west of town.

Wilbert Luts and wife of Auburn, were guests of Harry Shuff and family a few days this week.

Mr. and Mrs J P. Buckingham spent Sunday in the home of Mr. and Mrs. C. A. Patterson at Fort Wayne.

Mrs. Wm. Curie was at Indianapolis over Sunday and returned with her husband Tuesday evening Mr. Curie was acting on the federal jury.

Mrs. Mary Bowman and son, Ray, at Fort Wayne for a couple of days. Mesdames Kate Leighty, J. C. Hull, J. R. Stilling and Miss Dorothy Scholes were there Wednesday.

Thirty-five country friends of Mr. and Mrs. R. W. Bradbeck came in Tuesday evening with well filled baskets and surprised them, the event being his birthday also. A real jolly time was had.

Henry E. Coe of Butler, former county superintendent of schools, was placed under guardianship Saturday by Judge Endicott upon petition of his wife, Marcia Coe. The court found that Mr. Coe is seventy-two years of age and because of infirmities is unable to manage his affairs E. A. Eakright was made guardian and he qualified by filing $7,000 bond, with James G. Diehl and E W. Gengnagel as sureties.

In a suit filed in the DeKalb circuit court, the First National bank of Butler, says that on May 13, 1925, Don P. Hindman executed to F. W. Silberg a note for $600, due in ninety days. As security, Hindman posted with Silberg a $1,500 note executed to him January 1, 1923, signed by Lee Hindman, S. Hindman and N. M. Hindman, and due in a year. Silberg endorsed the $600 note and the collateral to the plaintiff. A judgement of $2,600 is demanded.

Special Sunday Services

Rev. W. D Trumbull, Ft. Wayne, who with Mrs. Rosemary Farmer, Director of Music, is conducting Special Revival Services at the Christian Church, is planning five services for Sunday.

At 9:30 he will give a "String Lecture" to the Bible School. At 10:30, morning service at the church. At 2:00 P. M., a special meeting for men only at the Methodist Protestant Church, subject, "Sins that Kill." At 3:00 P. M. a meeting for women only at the Christian Church, subject, "The Ideal Woman," and at 7:30 evening service, subject, "The Worst Thing in St. Joe."

Mrs. Farmer, who is well known in this vicinity, is one of the best musicians in Fort Wayne. She will sing at each service. It is hoped all interested in music will join the chorus and help sing. Evangelist Trumbull is anxious to have everybody of all faiths and no faith. Come and enjoy the services which are wholly nonpartisan.

The meeting will continue all next week beginning each evening at 7:30.

See Furnish for that new Chevrolet.

Mrs. Alice Lewis, of Auburn, spent a couple of days the past week with Mr. and Mrs. H. M. Widney.

Mr. and Mrs Don Ramsey and son, of Fort Wayne, were guests of her parents Mr. and Mrs. Morris Curie, Sunday.

Mr. and Mrs. F. M Hoffman and daughter, Ruth, of Hicksville, were Sunday guests in the F. M. Thornton home.

W. S. Wadsworth and Ray Inlow of Pebbles, Ohio, came Monday evening with a truck to move Monte Storer and family to that place, where they will start farming on one of his father's farms The family left Wednesday morning. All the above mentioned were guests in the Curtis Hursey home over night and Tuesday noon.

Lutheran Notes

Sunday School 9:30.

ST. JOE NEWS.

VOL. XXXIX | ST. JOE DeKALB COUNTY, INDIANA, THURSDAY NOV. 26, 1925 | NO. 47

Parent-Teacher Association

The second meeting of the Parent Teachers' Association was held at the St. Joe school house, with a large crowd in attendance.

An interesting program was given in observance of National Educational Week. This program was given by the school, assisted by several special numbers.

All committees reported their work going along satisfactorily. The membership committee reports that forty have paid their dues for this school year.

It was decided, by vote of the association, that beginning with January, the meetings will be held on the second Friday night in the month. This change was made so that the meeting would not conflict with the regular Teachers' Institutes which are held on the third Saturday of each month. Thus allowing the teachers more time to arrange their part of each program

The Pest Hunt which is being held between the Junior and Senior High Schools, was discussed to some extent, and the association voted to have the president and teacher work out definite rules to govern this hunt.

If you are not yet enrolled as a member of the P. T. A, see O. D Baker or one of his assistants. They are anxious to double the present membership until the next meeting.

A very interesting and instructive program is being arranged for next meeting, which will be announced later. You can't afford to miss it.

Annual Missionary Service at St. Joe

The annual Thank offering meeting of the Lutheran church will be held at St. Joe next Sunday evening, November 29th, at 7:00 o'clock. A short program will be given by the children and the principal address will be given by Rev. Richter of the U. B. Mission in Sierra Leone, Africa, who is in this vicinity on a furlough. This is a fine opportunity to hear about foreign missions first handed. The public is invited

In Memoriam

In loving memory of Minerva Hart who passed away two years ago November 26, 1923.

We miss you more and more each day;
Though two long years have passed
Since we saw your dear face last,
Friends may think the wound is healed
But they little know the sorrow
That lies within our hearts concealed,
Your sweet smile and happy voice
Still remains with our sweet thoughts.

Sadly missed by
Husband and Children.

Appointment Is Made

The local postoffice situation has been settled by the recommendation of A. M. Baker, by Congressman Hogg, as acting postmaster, and he will likely receive the permanent appointment when congress convenes next month and takes action on his name.

Besides Mr. Baker there were two others who were given higher grades,-namely:—Leon Kees, soldier and Mrs Esther Bowman, who was appointed to take the place of Sam Armstrong. The contest for the appointment lay between these two candidates and the continued, long drawn out battle for the appointment, resulted in a compromise by Congressman Hogg, who made the appointment.

Each of the two active aspirants had endorsements of political powers that ma e it difficult for appointment and yet please both, hence this step resulted

Mr. Baker, not desiring to enter the office in the middle of the quarter's business, and with the rush of the holiday trade, has asked for a delay until the first of the year.

WITH apologies to the bald eagle, it is appropriate to refer to the turkey as the great American bird. The association of this species of fowl with the Thanksgiving day festivities places it upon the highest pinnacle of fame. The few specimens taken back to Spain by Christopher Columbus aroused the greatest curiosity and interest in that country, and subsequent imports of the bird within fifty years stirred Europe to its center. It may be the screaming eagle better suits the ways of war and poets' dreams, but the turkey occupies a specially warm place in the affections of the American people. At Thanksgiving and Christmas time he is king of birds, and will so remain to the end of time. —Washington Star.

Tuberculosis Seal Sale

The sale of the Tuberculosis Seal Sale will begin Thanksgiving day and continue till the New Year. This year the DeKalb Anti-Tuberculosis Society is using the Mail Service plan through out the county, over 5,000 letters being sent out. In previous years the Seals in the rural districts have been sold through the schools, but the local society decided a better educational campaign could be conducted by the mail service.

The DeKalb County Society has given the public good Public Health Service the past year; 7 clinics have been held; 28 tonsil and adenoid operations performed by DeKalb county doctors for the society; 17 patients admitted to the Irene Byron Sanatorium; Child Health Day and Open Window Campaign sponsored and much helpful literature on Health distributed.

In the 4¼ years that DeKalb county has been affiliated with Allen county in caring for the tubercular patients at Irene Byron Sanatorium, 65 have entered from DeKalb, out of this number 10 have died, this leaving a large percent of arrested cases and allowed to return to their homes.

The Cou ty Council gave their stamp of approval on the work of the local society, by re-appropriating $10,000 00 for the care of the needy of the county at the Irene Byron Sanatorium, for the coming year.

The money derived from the sale of the Seals is not used for Sanatorium care. 20% of it goes to the state, 5% to the national, the 75% is kept in the county and used for Clinics, Nursing Service, Fresh Air Campsand Educational Programs.

"Public Health is Public Wealth" Let every one join together in protecting the county's greatest asset our children and young people from the great White Plague, by buying Christmas Health Seals.

The following chairwomen have been appointed for the Seal Sale in the county:

Mrs. Wm Browand for Auburn and Union township

Mrs. B H. Eastes for Garrett and Keyser township.

Mrs. Herbert C. Willis for Waterloo and Grant township.

Mrs. C. H. Fetter for Butler and Wilmington township.

Mrs I. J Delueney for Ashley and Smithfield township.

Mrs. Margaret Collette will act as chairwoman for the rest of the county

The county does not compel any one to buy the Seals, for your convenience they are mailed out, and with a return envelope, stamped and addressed, for your contribution or the Seals.

Seal all your letters from now until after the New Year with Health Seals.

Male Inhabitants of County

The number of male inhabitants of DeKalb county over the age of 21 years is 6,832, according to the sexennial enumeration taken by the township trustees and reported to the auditor of state by County Auditor Frank Shook.

Figuring the total population at four times the number of male inhabitants, the number of people living in the county is 27,328.

The trustees found 17 colored male inhabitants over 21, including 16 in Keyser township and 1 in Union.

Union township leads in the total of males enumerated with 1,448. Keyser follows with 1,391.

The enumeration in the other townships follows:

Butler 217; Jackson 305; Concord 300; Spencer 224; Newville 133; Stafford 115; Wilmington 802; Richland 265; Fairfield 300; Smithfield 398; Franklin 276; Troy 128; Grant 514.

Mr Shook reports the number assessed for poll tax is 4,140, an increase of 16 over last year. Those assessed for poll tax are between the ages of 21 and 50 years

Coal! --Coal-- Coal!

Now is the time to lay in your coal. We have always tried to give you the best advise as to best time to buy and we now firmly believe this is the time to get busy and prepare for the winter.

Feed

Mr. Hog Raiser, we have a good line of feeds on hand, also car of ear and shelled corn. If you need any give us a call.

Grain

We are paying highest market prices for all grains and will be pleased to have you bring us your grain.

The St. JOE ELEVATOR

Samuel Keesler, Mgr. Grain Dept. **Bert Jackson,** Mgr. Coal Dept.

NOTE—Pay your accounts. They are due now.

BETTER

Than CASH

Ever have to pay a bill twice? Ever even have the suspicion that you had done so? There is a way to avoid all that.

It is by keeping your money in the bank and paying your bills by check. Then you KNOW you have paid, because the canceled check you get back is a receipt. It is a better, safer, surer, more modern method than paying the cash.

DON'T BROOD OVER STOMACH DISTRESS

Don't lay awake nights and feel miserable all day—there's one right way to fix up your gassy, rebellious disordered stomach in such a short time that your heart will be gladdened.

Today Dare's Mentho-Peptic is the one remedy supremely efficient where acute or chronic indigestion or gastritis is making your days and nights miserable.

Reports of its mighty power to overcome unbearable, near suffocating stomach agony have swept the land until today its sales are marvelous.

Get one bottle of this pleasant speedy acting medicine today with the distinct understanding that if it doesn't help you—your money will be returned.

THE FACTOR

SYNOPSIS.—With David, half-breed guide, Brent Steele, of the American Museum of Natural History, is traveling in northern Canada. By a stream he hears Denise, daughter of Col. Hilaire St. Onge, factor at Wailing River, play the violin superbly. He introduces himself and accepts an invitation to make the post his home during his stay.

CHAPTER I—Continued

In front of the trade-house, in conversation with David, stood a tall, military-looking man, with iron-gray hair and mustache. Around the door lounged a group of curious company Indians. Advancing and gripping the newcomer's hand, the factor of Wailing River exclaimed:

"Bon jour, Monsieur Steele! Welcome to Wailing River! My daughter and David have told me of our good fortune."

As the old soldier continued, with a slight French accent, Steele was aware of being secretly appraised by the keen eyes of the other.

"You are to be our guest for as long as you will honor us. In this valley, for a man of science, there is much of interest."

"You are very good to a stranger, sir. David and I have been out from Nepigon since May. We need supplies and my stuff should also be overhauled. Some of it got wet bucking this river of yours."

"Too bad! You found it a hard river to pole and track?"

"We certainly did. David has a nose for quick water as keen as a mink's for fish, but we took too long a chance in the big white-water."

At the mention of the rapid the face of St. Onge hardened. He leaned eagerly toward the speaker.

"The Devil's mile! It got you too?"

"Oh, we pulled out of it with a wetting. You see, I was with the best bow-man on the Nepigon, so we saved the canoe and our own skins as well."

Slowly the Frenchman shook his head; then suddenly asked:

"You saw nothing on your way up-river—nothing peculiar, no signs of a canoe?"

Steele wondered at the question as he answered:

"No, we met no one. I imagine the Indians don't travel it, too much strong water, and then there's the taboo—they're shy of the lower river, aren't they?"

At the words, the narrowed eyes of St. Onge shifted to the ground. He made no answer to the man who watched his set face, wondering, as it vitally affected the trade, why the factor avoided this subject of the Indians' fear of the Windigo. Presently St. Onge broke his silence.

"You will pardon me, Monsieur Steele, I am a poor host. If you were in the water you spoiled your flour—you are hungry?"

Steele glanced at the grinning David who plaintively placed a sinewy hand on his stomach.

"Yes, we lost our flour and we saw no game, had to fish our way up the river, so, colonel, we are a bit hungry."

Snapping his fingers with impatience at his seeming lack of hospitality, the factor called to the loungers at the trade-house door:

"Michel! Tete-Boule! Bring up Monsieur Steele's stuff from the foot of the portage; and, Michel, David here will eat with you. See that there's plenty of caribou stew for supper. He's starved out." Turning to Steele, the factor added: "My daughter is now overseeing the cooking of our dinner, monsieur. I trust you will find it to your taste."

"You are mighty kind to a couple of bush-battered strangers, Colonel St. Onge. We are not exactly starved, you know. We travel with a net, but a straight diet of pike and trout grows a bit tiresome. You can sell us supplies to take us through to Nepigon?"

"You will not need to outfit for Nepigon," the factor's eyes grew bitter. "You will pass Laflamme's post at Lake Ogoke."

"Monsieur Steele will desire to be shown his room, father, before we dine," called a woman's voice. Turning, Steele saw, opening the gate in the dog-stockade surrounding the factor's quarters, Denise St. Onge, trim in white serge. Casting an embarrassed look at his frayed jeans, his hand sought his unshaven chin as she joined them.

"Welcome, again, to Wailing River, monsieur," she said cordially, giving him her hand.

"My daughter seems to need no introduction. She has told me of your meeting at the river. Denise, Monsieur Steele is bound for the Nepigon by the Ogoke trail." The eyes of father and daughter met in a significant look. "Laflamme, monsieur, can give you anything you wish—including Scotch whisky."

The girl's dark eyebrows contracted at the mention of the Ogoke trader's name.

"So he's giving the Indians whisky, is he?" said Steele.

"You are surprised?" laughed the factor bitterly. "For Monsieur Laflamme it seems that Canadian law does not exist. With his whisky he will soon have the fur trade of the whole district."

"They said as much at Fort Hope. But the authorities—why don't they act?"

St. Onge shrugged eloquently. "I do not know. He is running things with a high hand—has support of the strongest at Ottawa."

Steele turned with a smile to David who had been an interested listener to the conversation.

"I think that we shall have to pay Monsieur Laflamme a visit, David."

St. Onge and his daughter exchanged glances.

"Duveed like to shake de han' of Mister Laflamme," replied the Ojibway, dryly.

"I pity Laflamme when you do. He'll carry his arm in a sling for a month if he ever falls into that wolf-trap of yours.

"You see, colonel, David is under the impression that Laflamme is an old friend," Steele enlightened his host, whose face reflected acute interest. "Sometimes in meeting old friends he forgets in his joy that his

Steele Was Thankful That His Duffle Bag Contained a Change of Clothes and Moccasins.

hand-shake is famous from Nepigon to Norway House. In this case, David," he added grimly, "you'll have to remember that we're not on the Nepigon and must not mistake Monsieur Laflamme's throat for his hand."

Steele smiled inwardly as St. Onge's eyes shifted to meet those of his daughter, then focused quizzically on the grinning face of the half-breed. If the situation at Wailing River was a source of mystification to St. Onge's guest, Steele was satisfied that the guests had now balanced the score, to the truth of which surmise the face of the Frenchman patently testified.

"But come, I forget my manners, monsieur. We have a room and bed for you as long as you will honor us. My head man, Michel, will take care of David."

"Thank you, sir!" And picking up the bag containing his personal belongings, Steele followed his host.

The house of the factor of Wailing River was built of square-hewn spruce logs, carefully chinked against the January winds of the Height-of-Land country. In front, a roofed porch of hewn slabs commanded a view of the river which here gave no intimation of the swift metamorphosis which, a third of a mile below, turned it into a riot of white rapids. Beside the porch a bed of violets and wood anemone were now bloomless, but beyond, in their second flowering, white Canadian violets and the blue of fringed gentian and harebells against a background of northern golden rod bore gay witness to the care of one who loved flowers.

Familiar with the bare and uninviting interiors of the houses at the fur posts, often presided over by an Indian or half-breed, wife of the factor, the living-room Steele now entered bore resemblance to those he had seen solely in its huge sheet-iron stove. The rough walls hung sparingly with small French etchings framed in white birch, the rustic furniture shaped from spruce and cedar poles, the shelves of books, and the rugs of moose and bear and wolf, had, by the alchemy of taste, been fused into a room—a home.

"I did not know there was a room like this north of Winnipeg, mademoiselle," Steele said in frank admiration.

"Oh, monsieur! would you have us live like the Indians? But you are laughing at our poor little home."

"Please don't," he begged. "It is charming—this room. And all the books!"

"It was hard on our packers," broke in St. Onge, "but I insisted on having the books if I was to be marooned up here in this valley. The winter would be long without them—and the violin."

"I envy you the winters here with that violin, sir," said Steele, smiling at his hostess. "I hope to hear it again, mademoiselle—your superb playing."

Her face brightened. "It was only a mood—today at the rapids, monsieur. I go there when lonely, to play to the troubled waters. You thought me sad—I saw it in your face; but I was only homesick for Touraine. To-night we shall have something gay."

But Steele felt that it was not loneliness which had driven Denise St. Onge to the restless waters.

"Monsieur, you will wish to see your room. Our Ojibway servant, Charlotte, will bring you hot water." And St. Onge led Steele to a room on the second floor of the house, the capacity of which was strained by a cot and washstand, whither a square-built, half-breed woman followed shortly with a steaming bucket.

Steele was thankful that his duffle bag contained a change of clothes and moccasins. Hot water, a shave and fresh clothes speedily worked a miracle in the tattered stranger who had startled Denise St. Onge at the rapids.

When Steele rejoined his hostess he felt more at ease. He even had a suspicion that she approved his changed appearance. At the thought something like a thrill swept him—to be followed by a shrug of annoyance. He had not seen an attractive woman in months and was paying the penalty. Yet, as he watched her pour the tea while her father dispensed caribou stew and fried trout, a quality—rarer than mere comeliness; an evident fineness of fiber, a savor of personality in this factor's daughter, which meant race and background—impressed itself upon him, and a strong curiosity to know the history of these people whom he had stumbled upon in the bad-lands south of the Albany—to learn the cause of the fear and heartache which this lonely girl had so poignantly revealed in the gorge, possessed him.

"You are collecting Indian relics and utensils for the American museum?" asked the Frenchman. "You are an ethnologist?"

"Yes, I have been in the field four years for the museum."

"You have found much of interest?"

"Last year and this summer, I shipped by Hudson's Bay canoes considerable stuff from Fort Hope and Henley House. Lake Makakibetan on the Albany has some remarkable burial places, unlike anything I've seen. And the Ojibways up there are still very wild and superstitious—medicine men, sorcerers, fear of spirits and the Windigo, and all that."

The factor paused, fork in air. Slowly he replaced it on his plate, untouched; then asked:

"You have never been in this valley before?"

"No," replied Steele, puzzled at his host's tense manner, "but what I heard on the Albany interested me. It seems to be Windigo country among the Albany Ojibways—under a sort of taboo. It must be a serious handicap to your trade, although the very fact that you're here proves that it is not generally considered haunted country by the Indians."

The fine features of St. Onge stiffened. With a glance at his daughter who watched him with parted lips and wide eyes, as though fearful of what he was about to say, he replied bitterly:

"That is our problem, monsieur. The company rashly builds a post on this river which, for a hundred miles below the rapids here, is to the Ojibways a place of spirits; then sends me here to get the fur of the upper country. At Albany, they laugh at this talk of Windigo and spirits keeping the Indians from trading here. They even order me to send hunters to trap the valley below us—when they have avoided it for generations."

"They only betray their ignorance by belittling Indian superstition, sir. I was followed and shot at on the Albany this summer for photographing some Ojibway children. They believed the lens was an evil eye and that the children would be bewitched."

The factor has his troubles, evidently, and is worried by them. What is the true inwardness?

(TO BE CONTINUED.)

Sugar or Candy

Granulated, lump, pulverized and brown sugars, though differing in texture and flavor, are practically alike in composition. They contain little or nothing but sugar. A pound of candy may be considered the equivalent in fuel value of a pound of sugar. Water, which has no fuel value, is used in making candy, but so, too, are chocolate and nut meats, which have higher fuel values than sugar. The proportion of sugar in thick sirups, such as honey and molasses, is about three-fourths of a pound to the pound, and in jellies, jams and rich preserves, about one-half of a pound to the pound.

THE HAPPY HOME

The Junior Bathtub

Mrs. Jimmy had always had a dreadful time bathing Jimmy Junior. At the hospital they had taught her to bathe him in a wash-bowl, and then lay him out on a big bath towel spread on a table to be dried and dressed. Laps were considered dangerous, because wobbly, and of course the big bathtub was much too deep to bathe him in. Yet Mrs. Jimmy was always afraid he would skid on the washbowl, and he was so desperately slippery and elusive when she lifted him out. As he grew older the washbowl became too small, and the tiny baby tub had to be set up on a chair, from whence water was splashed all over the floor. She was never really comfortable and never felt really safe when bathing Jimmy Junior.

It was just when she had nearly decided not to bathe him any more that someone told her about a new baby-tub which solved all her troubles at once. It was a simple, light-weight affair, this tiny hanging tub-basket. It was a soft bag of heavy fabric, swung between two wooden supports which rested on the sides of Mrs. Jimmy's big bath tub. All she had to do was to place the two wooden arms on the rim of her tub, turn back the canvas top against the wall, fill her big tub

with warm water, and drop Jimmy Junior into his bath-bag. This bag was open at all four corners, so that the warm water in the big tub flowed in and out easily. When the bath was finished, all she had to do was to remove the stopper from the big tub and let the water out.

But the best part of this baby-tub was that the top of it was a dressing table. When Jimmy Junior was clean, a turkish towel was thrown around him and he was lifted in Mrs. Jimmy's arms until she could let down the hinged top. This top made a flat, comfortable canvas table on which he was laid to be dried, powdered, kissed and dressed. In the little pockets back of the hinged top were spaces for soap, sponges, powder and safety pins, all well out of reach of the water.

"I used to dread giving Jimmy Junior his bath, but I thoroughly enjoy it now," said Mrs. Jimmy.

Mending in Advance

What housewife doesn't know that when she puts into the laundry a garment with a tear or hole in it, the garment comes out with the rent made twice the size. Broken and torn threads naturally stretch, the weight of the wet cloth tends to enlarge the hole, and perhaps the nose of the electric iron gets thrust unintentionally into the open rent, to its fatal enlarging.

"I got so discouraged at the way torn places were made worse while going through the wash that I decided to do something about it," announced one home-maker. "A bit of lace ripped from Nancy's petticoat either was torn away altogether or the torn piece doubled in length. A bit of a snag in a dinner napkin or a handkerchief was developed into a big three-cornered tear. I wanted to mend these tears before the articles went into the wash, but they were all so soiled that I didn't want to handle them.

"Then I got my idea. Whenever I was about to put any article into the soiled clothes, I examined it and if it had any little rent or hole I dropped it at once into a bowl of soap flakes and warm water, to soak. I then rubbed it out gently—just enough to remove the actual dirt, and hung it up to dry. From there it went to my mending basket and, without being ironed, had its tear neatly and thoroughly mended, after which it went into the washtub for a thorough cleaning, starching and ironing. I do this now in the case of any torn garment or piece of household linen. By reinforcing it before it gets into the maws of the electric whirler, the wringer and the iron, I can keep the tear from growing worse.

This same procedure applies to stockings. Soaking and squeezing stockings out in soap flakes makes them fresh and clean enough to darn, while it may not get them thoroughly cleansed. Mending in advance of the ordeal of the laundry saves many a garment from destruction.

Scraps

American women have invented and patented nearly 1,400 devices.

The United States produces about 2,500,000 troy ounces of gold a year.

A daily newspaper in London is now printed on paper made entirely of straw.

The most universal of forces, gravitation, is the one which remains the greatest mystery to scientists.

Women announcers are employed exclusively in Japan's largest radio broadcasting station.

Tells Women to Avoid "Physics"

DR. CALDWELL AT AGE 83

To Dr. W. B. Caldwell, of Monticello, Ill., a practicing physician for 47 years, it seemed cruel that so many constipated women and girls had to be kept constantly "stirred up" and half sick by taking cathartic pills, tablets, salts, calomel and nasty oils.

While he knew that constipation was the cause of nearly all headaches, biliousness, sallow skin, indigestion and stomach misery, he did not believe that a sickening "purge" or "physic" every little while was necessary.

In Dr. Caldwell's Syrup Pepsin he discovered a laxative which regulates the bowels. A single dose will establish natural, healthy bowel movement for weeks at a time, even for those chronically constipated. Dr. Caldwell's Syrup Pepsin not only causes a gentle, easy bowel movement but, best of all, it is often months before another dose is necessary. Besides, it is absolutely harmless, and so pleasant that even a cross, feverish, sick child gladly takes it.

Buy a large 60-cent bottle at any store that sells medicine and just see for yourself.

No more RHEUMATISM

IT'S GONE! That awful agony! Rheumatism can't stand the rich, red blood that S. S. S. helps Nature build.

But rheumatism will bring pain and misery to your joints and muscles just as long as you are without plenty of rich, red blood in your system.

It's the red-blood-cells that S. S. S. helps Nature build that drive out of your system the impurities that cause rheumatism. And until you do build up your blood to where it is pure and rich and red, you simply can't get rid of rheumatism.

And S. S. S. is the thing. Red blood conquers rheumatism. Everybody knows that.

S. S. S. means millions of red-blood-cells—means health all over. No more rheumatism. Nights of rest—days of joy, filled with the happiness of accomplishment — made possible by a body brimful of red blooded life, energy and vitality.

That's what the end of rheumatism means—that's what S. S. S. brings to you. Get S. S. S. from your druggist. The larger bottle is more economical.

S.S.S.

Why Not?

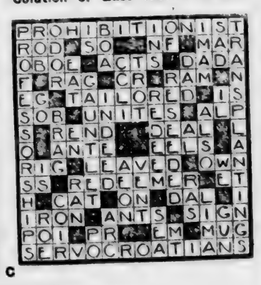
The solution will appear in next issue

Solution of Last Week's Puzzle.



HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "Horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

WEALTH AND FAME AWAIT INVENTORS

There are plenty of fortunes waiting yet for inventive minds.

For instance, a device that would keep men's trousers creased, and prevent bagging at the knees, would mean a fortune for the inventor.

A stove that would give all its heat out into the room instead of sending it up the chimney would find a quick sale to stove manufacturers.

Railroads would pay well for any kind of device that would stop the clank, clankety noise on trains, caused by the wheels passing over the rail connections.

Wipers have been invented for automobile windshields. But if someone would find a treatment for the glass which would prevent the glass from being obscured by fog or rain, doing away with the need for the wipers, even auto manufacturers would gladly buy the patent.

Day Named in Honor of Archangel Michael

Michaelmas day, September 29, is a festival in honor of St. Michael and all angels. It was instituted, according to Butler, in 487 A. D.

Michael is an archangel mentioned several times in the Bible, where he is described as the special protector of the Jewish nation and the leader of the angelic host in their contest with the powers of darkness. Michael is the minister of peace and plenty, and the chief of the seven archangels that stand before the throne of God. He figures prominently in Milton's "Paradise Lost," where, in company with Gabriel, he does battle against satan and his angels; and afterward prophesies to Adam all that shall happen until the second coming of Christ. He is also commissioned to lead Adam and Eve out of Paradise. According to tradition he appeared to the Virgin Mary to announce to her the time of her death, and afterward bore her soul to Jesus.

Brilliancy Lost

The famous sayings of great men are like silver-gilt spoons when the gold is wearing off from use; by dint of constant repetition they lose all their brilliancy.—Balzac.

Slam!

Freshie—There's a town in Ohio named after you.

Proud Senior—Yes? What's the name?

Freshie—Marblehead.

Wireless Well Known to Prehistoric Man

Sig. Marconi, father of wireless telegraphy, thinks that radio got its first real start when Adam gave Eve "the glad eye." In a recent speech the veteran inventor, disclaiming modestly any part in the radio boom, said: "At times I am amused at the discussions as to who really invented wireless. To my mind wireless has existed from the moment when prehistoric man first understood the meaning of a smile of encouragement from the prehistoric girl." Later Sig. Marconi added that his contribution was the discovery that electric waves were capable of traveling and of being received across great distances. He added further that no one was more surprised than he at the tremendous advance of radio in the last few years, as well as the tremendous popular interest therein. "It is all quite beyond me," he concluded. Sig. Marconi is working on advanced experiments with very short wave lengths.

Heart's Deep Secret

We have no doubt that many a kindly old grandmother sighs regretfully because bobbed hair wasn't the vogue in her time of high coiffures and hair combs.—New Orleans States.

Practical Youngster

A schoolmaster had explained to his pupils the functions of a British consulate, and to find out whether or not they understood, he asked:

"If someone carried you off in an airplane and after a long flight dropped you thousands of miles away in a foreign country, what place would you seek out first of all?"

An eager hand was uplifted by one of the pupils.

"Please, sir, the hospital," came the unexpected answer.

HOW TWO WOMEN AVOIDED OPERATIONS

The Following Letters of Mrs. Thurston and Mrs. Beard Carry an Encouraging Message to Other Sick Women

MRS. ETHEL THURSTON
324 N. PINE STREET, LIMA, OHIO

Lima, Ohio.—"I want to tell you how your medicine has helped me. For weeks I suffered with awful pains from inflammation and I was in such misery that I had to bend double to get relief. I could not be touched or jarred, had awful pain all over my abdomen and could not touch my feet to the floor. It was impossible for me to straighten up and the pains never ceased. I took treatments for some time and finally was told I would have to have an operation. I do not believe in operations, and I had read so much about Lydia E. Pinkham's Vegetable Compound that I told my husband I would try it before I gave up. I soon began to feel that it was doing me good. The awful misery began to leave me, also the backache. I have a good appetite and am gaining in weight. Taking the medicine was the best thing I ever did. I feel like it has saved my life and I do not hesitate to say so to my friends. At least it saved me from a dreaded operation and I am still taking it. I am willing to answer letters from women asking about the medicine."—Mrs. ETHEL THURSTON, 324 North Pine Street, Lima, Ohio.

Mrs. Beard's Letter

Eddy, Texas.—"I will write you a few words, thinking it will do some one else good. Two doctors said I would have to be operated on because for nearly twelve months I suffered from a weakness from which I could get no relief. I was restless and nervous and was not able to walk across the house. They said it was the Change of Life. I saw Lydia E. Pinkham's Vegetable Compound advertised in the newspapers, and as I could not get any help from doctors I thought I would give that a trial. I began with the liquid and it helped me some, then you advised me to take the tablet form and I began to improve rapidly. I have gained in weight from 105 to 170 pounds. I recommend it to all women with this trouble."—Mrs. M. E. BEARD, R. No. 1, Box 143, Eddy, Texas.

The man who talks in his sleep is lucky if his wife doesn't believe everything he says.

There's many a man who owes a lot to his wife—and many another man who owes a lot because of her.

CHILDREN CRY FOR

MOTHER:— Fletcher's Castoria is especially prepared to relieve Infants in arms and Children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep.

To avoid imitations, always look for the signature of *Chas. H. Fletcher*
Absolutely Harmless—No Opiates. Physicians everywhere recommend it.

He who cannot command himself, it is folly to think to command others.—Labertius.

Profits of South African gold mines have decreased because of the discontinuance of the gold premium.

A Thanksgiving

By Frank H. Sweet

THIS is the brink of winter,
But the harvest home as well,
The bounteous yield
Of orchard and field
The farm storehouses swell.
Heaped in the barn and cellar,
Till the bins can hold no more
In crib and in shed,
And on rails overhead,
And up on the attic floor.
Pumpkin and squash and yellow grain,
Gold that the farmers find,
And safely stored from the cold and rain
Apples of every kind.
Tons of hay in the monster mows,
Stacks of fodder to feed the cows,
Bags of cranberries, red and round,
Bushels of nuts the boys have found—
Everything to add to the cheer
Of Thanksgiving Day drawing near.

(Copyright, 1925, Western Newspaper Union)

RECOUNT BLESSINGS AND RETURN THANKS

Well for Nation to Be Reminded of God's Gifts.

THERE is no more important day in our national calendar than that on which we are called upon by our national and state executives to assemble in our accustomed places of worship to render devout thanksgiving to God for our blessings, both collective and individual.

It is well for our entire nation thus emphatically to be reminded of its dependence on God and of its obligation to Him.

It is well for us both as individuals and as a people thus seriously to take account of our blessings and thus formally and ultimately to express our gratitude.

For we are entirely too much inclined to magnify the ills we suffer, the difficulties we encounter, and the disappointments which befall us that we lose sight of the things which, if received and used in the right way, enrich and ennoble our lives. One need not make a very diligent search in order to discover a vast number of things in this favored land of ours which call for thanksgiving. Nor does it require much further investigation to make clear that the ills which afflict us most deeply are due, not to any failure of divine beneficence, but to our own sins and follies. And what is true in this regard of the nation is true also in large measure of each individual. Our only unbearable troubles are those which we bring upon ourselves through our disregard of the laws of God. So long as we remain in vital union with Him, the real values of life are still left us, whatever sorrows may overtake us.

The occasion which bids us recall our mercies may also be an occasion of repentance. For it not infrequently serves to remind us of blessings squandered and opportunities neglected. It is well to express in words our appreciation of the good gifts that come down from the Father of light, but such expression becomes mere mockery if we use these gifts unworthily.

It will be well, therefore, if we make Thanksgiving day a time of heart-searching. Are we as individuals, as a people, seeking to render service to our fellows that is proportionate to our advantages and opportunities? Or are we dishonoring the God whom we praise with our lips by living in Pharisaic self-complacency and selfish disregard of the needs of our less fortunate brothers and sisters?

Rightly observed, Thanksgiving day might mark the beginning of a revival that would revitalize the church and purify our national life.—Sunday School Magazine.

THE END OF A PERFECT DAY

Pride Before the Ax

By William Van Groos

In Portland Oregonian

O TURKEY you are strutting 'round the yard,
Your days are spent in showing off your plumes,
Your wattles change in hues as April blooms.
Your puffed-up pride we would not censure hard
If you could but your ugly feet discard.
We're not impressed at all; your mournful booms
Seem like the ghostly rumbles from the tombs.
You'd look much better on the menu card.
So waste not golden hours in vain display,
And gobble not so much to draw our eyes,
But rather gobble up the corn and wheat:
For it is written, on Thanksgiving day
We shall eat turkey, sauce and pumpkin pies.
So we implore you eat that we may eat.

OUR BLESSINGS; ART OF BEING THANKFUL

Time to Take Stock of the Good Things in Life.

FEW of us, I suppose, often stop to analyze the things which touch us most or mean most to us. Our greatest blessings, perhaps, we sometimes try most to avoid.

If today we should each take stock of the personal blessings for which we should thank the good Lord, what would they be? Not the same for all of us, perhaps, and yet for most of us very largely the same.

For myself I am most thankful for work—for the necessity and the opportunity of regularly doing something; for the joy of the weariness that comes from mental or physical toil. One of the saddest objects in the world is a man who does not like to work, who cannot work, or who has no work to do.

Just the other day I had a letter from a young fellow who through misfortune and illness has for three years been unable to work. "Will you not pray with me," he wrote, "that I may soon be strong again, for it will be the happiest day of my life when I can go to work."

I am thankful next for opportunity. "I never had a chance," a hopeless, shiftless failure said to me only a few days ago. I am glad for my "chance," for the far-reaching daily outlook to learn something new, to do something better, to help someone who is down and to stir someone to greater ambition and greater effort.

I am thankful for health, for the strength and energy that are needed to do the work that presents itself every day, to meet the problems that sometimes seem too difficult to be solved, to accomplish the duties that multiply and crowd upon one and sap one's vitality and try one's courage.

I am thankful for friends, for the joy of home and home ties, for the loving association and help of those with whom I am daily in contact and who every day make work sweeter and life more worth while.

I am thankful for life itself and for all it has meant and for all that it may mean here and hereafter.

And you who read these words will, as you read, perhaps, set down the catalogue of your own individual blessings, which, though they may not be the same as mine, will yet be made more real and more vital because you have turned your thoughts to them.—Thomas Arkle Clark, Dean of Men, University of Illinois.

THE LAST OF THE TURKEY

The Lestor's Thanksgiving

By Katherine Edelman

ALL over the Middle West the Indian summer lingered, like a visitor loath to depart, and everywhere people were enjoying to the full the lovely November days. Each morning the sun came up, a flaming ball of fire shining through the haze that lay so heavy over the horizon. And in the evenings the sunsets out in the open places were things to gladden and delight the senses.

"Looks as if the Indian summer was going to last over Thanksgiving this year," Charles Lester remarked to his family at the dinner table one evening. "It sure makes a fellow wish to see a little more of the country."

Which remark started one of the family to thinking what a lovely thing it would be to have Thanksgiving dinner out in the woods, and everybody seemed to agree with the speaker except mother, who protested very forcibly, saying that it would not seem a bit like Thanksgiving not to have a big dinner at home like they had always had. Besides, she reminded them, that Mr. and Mrs. Welborn were coming to dinner with them on Thanksgiving, and they would have to stay at home.

But she offered a compromise; she would see that dinner was served very early and if each one would help with the dishes and things after, they would still be able to enjoy a long afternoon in the woods.

"Mother always thinks of a way out of everything," twelve-year-old Harold cried, and the rest of the crowd agreed with him. For after all, Thanksgiving dinner is Thanksgiving dinner—a treat no real human being would want to miss.

True to her promise, mother had the big turkey with all the fixings on the dining table at an early hour. The Welborns had been advised of the program for the day and had brought their car along, as even the Lesters' big car would not hold all the happy crowd. Mother had seen to it that the family had only a light breakfast, so everyone was hungry. And how good it all tasted; plates were passed many times and all were glad they had stayed at home for the feast. And the fun they had after, helping mother; each one was given some particular task to do and almost before they realized it everything was spick and span.

All Were Glad They Had Stayed Home for the Feast.

And the wonderful afternoon they had; how each one of them enjoyed it. They had chosen a lonely little by-road after they had got out some distance, and there were many new and interesting things to see. There were still nuts and persimmons left in a few places, and mother found some wonderful leaves that had somehow escaped Jack Frost's touch.

The almost full moon was just coming up as they got on to the main highway on their way home, and the beauty of the night thrilled each one and brought the real meaning of the day very close to them.

Afterwards Mrs. Lester declared that this was the only Thanksgiving she had ever known when there were no leftovers from the feast, for when they got home from the long drive they were all ravenously hungry again, and the supper that followed was enjoyed as much, if not more, than the big Thanksgiving dinner had been.

Autumn Days

O, Autumn, laden with fruit and stained
With the blood of the grape, pass not, but sit
Beneath my shady roof; there thou mayst rest
And tune thy jolly voice to my fresh pipe,
And all the daughters of the year shall dance!
Sing now the lusty song of fruits and flowers.

—William Blake.

The Moving Sign

Uncle Eph says: "Talking 'bout Thanksgiving', if you're thankful that you're livin', that's a sign you're movin' right along; movin' strong an' steady, an' we're pretty sure you're ready to raise the celebratin' thankful song."

SPORTING GOSSIP

Spencerville made it two straight by taking its second game of the basketball season from Corunna last Friday night by a score of 16-10. The first half ended with the score 7-6 in Corunna's favor. The Spencerville team, came back in the second half and won the game—wholly by making good on foul goals. The game was rough and little resembled a basketball game. Neither team seemed to be playing at top speed Only six field goals were made in the entire game. Furnish of the Spencerville team made 9 out of the 26 points made by both teams. Spencerville meets Ashley next Friday at Spencerville.

For a curtain raiser the Spencerville seventh and eighth grades trimmed Lake Forest or Fort Wayne by a score of 23-5. The game was lively, and well played. Willard Chapman of the locals made the star player. Next Friday Garrett Junior High mixes with the seventh and eighth.

Spencerville 23		Fort Wayne 3
Rhoades	F	Rueter
Chapman R	F	King A.
Chapman W	C	Stellhorn
Laux	G	Cockrill
Vallieu	G	Johnson C.

THANKSGIVING HYMN

by HENRY ALFORD
in Hoard's Dairyman

COME, ye thankful people, come
Raise the song of Harvest-Home!
All is safely gathered in,
Ere the winter-storm begin;
God, our Maker, doth provide
For our wants to be supplied;
Come to God's own temple, come,
Raise the song of Harvest-Home!

Be ourselves are God's own field,
Fruit unto His praise to yield;
Wheat and tares together sown,
Unto joy or sorrow grown;
First the blade and then the ear,
Then the full corn shall appear;
Grant, O harvest Lord, that we
Wholesome grains and pure may be!

For the Lord our God shall come,
And shall take his harvest home;
From his fields shall purge away
All that doth offend, that day;
Give his angels charge at last
In the fires the tares to cast,
But the fruitful ears to store
In His garner evermore.

"Then the church triumphant, come
Raise the song of Harvest-Home!
All are safely gathered in,
Free from sorrow, free from sin;
There forever purified,
In God's garner to abide;
Come, ten thousand angels, come
Raise the glorious Harvest-Home."

Say It With Thanksgiving

by H. Louis Roybold

THANKSGIVING is a particularly lonesome day for a man to land in a strange city after several years overseas. At any rate, Dick Ormsby thought so as he stood on the dock surrounded by jostling baggage trucks with the words of a poem he had read somewhere ringing in his ears. "His war—his war is out of date."

Not that Dick wanted a band to meet him nor a parade down the Avenue. He merely wished that in the whole of big New York there was a man, woman, child, or even a dog who was glad he had come home. His only relative, an aunt, had died during his absence. His pals in the army had long since returned and were scattered to their homes and occupations. Between him and his associates in the French hospital the ocean now intervened. Yes, he was singularly alone in the world.

He had said as much yesterday to the assistant purser as they had stood at the rail. The purser, a friendly young fellow going back with the steamer, had recommended a boarding place and had secretly pitied so good looking a chap with no one to welcome him.

Thanksgiving! Dick drew a lugubrious sigh and stooped for his bag. As he did so he felt a light touch on his arm and turned quickly. There stood a very slender slip of a girl whose eyes—deep blue and remarkably trusting—were lifted hopefully to his. She was no one he recalled seeing

Yes, He Was Singularly Alone in the World.

on the boat, but that signified nothing, as he had kept very much to himself.

Puzzled, he watched her open her pocketbook, take out a bit of paper and hand it to him. Still more puzzled, he saw that it bore only an address—3762 Eastern avenue, Wiltsboro.

He knew Wiltsboro as a small residential town about thirty minutes' run out from the city.

"You don't know how to get there?" he asked courteously.

She smiled, then shrugged her shoulders.

Dick felt relieved. French, presumably. "Est—ce—que—vous—voules—" he began rapidly.

But still she smiled the same uncomprehending smile.

Dick wrinkled his brow. "Fraulein, Ich bin—" He saw no response to that.

Struck with an idea, he pointed to the paper, then to the girl, then vaguely into the distance. Ah—that brought results! She nodded quickly and slid her arm through his. There was no mistaking the fact that she wanted his guidance to Wiltsboro.

The trip across the city, the brief ... in the shorter ride half hour on the suburban express was without incident, beyond a brief conflict when the girl insisted on paying her elevated and train fare, silently, to be sure, but none the less successfully. Dick bought her a magazine, but she seemed content to sit and watch the flying landscape, while he himself pondered the strangeness of the situation and stole surreptitious glances at her sweet profile and a curl of chestnut hair which had escaped her veil. All too quickly he felt they would reach her destination and she would vanish completely from his ken.

Arrived at the station, she all but ran down the platform, seeming anxious to avoid a meeting with anybody. Brushing aside a taxi driver she swung down the main street, then, at an intersection of roads, turned up for a block or two, and stopped before a huge old-fashioned house built in the days when large families were popular and fuel was cheaper.

Even as she shook the doorknob Dick heard voices and laughter and even fancied that he could detect a delectable aroma like a turkey—cranberry—mince pie.

Then the door was flung wide, and for a moment Dick was overwhelmed with an excited babble of voices raised in joyous greeting, and all but caught in many embracing arms. Then he awoke to a strange miracle.

"Yes, mother. This is Richard Ormsby—the Richard Ormsby I wrote you about from Neuilly before I left to visit the Lanes. I've brought him home for Thanksgiving!" The speaker was Dick's silent companion of the last few hours.

That she could likewise hear as well as talk he discovered later—when the jolly dinner was a thing of memory only and the low settle before the fire held only himself and Eula.

"Why didn't you let me know you were a friend of the Lanes while you were at the hospital?" he was asking curiously.

"Let you know!" Why, at the hospital you never noticed a nurse unless she actually worked with you, which I never did. Then I left for a trip with the Lanes, and didn't see you until the day before we landed, when I happened to overhear you tell the purser your lonely condition. I knew you wouldn't accept an invitation given apparently on the spur of the moment, when even my own family

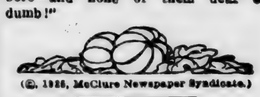
Arriving, She All but Ran Down the Platform.

weren't expecting me, so I cooked up my little scheme—and it worked!"

She looked over at him so appealingly that Dick suddenly rose, thrust his hands in his pockets and stood looking solemnly down at her.

"I've got to start in practicing somewhere, haven't I? Well, I'm going to start here in Wiltsboro. And I've got to marry some day, haven't I? Well, I'm going to marry—" he paused, aware of his extreme daring.

"Yes?" said Eula demurely. "I believe there are several girls in Wiltsboro—and none of them deaf or dumb!"



(©, 1926, McClure Newspaper Syndicate.)

Brother Higbee's View of De Projeckin' Son

Now is de very time fer de Projeckin' Son to come on home, fer dey has done traded de fatted calf for de Thanksgivin' turkey, thinkin' that mebbe veal don't set right with him no mo', an' he mus' be good an' tired o' de calf business ever' time he comes home to fill up. De las' time de Projeckin' Son come back, he said to de ol' man: "Dad, I has come home to die." But his daddy said: "Son, don't spring that tale on me, no mo'. It's too ol' an' feeble. You has come home to eat, an' well you knows it!" An' he never would 'a' drawed off from dat table ef de ol' man hadn't give him a se-gar an' tol' him it wus time to smoke! Lord help de turkey ef dat Projeckin' Son hits de home road in time fer Thanksgivin'!"

Furs, Flares and Femininity Rule

Your winter coat, if it is to measure up to the standards set by the chic Parisienne, writes a Paris correspondent in the New York Herald-Tribune, must meet these requirements: It must be extensively trimmed, preferably with one of the flat furs. And it must be elaborately feminizing, save in its informal and sports versions. All of these manifestations of the contemporary mode have made their appearances in other portions of the smart wardrobe, but in no other item of dress are all three combined with such decisive finality. And inasmuch as the coat is the standard-bearer of fall and winter fashions, it is advisable to consider each of these themes in detail before welcoming this new member—and it will have to be new this season—into the wardrobe as your sartorial winter guest.

First, because it is most obvious, the flare. The crystallizing of autumn fashions has demonstrated the supremacy of the broadened silhouette over all others. Here and there, of course, you will see a gallant remnant of the old straightline still striving to hold its head high, but the element of chic this season requires some definite interpretation of the flare. Particularly in coats, and however great your affection for the pencil silhouette, you will do wisely to forget it when acquiring this most visible and paraded member of the winter outfit.

The flare, in varying degrees and in different types, is a distinct feature of coats designed by Chanel, Patou, Lanvin—surely a distinguished triumvirate. In a Chanel model which is worn over a straight-line dress, the flare is of the sudden, low-placed type and it is definitely visible at all times. Scarlet crepella is the fabric of both coat and dress. Jean Patou's coat contribution exploits the sectional flare, more moderate than the first and commencing at a slightly higher line. This is an example of the far bruited kinetic silhouette which is converted into a swinging outline when its wearer is in motion. The flaring portion is achieved by the separate front sections.

A Lanvin coat exemplifies the broad silhouette rather than the strict flare. Its distended effect is inaugurated at the shoulders and it continues to widen gradually and almost imperceptibly until it reaches the hemline. This is forerunner of the coats of next season.

Use of Fur Trimming.

The tendency to include the flare even where the fabric used is the sportsmanlike English woolen, is pronounced.

A Chanel model, measured in square feet, has almost as much nutria sur-

Coat of Velours, Edged With Fur of Contrasting Color.

face as it has crepella, which is the foundation of the coat. The cuffs extend about eight inches back from the wrist, and the generous fur collar refuses to be repressed until it terminates in a huge circular band which is placed at the hem line.

Patou's fur application is similar in that it is applied at the same places, but it is not quite so generously employed. This is an English wool model in a beige color and the trimming fur is a matching beige renardeau applied modestly at neck and hemline and so lavishly as to simulate a muff on the sleeves.

Molyneux and Lanvin models, while less prodigal in the application of fur trimming, employ it in the newest and smartest manner. No trimming appears at the hemline, which is in accordance with the tendency of the chic Parisienne to concentrate the ornamentation at the top, leaving the lower section to be elaborated by the various silhouette devices.

These models atone for their hemline neglect of fur by being lined throughout with the identical fur used as a trimming. This is another modish note which is peculiar to the current season and which as well has the unqualified sanction of the smart Parisienne.

In general, flat furs are the outstanding pelts which are used to trim the new winter coats, and almost every short-haired fur has been used. There is a strong tendency toward high trimming colors, to match the fabric of the coat, and luridly-dyed pelts have made their appearance as a result. As a rule, though, the smart Parisienne adheres to the natural colored furs as a trimming, since she historically hesitates to gild the lily.

The third potentate in this new triumvirate is a little less tangible and, perhaps, has not progressed quite as much as the other two. The feminizing of fashion has been steadily gath-

Autumn-Red Needlepoint; Collar and Cuffs of Gray Squirrel.

ering momentum since last summer, yet there still remain unbelievers who will point to isolated models as a substantiation of their skepticism. Feminine fashions connote greater formality, increased elaboration and generally more mature atmosphere, and while some of the new coats may still refute one or more of these themes, the advancing season will witness a steady march in the direction of all three.

Every mode, without even the exception of the usually mannish O'Rossen product, offers mute evidence of the softer feeling in the new fashions. The tailormades of Patou and O'Rossen are cut on generally straight lines, but there is none of that bizarre severity which characterized the era of mannishness. And the elaboration in fabric and trimming which is so apparent on some coats, is ample to clearly differentiate them from the youthful, simple and overinformal styles of a fashion cycle that has reached the end of the long road. Flared femininity is the password to autumn and winter chic, and it belongs, before anything else, on the new coats.

Fit at the Waist.

Along the Bois de Boulogne Jeanne Lanvin shows many smart coats that fit decidedly at the waist. The shoulder flare and the rounded front are the other significant features. Most of her models are trimmed with fur and a favorite treatment is a wide panel down the side of the front which wraps over and then widens as it reaches the hem.

The inlay effect of two or three shades of fur is quite prominent in the smart Lanvin coats. This designer cut up her fur in narrow tongues, the lowest black, then a brown one and above that a smaller one of beige. Shaved rabbit in a sand shade of beige is a very popular Lanvin coat trimming. Fox, too, is smart in this becoming shade. It is particularly attractive on a chiffon velvet coat in the new chartreuse green that has a band of silver galon both outside and in, just two inches from the fur.

Most of the Premet coats have dresses made specifically to go with them, but some excellent separate wraps are seen. A very pretty model in gray-green cloth has a heavy flounce and a high collar and cuffs of ratgourdin. A coat of bright green cloth, fitting neatly to the waist and hips with a wide under flare, has a collar and cuffs of fox in the popular sand shade that trims so many wraps this season.

Flat disks of fur worked in concentric circles are often used by Charlotte as a trimming for both coats and gowns. This is a very decorative fashion and gives much originality to the models. A band of fur, at the back only, is seen on many of the coats, while most of them have a cozy turnover collar and wide cuffs of fur, the sleeves often flaring at the wrist.

GOOD MANNERS IN MOTORING HINTED

Commissioner Stoeckel of Connecticut Has Prepared Code of Ethics.

Robbins B. Stoeckel, commissioner of motor vehicles of the state of Connecticut, has proposed the following code of ethics or good manners in motoring.

"To be a good driver, in the terms of applied ethics, is to be a person of good manners, truly an altruist, ready to see and appreciate the problems of others, to make proper allowance for them and to exercise even a little more patience, care and consideration than is actually called for by the letter of the law.

"Driving an automobile through water or mud so as to splash same on pedestrians is a common pastime with some motorists who have peculiar ideas of what constitutes a joke.

Give Proper Warning.

"Give proper warning to pedestrians and other users of the highway. Even animals should receive reasonable notice.

"The horn should be reserved for safety purpose; not to signal a person inside of a house nor to attract the attention of people passing.

"Give proper attention to headlights. They often cause inconvenience and danger to others.

"Disobeying the instructions received from traffic officers and trying to steal a few feet of space, instead of remaining in a proper spot, not only annoys pedestrians and other motorists but is a dangerous practice.

"Starting an argument with a traffic officer is not only bad etiquette but is courting trouble with the law.

"'Keep in the middle of the road' is a tip that has been construed literally by the roadhog. Drivers of heavy vehicles should keep to the right side of the highway where they belong.

Common Offenses.

"A common offense against road etiquette is committed when a motor car operator places his car at a crossing so as to obstruct pedestrian traffic, thus compelling pedestrians to walk around his machine.

"Drivers who wish to be considerate of other people will concentrate on what they are doing, look where they are going, not attempt to gaze at passersby and stay in line.

"The exercise of kindness to others, consideration and true courtesy will prevent any operator from getting a wrong attitude of mind for driving in traffic. Any operator who loses his temper, who becomes sulky, or is abnormal from any one of many different causes is unfit to drive because his automobile provides a medium of expression for his personality. If that personality is upset, he is bound to make trouble for himself or for others, generally for both."

Driving Car Best Way to Determine Merits

How should an automobilist judge a car today?

"Get behind it and drive it," is the answer given by a general sales manager of the Oakland Motor Car company.

He sums up the reasons for this answer as follows:

"The public is accustomed to judge an automobile too much today by hearsay. Some of these opinions reflect an old judgment on a car and do not reflect the judgment that would be made on the car if the prospective purchaser actually got behind the car today and judged for himself.

"Automobile shows have been developed for just this purpose to keep the public informed as to the developments of each make of car. Each manufacturer makes changes, additions and improvements in his car—some more, some less. The problem is for the automobilist himself to decide for himself just how much "more automobile" each manufacturer is giving to the public each year.

"This can be decided in but one way—ride in the car. After all, how the car rides is the most important thing. Has it a feel of life, of power? Does it accelerate quickly? Is the mechanism easy to handle? Is the car comfortable to ride in? Will it stand the gaff of rough travel?

"It is the only test of a car today. For after all, a motorist's judgment of a car after he has ridden in it is apt to pretty thoroughly reflect the quality of the car."

How to Check Up on Gas When He Fills the Tank

On pumps making one-gallon delivery see that the pump operator makes a full stroke and that the piston travels its full length.

Keep your eyes on the indicator showing the quality of gas being pumped into your tank.

See that the operator drains the delivery hose properly. Many operators have a trick of creating an airlock in the hose which keeps the gasoline from flowing.

Beware of filling stations where the delivery is outside and the pump inside the building.

Short delivery is frequently caused by leaks in the supply line to the pump. This condition causes the pump to deliver air instead of gasoline. Listen for sputtering sounds.

If the gasoline is low in the supply tank short delivery is likely to result. This can be detected by the irregular flow of gasoline.

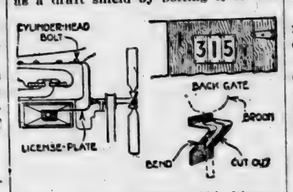
The first delivery by pump after it has been standing idle for some time is invariably short.

View with suspicion a gasoline delivery hose attached to a well in the curb. It is impossible to properly drain such a hose and adequate measure cannot be obtained.

Discover New Uses for the Old License Plates

Automobile license plates that are renewed annually have some usefulness. The enamel on them makes them rust-resisting and for that reason the numbers can be sheared off in strips, rearranged and placed on the rear gates of city homes as house numbers.

One motorist used a number plate as a draft shield by bolting it on the



Three Uses to Which Old License Plates May Be Applied.

forward side of the intake manifold to prevent the cold draft of the fan from cooling the manifold to the extent of interfering with the carburetion, while another made a holder bracket for the garage broom. Apart from these uses the plates are suitable as patches for holes in the wooden garage floor.

The ingenious motorist will be able to think of many other uses for last year's license plate. The plates are made of pressed steel of a very good quality.

Clutch on Modern Auto Makes Shifting Easier

One of the most notable advances made by modern cars has been in the direction of easier and more quiet operation. The prevalence of women and even children in their upper teens as drivers of cars is perhaps the best testimonial of the great strides that have been made by automobile engineers along these lines.

Not so many years ago it was necessary to have a good strong arm to crank a car—an ordeal, incidentally often performed in mud or puddles of water.

Another essential was the possession of a box of matches to light the gas lamps at night. There was also the inconvenience of gear shifting with the clutch pedal requiring considerable pressure and levers hard to manipulate. In short, driving a car was strictly a man's job.

Electric starters and lights, instrument boards, cord tires and, particularly, easy gear shifting revolutionized things, until today it is not only the usual thing to see a woman at the wheel of a car, but women have become actually as proficient as men in driving automobiles.

Strainer for Cleaning Pail

In cleaning the parts when overhauling the car, the gasoline or kerosene used for the purpose may be of service longer if kept clean. To this end such a strainer or metal grating that will stand up four or six inches in the pail or other receptacle is very advantageous, says Motor Life. When the cleaning liquid is used, sediment is not stirred up, as it strains through into the bottom of the containers. Furthermore, small parts do not get mixed with the sediment and accidentally thrown out.

WORLD'S SMALLEST AUTO TRAVELS FAR

This little car was designed and built by Gus Petzel of 1207 Grand street, Alameda, Cal., who drove it from San Francisco to New York. The car has a 4-cylinder, air-cooled motor, electric lights, 3 speeds, self-starter, and it weighs 980 pounds. It has a speed of 80 miles per hour and cost about $2,000 to build.

Hoosier News Briefly Told

Albert D. Thomas, prominent Indiana jurist, former chairman of the state board of pardons, and the father-in-law of Will H. Hays, died at Crawfordsville.

Indiana corn won eight out of ten ribbons in the Sedalia (Mo.) national corn show for the white corn exhibits. Illinois scored fifth and Missouri sixth places and Indiana took the rest.

Earl S. Howard, former vice president and one of the organizers of the Lafayette Motor company, at one time situated at Mars Hill, died at Cleveland, Ohio.

Funeral services for Panel Jackson, age eighty-three, at one time a dispatch rider for General Grant in the Civil war, were held at the home of his nephew, Frank Bridges at Frankfort.

Henry Garritson, age fifty-nine, president and general manager of the Indiana Basket company at Roann, Wabash county, was fatally burned when he fell into a seven-foot vat of boiling water at the basket company's plant.

Albert D. Thomas, age eighty-four, former judge of the Montgomery and Parke Circuit court, prominent Crawfordsville attorney for half a century, and chairman of the Indiana state board of pardons, died at his home in Crawfordsville.

The marriage of Mrs. Marie Duenweg, a wealthy widow of a year, to Bernard Witzgerald, an Indianapolis pension attorney, November 6, was announced at Terre Haute. They left on a wedding tour in the East. Mrs. Duenweg has three children.

Daniel A. Levy of Philadelphia, a fugitive from justice after being indicted in Federal court at Indianapolis on a charge of using the mails to defraud in connection with an oil selling company at Gary, appeared in Federal court and pleaded not guilty. His bond was fixed at $7,500.

Announcement that Rev. George S. Henninger of Indianapolis had been appointed a member of the state board of pardons to succeed Rev. Frank L. Hovis of Frankfort, was made by Gov. Ed Jackson. Rev. Mr. Henninger is pastor of the Tenth Street Methodist Episcopal church.

The murder mystery of Lulu Williams, fifty-eight years old, found mortally wounded at Evansville August 5, was solved when the body of her husband, Frank A. Williams, sixty-eight years old, was found in the woods two miles from the Williams home. He had committed suicide.

Masonry and Masons were lauded by Gov. Ed Jackson in an address before 1,400 members of the Scottish Rite branch at the annual convocation in Fort Wayne. The governor was the principal speaker at the banquet, which brought the convocation of the valley of Fort Wayne to a close.

Two gifts, totaling more than $50,000, to church and welfare organizations in Gary from the United States Steel corporation have been announced. One gift of $40,000 will go toward a new unit for the Christ Episcopal church while another gift is of a downtown site for a Salvation Army building.

The first step in a building program that will amount to approximately $700,000 was taken at the semi-annual meeting of the board of trustees of the Methodist Episcopal hospital system of Indiana, at the Indianapolis Methodist hospital. This program will include the erection of a nurses' home, a chapel, and a laundry, in connection with the Indianapolis hospital.

Fred Lontin, witness in the trial of Charles (One-arm) Wolfe at Muncie, for the murder of Ben Hance and wife, told the court in the absence of the jury, that as Hance lay dying, where he had been shot down, the witness asked the dying man: "Who did the shooting?" and Hance responded, "Dutch Anderson and Charles Wolfe."

At the close of the fiscal year which ended September 30 the industrial board of Indiana turned back into the state treasury an unexpended balance of $2,013.39 of its $90,000 appropriation. These figures are contained in the annual report for the fiscal year as prepared by Dixson H. Bynum, chairman of the board at Indianapolis. The report points out that in the fiscal year 49,170 injuries were reported to employees, or 106 fewer than the year before.

Indiana's 200,000 farms will be "closed for inventory" the week of December 28 to January 2, if all of them observe "Farm Inventory Week." Plans for state-wide observance of this week are being formed by the agricultural extension department of Purdue university at Lafayette and all the agricultural forces of the state are being enlisted in this first big drive ever made to have the Indiana farmer get a close-up view of his own business with the idea of putting it on a more profitable basis.

The largest consignment of liquor ever confiscated in Hamilton county was brought to Noblesville by State Policeman Bridges. It consisted of 200 gallons of alcohol. A man giving the name of C. E. DeLong of Indianapolis was arrested.

That the United States faces a promising economic condition was the forecast made by Andrew Burry of Fort Wayne, general manager of the Fort Wayne Box company, in an address before the tenth anual session of the Indiana Credit Men's association at Indianapolis.

WRIGLEY'S
AFTER EVERY MEAL

THE FLAVOR LASTS

Probably one reason for the popularity of WRIGLEY'S is that it lasts so long and returns such great dividends for so small an outlay. It keeps teeth clean, breath sweet, appetite keen, digestion good.

Fresh and full-flavored always in its wax-wrapped package.

United States Rubber Company

PATENTS

Don't risk delay in protecting your ideas. Send sketch or model for instructions or write for FREE book, "How to Obtain a Patent" and "Record of Invention" form. 881 W. Huestis Avenue, Fort Wayne, Ind.

YOU WON'T GET RICH

but you can make $10.00 upward each day showing new article that sells on sight. No capital required. You can become district manager if you make good. Only costs you two-cent stamp to investigate. Address LOCK BOX 1101, INDIANAPOLIS, IND.

Sure E-nuff

"Is this milk pasteurized?"

"I guess so. I bought the cow from a preacher."

COLOR IT NEW WITH "DIAMOND DYES"

Just Dip to Tint or Boil to Dye.

Each 15-cent package contains directions so simple any woman can tint soft, delicate shades or dye rich, permanent colors in lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings—everything!

Buy Diamond Dyes—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.

The ideal husband exists chiefly in the minds of women who have never had one.

Never Grows Older

He feels like a boy at forty. Whenever constipation troubled him Beecham's Pills brought certain relief.

"For over a year I suffered from headaches and constipation, other remedies having failed. I told someone at my club, who suggested that I try Beecham's Pills. I tried them, and they relieved me. I'm only forty and I feel like a boy again after taking Beecham's Pills.

"Anyone with common sense should take Beecham's Pills for constipation, biliousness and sick headache."

Mr. J. C., Yonkers, N. Y.

This man gives good advice. Follow it, and see how quickly digestive disorders, constipation and biliousness are overcome by Beecham's Pills.

COULD NOT EVEN SLEEP

Mrs. Michael Was So Nervous

Mrs. Emma V. Michael

"All the thanks, praise and gratitude for my splendid health belong to Tanlac," recently declared Mrs. Emma V. Michael, 2102 Stratmore Ave., Fort Wayne, Ind.

"And," she said, "I freely give my testimonial to advertise to everybody that when I began taking Tanlac I couldn't sleep at night, had no appetite at all and was so weak I could hardly do my work.

"I was completely run-down; suffering from indigestion, headaches, dizzy spells, bad nerves, heart palpitation and pains across my back. I was pale, depressed and downcast. But since taking Tanlac I eat and sleep like a child and feel fine in every way. I believe Tanlac will help anyone troubled as I was."

Tanlac is for sale by all good druggists. Accept no substitute. Over 40 million bottles sold.

Tanlac Vegetable Pills for constipation, made and recommended by the manufacturers of Tanlac.

Loosen Up That Cold With Musterole

Have Musterole handy when a cold starts. It has all of the advantages of grandmother's mustard plaster WITHOUT the blister. Apply it with the fingers. You feel a warm tingle as the healing ointment penetrates the pores, then a soothing, cooling sensation and quick relief.

Made of pure oil of mustard and other simple ingredients, Musterole is recommended by many nurses and doctors. Try Musterole for bronchitis, sore throat, stiff neck, pleurisy, rheumatism, lumbago, croup, asthma, neuralgia, congestion, pains and aches of the back or joints, sore muscles, sprains, bruises, chilblains, frosted feet, colds of the chest. It may prevent pneumonia and "flu."

Jars & Tubes

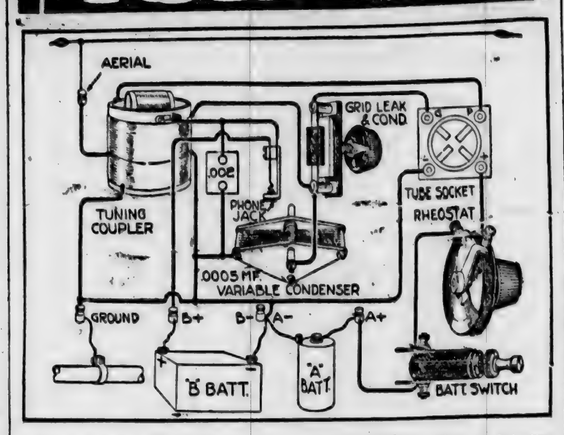
RADIO



Pictorial Diagram of Three-Circuit Regenerative Receiver That Is Selective and Has Wonderful Range. Three-Circuit Tuner Used.

By CARLTON E. BUTLER,
(Member, American Institute of Electrical Engineers and Institute of Radio Engineers.)

Superheterodynes and tuned radio frequency receivers are the eventual goal of most set builders in radio. For the beginner, the usual start should be with a one-tube set, amplification coming later. One of the encouraging things about radio for the novice is that the ultimate set may be built on the installment plan, yet give entertainment from the moment that the initial unit with a single tube is assembled.

In the realm of one-tube sets, the foundation for the big set later on, there are many freak or trick circuits, each having a following of boosters. The little points of difference between the majority of these circuits usually rests in the manner in which regeneration is secured. The best circuits use regeneration, without which it is next to impossible to tune through interference, or bring in distant stations.

Regenerative Feedback.

The ultra-audion circuits, known under a variety of names and very popular a few years ago, secure regeneration by the direct method, but as this is used with single circuit receivers as a rule, it is not selective enough for present-day needs. The variometer in the plate circuit method is good, but requires additional space, and the purchase of additional apparatus. The capacity feedback method is good but also requires an additional instrument.

The tickler method of regeneration is very popular and can be secured by the use of a small rotating coil inside of the tuning inductance. The three circuit tuners, of which there are a number of popular makes on the market, use this form of securing a regenerative feedback. This type of receiver is by far the easiest and cheapest to build, when selectivity and DX reception are taken into consideration.

The three-circuit couplers make use of an aperiodic or untuned primary. The secondary winding is without taps, being tuned by a variable condenser. The rotor, or tickler winding, is connected in the plate circuit of the detector tube. Two controls tune the circuit, making it convenient for the beginner to obtain results.

Apparatus Needed.

To construct a set of this kind, the following apparatus will be needed:

1 3-circuit tuner of any good make.
1 23-plate .005 mfd. variable condenser of good low loss construction.
1 centralab rheostat (6 ohm for the WD 11, WD 12, UV 200 and C 300 type of tubes, 30 ohm for the UV 201-A and C 301-A, UV 199 and C 299 types.
1 fixed mica condenser of .00025 mfd. capacity.
1 centralab variable grid leak.
1 centralab filament cut-off switch.
1 detector tube (WD 11 or WD 12).
1 22½-volt "B" battery. "A" battery for tube to be used (1½ volt for WD 11 or WD 12).
Wire, binding posts, headphones, etc.

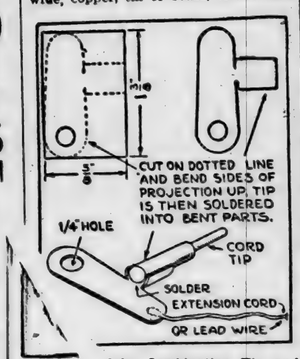
The receiver will take up but little room and can easily be assembled on a baseboard 6 by 12 by ¾ inches. After the set is working satisfactorily it may be assembled on a bakelite or hard rubber panel and inserted in a cabinet. As it is usually desirable to add further amplification, it is best to purchase a cabinet and panel that will accommodate additional appartus needed.

The value of the grid leak required depends on the individual tube used for a detector. This value can be secured best through the use of a variable grid leak which will also be of considerable assistance in tuning.

Remarkable long-distance records have been made with receivers using this circuit, and it can conservatively be called the best one-tube receiver for the beginner to try.

Tip and Lug Combined for Extension Cords

A combination tip and binding post lug for use on loud speaker extension cords, battery wires, etc., can be easily made in the following fashion. A piece of metal about one and one-eighth inches long and five-eighth inches wide, copper, tin or brass, is cut with



How to Make Combination Tip and Binding Post Lug.

shears as shown in the illustration. Cut on dotted line, fold sides together, and then solder folded tin.—Radio Digest.

Use Electric Bulb for Testing Batteries

A very simple method of determining whether an "A," "B" or "C" battery from six volts up, is not below the rated voltage of operation, is to take an ordinary electric bulb of 40 watts and hold the contact base on one terminal, connect a short wire to the opposite terminal and touch this wire to the ferrule of the bulb. If the bulb does not light your battery is discharged or useless.

The 22½-volt "B" battery should give a very healthy glow to the lamp when operating at 20 volts or more. If under this test the lamp shows a dim light the 22½-volt "B" battery has less than 20 volts. This can readily be adopted in any case in which a voltmeter is not to be had.

Some Good Suggestions That Will Help Fans

Because of the shrinkage, all guys should be made of rope.

Every connection of an aerial will help to increase the volume, if soldered.

A dry-cell battery loses some of its capacity while it is standing unused on the shelf or between periods of service.

It is better to connect the ground wire to the water pipe before it reaches the water meter, if possible, for there is considerable resistance in the meters.

A crystal can be securely held in its cup by mixing a small quantity of mercury or quicksilver with a piece of ordinary tinfoil to the consistency of a thick paste.

A squealing set will annoy the neighbors' reception. Find the point on the dial where this oscillation starts on a given signal, and then always keep it below this point.

As earphones must be handled carefully, why not put a small screw eye or hook on the side of the radio table so you can hang up the phones when through with them for the night?

There is ample current capacity in dry cell batteries to produce a fatal shock, but ordinarily the voltage is not sufficient to force this fatal shock through the body.

A good ground and aerial are the basis on which an efficient set can be installed.

When a loop won't reach the longer wavelengths insert a 25 or 50-turn honeycomb coil in series with the loop. When it won't reach the low, or short, wavelengths use a variable condenser in series with the loop.

If you want a "C" battery in the audio unit, connect the F posts on the transformers, run the negative C to this wire and hook the positive side of the C to the negative A battery line.

A layer or so of thread wound around the telephone cord where it is likely to bring out will stiffen it and keep the inside flexible conductor from breaking.

Wavelengths of radio communication are measured in meters, meaning the number of meters from crest to crest of the waves sent out from the transmitter. One meter equals 3.937 inches.

HOW TO KEEP WELL

DR. FREDERICK R. GREEN
Editor of "HEALTH"

(©, 1925, Western Newspaper Union.)

OPEN-AIR SCHOOLS

DO YOU remember when you were in school how hard it was to keep awake in the afternoon? The crowded schoolroom was overheated with the hot air from the furnace, or the schoolroom stove. The teacher was tired and irritable. The children were drowsy and stupid. Everybody watched the clock, whose hands seemed to drag as slowly as the children's brains. And when the closing hour finally came, how eagerly you snatched your hat, books and lunch-basket and rushed into the outdoors and the fresh air. And how soon you forgot your sleepiness. By the time you were half-way home, your lungs were full of fresh air, your blood was tingling through your body, and you were so full of pep that you had to use some of it up playing leapfrog or chasing the other boys.

As happy as a boy let out of school, was supposed to mean that the boy was happy to get away from school, whereas in many cases it merely meant that the boy was happy to get out of the overheated, illy ventilated schoolroom.

Dr. Hubert Work, eminent physician and secretary of the interior, said in a recent address, that there were only three absolutely essential needs for man. These are food, shelter and sleep. Everything else is luxury. He might have added that most of us eat more than we need and stay in our shelters more than is good for us.

It wasn't until we learned, only about twenty-five years ago, that tuberculosis is a house disease that men began to realize that civilized man, in becoming a house-dwelling animal, was paying an awful price for too much shelter. Animal trainers and keepers noticed that monkeys kept indoors soon died of consumption. So they moved them outdoors and they stayed well and strong. Then someone said, "If outdoor life is good for tubercular monkeys, why isn't it good for tubercular children?" So about twenty years ago the Elizabeth McCormick foundation started one of the first outdoor schools for tubercular children. The children well wrapped up, stayed outdoors all day, and they also stayed awake while the children indoors got sleepy.

Today fresh-air schools are found everywhere, not only for consumptive children but for those suffering from other diseases.

The English board of education, in its 1924 report, says that open-air schools are especially suitable for children suffering from rickets, anemia and malnutrition; children living in the same house with consumptives; children with tubercular glands of the neck; children recovering from diseases such as pneumonia and measles or from operations; nervous and high-strung children and crippled children.

There is plenty of fresh air, especially in small towns and country districts, and there is no reason why every school child should not have all it needs.

DOGS AS CARRIERS OF DISEASE

THE dog is not only the best but also the closest friend man has among the animals. In many cases he lives in the same house, even in the same room as his owner. He may sleep on the same bed, or at least on the same chairs and cushions which his master uses. Often he eats from the same plate. The family pet him, he licks their hands or he may lick the baby's face. He runs outdoors, plays with other dogs, rolls in rubbish heaps and comes back into the house without even wiping his feet. Certainly if dogs have any contagious diseases or if they are capable of carrying any diseases, there is every opportunity for the members of the household to acquire them.

We know that dogs do have a number of diseases that can afflict human beings. Cases of tuberculosis in dogs have been reported, although the dog is not as susceptible to this disease as are cattle. Even if the dog does not have the disease himself he may easily carry it on his paws or hair. In the same way diphtheria, scarlet fever and measles may also be carried. It is claimed by some writers that the dog may carry smallpox, but as we know nothing whatever about how this disease is caused or transmitted, this is little more than a guess.

Every one knows that rabies or hydrophobia is largely a dog disease, although cats, horses, wolves and skunks also have it.

Probably the most common dog disease is worms. So common is this condition in dogs that it is safe to say that every dog has some kind of worms. Some of these are never found in man.

None of these parasites is serious, although they may be annoying. Fortunately the most serious one is also the rarest. This is the echinococcus, which forms large sacs in the body and may cause death. Practically all such cases come from infection by dogs.

Train your dogs to eat off their own plates and not to lick your face and hands. In all cases of contagious diseases keep them out of the sick room.

Lesson for November 29

PAUL BEFORE AGRIPPA

LESSON TEXT—Acts 25:1-26:32.
GOLDEN TEXT—"I was not disobedient unto the heavenly vision."—Acts 26:19.
PRIMARY TOPIC—Paul Tells Why He Obeyed Jesus.
JUNIOR TOPIC—Paul Tells a King About Jesus.
INTERMEDIATE AND SENIOR TOPIC—Obedience to the Heavenly Vision.
YOUNG PEOPLE AND ADULT TOPIC—Paul's Defense of His Mission.

More than two years had elapsed since Paul had been tried before Felix, during which time Jewish hatred for him had not abated. As soon as Festus, the new governor, went to Jerusalem he was besieged with accusations against Paul. His accusers desired that he be brought to Jerusalem for trial, intending to lie in wait and kill him on the way. Festus refused their request, but agreed to give them an opportunity to accuse Paul if they would go down to Caesarea. They were unable to prove anything against him. Festus, willing to please the Jews, proposed to send him to Jerusalem for trial. Paul rebuked Festus for this, declaring that he knew very well that he was innocent. Seeing that it was impossible to get justice before Festus, Paul made use of his right as a Roman citizen and appealed to Caesar. This surprised Festus. His failure to release an innocent man placed him in an awkward position for he could give no explanation as to why an innocent man should go to Rome for trial.

I. Paul Before the King (25:13-27).

The occasion of his appearing before Agrippa was the visit of Agrippa and Bernice to Festus. Upon their arrival they expressed a desire to hear Paul, whereupon Festus told them of his perplexity. So it was arranged that Paul be brought before them for examination. The gospel should be preached to all regardless of wealth or station in life.

II. Paul's Defense Before Agrippa (26:1-27).

1. The Introduction (vv. 1-3).

He expressed his delight that he now could speak and tell his case to one who was able to follow his line of argument, for Agrippa was an expert in questions concerning the Jews; but most of all he was now happy in witnessing to him of the Savior, and perhaps leading him into the light of God.

2. His Manner of Life (vv. 4-12).

His he showed had been in strictest accord with the most rigid sect of Jews. He possessed the same hope, i. e., that of a coming Deliverer, and reminded them of the fact that formerly he was most bitterly opposed to Christ as his zeal would prove.

3. His Supernatural Conversion (vv. 13-15).

Jesus Christ appeared to him on the way to Damascus and revealed Himself to him.

4. Jesus Christ Commissioned Him for His Work (vv. 16-18).

He was sent unto the Gentiles:

(1) To open their eyes so awfully blinded.

(2) To perform the blessed work of turning them from darkness to light.

(3) To turn them from the power of satan unto God.

(4) That they might receive forgiveness of sins.

(5) And that they might obtain an inheritance among the saints.

5. His Consecration (vv. 19-23).

As soon as he received his commission, he obeyed. Every man should instantly obey the call of God and devote his life to carrying forward the work entrusted to him. The vigorous prosecution of his work brought him into conflict with the Jews, for which they sought to kill him.

6. The Interruption by Festus (v. 24).

Seeing how thoroughly in earnest Paul was, Festus attempted to account for it by calling him a crank, attributing it to the ravings of an unbalanced mind.

7. Paul's Appeal to Agrippa (vv. 25-27).

Still maintaining his courage, he appealed to Agrippa's knowledge of the work of Jesus and of the prophets, for they have an intimate connection.

III. Agrippa Almost Persuaded (vv. 28-32).

Whether Agrippa's answer was a contemptuous sneer or not, it is quite evident that his soul was wrought upon. He saw the claim of Christ upon him but was unwilling to yield. Sad, indeed, that a man should be so near to eternal life, and yet lost! Paul took Agrippa seriously. His heart longed that Agrippa, and all concerned, might accept Christ and be saved.

For Religious Peace

It would make greatly for religious peace in this country if we all learned to rejoice when we hear of others finding God in any way, and ceased to insist that our own way is the best.—A. Herbert Gray.

Dignity of Manners

A certain dignity of manners is absolutely necessary to make even the most valuable character either respectable or respected in the world.—Lord Chesterfield.

Club Work News

From Concord Boys and Girls

The Corn and Potato Club exhibit was a fair degree of success.

Nine samples of potatoes were exhibited by Club Boys and rating was made on exhibit 25% yield 25%, cost 25% and story of record 25%.

The County Agent was the judge Geobel Goodwin won first with 88%; Bernard Sechler won second with 87%; Edward Kimes third with 80%; Dale Walters third with 86%.

The highest yield was made by Dale Walters, 74 bushel from ¼ acre. Geobel Goodwin and Bernard Sechler each 65 bushel. The potatoes were of good quality.

The corn had eleven samples, both white and yellow.

The boys found it extremely difficult to pick out ten ears suitable for show purposes. The weather has been extremely hard on corn. The winners in corn were: Jerry Douglas, first, white; Goebel Goodwin, second, white. Georga Simanton, first, yellow; Robert Johnson, second, yellow; Bruce Koch, third, yellow

Final Placing: Jerry Douglas, first over all winner of the trip to Chicago.

The winner of first place will be awarded for their labor a trip to the Club Congress at Chicago at the International Live Stock Show.

Three trips were given this year by the following:

The Bank, Potato, Goebel Goodwin.

Nathan Grain Co., Corn, Jerry Douglas.

Home-Coming Committee, Pig, Cecil Likes

Mrs. Kate Leighty contributed $10.

These three boys will leave the 29th day of November for Chicago Mr Stinson, County Agent, will have charge of them These are the only DeKalb boys going this year.

The Club Boys wish to thank the donators for these trips and donations and will give a good account when they return.

MICKIE SAYS—

Accounts Must Be Settled Soon

In closing the Henry Beams estate, notice is hereby given all persons indebted to same, to call and make satisfactory settlement by cash or note by December 1, 1925.

St. JOE FILLING STATION
KEESLER & YEISER

The Thanksgiving Goose by Christopher G. Hazard

EPHRAIM STRUT wrote "the Puritan tradition must be preserved in America," as he labored on his Thanksgiving day oration. "Our country has indeed become a new world, so cosmopolitan' is its character, and our task is the Americanization of America. Personal integrity and honest work are the essential elements of our national welfare," he continued.

These laudable and well-expressed sentiments so pleased their author that he was reading them the third time when his boy Samuel, surnamed the judge on account of his argumentativeness, and his girl Louise made evident the fact of their disputation under the library window. It appeared that the discussion concerned the material for the approaching feast and that the question was that of turkey or goose, arrangements having been made for the traditional bird, but a relative having signified his intention of bestowing as an alternative the mate of a gander. "Father thinks we couldn't be thankful for anything but a turkey. I heard him say that it is as much the emblem of the day as the eagle is of our country. He said that last Thanksgivin'," said the judge. "Well," replied his sister, "it doesn't make so very much difference to me what it is as long as there is enough of it and plenty of stuffin', but I think mother ought to settle it, she's the cook." "We'll have a goose anyhow, if you're there," rejoined the ruffled Samuel, but he assented to a change of venue and to bringing the case before the lady of the house, and the court was adjourned to the kitchen.

Mrs. Strut being absent, however, the opinion of Dinah, who was agitating the various constituents of pumpkin and mince pies, was desired. With no result from this busy official but a continuation of the song that she was singing:

Grasshopper sittin' on a switcheator vine, a switcheator vine, a switcheator vine,
Turkey gobbler comed up behime and yanked him off de switcheator vine,

The children were left to the conclusion that turkey had won the suit, until the returning mistress reversed the decision, replying to Samuel's "But I think turkey is so dear" with

Upon the Top of the Machine an American Flag.

the remark "I think it, too." So that they all marched to the goose step when the day came round.

The result rather worried Mr. Strut, however. Combined with the facts that his address had seemingly failed to enrapture his audience, and that it had given a rather hollow sound even to himself, and the further fact that his concealed disappointment over the absence of his favorite bird had induced a fit of indigestion, was an increasing consciousness that he was himself a member of the talkers' brigade rather than a soldier in the army of toilers at work upon the foundations of a better future. Although unpunctured by age and disability, he was off the road of actual affairs, being of that leisure class that, living upon accumulated competence, spends its time in discussion rather than percussion, out of contact with the hard conditions of the real service of progress.

In the endeavor to walk off his chagrin and dissatisfaction, Mr. Strut came upon a group of Italian laborers and was struck by their hearty and joyous dealing with the question of social progress as they toiled in their road making; and a little later he drew near to another force of aliens who were at work upon the foundations of a new building. These last had taken of sand and rocks and cement and poured the mass into a concrete mixer, placing upon the top of the machine an American flag. These concrete illustrations of true Americanism so affected the observer that he might have been heard as he told himself that there was more progress going on than he was actually concerned in, that sand, cement and pieces of Plymouth Rock were still going into the racial material of New America, and that to build American institutions under the American flag was also his business. He even said to himself in his sense of usefulness and humiliation that perhaps he, himself, had been a Thanksgiving goose.

Mr. and Mrs. T. C. Blanchard and children were guests of W. H. Northrup and wife from Tuesday until Thursday. The Blanchards are from South Haven, Michigan, and are enroute to Jacksonville, Florida. Will Hamilton, wife and children and Mrs. Lela Northrup and son, were Wednesday guests in the Northrup home also.

It is now Postmaster Baker. Tuesday, December 1st, Meade Baker became the new official. Mr. Baker, at the time of receiving the appointment, asked for a detention of time, but the notice came back December 1st. Mrs. Bowman and Harcourt Miser will continue their services until the holiday rush is over, thus giving Mr. Baker more time for detail work and getting into the routine of the office.

C. A. Cochran and wife were Thanksgiving guests of their daughter, Mrs. Wyllis Wilcox and family of Fort Wayne.

Howard Williams and wife and Messrs Strait and Lester Pratt of Fort Wayne spent a few days the past week in the W. E. Henley home.

Mrs. C. A. Towsley of Elkhart was a recent guest of Mr. and Mrs. Wm. Pepple. Thursday they were all guests of Dr. and Mrs. Dorsey Hines at Auburn.

J. E. Folts and wife spent from Friday until Sunday with their parents, Mrs Margaret Folts and Mr and Mrs. Joseph Cox near Continental, Ohio.

Mr. and Mrs. W. E. Turritin of Bowling Green, Ohio, Mr and Mrs. John Crowl of Hicksville and Mrs. Chas. Jordan and son, Dickie of Garrett, were Thanksgiving Day guests in the G. M. Barney home. Sunday afternoon Dr. and Mrs. Shook were callers.

DON'T FAIL to hear the Lecture and Musical Entertainment Tuesday night at Christian Church. Mrs Rosemary Farmer, soloist, lecture by Dr. Trumbull, "Taking the Moan Out of Matrimo(a)ny," Admission 25 and 10 cents.

B. A. Rhoads of Angola, was in St. Joe, Monday.

Milton Haifley is at Detroit and has secured steady work.

Harry White was hunting Tuesday and shot an owl measuring 4 feet and 9 inches in the spread of its wings.

Paul Hadsell, who is attending State Normal at Muncie, spent the Thanksgiving vacation here with his parents.

Donald Kinsey left Sunday for Detroit, Michigan, for several days visit with his sister, Mrs. Albert Wade and family.

Lloyd Miller and wife returned home to Detroit Sunday after spending their Thanksgiving vacation here guests of the latter's parents, Mr. and Mrs. M. H. Andress.

Mr. and Mrs. Geo. Kinsey and daughters, Ines and Juanita, Mrs. Velma Mohney and Mrs. Catharine Bowser, were Thanksgiving guests of Harry Kinsey and family at Fremont, Indiana.

The Annual Hunt of the Fish and Game Club will be held December 21-26 inclusive. Sides will be chosen Friday evening, December 4th. If you want to take part in the hunt come to the town hall or send in your name.

Morris Curie, who is working in Chicago, came Tuesday to spend the remainder of the week with his family here.

During the past week a shipment of black bass was received from the government hatchery at Dubuque, Iowa, by the local Fish and Game Club and were placed in the St. Joe river. In the last two years several thousand bass and pickerel have been put in the river through the efforts of the club.

GIFTS FOR ALL

EVERY member of the family, and friends as well, may be remembered with gifts selected from this store, for the variety of choice afforded by the ample display of items suited to giving enables every need to be supplied economically and well.

Before starting your list you should plan to come here and see the many suggestions offered. It will aid you in making your list and save you time and money. Kinsey's store has a reputation of always meeting the buyers needs with substantial merchandise, and this year is no different. New goods are arriving.

Given Away

Free

Crosley 3-Tube RADIO

How We are Going to Do It:

Beginning last Saturday morning we begin to hand out tickets. For every 50c cash purchase, a ticket will be given, the stub of which is to be deposited in our store. Book accounts paid will be given a ticket for each $5.00. We will continue giving tickets until Saturday, December 19th. when the Radio will be given away.

THE FUR CANOE

SYNOPSIS.—With David, half-breed guide, Brent Steele, of the American Museum of Natural History, is traveling in northern Canada. By a stream he hears Denise, daughter of Col. Hilaire St. Onge, factor at Wailing River, play the violin superbly. He introduces himself and accepts an invitation to make the post his home during his stay. He finds the factor worried and mystified. The "log chateau" is a real home.

CHAPTER I—Continued

—3—

"But they missed you!" laughed the Frenchman. "Yes! Our inspector, Monsieur Lascelles, in his desire to get fur ignores the conditions here entirely."

At the mention of the name Lascelles, Steele sensed a swift change in Denise St. Onge. His curious eyes caught a faint color in the girl's temples as she avoided his glance. In a moment she had control of herself but he wondered if this then was the cause of her heartache.

"My position is most difficult, you see," continued St. Onge. "Laflamme controls the upper country with his whisky. We get considerable Little Current and Drowning River trade, but Michel and I have to meet them with our goods over at Portage Lake. There are many who fear to come to the House of the Windigo, on the Spirit rapids, as they call it."

"Strange your people at Albany fail to realize this!"

"They will realize it now—this summer, for we have come to an impasse, as we say in French."

"How is that, sir?"

"Why, my Indians, except Michel, who is a hard-headed Iroquois from the Nipissing and laughs at this devil talk, will not now go into the bush alone. They are always seeing and hearing things. Our hunter, Tete-Boule, refuses to leave the post since he found some prodigious tracks in the muskeg and heard screaming at night. Monsieur, our people are panic-stricken." St. Onge gravely shook his head. "And now, as you say in English, the climax is capped."

Steele leaned toward his host, keenly curious of what was coming, as St. Onge finished dramatically:

"Our fur canoe, which left here early in July, with four men, never reached—Albany!"

"Never reached—Albany?" repeated the astonished listener. "They sent you word, by canoe?"

"Yes, they sent a relief party upriver to find my men who were long overdue. They feared they had lost their boat in the Albany rapids and were following the shore."

"And this search party found nothing?"

"Nothing!" St. Onge lifted shoulders and hands in eloquent gesture. "Men, fur, canoe; gone, wiped out, swallowed up!"

"But there must have been something washed up alongshore," vehemently protested Steele, "the shell of the canoe—small stuff—and a paddle always comes ashore."

"Nothing!" repeated the factor. "They searched the Albany and then the lower Wailing, for they had to pole and track most of the way as you know. Above the Devil's mile they found the first camp of our people, but below, not a body, or paddle, or scrap of canoe—nothing!"

To Steele this was incredible—this mysterious tragedy of the fur canoe. He wished he had known what had happened on the Wailing but a few weeks before, when he and David fought day by day its stiff current on the way to the post.

"It's simply unbelievable, colonel," he vigorously objected. "A swamped canoe, broken up in a big rapid, is bound to throw something on the beach below. We noticed nothing, but we were not on the lookout."

That there was more to this story Steele was convinced; but what personal bearing could it have on Denise St. Onge?

"Yet those are the facts, monsieur, and our people are mad with fear. Thank Heaven! Michel had a bad ankle and was not with the boat. He tells the Indians that the canoe and bodies are held in the big eddy, but I doubt it."

Steele stared at the factor, unable to accept the sole inference to be drawn from his host's remark. St. Onge was surely facetious.

"That leaves us the Windigo theory, colonel," he laughed, but to his surprise his pleasantry was met by so grave a face that for an instant Steele was in doubt of the mental balance of the Frenchman, harassed by the misfortunes of the summer. The dark eyes of Denise St. Onge, fixed on the window, were cryptic. Then the factor smiled inscrutably as he said:

"Monsieur, I am a furtrader on a river believed to be haunted. It would be a policy most ruinous for me to admit a belief in the supernatural—in this Indian tradition. Is it not so? But," and the speaker glanced at his daughter, "as well believe it the Windigo; what other solution is left? Men and canoe disappear—like that!" and he snapped his fingers.

It was clear that St. Onge was dissembling—for some reason he was loath to give his guest the whole story. But why? What was there in this tragedy of fear and death that a stranger should not know? Why, since St. Onge had so frankly revealed the crisis he faced at Wailing River—the threatened loss of the trade and abandonment of the post, due to the superstition of the Indians—did he withhold his own solution of the riddle? Certainly there was more, much more, in this strange situation which Steele had accidentally stumbled upon, than the loss of the fur canoe. The furtive glances of father and daughter at Steele's reference to Laflamme, the free-trader; her evident embarrassment at the mention of Lascelles, inspector at Albany; and above all, her mood of despair at the rapids, voiced so poignantly by her violin; these could bear no relation to the tragedy of the fur canoe—to the panic of the Indians at the ill-starred post.

"Were your men trustworthy?" he suddenly asked.

"Absolutely. They could not desert and hope to dispose of the fur. We and the Hudson's Bay people have an agreement. On the Albany at that time they would surely have run into the Fort Hope York boats and the Martin's Falls and Henley House brigades. Besides, two of them left young wives here."

"Still, I'm sure Michel is wrong about the eddy," ventured Steele, hoping to draw out the factor. "The Big Pelican whirlpool, below Lac Seul, the worst I've ever seen, always throws out the stuff sucked into it in the course of a few hours."

St. Onge lifted his heavy eyebrows in a nod of assent. "Oh, Michel is in doubt about it also, but that is what he tells the Indians. A man of parts is Michel, monsieur. He is more than my right hand here."

"Yes, he looks like a good man. Did you notice David, colonel?" Steele's face lighted as he mentioned his swarthy comrade.

"He seemed most intelligent," replied St. Onge, "and looks as if he could pack four hundred over a portage, if he wished.

"He can, colonel." Then Steele gambled with his host's curiosity. "What worries me is how to keep him from wringing Laflamme's neck when we reach Ogoke—and, aside from getting supplies, we wish to stop at Ogoke, Colonel St. Onge."

The factor was palpably interested. His narrowed eyes seemed to search those of his guest in an endeavor to read his thoughts. Then, leaning forward, elbows on table, he asked tensely:

"Why?"

"I am sorry, but that is David's secret."

"Oh, I see! It is right, then, that you do not tell. But I was curious, monsieur, for today when he reached here, he asked at once how many days' travel it was to Ogoke lake."

That St. Onge should be vitally interested in the man, who, by the use of whisky, was winning the fur trade of the whole headwater country of the Wailing, was natural, but the observant Steele sensed more to the story than mere trade rivalry, in the attitude of the factor. However, he dropped the subject and returned to the lost canoe.

"It's by far the strangest case I have heard of—four men in a loaded canoe, wiped out without leaving a scrap of birchbark or a sliver of spruce as a clue, and a wonderful opportunity for the study of this Windigo superstition at first hand."

"Eighteen thousand dollars in fur!" sighed the factor, whose face was drawn and old, as they left the table.

CHAPTER II

"Will you come with me to the trade-house, monsieur? For a time my daughter will be busy with the dishes. Then we shall have some music, Denise?"

"If you wish," and addressing Steele she added suggestively: "It will be gay music tonight, monsieur, I promise you—in honor of your arrival at the 'House of the Windigo.'"

"But I like your sad music, mademoiselle," he said, "and I am clever at washing dishes, if I could be of service."

There was challenge in her black eyes as she countered: "Ah, monsieur, but you are more clever, I fear, at concealing your thoughts."

As he walked with the factor to the trade-house he wondered precisely to what she had alluded.

St. Onge was writing a lengthy report of the situation at Wailing River to his chief at Albany, three hundred miles downstream, so Steele joined David and Michel seated beside the post canoes on the beach, smoking after-supper pipes. In front of the Indian shacks, a group of shawled women talked in hushed voices. Near them, three men, squatted on their heels, Indian fashion, conversed, heads together. No shrill shouts broke the quiet. Even the play of the dusky children seemed suppressed. Truly, thought Steele, St. Onge had not exaggerated. The air hung heavy with fear. The Indians were in a panic. Dread of the fabled Windigo had wrought its spell. At this rate it would not be long before the foxes would bark in the clearing of the abandoned post—before padded feet would roam at will in what was now a home. And the girl up there—what would become of her?

"Well, David, has Michel told you of the fur canoe?" demanded Steele.

David's broad face wrinkled in a grin. Taking his pipe from his mouth he spat deliberately before he answered with another question.

"How long we stop here?"

"I don't know. Why?" Steele was interested.

"Wal, Michel an' Daveed tak to drop down to de beeg strong water. We strike back in seven-eight sleep, may be."

"What's your idea? It's not just to make another search on a mere chance of finding something. There's something else cooking under that black hat of yours."

But David was noncommittal. "We tak a look at de las' camp fur canoe made, an' shore below, for little piece.'

Steele was secretly delighted at the excuse this expedition of David's would give him for prolonging indefinitely his stay at Wailing River. As a student of Indian mythology and worship of the supernatural, the probing of this mystery—the study of its effect on the post Indians—demanded his best efforts. It was a rare opportunity for an ethnologist, a student of folklore, to gather data at first hand. But over and beyond that was the riddle of this girl whose hands of an artist were now busy with the dishes up there in the factor's house.

"But what do you expect to find Michel? There have been two canoes over the ground. The Windigo have swallowed canoe, fur and men."

The small eyes of the Indian snapped. "Daveed and Michel nevaire see M'sieu Windigo. We tak to hav' look at heem, Tete-Boule," with a gesture toward the three men grouped in front of the shacks, "he hear Windigo one, two, many tam. He fin' track een muskeg—ver' beeg. But he hav' fear to tak Michel to de track. Maybe down on de beeg rapids, Daveed an' Michel shake han' wid de Windigo. Maybe we fin' he is hongree—den we feed heem—some lead." And the smile faded, while the swart features of the Indian set stiff with hate.

"Ah, ha!" thought Steele. "These two old foxes have got something in their heads."

But knowing his people, he did not press them for an explanation. Later alone with David, he would be told. So he filled his pipe and sat down.

"Michel," he asked, "why did the Revillon Freres build this place at the head of these rapids instead of up at Ogoke lake where they could buck Laflamme, face to face, for the trade of the whole country?"

For a space Michel smoked, ignoring the question; then he grunted through the stem of his pipe:

"You see M'sieu Lascelles at Albance?"

"No, I stopped with the Hudson's Bay people. Why?"

"Wal, eef you see M'sieu Lascelles maybe you know why," was the reply.

"Where were you before you came here?" asked Steele.

"At Albanee."

"You know him, then. But he can't be a good fur man to build here—in the bad-lands, at these Spirit rapids of the Ojibways."

"De man who build dees pos' die. Me'sieu Lascelles ees no fool; he not keep eet for fur—he keep eet—for 'noder reason." After which startling statement Michel became a sphinx to Steele's further questioning.

More than ever mystified by what he had heard, he left the men on the river shore, and rejoined his host.

In the warm candle light of the factor's quarters Steele soon lost himself in the playing of Denise St. Onge. There was no trace of the troubled eyes, of the reserve of the girl who had sat mute through the evening meal, listening to the talk of the men, in the gay creature who now conjured with her violin mad dances of the Polish and Hungarian peasants, love songs of Italy, French and German opera. Here was rare temperament, technique, training—all wasted in this wilderness. It was monstrous—inexplicable! What could have brought them here?"

"It is superb, mademoiselle—your playing," he cried impulsively, "you have appeared professionally, of course, in France?"

The culmination of the missing fur canoe is serious for St. Onge. What a mystery!

(TO BE CONTINUED.)

Jenny Lind, Genial Friend

Jenny Lind came again and yet again to the Taylors' congenial homestead; her kindness, "sensitive, capricious and restless as it is, her humanities and impetuosities" won the affections of mother and boy alike, says the Christian Science Monitor. "Great impulses, a humble Christian heart watching and praying to bring her into subjection of God's will, she is a great addition to my life," wrote Alice Taylor. . . . Nor was it to him (James Spedding) only that the great cantatrice of the world's worship brought her message of beauty and joy. In many a letter of that date we catch glimpses of her shining presence in that quiet home.

She Didn't Get It

"You kissed me last night and mother didn't like it."

"How can she dislike what she didn't sample?"

IMPROVED UNIFORM INTERNATIONAL

Sunday School Lesson

(©, 1925, Western Newspaper Union.)

Lesson for December 6

PAUL'S VOYAGE AND SHIPWRECK

LESSON TEXT—Acts 27:1-44.
GOLDEN TEXT—"Be of good cheer; it is I; be not afraid."—Matt. 14:27.
PRIMARY TOPIC—Paul in a Storm at Sea.
JUNIOR TOPIC—The Story of a Shipwreck.
INTERMEDIATE AND SENIOR TOPIC—Paul's Leadership.
YOUNG PEOPLE AND ADULT TOPIC—The Christian Overcoming Adverse Circumstances.

I. **The Voyage** (vv. 1-20).

1. The Ship (vv. 1-6).

It was a vessel of Alexandria sailing from Myra to Italy.

2. The Company (vv. 1-2).

Two of Paul's friends, Aristarchus and Luke were permitted to go with him. Besides these three there were two hundred and seventy-three in the ship (v. 37).

3. The Storm (vv. 7-20).

The ship made little headway on account of unfavorable winds. Paul advised that they winter in Fair Havens (vv. 9-12), but his advice was unheeded. The gentle south wind deceived them so they loosed from Crete only to be overtaken by the tempestuous wind called Euroclydon. They did everything possible to save the ship; they took up the boat which was towed behind; they bound great cables around the ship to strengthen it for the storm; they lightened the ship by bringing down from the masts and rigging everything that was superfluous, and finally the cargo and tackling were thrown overboard. All this seemed to be of no avail and all hope of being saved was removed. It seemed that wicked men and material forces were combined to prevent the great apostle from reaching Rome. However, these very experiences were overruled by God to bring good cheer and salvation to many on the way. We should remember that tempestuous winds as well as soft breezes await God's faithful ones. The presence of storm does not prove that we are going the wrong way.

II. **Paul's Serene Faith** (vv. 21-26).

To a man who does not know God, upon the failure of the sun and stars to shine for many days, the fading of all hope is natural; but to the man of faith, hope still burns brightly. God is just as near to His own in the midst of a stormy sea as in their quiet homes. Observe Paul's behavior:

1. His Rebuke for Their Failure to Heed His Advice at Fair Havens (v. 21). This was not a mere taunt, but a reference to the wisdom of his former advice, urging them to give him a more respectful hearing.

2. Bids Them Be of Good Cheer (v. 22).

He inspired them with hope.

3. He Promises Them Safety (v. 22).

Though the ship go to pieces, every man's life should be saved.

4. The Source of His Information (vv. 23-24).

The angel of God had revealed it unto him.

5. The Reason of Paul's Calm Faith (v. 23).

"Whose I am, and whom I serve." God can and will take care of His property (John 10:28-29). Those who have been redeemed by the blood of Jesus are not their own, but God's.

III. **The Ship's Crew All Safe on Land** (vv. 27-44).

This was exactly as the Lord had said. We can rest assured that all God has spoken will come to pass even though there be a broken ship, brutal soldiers and a perfidious crew. Aside from the fulfillment of God's promises, the most important part of this section is the splendid sanity which characterized Paul's action on the way. Three things marked his sanctified common sense.

1. His Vigilance Detected That the Sailors Had Planned to Escape (v. 30).

He knew how much they would be needed presently, and at once took steps to prevent their escape. He went straight to the man in charge and said, "Except these abide in the ship, ye cannot be saved." Why should he make such a declaration when God had said that all should be saved? It was because he was not one of those foolish men who ignore human agency. He practiced the truth that genuine reliance upon God is the all-powerful incentive to human action.

2. He Got Them to Take a Substantial Breakfast (v. 34).

It was no time to talk to these men about their souls when their bodies needed immediate attention.

3. He Gave Thanks to God (v. 35).

This he did in the presence of them all. His prayer for that meal had more effect upon the people than his preaching would have had.

The Men Who Succeed

The men who succeed best in public life are those who take the risk of standing by their own convictions.—Garfield.

Inscriptions

It is a good thing to "write injuries in the dust but kindness in marble."—Christian Observer.

Be Merciful

WHY SUFFER ANOTHER DAY WITH INDIGESTION?

The big seller today for acute and chronic stomach misery is Dare's Mentha Pepsin and it is such a fine, pleasant and supremely good medicine that if the first bottle you buy doesn't help you—your druggist will return the purchase price.

One man writes, "I Cannot understand why any person will continue to suffer from gastritis or indigestion when Dare's Mentha Pepsin is available."

And tens of thousands of people—many of whom almost died with stomach agony—think the same way.

It's the right medicine for any person who suffers from bad digestion, gas, heaviness and that feeling of suffocation which is always dangerous.

For gastritis, indigestion, dyspepsia or any stomach agony—acute or chronic, keep Dare's Mentha Pepsin in mind.

Appropriate Dome

An astronomical hall three stories high and capped by a large dome on which will be represented the constellations of the sky is planned by the American Museum of Natural History.

In Some Society

The foolish sayings of the rich man pass for laws in society.—Don Quixote.

A torpid liver prevents proper food assimilation. Wright's Indian Vegetable Pills tone up the liver. They act gently but surely. 372 Pearl St., New York. Adv.

There are as many ways of losing money as of making it.

DR. W. B. CALDWELL AT THE AGE OF 83

"Most laxatives are unfit for Babies and Children—too harsh. They shock the tender bowel muscles and derange the digestive and eliminative organs."
—DR. CALDWELL

Your Child's Laxative! Does It Regulate for Weeks?

Does the laxative you now give your baby or child promote regularity for weeks and often for months—or must you "purge" and "physic" the little one every little while to keep the system clean, fresh and sweet?

Even a cross, feverish, sick baby or child will love the taste of Dr. Caldwell's Syrup Pepsin and one dose will establish natural, healthy bowel movement for weeks at a time, even if the child was heretofore chronically constipated. Dr. Caldwell's Syrup Pepsin not only causes a gentle, easy bowel movement but, best of all, it is often months before another dose is necessary.

Buy a large 60-cent bottle at any store that sells medicine and just see for yourself the difference between this pleasant, harmless, regulating laxative and the ordinary griping, nauseating "physic."

Dr. Caldwell's SYRUP PEPSIN

DECEMBER

L91
0392

This woman's experience is typical of thousands. Ask any physician.

"And to think I was poisoning my own Baby!"

"I couldn't see why he didn't gain. I never dreamed that my constipation was responsible until the doctor told me.

"He explained that faulty or slow elimination of waste matter allowed poisons to form and be absorbed by the blood—and this meant tainted milk for baby.

"He prescribed the Nujol treatment and it made a world of difference to both of us. Now that I know how dangerous constipation is and how easily it can be prevented, I am never going to allow myself to get into that bad condition again."

ities approve because it is so safe, gentle and natural in its action. Constipation is dangerous for anybody. Nujol is safe for everybody. It does not affect the stomach and is not absorbed by the body.

Nujol helps in Nature's own way

Nujol simply makes up for a deficiency—temporary or chronic—in the supply of natural lubricant in the intestines. It softens the waste matter and thus permits thorough and regular elimination, without overtaxing the intestinal muscles.

Nujol can be taken for any length of time without ill effects. To insure internal cleanliness, it should be taken regularly in accordance with the directions on each bottle. Unlike laxatives, it does not form a habit and can be discontinued at any time.

Mothers are the best friends of Nujol. When precious new lives are at stake they seek the remedy that medical authorAsk your druggist for Nujol today and begin to enjoy the perfect health that is possible only when elimination is normal and regular.

Nujol
THE INTERNAL LUBRICANT
For Constipation

The "I told you so" of his friends adds to the hardness of the way of the transgressor.

We do not dislike the people we can see through as much as those who can see through us.

SAY "BAYER ASPIRIN"—*Genuine*

Unless you see the "Bayer Cross" on tablets, you are not getting the genuine Bayer Aspirin prescribed by physicians and proved safe by millions over 25 years for

Colds	Headache	Neuritis	Lumbago

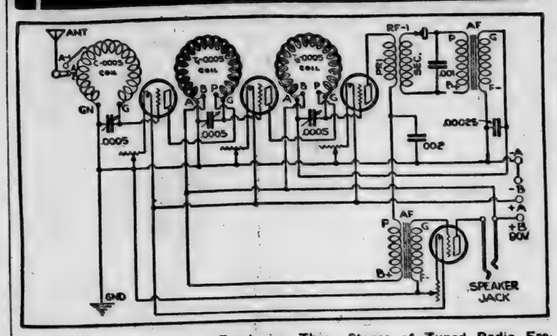
Proven directions on each package. Physicians everywhere recommend it.

RADIO



Four-Tube Reflex Receiver Employing Three Stages of Tuned Radio Frequency Amplification With Low Loss Doughnut Coils.

The most out of the smallest amount of apparatus is the goal most set builders are striving for, applying particularly to receiving sets that are intended for portable use, where space and weight are important factors to be considered.

The combination of the reflex type of circuit and the newly perfected low loss doughnut type of coil is ideal. The reflex circuit is especially desirable for the saving of tubes, and the doughnut coils for their high efficiency and low losses combined with the fact that they may be placed at almost any position in the receiver, consistent with a saving of space. Ordinary coils must be placed at critical angles and at a conservative distance from each other, in order to minimize the magnetic spraying effect from the ends of the coils.

Advantage That Is Important.

The low loss doughnut coils possess another advantage that is very important in radio frequency receivers. Low distributed capacity. This is gained by a peculiar winding construction used, where the wire is indented at regular intervals, preventing adjacent wires from running parallel to each other. This fact alone gives a receiver greater volume and tone quality than is obtained with ordinary layer wound coils.

The circuit described in this article is similar to that of a neutrodyne or tuned radio frequency receiver with the exception that three stages of radio frequency (one reflexed), crystal detector, and two stages of audio frequency (one reflexed) is obtained with only four tubes. No balancing or neutralizing condensers are necessary when low loss doughnut coils are used for there will be no stray magnetic fields to interact and cause the receiver to break into oscillation.

Parts Needed.

To construct the receiver you will need the following list of apparatus.

One low loss doughnut coupler.

Two low loss doughnut coil transformers.

Two low ratio audio frequency transformers.

Three low loss, straight line frequency variable condensers of .0005 mfd. capacity.

Four standard vacuum tube sockets.

One radio frequency reflex transformer.

Four 25 ohm rheostats, if UV 201-A or C 301-A tubes are used.

One each of the following sizes of fixed condensers: .00025 mfd., .001 mfd. and .002 mfd.

One fixed or adjustable crystal detector.

One phone jack.

Binding posts, wire screws, etc.

The receiver can be assembled on a 7 by 24 inch panel with a 7 by 23 inch baseboard or the panel can be of any convenient size to fit into a carrying case for portable use. The space required for the three variable condensers is the only limiting factor in the construction of a small receiver with this hookup The coils may be mounted upright or flat, above or below the baseboard or subpanel.

Wiring Done Underneath.

In the later types of receivers most of the wiring is done underneath the subpanel to improve the appearance of the set, and to shorten the leads. The low loss doughnut coils may be mounted in a horizontal position below the subpanel in this set if there is not sufficient room above.

It is advisable to use the C 301-A type of tubes throughout, with this receiver, with a storage battery to light the filaments and about 90 volts of "B" battery. As a crystal detector is used, there will be no need for a grid leak and condenser or a detector tube.

An Electric Soldering Iron Is Made of Scraps

Soldering up a radio outfit is quite a job unless you have a good soldering iron, and nothing beats the electric type. To heat an iron in gas consumes a lot of time and for the man in a small town without gas or electricity it is a bug-a-boo. To make an electric iron out of a few scraps and two binding posts—

Take two pieces of brass or copper about 2 inches long and ¾ inch wide, shape and drill two holes in them as shown in figure A. Fasten each to handle made of wood, fiber or bakelite. Handle is 4½ inches long and ¾ inches wide. Use one screw and one metal binding post for each prong as in second drawing. Prongs should be ⅛ inch apart.

Only Few Scraps Needed to Make Electric Soldering Iron.

Connect with twisted light wire to 6-volt battery. To operate, put soldering solution on joint and lay a small piece of solder on it. Touch both prongs to joint, thereby causing a momentary short circuit. This will cause joint to heat and solder will flow. Current is consumed only during use.—Radio Digest.

Care of Dry Batteries to Prolong Their Life

A dry battery will not stand much abuse. If it is accidentally dropped its internal connections are liable to be broken or the sealing compound on its top might become cracked, through which moisture can seep, causing a leakage between cells which act as a continual drain on the battery. If dust accumulates on the top of the battery wipe it off with a dry cloth, never with a wet rag, as this, too, will cause a drain or leakage between the terminals until such time as the moisture evaporates. Metal articles, such as trays, shears, metal pencils, etc., if placed on a battery will cause a possible short circuit.

What Radio Means

The word "radio" comes from the Latin "radius," and means in this sense the giving off, or radiating, of energy in every direction. From the broadcasting station energy is sent out in all directions in the form of electro-magnetic waves into the ether, an invisible medium filling all space.

RADIO RHYMES

By ROBERT S. SUTLIFFE

I WENT into a Radio store and looked at sets and horns galore, about two dozen kinds or more—to make a start; I told the clerk I nothing knew 'bout what to by or what to do, to get good entertainment through the Radio art. I didn't want to get in deep, just wanted something simple—cheap, an outfit any one could keep—no work for me; some little thing to please the folks, to sing us songs and tell us jokes, to run with simple turns and pokes—from troubles free.

"This is the place," the fellow said, "don't be by any one misled, for Radio outfits we're ahead; we treat you white; don't throw away your time and cash, by fooling with some simple trash, get something good and cut a dash, start going right. The simple sets are naught but toys, all right for little girls and boys, who only want to get a noise from near at hand; the thing you need is 'Number Eight', it's Radio in the perfect state, from Montauk Point to Golden Gate you'll hear the band."

They say there's one born every minute, I fell and found myself deep in it, I went the limit to begin it, with that set; more than a hundred plunks I paid to get reception of high grade, but a mechanician, I'm afraid, I'll have to get.

There is a moral in this telling for those with minds on Radio dwelling:—The folks who others are excelling, who win fame, are those who work while they are winning, who take it easy in beginning, but when they strike the old ninth inning, know the game.

(© Science and Invention.)

Concerning Loop Aerials

Loop aerials must be rotatable because they are directional; that is, they receive best in the directions in which the sides point. To cover stations in all parts of the country then the frames must be capable of being swung in those directions.

Repairing Howl

In case you are bothered with a continual howl in the loudspeaker try placing the speaker farther from the set. The vibrations of the speaker may be causing the tubes to "ring."

DECEMBER

It Was Christmas From Home Folks

Post Office Employee Takes "Time Off" to Enjoy His Own Package.

By ELEANOR E. KING

IT WAS certainly not an easy job, for there is no such thing in a post office at Christmas time. But, it kept one's mind and hands occupied. To attend college is one privilege, but to be able to go home for Christmas is another. Charles felt it keenly this very moment. He had the first privilege—and was fifteen hundred miles from home. However, mid the rush and tumble of sorting Christmas packages, stacks of letters, and cards, he hardly had time to grieve.

The postmaster could not understand how Charles could turn out so much more work than the others. It was all very simple. He eagerly searched every card, letter, or package to see whether or not it bore his name, hurrying on to the next one.

"I surely do get great fun out of this," burst forth Charles. "This one is heavy as lead, slides around in the box like a cake on a plate.

Silence followed, broken only by the constant thud of the "good will messages."

"I say," shouted some one across the room. "Your name is Lieffer, isn't it? I was just cussing this heavy, bunglesome thing when I discovered the name."

"It's heavy," said Charles making a wild dash. "It rattles?"

An hour later, the postmaster making his tour of inspection, stopped open-mouthed, gazing at one corner of the room. There, sitting on the floor, was the happiest boy in the world. The Captain, as the boys admiringly called him, understood now why Charles' work had accumulated in the last fifty minutes. Around him on the floor was a sea of tissue paper, ribbons, stickers, and gifts. Riding the crest of each wave were smiles. His radiant face was a joy to behold. The postmaster grinned. Charles felt some one looking at him and glanced up into the eyes of his employer.

"It is Christmas, Cap, from down home."

(©, 1926, Western Newspaper Union.)

HUMAN KINDNESS

MUSIC will die away; candles will burn themselves out; evergreens will fade. But once kindled, that flame of human kindness lighted at Christmas rarely becomes dim, and music incident to the Holiday pleasures will echo and re-echo through innumerable happy days.—W. D. Pennypacker.

(©, 1926, Western Newspaper Union.)

Christmas in Venice Is No Thriller for Yanks

THREE United States destroyers came into port at Venice to spend the Christmas holidays. It was Christmas Eve. The narrow, winding streets of Venice that lead off from the Piazza, San Marco were thronged with United States gobs. In almost every gondola one could see the small round cap of an American sailor. Out in the harbor were the three ships, all lighted with red and green electric bulbs, which were reflected in the blue-blackness of the water. There was a large Christmas tree in electric lights on one of the decks. It was a glorious sight—particularly to American eyes—these modern American war boats ablaze with Christmas cheer.

"I suppose you are thrilled," I said to one of the gobs, "to be spending Christmas at Venice?"

"Thrilled?" he echoed. "Say, this is the worst town I ever struck in all my life—no movies—no trolley cars—nothing! Believe me, I'll be glad to get back to good old Springfield. When I think of a real American Christmas dinner, the old log fire there at home, and the family—" There was a tremor in his voice and I turned away as I saw him reach for his handkerchief to daub his eyes.—Marion R. Reagan.

Merry Christmas Time Here Again

Every One Is Filled With "Peace to Men of Good Will" Spirit.

By KATHERINE EDELMAN

CHRISTMAS has come again — the happiest, gladdest, merriest time of the whole year. Glad bells peal upon the air; holly wreaths and mistletoe are everywhere and hearth fires glow with a warmer welcome. Every home is filled with cheer, every face alight with happiness and every heart is tuned to catch the message of love and peace that is abroad. Men and women greet each other with added friendliness; little children stand eager-eyed and radiantly expectant. All humanity is filled deep with the desire to give, to serve, to love. A new bond of fellowship is encircling the world and bringing hearts together; today we are all one great, big family, watchful and solicitous about one another's welfare. The ties of home and kindred grow even more close—friendships more dear—memories more precious. Our thoughts fly on eager wings to those who are absent—the vacant chair grows sacred in our eyes.

The very air is full of some strange, wonderful force that fills us with exhilaration and delight. Youth grows more tolerant of age and age looks with new understanding into the eyes of youth.

Streets are crowded with happy throngs—shops are filled to overflowing with gift seekers. Thousands of Christmas stockings are to be filled—thousands of older hearts are to be made happy because they are remembered. The gospel that it is more blessed to give than to receive is in evidence everywhere, and its practice is bringing radiance and beauty to every face.

Christmas has come again—its star is gleaming in the sky—its magic is all over the land! The young and the old, the gay and the wise have fallen under its spell. And every heart is singing the song of the angels—the song that echoed over the hills of Judea in the long ago—"Glory to God in the highest and on earth peace, good will toward men."

Roscoe Walter, Adm.

SPORTING GOSSIP

Spencerville high school won its third successive game last Friday night at Spencerville by downing Ashley by a 27 to 18 score. This leaves Spencerville with a clean record so far this season. The game was fast and well played. The Spencerville boys showed a return to their previous form. The first half ended with the Ashley team leading 11 to 10. The Spencerville boys hit their pace in the second half and scored more than two points for each of their opponents points. Frey of the Ashley team was removed on account of personals.

The Spencerville team has no game this week, but will meet Leo on the Spencerville floor on December 11.

The Spencerville seventh and eighth grade team had a hard fought game with Garrett Junior High, but came out with the long end of a 17 to 12 score. This also leaves this team with a clean record.

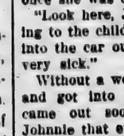
T. H. Shull and family, Clair Shull, Homer Smith and C. E. Wolford, ate dinner Sunday with L. A. Mercer and family near Hicksville.

Old Bill Hallons' Car Load of Toys

How Lonely Man on Christmas Eve Spree Brought Joy to Orphan.

By MARION R. REAGAN



OLD BILL HALLONS, who had a reputation for being the tightest man in the county, always broke away from his usual stinginess at Christmas time and made a practice of driving about on Christmas Eve distributing presents to people whom he had never seen before. He led a lonely life, and his Christmas Eve sprees were the biggest events in his life. He usually drove around the slum districts with a car full of toys and clothing and stopped indiscriminately in front of houses and flats, leaving a few packages on each doorstep. He never had accepted the proffers of hospitality and refused always to go inside.

This Christmas Eve, however, he found himself in a peculiar predicament. He stopped in front of a battered old frame house, which he knew very well. It was the fourth year he had gone there with toys for the little boy. He had scarcely stepped out of the car when little Johnnie came running out of the house, half crying.

"What's the matter, son?" he asked.

"Oh, it's ma; it's ma. G'wan in an' look."

Hallons had no desire to go in and look, but the child was so insistent and so pathetic, with great tears

"Gee, Is This Where Ya Live, Mister?" Asked Johnnie.

streaming down his cheeks that the old man followed him into the house.

The "house" consisted of one room, in the greatest disorder. At the far side a woman was lying motionless in a small iron bed. Hallons knew at once she was dead.

"Look here, Johnnie," he said, turning to the child, "you run out and get into the car outside. Your mother is very sick."

Without a word the little fellow left and got into the machine. Hallons came out soon after and assured Johnnie that everything was all right, for that evening anyway. To himself, however, he was wondering what on earth he would do. He had the car stop at the undertaker's and made arrangements for the burial. He purposed saying nothing to Johnnie about it until after Christmas, but then—what to do with Johnnie? He did not care to put him in a home. He disliked institutions of any kind.

"Do you have any relatives, son?" he asked suddenly. "Any aunts or cousins or anything?"

"No," said Johnnie. "I have a grandmother in Ireland, but I've never seen her—why?"

"Oh, I just wondered," he answered casually. They were in front of the big old Hallons house now.

"Gee, is this where ya live, master?" asked Johnnie, amazed and excited to think he was actually going to visit in such a mansion. Hallons assured him it was his house. "Gee whiz!" was all Johnnie could say to express his admiration.

Inside, Hallons had a chance to see his new friend in a better light. He was extremely dirty and ragged. He had a sharp, intelligent little face with large, sparkling blue eyes. Hallons liked him at once. He ordered a light supper to be prepared and sent Johnnie upstairs with a servant to have him scrubbed. "Put him in a pair of my old pajamas when he's clean and send him down," ordered Hallons.

That night after the supper had been eaten Johnnie snuggled up near the logfire in the drawing room, a delightful little figure almost lost in the spacious folds of his pajamas. His face shone with cleanliness.

Old Hallons sat back in his comfortable, easy-chair watching the child. He was more pleased with the sight than with anything he had ever known before.

"See here, Johnnie. "What would you like most to have for Christmas?" Hallons asked finally.

Johnnie stretched himself out on the comfortable pillow in the attitude of one about to think over a serious proposition. "Well," he said at last, "I think I'd like a house like this—just like this. I want this fire and this pillow, too."

Hallons smiled. "Very good," he said, "all I'll ask is that you share it with me, but it is your home, little man, from this time on."

Shimmering Metal Cloth, Paris Mode

The ghosts of the dim Victorians are stalking their ancient haunts. Sensing the tedious banality of pallid pastelism and too simple simplicity, the lovely ladies of yesterday have suddenly become articulate even in the awesome presence of youth, and they are boldly declaring the sartorial virtues of the epoch that was Ward McAllister's. Indeed, asserts a Paris fashion writer in the New York Herald-Tribune, they have transformed their words into material manifestations, and were you an habituee of smart Paris rendezvous du soir you would see definite evidence of the proposed revival of the golden splendor of the Victorian era. Where recently pastel hues were the hallmark of formal chic, now gold and colorful hues are also the order of the night. Where airy silks were once the stuffs that robes du soir were made of, today metallic brocades and luxurious velvets share the evening spotlight. And the straight, simple, tubular gowns that used to be the epitome of smartness have been succeeded by flares, sumptuous decoration and complicated built-in elaboration. Even youth has been compelled to join the march back toward ornatelsm, and for the moment the reaction appears complete.

Modernized Elegance.

Your problem, whether you are youth or matron, concerns the extent to which you shall adopt the returning grandeur. You may take it for granted that elegance to a degree is with us once more and that straight silhouette has encountered unexpected and happy complications. You know, too, that this is what is known as a transition season, when it is easy to be incorrect and dangerous to be too smart. Dangerous because you may accent the theme which is irritating the sensibilities of the mode—and that theme may be yesterday's as well as a mythical tomorrow's.

The bruited return of elegance offers just such a delicate problem. There is no question that the stage for some time has been well set for the coming of almost anything which would overshadow trite simplicity. And the Paris couture, sensing the situation, has made several radical departures from that mode which, inaugurated after the war, has lasted until this season—departures which naturally enough have been in the direction of increasing elaboration; particularly in the evening mode, because here the field for ornate decoration is greatest.

Yet this new elaboration is only relative. Compared to the belles of the gay '90s, our elegantes are simple Cinderellas and prophecies of a return to the swishing glories of Victoria are a long way from being realized, despite the many ardent verbalists who are broadcasting such predictions. From these impulsive sources we learn that the Venus-proportioned figure of the early century Gibson girl, the corset and elaborate concealing garments are about to enjoy a renaissance and that they will revolutionize the mode.

Model Featuring Waistline; Circular Side Flounces, Fox Border.

And if you express doubt these prophets point to the returned waistline, the golden brilliance of the present mode du soir and the universal tendency away from boyish straight-line simplicity.

Seen at the Waistline.

All of which seems logical enough if you only scratch the surface. Looking at the sketches of Paris evening models you will see the waistline, ornate decoration, vivid colors and compared to the boyishness of recent years, graceful femininity. But each of these themes is present only in a moderate and modern degree—present more as a pleasing development of the post-war mode than a strong protest against it. And forecasting, from these premises, a return to the deep chested, heavily encumbered, decorous figure of the early 1900s, is simply a sentimental proceeding with no logical foundation. It totally disregards the temper and position of the modern woman.

Fifteen years ago, Paris first launched the fashion of the bobbed head, and it was a dismal failure simply because milady, in that period of comparative subordination, demanded a high degree of artificial elaboration; in this instance the abundant reinforced coiffure. That was the sort of elaboration that belonged to the glorified Victorian—it was the product of her subordinate position—she was the lady whose place was in the home. Since then she has left it, if not forever, at least for the next few generations, and coincident with her appearance in the arts, the professions, in politics and in business she has for-

Evening Gown of Black Velvet, Fullness Massed in Front.

ever discarded the style artifices that were so essential to her lesser state.

The elaboration that has so happily inaugurated a new style cycle this season is of an entirely modern character. It is based on the free and unencumbering post-war mode and it will never degenerate into the artificial all-concealing awkwardness of the early century. What appears to some to be a renaissance of the gilded Victorian age is only the golden afterglow of an era which has forever joined the innumerable caravan.

So let modernized elaboration be the keynote of your winter robe du soir. You can accent the theme so far as you like in fabrics—no material is too luxurious for the current mode—but in silhouette and detail temper your ornatelsm with a grain of discression. The bustle back, when offered in moderate versions has its place in contemporary fashions, but shun uncompromisingly the extreme manifestations which insist upon a literal return to the '90s. It would be folly to discard the lissome grace of the modern mode for the awkward elegance of the early century or for the unattractive artifices of the 1880 period.

Trimming at the Back.

There is a marked tendency in the gowns worn at the smart Paris dancing places toward trimming at the back. A lovely model from Louiseboulanger, which was worn by a smart French woman recently, was in oyster-colored satin with a most original arrangement of three looped flounces at the back and a little to one side. The lowest of these nearly touched the ground, while the full skirt was short, reaching to a little below the knees. The corsage was plain with a series of triangles in golden beige satin, inlet with gold thread.

Paris offers a wide choice of materials for evening gowns. Richest lames and velvets are seen side by side with the filmiest chiffons and georgette crepes, while lace has never been more popular, both in black and all the colors that are fashionable in other fabrics. Moire is used for some effective gowns. It is sometimes shot with metal, which makes it particularly rich in effect. There is a fine pin-spot net that is returning to favor for simple dinner frocks this season, while tulle is enjoying a popularity that is unusual during the winter months. Taffetas and satin are equally popular for picture frocks; metal gauze is often seen.

The favorite evening colors this season are chartreuse green, various shades of pink that invariably deepen to rose and coral red, blue in the shade that Chanel has made her own, besides turquoise, cornflower and hyacinth blues. The mauves are either a deep pinkish lilac that is particularly effective in some of the Renee models or else the bluish tint that is this season's development of the violine shades that were so popular during the spring. Corinthian red has a certain following among women who like deep rich shades, and bright coral red is as popular as ever, because it is so universally becoming. Black is used with discretion, but when it is simply made and worn by the young matron it is delightfully distinguished and stands out in pleasing contrast against all the other colors.

INDIANA STATE NEWS

Harry McNamara, ex-federal agent, charged with bribe extortion, was released from the county jail at Fort Wayne on bond of $3,000.

An estate valued at approximately $100,000 is disposed of in the will of Albert D. Thomas, former Crawfordsville attorney and judge, who died recently.

Clarence E. Custer of Columbus was appointed as acting judge of the Bartholomew circuit, pending appointment by Governor Ed Jackson of a judge to fill the vacancy caused by the death of John W. Donaker.

David C. Stephenson arrived at Indiana state prison in Michigan City and began serving the life imprisonment to which he was sentenced for the murder of Madge Oberholtzer. His prison number is 11148.

Richard J. Kruse was reinstated as police chief of Michigan City by the city commission in regular session upon petitions signed by all members of the police force and a large number of citizens.

More than 300 representative men and women of Richmond were guests of the Richmond Rotary club at a banquet arranged in honor of the seventy-seventh birthday anniversary of William Dudley Foulke, a member of the club and one of Richmond's widely known citizens.

Indiana's dairy cow population continues to increase, says a statement issued by Purdue university. More heifer calves are being purchased outside of the state. Last year there were 737,000 dairy cattle in Indiana. The estimate of Indiana's dairy cattle population for this year is 770,000.

While police and federal agents of the county searched high and low for Martin Durkin during the last two weeks of October, the master crook spent at least three days of that period taking treatment for a cold in St. Margaret's hospital in Hammond, it became known.

Appropriations totaling $2,635,000 for extension of the work of the board of home missions and church extension of the Methodist Episcopal church in America were passed by the board at its annual meeting in the Central Avenue Methodist Episcopal church at Indianapolis.

First place in the boys' annual corn club show, held at Shelbyville, went to Gibson Gray, son of Hal Gray, although the high yield record for the club work is held by Victor Lux, fifteen years old, whose production of 144.95 bushels of corn to the acre is the highest ever reached in Shelby county.

Rear Admiral William S. Sims, retired commander of American naval forces in European waters in the World war, announced at Newport, R. I., that he had accepted an invitation extended by Myron R. Green, of Indianapolis on behalf of the Contemporary club, to make an address before the organization the evening of December 16.

The War department at Washington announced the names of three Indiana boys who have been designated as cadets for the West Point military academy entrance examination to be held March 2, next, with a view to admission to the academy next July. They are Farroll A. Dragoo of Parker, Alden P. Taber of Bluffton, Rural Route 3, and Ed. E. Griffin of Elwood.

Figures and estimates which were submitted at the Indiana Bell Telephone company hearing before the public service commission by Edward W. Bemis, head of the commission's special staff of engineers at Indianapolis, showed the final total depreciated reproduction cost of the entire property as of April 30, 1925, to be $28,425,069.44.

Construction of the shrine which will constitute the main building of the Indiana War memorial will begin in January, according to plans completed at a meeting of the memorial commission in the War Memorial building at Indianapolis. The cost of the shrine, which is designated in the plans as building A, is not to exceed $3,000,000.

Indiana, though ranking thirty-seventh in area and eleventh in population in the United States, holds ninth place among the states in respect to total wealth of manufactured products, and eighth place in respect to wage earners, according to figures compiled by Prof. Lionel D. Edie, head of the bureau of business research of the school of commerce and finance of Indiana university at Bloomington.

Henry Roberts, statehouse custodian, was appointed state sales agent by the joint state purchasing committee at Indianapolis. The appointment followed the creation of the new state post on a recommendation of a special committee, representing the state penal and correctional institutions, to Governor Ed Jackson that a central sales agency be established to dispose of the commodities produced by the state institutions.

Governor Jackson issued a proclamation at Indianapolis, designating December 11, the anniversary of the admittance of Indiana to the Union, as Indiana day, and urging suitable observance in the schools and by citizens generally.

R. C. Minton, assistant prohibition director under Bert C. Morgan, has been appointed by D. H. Blair, commissioner of internal revenue, as attorney for the internal revenue department for the Thirteenth prohibition enforcement district, it was announced at Indianapolis.

MAGNET HELPS BETTER ROADS PROGRAM

A 36-inch lifting magnet put to unique use in a "better roads" program along the Yellowstone trail. From a seven-mile stretch of road a total of 603 pounds of nails, bolts, scrap iron, etc., was picked up, saving motorists innumerable punctures. The magnet was suspended four inches from the ground and was actuated by 72 cells of storage battery current.

CARBON MONOXIDE GAS DANGEROUS

Only Safeguard Is Never to Run Engine in Garage While Closed.

Caborn monoxide is deadly, colorless and odorless. The air in a garage or room may seem perfectly pure, yet may contain enough carbon monoxide to kill you.

Carbon monoxide may be formed by burning almost any kind of fuel without oxygen. A very small percentage in the air will cause headache, then unconsciousness, then death. The blood has a great affinity for carbon monoxide and absorbs it from the lungs instead of the oxygen which is needed to sustain life.

No Warning Given.

An automobile engine running in an ordinary small garage with doors and windows closed will produce enough carbon monoxide in a few mnutes to cause death. If a person is alone in such a garage, he is generally overcome without warning.

The only safeguard is never to run your engine unless the garage door is open, or at least two windows. If your engine is running and you feel any headache or faintness, even if you think the ventilation is all right, go at once into open air—there may be a pocket of gas in some corner of the garage.

First Aid.

If you find any one unconscious in a garage, drag him at once to the open air if possible. If you cannot do this, open the doors and windows wide. If the victim is breathing, send for help. If the victim has stopped breathing, start artificial respiration by the prone pressure method. Send someone else to call the police, gas company, or electric company, as they usually have equipment for resuscitation including oxygen or carbon dioxide-oxygen inhalators.

If you do not know how to start artificial respiration, learn! Get this information from your local safety council, Red Cross, police department, electric or gas company, or write to the National Safety council, Chicago.

Auto Speeder Penalized by Increased Tire Bill

A high-grade tire on a racing car will sometimes stand up as far as 500 miles, about one-twentieth of the life of a tire operated under ordinary conditions. This difference in tire service is due directly to a difference in the heat developed.

Heat exerts a deteriorating effect on rubber in proportion to the intensity and length of time the rubber is exposed to it. Running at high speed quickly raises the temperature of a tire. This heat results from the internal friction set up in the tire carcass.

Tires are designed to resist the effects of heat produced by ordinary every-day car operation, but they cannot long remain intact when highly heated by continuous speeding. The tire bills of the speeder are likely to be higher than those of the driver who proceeds at a moderate pace.

Springs of Automobile Are the Most Neglected

The real orphans, the neglected or phans of motordom, are the springs on the average man's motorcar, according to the viewpoint of a manager of a large lubricating company, who adds:

"Show me a man who gives the springs of his automobile the attention they need and I'll show you a wise motorist. Without doubt the springs are the most neglected part of the automobile. The average owner treats them like orphans. He assumes, apparently, that they'll go ahead and do their work with little, if any, help from him

"And you really can't blame him for such neglect. The cleaning and oiling of greasy, dirty, rusty springs is anything but an inviting job, especially on a Sunday morning. Yet it pays to take care of them, not alone in the greater riding comfort you'll get from the springs that are working as they should, but also in the protection that engine parts receive."

Rigid Watch Should Be Kept for Auto Thieves

Auto owner, did you know that 10,064 autos were stolen in 1924. This report is authentic and shows that a

One Way of Towing Away Your Car.

more rigid watch should be kept for the thieves.

Even if you lock everything on your car they will hitch on a towline to another car and make off with it.

Failure to Signal Unsafe

Even the experienced driver lapses into the habit of failing to signal his intention to turn left if he is following the beaten track of the main highway. He should remember that the man behind may be a local driver who, planning to take the continuation of the road straight ahead, figures that those ahead of him are going the same way. Everybody is not traveling the broad highway all the time. Signal always.

Privilege of Some Motorists

The democracy of the American form of government was upheld when an irate motorist who had parked outside the parking space on Capitol Hill, Harrisburg, Pa., refused to move his car because Governor Pinchot's car also was parked in the proscribed area. "I don't care if it is the governor's car!" the angry motorist shouted. "If it stays, mine stays." The two cars remained there until the governor's

Spring Wisdom

When a spring plate breaks it is important to have it repaired or replaced at once by a skilled spring maker, not by any chance blacksmith. Often a break in a plate occurs at a place where it does not immediately cripple the entire spring, but it is obvious that the breaking of one plate throws extra work on the other plates, which may in turn suffer breakage. If the intermediate plates should break at the center bolt, the spring clips should be tightened down until it is possible to have the break repaired. Very often rebound clips are loose or broken. Missing rebound clips may result in broken main plates.

To Clean Contact Points

It is not always easy to find a really satisfactory agent for cleaning the contact points of ignition apparatus or the surface of a commutator on the starting motor or a lighting dynamo. There is a product known as cuttlefish paper, which is finer than the finest sandpaper and which is ideal for this purpose. This paper cannot always be obtained at hardware stores, but it is always stocked by dental supply stores.

Oregon Auto Laws

Oregon has enacted laws which make it a criminal offense to tamper with a serial number of an automobile with intent to defraud. The laws also require that all applications for licenses shall be accompanied with certificates of title.

Cooling Hint

In engines having the thermo-syphon system, the owner should be careful always to keep the system filled, because if the water is allowed to fall to half or even three-quarters of the full amount there will be impaired circulation and consequent overheating.

Backache Wearing You Out?

Every day find you miserable with backache? Suffer sharp, stabbing pains? Feel lame and stiff—always tired, nervous and dispirited? Then look to your kidneys! Your kidneys are the blood filters. Perhaps they have failed to properly rid the blood of body poisons. Naturally, then, you suffer the injurious effects of this slow poisoning.

Don't risk neglect! If your kidneys need help, use *Doan's Pills*. No other kidney diuretic is so well recommended nor so successful. *Ask your neighbor!*

An Ohio Case

Mrs. Cordella Black, 200 Dow St., Carey, Ohio, says: "My back gave out and it was a great effort to do my housework on account of the bearing down pains in the small of my back. Black specks floated before my eyes, making me dizzy. I purchased Doan's Pills and one box made my back strong and my kidneys were flushed and regulated."

DOAN'S PILLS 60c

STIMULANT DIURETIC TO THE KIDNEYS

Foster-Milburn Co., Mfg. Chem., Buffalo, N. Y.

Speaking of well-preserved women, Lot's wife was probably the best of the assortment.

BEAUTIFY IT WITH "DIAMOND DYES"

Just Dip to Tint or Boil to Dye

Each 15-cent package contains directions so simple any woman can tint soft delicate shades or dye rich, permanent colors in lingerie silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings hangings — everything!

Buy Diamond Dyes—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.

Whatever advice you give, be short —Horace.

Have you ever walked on Sprayed Rubber? It is the purest, toughest, most uniform rubber known—patented and developed by the United States Rubber Company. It has put "U. S." Spring-Step Heels in a class by themselves. Such comfort! Such long wear! Get onto a pair today and note the difference. Also—ask your repairman about USKIDE—the sole that wears twice as long as best leather. Comfortable, healthful, waterproof. Buy new shoes with USKIDE Soles and "U. S." Spring-Step Heels.—Adv.

Truth is always strange, stranger than fiction.—Byron.

Cuticura Soothes Baby Rashes

That itch and burn, by hot baths of Cuticura Soap followed by gentle anointings of Cuticura Ointment. Nothing better, purer, sweeter, especially if a little of the fragrant Cuticura Talcum is dusted on at the finish. 25c each.—Advertisement.

To do is to succeed.—Schiller.

Guard Against "Flu" With Musterole

Influenza, Grippe and Pneumonia usually start with a cold. The moment you get those warning aches, get busy with good old Musterole.

Musterole relieves the congestion and stimulates circulation. It has all the good qualities of the old-fashioned mustard plaster without the blister.

Rub it on with your finger-tips. First you feel a warm tingle as the healing ointment penetrates the pores, then a soothing, cooling sensation and quick relief. Have Musterole handy for emergency use. It may prevent serious illness.

To Mothers: **Musterole is also made in milder form for babies and small children. Ask for Children's Musterole.**

SAVES HEALTH AND BUSINESS

Popular Modiste So Ill She Almost Had to Give Up. Tanlac Restores Her Shattered Health

Miss Sarah Hyndman

Hundreds of people know Miss Sarah Hyndman, popular designer and dressmaker living at 334½ East Columbia Street, Fort Wayne, Indiana. But few of them, seeing this robust, healthy young woman today would ever dream that she was almost a nervous wreck a few years ago.

Miss Hyndman says: "My business meant long hours of sedentary work and a serious strain on my nerves. I was so played out that I had to give up my sewing for a time and take a long rest. Nervousness, severe headaches and sleeplessness nearly drove me wild. At the end of a busy day, my energy was gone and I had no ambition for any kind of recreation or social activities.

"I was just on the verge of giving up when a friend suggested that I give Tanlac a trial. It was marvelous the way I responded to this wonderful tonic and health builder. It righted everything for me, strengthened my nerves so I could work well and sleep well and gave me an abundance of new vitality. It drove away all aches and pains and now I feel as happy and light-spirited as a school girl. All my friends are congratulating me on my new health and vigor. I recommend Tanlac because it is the best medicine in the drug store and because I would like to see other sufferers benefit by this tonic as I have done."

Get a bottle of Tanlac from your druggist today and start back on the road to health. Over 40,000,000 bottles have been sold.

Tanlac Vegetable Pills for constipation, made and recommended by the manufacturers of Tanlac.

50—A sloth
51—A small mass of butter
53—A man's name shortened
55—A parent

The solution will appear in next issue

Solution of Last Week's Puzzle.

HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

Not Too Hard-Headed to Dye His Whiskers

A lecturer on art recently spoke before a group of men in an industrial city, according to Fred C. Kelly, urging upon them the duty of trying to put more beauty into their surroundings. At the close of the talk, a leading citizen came up to have a few words with the lecturer.

"I enjoyed your talk," he said, "though I didn't agree with you. The fact is that we have no time here for beauty. The prosperity of this town is due to hard-headed, practical men. We are doing things, and can't bother to think about being beautiful."

"Yet," retorted the lecturer, smiling, "you yourself are seeking beauty, according to your lights. You may not have found it, but I know you are aiming at what you think makes for greater attractiveness."

"No, you're wrong," insisted the hard-headed, practical man; "I'm not interested in beauty."

"Then," said the lecturer, "if you don't mind my being so personal, will you please tell me why you have dyed your whiskers?"

Darky Certainly Had the "Goods" on Pastor

Dr. John Roach Stratton, the famous fundamentalist, said in New York the other day:

"Clarence Darrow's shallow criticism of religion impresses nobody. Darrow reminds me of old Cassius Cage.

"'Cash,' said a Southern planter, 'did you attend divine services this morning, as I charged you?'

"'Ah sutny did,' said Cassius, 'and Ah ketched de pawson lyin', too.'

"'The parson lying? What do you mean, you black rascal?'

"'Well, sah, he done say no man can sarve two masters. Dat's de fust lie, 'cause Ah sarves you, mah ole master, and Ah sarves young master Charles besides. Den he say we loves de one master and hates de udder, and dat's de second lie, for de Lord knows Ah hates you hofe.'"

What's the Use?

"I've almost given up hope of trying to please my wife," said a disgruntled husband the other morning. "Last night I was sleeping peacefully when she woke me up. 'Please stop snoring, John,' she said. So I turned over to another position and resumed my slumbers. In a few minutes I felt someone shake me again. It was my wife. 'Are you all right, John?' she asked. 'Wha's a matter now,' I growled. 'I couldn't hear you breathing, and it made me nervous,' she replied. What's the use?"—Detroit News.

Spots on the Sun

If a spot on the sun is as large as 27,000 miles in diameter it can be seen without a telescope as a very minute black speck. Occasionally spots are even larger than this, and 50,000 miles is a size not unknown. The largest sun spot on record was observed in 1858; it was nearly 150,000 miles in breadth and covered about 1-35 of the whole surface of the sun.

Sickroom Hint

Quite a pleasant way to purify the air of a sickroom is to pour a few drops of oil of lavender into a glass of hot water.

Worth Finally Recognized

Millet's famous painting, "The Angelus" representing two peasants saying the Angelus in the evening twilight, was painted in 1859. Millet sold it in 1860 for $160. After passing through various hands it was purchased in 1890 for $150,000.

Canada Speaks

Canada ranks second to the United States in the number of telephone subscribers per head of population, the ratio being about one in nine.

Money in It, All Right

Smith—You say the speculation has proved a failure?

Jones—A total failure.

Smith—But I thought you said there was a fortune in it?

Jones (with a groan)—So there was. One!—Ipswich Beacon.

"Will" in Ungallant Mood

Of all the plagues the greatest is old, the book-learned wife in [illegible] in bold.—Shakespeare.

POINTS ON KEEPING WELL

DR. FREDERICK R. GREEN
Editor of "HEALTH"

(©, 1926, Western Newspaper Union.)

ARE WE NOT HOT-HOUSE PLANTS?

ARE Americans living in too hot and dry houses? Are we as a nation living, during the winter months, in so warm an atmosphere that we are becoming abnormally sensitive to drafts and cold air and so are reaping the results in the form of constant colds, coughs, bronchitis and pneumonia? These are some of the questions Dr. Thomas Hubbard of Toledo asks in an article on "Hot Air Comfort" in a recent issue of the Journal of the American Medical Association, and which he endeavors to answer. As the questions affect living conditions in practically all American homes, his article is deserving of careful consideration.

Americans, a few generations ago, says Doctor Hubbard, lived in houses and hotels with an average temperature of about 55 degrees. Those were the days of the open fireplaces. This method of heating is still widely used in England, as it has been for centuries. Most of the present improvements in heating have been American inventions. About 150 years ago Benjamin Franklin invented the Franklin stove, which at once became popular. This was followed later by the sheet-iron stove, still widely used in many households. The hard-coal base burner was invented about 1850, then the hot-air furnace, the steam and hot-water radiator systems, and later the vacuum heating with oil or gas as a fuel.

In 1820, a temperature of between 50 and 60 degrees was considered best for hospitals. Today, 70 is the average temperature for schools, hospitals and hotels, while 72 to 75 is not unusual in offices and homes.

That Americans require a much higher degree of warmth than Europeans is shown by the fact that most American tourists complain bitterly of cold living and sleeping rooms, both in England and on the Continent, while foreigners usually object just as strenuously to our overheated houses, offices, hotels and theaters. On the other hand, we wear thinner clothing and less of it, even though our winters on the average are much more lengthy and severe. A friend of mine, just back from a year's study in London, says that woolen underwear is absolutely necessary in England all the year round. Shades of B. V. D.'s!

On the other hand, medical officers during the World war stated that the American soldier was more susceptible to cold than the English or French soldier. All ex-service men who were in France agree that the two most unpleasant features were the cold and dampness.

Probably our houses and offices are too hot and too dry. Free ventilation and plenty of outdoor air will correct both of these mistakes.

HUNTING THE INVISIBLE

IN 1846, Leverrier, the French astronomer, decided from his calculations that there must be another planet beyond Uranus. The existence of such a planet was the only possible way of accounting for the movements of the others. So he carefully calculated where this planet, if it existed, ought to be at a certain time.

But he had no telescope powerful enough to see it, even if it existed. So he wrote his friend, Galle, in Berlin, who had a very powerful telescope, and asked him to look in a certain spot in the sky at a certain time. Galle did so, and there was the new planet.

Who discovered it: the man who from his figures decided that it must exist, or the man who first saw it?

A similar situation has arisen in regard to the most common vitamin, called vitamin A. Chemists and food authorities have suspected for years that there was some substance in fresh foods which was necessary for the growth and health of the body, and the absence of which caused various diseases of nutrition. In 1912, Doctor McCollum, then a teacher at Madison, Wis., found by feeding experiments on animals, that there were at least three of these mysterious substances, which he called "fat soluble vitamin A," "water soluble vitamin B" and "water soluble vitamin C." Vitamin A is found in butter, cod liver oil, milk, egg yolks and the green leaves of vegetables.

Doctor McCollum's discovery has been confirmed by many hundreds of scientific men in all parts of the world. Chemists at once began to hunt for the Vitamin A, which they knew was there, but which they couldn't separate from all the other substances in the foods which contained it. They have been hunting for it for 12 years, but no one has seen it.

Now Professor Takahashi of the Tokyo Institute of Research announces that he has extracted it from cod liver oil, spinach and green lave, a Japanese weed.

It is a transparent, thick, yellowish-red oil with a bitter taste and a peculiar odor. Professor Takahashi has named it "biosterin," and the amazing thing is that this vital principle in food, like radium, gives off actinic light rays so strong as to affect a photographic plate. Whether, like radium, it will continue to give off rays without losing strength is not yet known.

The HAPPY HOME

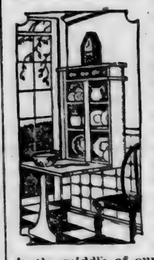
A Disappearing Kitchen Table

The extra kitchen table is a good deal like the extra chair in the small living room—when it is needed it is needed badly, and when not in use it is abominably in the way! In the ideal kitchen, which is the one requiring the fewest steps, there simply isn't room for the emergency table. Yet there are times when we stand helplessly in the middle of our snug kitchenette, with our hands full, wondering where in the world we are going to put down the soiled salad plates, the tray of glasses to be filled with fruit cocktail, or the after-dinner coffee cups. Oh, for another table to hold this temporary burden!



For such congested moments, let me commend to you the collapsible table, which claps back against the wall when not wanted and comes forward at a touch to serve as an extra table on which to mix up biscuit, arrange the dessert glasses, or hold the debris from the early courses of the dinner table.

While this disappearing table can, of course, be fastened to the wall in any available space, it is especially unnoticeable if it fills in the vacancy below a cupboard or beneath the cook-book shelf. Hinged to a cleat in the wall, or even to the bottom of the cabinet or to the shelf, it may be drawn forward and upward, its hinged support falls into place on the floor, and there you are! A wooden button should be screwed on underneath, to hold the wooden support in firm position.

This little vanishing table may easily be used by two persons as a breakfast table on occasion. In fact, if you can imagine a cozier spot on an autumn morning than this little nook near the window, you will do better than I can!

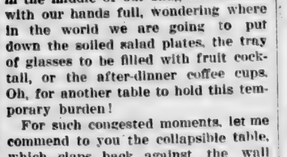
Taking Care of Your Watch

The suburban woman took her way in leisurely fashion to the local railway station, en route to the city for the day. As she rounded the corner of the building, she was dismayed to see her train disappearing down the tracks, just too far away to catch. Pushing the sleeve of her coat aside, she consulted the watch on her wrist.

"Five minutes slow," she muttered in exasperation. "Wouldn't you think this watch would keep better time? I just set it last night, too."

Why do we women buy watches for beauty instead of for service, and why do we not take care of them after we get them? What would we think of a business man who carried a fussy little timepiece with works so fragile and delicate that it was always getting out of order? Yet we, too, have to catch trains and meet friends by appointment, and get off on time for matinees and club meetings.

Another thing, women do not take the care of their watches that men are in the habit of taking. A man's most sacred duty and habit is to wind his watch the last thing before he goes to bed at night. A woman winds her watch one day, when she is going to wear it—and then leaves it lying on her dressing table for the next two days, when she is staying quietly at home and depending upon the clock in the living room. Her watch runs down, naturally, and has to be set and started



up again, only to go unwound, perhaps, for another two days. The watch experts tell us that the worst thing that can happen to a watch is irregularity in winding.

Ask almost any woman for the time, and she glances dubiously at the platinum bijou on her arm and says: "I'm fast, I think," or "Sorry, my watch isn't running." Yet there are to be had excellent reliable timepieces that are encased in beautiful frames, if only we will buy them for the works and not for the case alone. But even these will become useless unless we wind them and have them regulated from time to time.

Welcome Relief

"Well, young woman, so you have graduated."

"Yes."

"Chock-full of wisdom and erudition, eh? What will you do first?"

"Plunge right into the silly season."—Winnipeg Tribune.

Good Old English Word

The word "housewife" has been in use in the English language from a very early period, it having appeared in literature as early as 1225 in the form of "husewif." It implies a woman, usually married, who directs or manages the affairs of the household, also the wife of a householder. It is from the Middle English words "hus," meaning "house," and "wif," meaning "woman." Nothing derogatory is implied in the term, and it is in good usage.

Too Weak To Work

LeRoy, Mich.—"I was troubled with a pain in my right side and in the small of my back. I could not sleep soundly and had no appetite—it seemed that nothing looked good to eat. I was so weak I could scarcely do any work. I wrote to Dr. Pierce, and, upon his advice, took three bottles of 'Golden Medical Discovery,' two of 'Favorite Prescription,' and two of the 'Anuric Tablets,' and occasionally a 'Pleasant Pellet' at bedtime, and I gained nine pounds."—Mrs. Arthur Ruppert, Route 1, Box 15a.

Send 10c to Dr. Pierce, Buffalo, N. Y., for a trial pkg. of any of his medicines in tablet form.

Is Your Contentment Real?

Long before the first holly berry blushes scarlet, children rre looking forward to Christmas. Soon their joyous shouts and laughing voices will echo through the home.

But what of you? Do you dread the coming of Christmas, with its burden of expenses? Are you buying contentment for little faces with personal sacrifices?

Every mother and father can enjoy Christmas. It is so easy to save a litt'e each week in our Christmas Savings Club, you never miss it that way, and it relieves you of worry when buying time comes.

Then too, what of the future years? Will your Children's Christmas always be happy and free of financial cares. Our bank is your bank and your friend.

Let us guard pour investments and transactions.

Come in and ask us to EXPLAIN the CLUB to YOU.

St. Joe Valley Bank, A State Bank.

Parent-Teacher Association

The following program has been arranged for the third Parent Teacher Meeting, which is to be held at the St Joe School Hou-e, Friday eve, December 18, at 7:30.

Community Singing led by C. A. Woodcox.

Piano Duet — Lora Leighty, Addie Koch.

Reading — Catharine Bowser.

Quartette, arranged by Harvey Hull.

Address, "The School and the Community," Walfred Lindstrom.

Business Session

This promises to be an especially interesting program, and you are urged to be present.

Are you a member of the P. T A? Dues are 25 cents, and payable to O. D. Baker. You should join now.

Get Your Automobile License

That annual, easily forgettable need, next year's auto licen-e, is upon the motorists of St. Joe For weeks officials have been calling public attention to this important matter. While there has been some response, thousands of motorists are apparently going to delay until the last day and when their licenses cannot be issued "while you wait" start to cuss.

Obviously the thing to do is for the motorists of the state to make their applicafion now. There is no indication that any respite will be granted delinquent motorists after February 15. None should be. Ample notice has been given. The auto division is now ready to issue the licenses, and applications can be made at The News office If part of the public chooses to ignore the opportunity, they will get no sympathy if after February 15 they are arrested for carrying antiqu'ted license plates.

LOCAL ITEMS.

Will Hamilton is doing his best to find out who cut a couple of bee trees a few days ago on his farm, and a liberal reward is advertised in this issue for information leading to the party that is guilty. The one tree is said to be valuable, and besides this, it is some nerve without permission.

Have individual Christmas cards. Your name printed on at The News office.

Elza Morr and wife moved in last week with J. S. Kain and he will do the farming from now on. Mr. Kain has a sale advertised in The News for Saturday, Dec. 19.

A marriage license has been granted Lester D. Baker, St. Joe, 20, farmer, and Miss Thelma R. Johnson, 20, of Concord. The groom's father, Ora D. Baker, consented to the marriage.

There will be no issue of The News following Christmas or on December 31st. Persons wishing advertising at this time will please notice. January 7th, will be the first issue after the Christmas issue.

The Ladies Aid Society of the M. P. Church will meet this Thursday afternoon with Mrs Mayola Kinsey. Time, 2 o'clock. Committee in charge, Mesdames Loretta Hull and Blanch Leighty. A good attendance is desired.

SOFT CORNS ETC.

Asks Permission To Sell Lands

S. D. Steffey, administrator of the estate of the late Jacob Gratz, has filed a petition in the DeKalb circuit court for authority to sell land in Jackson township, DeKalb county, and in Allen county.

The indebtedness of the estate and claims allowed amount to $5,-854.13, which is in excess of the value of the personal property.

The real estate is estimated to be worth $12,000, the administrator states, with a school fund mortgage against it of $2,430.

Patronize the advertisers.

Cattle Testing Completed

The value of tubercular testing of cattle is again being demonstrated to farmers in DeKalb county. Dr. R. A. Miller, who has been conducting a test in the county at the expense of the county, state and federal government co operating, says that out of 14,500 cattle tested, only 75 were reactors or about ½ of 1%, being the smallest percentage of any county in Northern Indiana where tests have been made. Where cattle were ordered killed, the expense was shared between the state and federal government, and the farmer losing ⅓.

The only towships found entirely free from tuberculosis were Concord, Spencer, Grant and Union. Dr. Miller probably established a record when he tested 52 herds, or about 285 cattle in a single day.

Next Saturday

Our Special will be on **LARD.** Any quantity desired up to 25 pounds, at lb.....20c.

Any quantity of 25 pounds or more, at.....18C.

Hog Casings in Pound Lots or More

Bulk Oysters. Any cut of Meat you want.

Moves Stock To Larger Quarters

I am now located in the store room vacated by the Rice Drug stock and assure my customers an increased stock from which to make their needed purchases. Call and see me. Dr. B S. Sheffer.

Ma Ferguson begins to act as if she might get to the point of taking some of the favorite sons of Texas to the woodshed.

Newton Perry was in town Monday. He has been in Northern Michigan for the past year. He is visiting in the Walter Baker home at Concord.

A universal fishing license law is being urged and recommended for Indiana. This would make it necessary for every fisherman to purchase a license. At present fishermen do not have to possess licenses to fish in their own or adjoining counties. As the law now stands, the man who hunts is standing all the expense by his license fee and his money is not being used to furnish game, but instead is used to furnish stock for our streams and the nimrod is the beneficiary. Let everyone who enjoys these two sports help support it.

Coal! --Coal-- Coal!

Now is the time to lay in your coal. We have always tried to give you the best advise as to best time to buy and we now firmly believe this is the time to get busy and prepare for the winter.

Feed

Mr. Hog Raiser, we have a good line of feeds on hand, also car of ear and shelled corn. If you need any give us a call.

Grain

We are paying highest market prices for all grains and will be pleased to have you bring us your grain.

The St. JOE ELEVATOR

Samuel Keesler, Mgr. Grain Dept. **Bert Jackson,** Mgr. Coal Dept.

Note—Pay your accounts. They are due now.

GIFTS FOR ALL

EVERY member of the family, and friends as well, may be remembered with gifts selected from this store, for the variety of choice afforded by the ample display of items suited to giving enables every need to be supplied economically and well.

Before starting your list you should plan to come here and see the many suggestions offered. It will aid you in making your list and save you time and money. Kinsey's store has a reputation of always meeting the buyers needs with substantial merchandise, and this year is no different. New goods are arriving.

Famous Actress Recovers Gives Dr. Bismola Credit

"For the past year I tried everything I knew to get relief from Indigestion, Dyspepsia and constant Stomach Trouble. I became so discouraged and worn out that I considered giving up the stage." So writes this popular favorite. "But thanks to an acquaintance telling me about that wonderful discovery, 'Bismola,' I have regained my appetite, sleep soundly, my indigestion has disappeared. I no longer look worn and drawn out, but feel as young and well as ever. It is a renewed joy to live and act."

If you are suffering from Indigestion, Dyspepsia or gas on your stomach, you can be relieved. Letters of praise are daily coming into the laboratories. Some of them write that for years they have felt more dead than alive and simply drop us a note in appreciation of what Bismola has done for them.

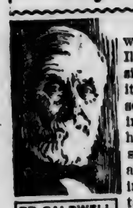
Bismola does not perform miracles. Take it as the directions state and you will feel your old time vigor and vitality returning. It's possible that Bismola may not just suit your case. If so, you have simply to ask for refund. We have never had any cause to withdraw this guarantee.

Bismola is the prescription of a famous physician. It's now obtainable in convenient form due to the continued solicitation of hundreds of grateful patients of this famous stomach specialist. Thousands have written, "I tried everything but Bismola was the only thing I have found that gave me permanent relief."

Mail one dollar (the fraction of a penny per dose) to The Humma Laboratories, Dept. B, Franklin Bldg., Baltimore, Maryland, for a convenient medicine chest size of this remarkable stomach relief.—Adv.

Many will suffer if you are not true.

It's Cruel to "Physic" a Child



DR. CALDWELL AT AGE 83

To Dr. W. B. Caldwell, of Monticello, Ill., a practicing physician for 47 years, it seemed cruel that so many constipated infants and children had to be kept constantly "stirred up" and half sick by taking cathartic pills, tablets, salts, calomel and nasty oils.

While he knew that constipation was the cause of nearly all children's little ills, he did not believe that a sickening "purge" or "physic" every little while was necessary.

In Dr. Caldwell's Syrup Pepsin he discovered a laxative which regulates the bowels. A single dose will establish natural, healthy bowel movement for weeks at a time, even if the child was chronically constipated. Dr. Caldwell's Syrup Pepsin not only causes a gentle, easy bowel movement but, best of all, it is often months before another dose is necessary. Besides, it is absolutely harmless, and so pleasant that even a cross, feverish, bilious, sick child gladly takes it.

Buy a large 60-cent bottle at any store that sells medicine and just see for yourself.

Dr Caldwell's SYRUP PEPSIN

Grow Hair on Your BALD HEAD

BARE-TO-HAIR
A Blessing to Mankind

Paul Bonor, Pitcairn Ave., Jeannette, Pa., had Alopecia, which left him without hair on any part of his head. Used four bottles of Bare-to-Hair. Now has a full growth of hair as shown on the photo. THE WINDIGO

SYNOPSIS.—With David, half-breed guide, Brent Steele, of the American Museum of Natural History, is traveling in northern Canada. By a stream he hears Denise, daughter of Col. Hilaire St. Onge, factor at Walling River, play the violin superbly. He introduces himself and accepts an invitation to make the post his home during his stay. He finds the factor worried and mystified. The "log chateau" is a real home. From St. Onge he learns of the mysterious creature of evil, the windigo, and the disappearance of a canoe and its crew, with the season's take of furs.

CHAPTER II—Continued

She shook her head, wistfully. "At the Conservatoire they had planned for me—a career, but father was coming out to Canada—and I could not have him come—alone."

"She was the favorite pupil of the great Mario," announced St. Onge, proudly, "but her love for her old father could not suffer a separation, so she is sharing with me—" the Frenchman rose and nervously paced the room, then, with a gesture of hopelessness, finished, "the loneliness and the—hell of this spirit-ridden valley."

Steele's eyes were on the fine profile of the girl as she followed her father's nervous pacing. Frankly ignoring his presence, she made no effort to conceal the solicitude pictured by her sensitive face. What a sacrifice she had made! To give up career, life—all that people, cities, civilization mean to the artist—how could St. Onge have permitted it? What a tragedy he had stumbled on at Walling River!

"I've told David he could go down the river with Michel, sir," Steele hastened to change a too painful subject.

"They will find nothing, monsieur."

"Has Michel told you exactly what they are going to look for, Colonel St. Onge?"

The factor stopped his pacing. "Why, what is there to seek, monsieur, except the evidence which has escaped us?"

"Based on a familiarity with the way David's mind works, coupled with an idea of my own, my guess is that they will not spend much time following the shore."

St. Onge's black eyebrows lifted in surprise. "What do you mean; they are going into the back country?"

"Precisely."

"What for?"

"To find a trail!"

"A trail—through the muskeg? But they couldn't get out that way. A trail leading where?"

"That's what puzzles me, colonel."

"Oh, you are wrong! My men never stole that fur. We shall find something yet to prove they were broken up in the big rapid—"

"And then, father, it may be too late," added the low voice of Denise St. Onge.

The bronzed face of the old soldier noticeably reddened at the remark, but he avoided his daughter's eyes.

It was Greek to Steele—this innuendo, and besides, he was hungry for music. "Please, mademoiselle, just a little more—if you are not too tired," he begged.

But the gay mood was not to be recaptured. She shook her head, put aside her bow and violin, and with chin in hand sat with brooding eyes on the bearskin rug at her feet. As the factor talked of the trade, the glance of his guest shifted constantly to the masses of the girl's hair, stray tendrils of which caught and held the light of the candles; to the hand of the artist, with its tapering fingers, which masked her cheek; to the trim foot, in the house moccasin, and rounded ankle; and within him was born the determination to help this girl in her secret trouble, if the aid of a stranger were possible.

Shortly, with a few words of apology, she bade them good night.

With a sigh, as she left the room, the factor went to a cupboard and produced a bottle and two glasses.

"You will honor me, monsieur, by joining me in a glass of cognac? This, and the books, I insisted on having if I were to be exiled to this valley."

Steele poured himself a modest drink. "It is not right, colonel, that you should squander this good stuff upon me. In a few weeks I shall be in New York, while your supply is limited."

"It is not wasted if appreciated," protested St. Onge, "but I fear you have a suspicion of it; you have hardly a taste there," and he deliberately filled his own glass, and raising it with the toast, "Your health, monsieur, and the devil take the Windigo and their friends!" swallowed the brandy.

It was not long before the potent spirits asserted themselves in the Frenchman's manner, which grew appreciably warmer.

"Monsieur Steele," he said, "you doubtless ask yourself why I, a retired colonel, in the army of France, should find myself a trader of fur for the Revillon Freres in Canada—should have brought a girl, educated, refined, to this wilderness?"

"It was, of course, a surprise, sir, to find a woman of the charm—of the remarkable musical talent of your daughter here, in this valley. It is marvelous—her playing. She should have a career, sir."

"Yes, a career!" echoed St. Onge, as he poured himself another drink, "and she has lost it, lost it because she would not leave me."

The liquor had aged the once handsome face of St. Onge. Lines multiplied about the eyes and mouth as he slouched in his chair. All trace of the soldier had vanished; in his place sat a man, broken—conquered by life.

"You have not been in Canada long?" Steele ventured, hoping that the Frenchman would now talk more freely.

"Four years. I was a year at Albany—at school, you might say, learning the ways of the trade. Then they sent me here."

"You found it hard—this life in the North—after France?"

The factor straightened in his chair. His dark eyes snapped. His face stiffened. He looked the leader of men. "Hard, monsieur? I have faced

She Shook Her Head Wistfully.

hardship all my life—in Algeria, Senegal, the Sahara. It's not the hardship here, it's the humiliation, for one who has led his regiment of cavalry in two Moroccan campaigns, to receive the orders of a former sous-lieutenant."

"You mean Lascelles, at Albany?"

"Yes!" St. Onge was patently laboring under strong excitement. It seemed to Steele that a revelation was imminent, but the factor turned to the bottle. "Monsieur," he protested, "you do not flatter my cognac!"

"I am enjoying it, sir," replied Steele, pouring himself a drink to humor his host, to which he added water, for the brandy was powerful. That the cognac habit was an old story with St. Onge was evident, and the younger man wondered what relation a fondness for strong liquor had to St. Onge's presence in Canada. Then he opened abruptly:

"By keeping this post active, under the conditions here in this valley, Lascelles must have realized the chances he took. I cannot understand a fur-trader of judgment doing such a thing."

The face of the Frenchman hardened. "Why this post was built in this place, I do not know; but I do know why Lascelles sent me here." St. Onge leaned toward Steele as he repeated bitterly, "He sent me here—to ruin me."

"To ruin you!" gasped the other. "I don't understand. It is to his interest as an inspector that every post in his district should make a profit." Then he suddenly remembered the mysterious statement of Michel. "M'sieu Lascelles ees no fool; he not keep eet for fur; he keep eet for noder reason." That explained it; the head man knew. "But why?" pressed the curious Steele.

The factor rose and paced the floor, his hands working nervously. Turning impulsively to the man he had met but a few hours before, he exclaimed: "Why I am telling you this, I do not know. It is an affair the most private, but I am alone with my troubles—and you are a gentleman—a man of heart. You will understand."

Steele tingled with expectancy.

"It surprised you to hear that I was sent here to make a failure of the trade, but that is the truth," went on the factor.

"But for what reason, sir?"

St. Onge shook with emotion. "Because that canaille at Albany desires to marry my daughter!"

Steele wondered, now, why he had not guessed. Of course, the failure of St. Onge as a trader would put him into the hands of his superior at Albany, so he had been sent to the doomed fur post on the Wailing.

"You will leave the company, then?" he hazarded, sick with thoughts of the girl who was the stake in this mad game of Lascelles.

"I must, if I fail here. Up to this year, I have beaten him, in spite of the odds—shown a small profit. And this year, at Portage Lake, we had a good trade—better than ever before—in spite of Laflamme. But the loss of this fur canoe destroys our four years' profits. Monsieur, I am a ruined man."

There was little Steele could say. For a space St. Onge walked the floor with his bitter thoughts, then he began:

"We have been a proud family, the St. Onges. My grandfather fought under the great Napoleon. My father was killed at Sedan. We have always been soldiers, bearing an honored name, but I, the last, am unworthy of it. Cards and this," pointing to the bottle, "have done it. They lost me my old home in Touraine; my poor wife died while I was deep in the Sahara, at Lake Tchad. She is all I have left—Denise." The voice of St. Onge softened as he spoke of his daughter. Then he finished fiercely:

"Give her to that bourgeois! Never!"

Conscious of the fact that the voice of the enraged factor carried to the remotest corner of the house, the embarrassed Steele rose to check further revelations which could prove only a source of pain and mortification to the girl who heard them.

"It is very late, sir—we may be disturbing your daughter," and he offered his hand with a "good-night!" when the pat of moccasins drew the attention of both men.

Clothed in a loose garment, caught at the waist by a Cree sash, her wayward hair in a great coil at the nape of her neck, Denise St. Onge stood in the doorway. She was a figure of peculiar beauty and dignity as she calmly said: "Father, Monsieur Steele doubtless desires to rest after his long journey. It is late."

St. Onge pulled himself together "Pardon me, monsieur, you are tired Good-night."

Red with confusion, Steele met the level eyes of the girl who had heard her personal affairs so intimately discussed with a stranger, and marveled to find there no humiliation, no anger, as he murmured a good night and sought his room.

There, for a time, he sat smoking, as he watched the moon drift down to the purple ridge beyond the river. His thoughts traversed the events of the day; the meeting with Denise St Onge; the news of the loss of the fur canoe and the panic of the post Indians; the startling revelation by the factor of what the future might hold for him and the girl downstairs. As for this fur canoe—St. Onge was palpably holding back something there But what? And his daughter—had he told the whole story? Could it be that she had already bound herself to Lascelles, to save her father? That would account for the heartache, but not for the fear he had seen in her eyes at the rapids. Fear of whom? Would the old soldier, in spite of his protestations, allow her to sacrifice herself? This Windigo matter—what a rare chance for a first-hand study of the Ojibway superstition! What a monograph it would make for the museum! There was certainly much to do here until they were forced to race the ice down to Nepigon.

Steele undressed and was soon asleep. Presently, from a dream in which timber wolves in full cry were running an old caribou across a frozen lake, he waked to find himself sitting upright in his cot. Across the valley floated a low wail. The man stirred For a space the hush of the forest night returned. Then from the somber shoulder of the ridge rose sobbing as of a creature in torment.

Wide awake now, nerves tingling Steele sprang to the window. The voice ceased. The man waited, expectant. Was it a trick of his senses, had he dreamed it, or— Then the eerie wail filled the night with horror, rising in wild crescendo to climax in a demoniacal shriek.

The brain of the excited and mystified man at the window was working swiftly. "Lynx," he muttered, "No; Wolverine? No, not at this time of the year. Wolf? Impossible!" Then his mouth shaped a grim smile. "The Windigo!"

Apparently the Windigo is performing for Steele's benefit. What can the thing be?

(TO BE CONTINUED.)

All Ages Poetic

For my part, I can call no age absolutely unpoetic; how should it be so since there are always children to whom the acorns and the swallow's eggs are a wonder, always those human passions and fatalities through which Garrick as Hamlet in bob wig and knee breeches moved his audience more than some have since done in velvet tunic and plume? . . . To be quite fair toward the ages, a little ugliness as well as beauty must be allowed to each of them, a little implicit poetry even to those which echoed loudest with servile, pompous and trivial prose.—George Eliot.

Lesson for December 13

PAUL IN MELITA AND ROME

LESSON TEXT—Acts 28:1-31.

GOLDEN TEXT—I am not ashamed of the gospel of Christ: for it is the power of God unto salvation, to every one that believeth."—Rom. 1:16.

PRIMARY TOPIC—Paul the Helper.

JUNIOR TOPIC—Paul in the World's Capital.

INTERMEDIATE AND SENIOR TOPIC—A Prisoner Preaching.

YOUNG PEOPLE AND ADULT TOPIC—The Power of the Gospel.

I. The Shipwreck on Melita (vv. 1-10).

Through the storm they lost their bearings, and when they were safe on land they learned that the island was called Melita. Their experiences here may be noted as follows:

1. The Hospitable Reception of the Natives (v. 2).

They built a fire and made the shipwrecked people as comfortable as possible in the cold and rain.

2. Paul Gathering Sticks for a Fire (v. 3).

The world's greatest preacher and missionary, yet he was not above picking up sticks for a fire. All along the journey Paul busied himself in doing all that he could to help some one. Any service rendered in the right spirit is holy work.

3. Paul Bitten by a Venomous Serpent (v. 3).

Among the sticks that Paul gathered was a serpent. Perhaps it had already coiled itself up for its winter's sleep, but aroused by the warmth of the fire, it darted at Paul and fixed its fangs upon his hand. This was a serious thing. The natives expected to see him fall down dead, yet he shook it off, unharmed. At first the natives concluded that he was an escaped murderer, and that retributive justice was being meted out to him. When they saw he was unharmed they concluded that he was a god. In the popular mind a man soon passes from a murderer to a god, or more frequently the reverse is true.

4. Paul Heals Publius' Father (vv. 7-10).

These people now received some return for their kindness. When this man of note was healed, others came and were healed also.

II. Paul's Arrival At Rome (vv. 11-10).

When Paul reached Rome Christ's charge to the disciples was fulfilled. After three month's stay at Melita Paul departed for Rome in the ship of Alexandria, whose sign was Castor and Pollux. At Syracuse they were delayed three days, perhaps for favorable winds. At Puteoli he found brethren at whose request he tarried seven days, after which he again set his face towards Rome. At Appii forum and at Three Tavers brethren from Rome met him. From Puteoli the news went before of Paul's coming, and so interested were the brethren that they came for more than forty miles to meet him. This greatly encouraged him and he gave God thanks. He greatly craved the fellowship of other Christians and was much helped thereby. This was the first city in all his missionary life that thus welcomed him. It was typical of the welcome that was given to the gospel by the Gentile world. He was treated with great leniency at Rome for he was allowed to hire a house and live apart, except that his guard was constantly with him. Being chained to a soldier was rather irksome, yet it gave him a chance to preach to the soldiers, which he could not have had in any other way.

III. Paul's Ministry In Rome (vv. 17-31).

1. His Conference With the Leading Jews (vv. 17-22).

He did not as usual, wait for the Sabbath day to speak to the Jews. He allowed only one day for rest, his object being to have a fair understanding with them. When they came he endeavored to conciliate them. He told them that though he came as a prisoner, he was not a criminal. Though his own countrymen had sought his life he did not come with accusations against them. The result of this interview was that the Jews cautiously took neutral ground, but expressed a desire to hear what Paul could say in defense of a sect which was everywhere spoken against.

2. Paul Expounding the Kingdom of God and Persuading Concerning Jesus (vv. 23-31).

He pointed out a real kingdom—the Messianic kingdom with the historic Jesus as the king. The kingdom to Paul meant a definite reign of a definite person, not simply an improved state of society. This he showed from the Scriptures.

Small Things; Great Things

You are waiting to do some great thing; you are waiting to pull down some great evil. Perform the small things that are unseen, and they will bring other and greater things for you to perform.—John Bright.

Leading Us Along

In denying ourselves, Jesus is not asking us to limit ourselves. He is, rather, leading us along the road in which we shall find self.—G. Glenn Atkins.

Speechless amazement is one of the things that go without saying.

Pimples

What can I do?

"OH, why can't I have a skin like other girls? Why do I have to have these ugly pimples, blotches and blackheads?

"If I could only find something that would clear up my skin and give me back my soft, rosy complexion, I know I would be the happiest girl in the world! What can I do?"

Is that you talking? If it is, you don't have to worry a minute! Just build up the rich, red blood in your body. Then your skin will be as clear and soft as anybody's.

That's what S. S. S. has been doing for generations—helping Nature build rich, red blood! You can build red blood-cells so fast that the impurities that cause breaking out on the skin hardly get into the system before the pure blood annihilates them—kills them right out—stops them from breaking out through the skin.

And then this rich, red, pure blood feeds and nourishes the tissues of the skin and keeps it looking healthy.

That's all there is to it. Healthy, vigorous, red blood such as S. S. S. helps Nature build, makes you healthy all over. It beautifies your skin—drives away pimples, blackheads, blotches, rash, boils and eczema—gives you back your appetite—builds firm, plump flesh and fills you full of new life and energy.

RADIO

Showing Expert at the Laboratory of the Bureau of Standards Demonstrating Rejuvenation of Electron Tubes of Thoriated Tungsten Filament Type.

Radio tubes, like some of the older humans, eventually lose their "pep" under the strain of constant work and require a rest the need to be rejuvenated. This rejuvenating process, as applied to vacuum tubes, is not as serious an operation, however, as the one some humans undergo in the search for youth.

It is known as "reactivation" and is said by the bureau of standards radio experts to renew the sensitivity of electron tubes of the thoriated tungsten filament type.

Concerning this method of reactivation the bureau has issued the following report, so skilled listeners can "pep up" their tubes themselves:

"Electron tubes in radio receiving sets eventually lose their sensitivity. This sometimes progresses to the point where the receiving set operates very poorly or not at all, even though the tube filament is not burned out. The user of the set frequently confuses this condition with that due to an exhausted "B" battery. If the tubes are of the thoriated tungsten (X-L) filament type they can usually be rejuvenated by a simple process, and made to serve as well as new tubes in the receiving set.

Two Cannot Be Reactivated.

"It happens that most of the tubes now used are of the thoriated tungsten type, and it therefore becomes of quite general interest for the public to know how to secure the full life of their electron tubes. The WD-11 and WD-12 types of tubes are the only ones extensively used which cannot be reactivated. In these tubes the source of the electrons is a coating of certain oxides on the surface of the filament, and when this has been used up no process can renew it.

"The thoriated tungsten filaments, however, used in most of the various other types of tubes, contain the oxide of thorium throughout the whole mass of the tungsten filament, this oxide having been originally put in incandescent lamps to keep the filaments from being too fragile. The filaments are given a treatment which produces a layer of atoms of thorium on the surface of the tungsten, and this thorium, which is radioactive, emits electrons much more copiously than the tungsten would. After long use, or after burning the filament too brightly, the layer of thorium atoms is evaporated off, and so few electrons are then emitted that the tube does not function properly. Reactivation is a process which boils additional thorium atoms out of the interior of the tungsten filament and forms a new layer of thorium atoms on the surface.

Method Is Successful.

"The thoriated filament was developed by the General Electric company, which has also developed the methods of reactivating tubes of this type. The bureau of standards has found that the reactivation process is quite successful, and frequently makes a wonderful difference in the results obtained with a receiving set. The process is essentially the operation of the filament for a very brief interval at a specified high voltage (called "flashing"), followed by a lower voltage for a longer time (called "aging"), all of this with no grid or plate voltage. The flashing reduces some of the thorium and the aging forms the required surface layer. The following schedule of these operations is the result of extensive experience of the Radio Corporation of America, and is published here by courtesy of that company:

FLASHING.		
Radiotron	Filament Voltage	Time
UX and UV 199	10 volts	30 sec.
UX and UV 201-A	15 volts	1 min.
UX-120	10 volts	1 min.
AGING.		
Radiotron	Filament Voltage	Time
UX and UV 199	4.5 volts	10 min.
UX and UV 201-A	7.5 volts	10 min.
UX-120	4.5 volts	10 min.

"Exactly the same procedures apply for C and CX tubes as for the UX tubes of corresponding number. Thus, C and CX-299 correspond to U and UX-199, C and CX-301-A to U and UX-301-A and CX-220 to UX 120.

"In carrying out this schedule it is absolutely essential to have a voltmeter of a good degree of accuracy and to use a watch. No grid or plate voltages are used. Either alternating or direct current may be used for heating the filaments.

Tubes Need Treatment.

"It is important that reactivation not be attempted until the tube user has assured himself that the tubes actually need this treatment; that is, he should make certain that his batteries are not run down and that other parts of the receiving set are in proper order. The schedule above should be followed with great care. The process is useful only for the thoriated tungsten filament type of tubes.

"The apparatus necessary for carrying out the process is simple. The filament is connected to the necessary source of voltage, nothing being connected to the grid and plate. A voltmeter is connected across the filament terminals. If alternating current is available the source of voltage can be a small transformer, such as those for running doorbells or electric toys. The voltage tap nearest the voltage specified should be selected and a rheostat in series with the filament used to adjust to the exact voltage. The voltmeter must be one for alternating current.

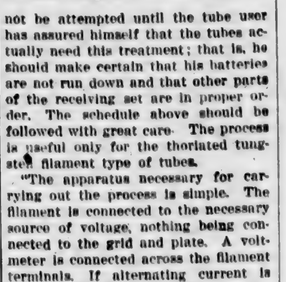
"If alternating current and a transformer are not available, dry batteries or storage batteries may be used as a source of voltage. A single dry cell when new will furnish approximately 1.5 volts. A rheostat should be connected in series to give the exact filament terminal voltage as indicated on a direct-current voltmeter.

"There are several manufacturing companies that advertise tube reactivators at varying prices. Radio dealers are beginning to give tube reactivation service."

"C" Battery Valuable in Audio Amplifier Unit

While most of the new radio set models employ the "C" battery unit in their radio amplifier units, a great many of the sets now being used by radio fans were built without this valuable unit. The use of a "C" battery will increase the efficiency of any receiver, and reduce the cost of its operation. It eliminates a great deal of distortion when a heavy "B" battery voltage is applied to the amplifier plates.

It is a very simple operation to install a "C" battery in any receiver. All that is necessary is to disconnect the filament terminals (usually marked



How to Connect "C" Battery in Audio Circuit of Receiver.

"F") of the transformers from the rest of the circuit. Then connect the two "F" terminals together and lead this to a binding post for the negative "C" battery terminal. This is shown in the accompanying diagram.

The positive teminal of the "C" battery can be connected to the regular "A-minus" post of the receiver as shown in the diagram.

For "B" battery voltages of from 45 to 67 use 4½-volt "C" battery. This may be procured in a small block at any of the local shops. For voltages above 67, at least 6 volts of "C" battery should be used.

"The "C" battery, which draws but very little current in its operation, will last a considerable length of time. It will probably be necessary to renew it but once a year.

Reverse "A" Connections

A sudden dropping off of signal strength may be caused by a weakening of the "A" battery. The storage battery, when it needs a recharge, generally drops suddenly, and the lowest brilliancy of filament indicates a weakening current. No matter what type of circuit is employed it is always a good idea to reverse the "A" battery connections. Some sockets have the positive and negative signs marked incorrectly, so to verify the proper contacts for the battery the connections should be reversed.

The Old Standby in a New Dress

The New Package

—the same dependable remedy that over a period of more than fifty years has been found so reliable in the treatment of catarrh and diseases of catarrhal nature.

The outside of the package only has been altered. To facilitate packing and reduce breakage in shipping, the paper wrapper which has identified the Pe-ru-na bottle for many years has been displaced by a substantial pasteboard carton.

Pe-ru-na cannot be made any better. Three generations of users testify that Pe-ru-na is the best remedy in the world for catarrh and diseases of catarrhal origin.

The remedy our fathers and grandfathers used with so much satisfaction is still the standby for the ills of everyday in thousands of American homes.

The hardest things in the world to keep are your money and your temper.

Through much enduring come things that cannot be endured.—Latin Proverb.

"Why, Uncle Jim! You look ten years younger!"

"When I saw you a couple of months ago, I made up my mind you were getting old. At least you looked it."

"Yes, Billie, and I felt old. No appetite, couldn't sleep nights—one day just like another, and none of them any good. I knew constipation was at the bottom of it, but it seemed the more laxatives I took the worse I got. Then one day I saw Nell giving Nujol to my little grandson. The doctor had prescribed it for the baby, but I found out it's just the thing for old fellows like me, too.

"I tell you, Billie, it keeps me feeling fine all the time. My appetite's back and I sleep like a child. If I look any younger, Nujol gets the credit."

Nujol helps Nature in Nature's own way

Middle age brings on a decrease in the natural lubricating secretions in the intestine. Then you need Nujol. It supplies the deficiency of the natural lubricant. Medical authorities approve Nujol because it is gentle, safe and natural in its action.

Constipation is dangerous for anybody. Nujol is safe for everybody. Nujol simply softens the waste matter and thus permits thorough and regular elimination without overtaxing the intestinal muscles. It is not a medicine.

You can take Nujol for any length of time without ill effects. It should be taken regularly in accordance with the directions on each bottle. Unlike laxatives, it does not form a habit and can be discontinued at any time.

Ask your druggist for Nujol today and begin to enjoy the perfect health that is possible only when elimination is normal and regular.

The appointment of a guardian for Catherine Hart, wife of Aaron Hart of Spencerville, is sought in a petition filed in the DeKalb circuit court by Harmon G. Fredrickson. Mrs. Hart is eighty-eight years of age and the petitioner states that because of old age and infirmities she is unable to manage his affairs.

The Rayo Class of the Methodist Sunday School was entertained last Wednesday evening at the home of Mrs. Pearl Farver. At this meeting they elected their officers for the year as follows:—Teacher, Mrs. Clyde Rectenwal; Assistant, Mrs. Sudie Howey; President, Theresa Kelley; Vice, Elsia Fisher; Secy—Treas., Mrs. Lena Zimmerman.

Spencerville H. S. Glee Club Concert

The people of Spencerville were very agreeably surprised Friday night, December 4, by the program presented by the Spencerville High School Glee Club. Th program consisted of songs, one act plays and a pageant. All the numbers were highly applauded. The stage sets and lighting, the property of the director, were very unusual.

Peter, a one act play, presented by Howard Beams, Ada Bowser and Marjorie Furnish, surely kept the audience in an uproar. It alone was worth the price of admission.

The Five J's, another one act play, won the approval of all. It was presented by Lillian Steffey, Edith Place, Frankie Allen, Janice Wade and Gladys Agler.

Mr. Ashby's Chalk Talk proved so popular that he was compelled to answer to an encore.

The crowning number of the evening was a pageant, E. Pluribus Unum. This number was arranged by Mr. Ashby. It was, of course, specially costumed.

All Spencerville is now eager for the second appearance of the Glee Club.

NEWVILLE

Jack, the little son of Malcolm Richmond and wife, is ill with pneumonia.

Byron Miller has his garage finished, and it has been remarked that the building is nice enough to live in. Byron, no doubt, will live in it a part of the time.

Christmas Morning

By EUGENE FIELD

THE angel host that sped last night,
Bearing the wondrous news afar,
Came in their ever-glorious flight
Unto a slumbering little star.

"Awake and sing, O star!" they cried,
"Awake and glorify the morn.
Herald the tidings far and wide—
He that shall lead His flock is born!"

The little star awoke and sung
As only stars in rapture may.
And presently where church bells hung
The joyous tidings found their way.

'Awake, O bells! 'tis Christmas morn—
Awake and let thy music tell
To all mankind that now is born
What Shepherd loves His lambkins well!"

Then rang the bells as fled the night
O'er dreaming land and drowsing deep,
And coming with the morning light,
They called, my child, to you asleep.

Sweetly and tenderly they spoke,
And lingering round your little bed,
Their music pleaded till you woke,
And this is what their music said:

'Awake and sing! 'tis Christmas morn,
Whereon all earth salutes her King!
In Bethlehem is the Shepherd born,
Awake, O little lamb and sing!"

So, dear, my child, kneel at my feet,
And with those voices from above
Shall thou this holy time with me,
The universal hymn of love.

Brice's Christmas at Old Farm Home

Jolly Girl Gives Uncle and Aunt and Young Friends Happy Surprise.

By FRANK HERBERT SWEET

BRICE HARPER stepped happily from the train. A whole month vacation, with Christmas only ten days away. That meant nearly three weeks for after-Christmas jollification, skating, visiting around, and curled up before the big fireplace popping corn and reading and talking—just playing lady. After three steady, grinding years in the department store it would be heavenly. Wouldn't Aunt Margaret and Uncle Jack be surprised and pleased! It was to be a surprise. She had not written them.

She flashed a look down the platform. Yes, there was wooden-legged Sam, the expressman, peering into the baggage room for possible business.

"Hoo-hoo!" she challenged.

The old expressman looked up, stared, then stumped forward.

"Brice Harper, for a fact!" he cried. 'Back home ag'in. Come to stay, or a-visitin'?"

"Just visiting, Uncle Sam. A whole month, though. After three years. I'd never have believed I could stay away that long. I want you to take my trunk right out, and I'll ride with you."

"Ain't ye heered—had a letter nor nothin'?" asked the old man, whose face had been growing troubled.

"N-no. Anything the matter?" with sudden anxiety.

"No, except they ain't there. Folks round here know all other folks do, ye recollect. So I did hear your Aunt Marg'ret Holmes said Christmas was so lonesome here she wouldn't spend another like the last. Two, three days ago she an' your Uncle Jack went over into the next county to spend Christmas with a cousin who has a reg'lar passle o' children. I was by there yesterday, an' the house did look dismal, all shet up, with hens an' turkeys complainin' all over the place."

"Isn't there anyone to look after them?"

"One o' the Dill boys was asked to, I b'lieve, but he's neglectin' 'em shameful. He—"

A shrill hail came from a store across from the station.

"Say, Brice," wheedled the old expressman, "would ye mind waitin' three

"Take the Box Over, Uncle Sam," She Said.

or four seconds? That mad shouter was storekeeper Tomson. Been 'spectin' a box o' Christmas stuff more'n a week, an' 't was just throwed off this train. He was yellin' to me. S'pose I take the box over to him, then come an' carry you and the trunk out to one o' your girl friends? They'll all be glad to have ye visit 'em."

But Brice had been thinking rapidly.

"Take the box over, Uncle Sam," she said, "and I'll run across to the post office while you're gone. I want to write some postals. And no, I won't embarrass any of my girl friends. You may carry my trunk right out to the farmhouse. I know where Aunt Margaret hides the key. And I know she and Uncle Jack would want me to go right there and use everything as my own. I'll take care of the poultry," enthusiastically, "and I'll bake one of the turkeys for Christmas, and cook everything that goes with it, pies and cakes and all. Won't it be fun!"

"You can invite a lot of your girl friends to eat with you, too," grinned the expressman.

"Afterward," agreed Brice. "They will all want to eat at home on Christmas. Then we'll have a round of nice visiting. But for the real Christmas I'm going to depend on the postals. There are lots of nice girls in the department store who haven't any home, and who will have to depend on the cheap boarding houses they live at. I'll write a postal to Aunt Margaret, and five or six to girls I know will be glad to spend their week or ten days vacation with me. And say, Uncle Sam, I'll look around the house, and then make a list of groceries and other things I want you to bring out, and—any place where I can buy a Christmas tree?"

"Ain't none better than grow right down on your uncle's lower shed meader."

"All right. I'll get the Dill boy to help, and we'll cut and rig up a nice one—Or no, I'll wait a few days until some of the store girls come. If they feel like me—and I know they will—they'll want to help get the tree, and trim it, and to help cook the dinner."

"Need any Christmas present stuff?" chuckled old Sam. "Tomson's been sayin' he was havin' the grandest holiday goods ever opened up here, comin' in that box. Mebbe ye'd like to see him pry the cover off."

"'Deed I would," promptly. "I'll be right over from the post office."

The girls condemned to a prospective boarding house Christmas accepted Brice's invitation relievedly. On the third day old Sam brought the hilarious five out in his ancient express wagon. In the three days Brice and the Dill boy had been making the house ready

"Greens Were Found at the Edge of the Swamp."

for them and looking over the root and apple cellar and preserve closet with an eye to Christmas.

Then the girls plied in like a whole jolly Christmas in itself, and the old farmhouse seemed like to burst itself. The Christmas tree was cut and drawn home with all the appropriate songs and carols and huzzas they could think of, and trimmed as never a Christmas tree had been trimmed before. Greens found among the leaves at the edge of the swamp, a small holly discovered, and a sprig of mistletoe bought at some store. The kitchen became filled with fragrance and song, the evening crackled with popping corn, rang with voices about the awakened organ, and the fireplace glowed with the logs behind and the half circle of baking apples in front.

And then right in the midst of it the hearty voice of Uncle Jack roared through the door, mellowed by the softer, happy laugh of Aunt Margaret that accompanied it.

"I'm going to have that dinky post office over yonder indicted," guffawed Uncle Jack. "Kept that postal four days before the R. F. D. delivered it. Fifteen minutes after that we were on our way. Of course we had to come. Five more girls to help wake the old house up. Whoopee! Why didn't you write so we needn't have left the lone some place?"

"Why didn't you write you were going away, so I'd have known what to expect?" retorted Brice.

"Lucky none of us didn't," laughed Aunt Margaret, "for then we might not have these nice five extra girls. But come, I must get into the kitchen."

"But we've cooked and cooked and cooked, till—"

"Not enough," declared Aunt Margaret firmly, "no matter how much you've done. There are all your old friends that must be invited to come, though they would, anyway. And we want your friends here to meet 'em. Then we must invite a lot of extra young people in evenings to help keep things going. Then—my land! if I hadn't forgotten! There's a wagon load outside. Where's Jack? Oh, I guess he's gone out to look after 'em. You see, Cousin Mary didn't want us to leave, being nigh Christmas. So we brought 'em all along. Not any danger of havin' too much to eat. Then there ain't much Christmas goods over in the next county, so Jack's goin' into town this evenin' to buy more."

"But, Aunt Margaret, we've got a tree ram-jammed full," explained Brice.

"Not enough," firmly. "We can pack more on the floor under it. Now I'm goin' into the kitchen. Can't you see, girls," her firm voice suddenly dropping pathetically; "being Christmas I've just got to cook something."

(©, 1925, Western Newspaper Union.)

Seen and Heard In Indiana

August Van Hoy, Charles Enmeier and August Marco, miners, employed at the Columbia mine at Bicknell, were terribly burned in an explosion of several kegs of powder at the mine.

Seven new cases of scarlet fever, reported at Evansville in the last 36 hours, brings the total of cases to 90. Dr. Wallace Dyer, city health officer, says the situation is becoming serious.

Plans for the reconstruction of the Chicago, South Shore and South Bend railroad were announced at South Bend by Samuel Insull, Jr., in an address before members of the chamber of commerce.

Phases of Indiana history from the time of the mound-builders to the final development of the Calumet region will be authoritatively commented on at the seventh annual Indiana history conference, to be held at the Claypool hotel at Indianapolis December 11 and 12.

Every effort is being put forth by Evansville health officers to check the epidemic of scarlet fever in Evansville and Vanderburg county. It is reported there are more than forty cases of the disease in the city and approximately twenty throughout the rural communities.

Three youthful highwaymen armed with shotguns and wearing black masks held up 12 men in a soft drink stand four miles northwest of New Albany, known as the "Shack," and robbed them of approximately $500 in money and $250 in watches and jewelry.

A mock duel with supposedly unloaded revolvers sent Albert Tuggle, sixteen years old, to a Gary hospital with a serious abdominal wound. A gun, in the hands of Mitchell Trimble, eighteen years old, was discharged into his side. Hospital attaches think he will live.

Word was received in Indianapolis of the sudden death of Lloyd W. Henley, secretary of the Presbyterian ministers' retirement fund, at the desk of his New York office. Death was due to a stroke of apoplexy. He was fifty years old. For more than a decade Mr. Henley was a prominent figure in Indiana state politics.

Gary's city council held a special, secret session and stole a march on its rival city, Hammond, by passing an ordinance annexing all unincorporated parts of Calumet township, an area of more than thirteen square miles. The city's area is increased to 64 square miles, making it geographically larger than Indianapolis.

The Indiana Telephone and Telegraph company, a concern that is backed by practically the same interests that back the Indiana Bell Telephone company, filed a petition before the public service commission at Indianapolis asking the commission's approval of a schedule of revised and increased rates for patrons of its exchanges at Clinton, Dana and Hillsdale.

It is proposed to authorize in a public buildings and grounds bill the expenditure of $180,000,000 at the rate of $30,000,000 a year, in order to carry out the authorizations under the 1913 act, about half postponed because of the World war, and also to build on about 159 sites bought by the government from time to time, says a Washington (D. C.) dispatch. This would mean new post office buildings for several Indiana cities and towns.

Recoveries during the fiscal year ending September 30 as the result of investigations by field examiners for the state board of accounts at Indianapolis, amounted to $339,701.11, which was $139,195.26 above the expenses of the department, according to the annual report announced Saturday by Lawrence F. Orr, state examiner for the accounts board. The expenses for the year were $200,505.85. The expenses are not classified.

The annual report of Lewis S. Bowman, auditor of state, for the fiscal year ended September 30, shows the state departments had unexpended balances amounting to $1,000,497.92, which reverted to the general fund at the year's close. The report is an analysis of the announcement made some time ago of the balances in state funds. The departments began the year with $5,382,770.90, had net receipts of $38,999,315.52, made disbursements totaling $35,751,064.50, thus leaving a balance of $8,628,021.83.

Arguments on a demurrer in a suit brought by Mrs. Nettie Stephenson Brehm of Poteau, Okla., against D. C. Stephenson for damages amounting to about $17,000, will be heard before Judge James M. Leathers of the Superior court in Indianapolis. Mrs. Brehm alleged in her complaint that she was a former wife of Stephenson, and that this amount is due for the support of their nine-year-old daughter, Catherine Stephenson. Stephenson is now serving a life sentence at the Indiana state prison for the murder of Miss Madge Oberholtzer.

Mrs. William Gremelsparker was unanimously elected president of the Indiana Woman's Republican club at the meeting at the Hotel Severin in Indianapolis.

Step by step Russia is slowly passing from Communism to individualism and capitalism, said James P. Goodrich, former Governor of Indiana, who told of personal observations he made recently on a visit to Russia, speaking to about 300 men and boys at a "Father and Son" dinner given by the Men's club of the Tabernacle Presbyterian church at Indianapolis.

Rippling Skirts Favored in Paris

The couturier who regards his vocation as an art aims to distinguish himself in it. This is especially true of the Parisian creator of fashions whose clientele looks to him for something particularly adapted to an individual style. Although the general trend of the season is taken into account, notes a Paris fashion writer in the New York Times, those couturiers who have attained prestige are known by their own special treatment of costume. Each has an individualized conception of beauty in line, in design, in color and in fabric; and each has a following both in Europe and in America.

Martial et Armand claim the distinction of having introduced the flare, the conspicuous feature of the present mode. To create an entirely new style that reverses the old is in itself a radical step, an adventure, in its way. The fashion public is fickle and gives up old favorites reluctantly, though it clamors for novelty. To present the advanced idea first requires a certain sense of security in the public's opinion, a sureness of touch. The designer proposes, but it is the woman of fashion who disposes. If she accepts the new version, it becomes established. If she does not, its life is short. The straight-line, the chemise, gown and tube skirt exhausted the possibilities in that type of dress. They became commonplace to monotony. The pendulum had to swing the other way, and so it has done. The success of the innovation is illustrated in innumerable ways in costumes of great art and beauty. The coming of the flare has been prophesied from time to time for several seasons. Now and then a slight hint of it appeared in a tiny godet or a slight ripple. The name of a swagger couturier would carry it a little way and women who wanted it for eccentricity would affect it for a time. But the straight, slim silhouette, beloved of the slender figure, died hard. Last season the coming of the flare was certain. All of the Parisian creators swung to it, but Madame, the directress of this prominent establishment of the Place Vendome, claims the honor of having shown first the charm of rippling skirts in a whole collection of beautiful gowns for every occasion.

Use of Silk and Velvet.

In making good this claim, Martial et Armand are presenting this season some of the most attractive costumes ever conceived in their atelier. These run through the entire list of the requirements of fashion from the simplest frock for morning or all day, to the most pretentious outfit for afternoon or evening. The fabrics range from the richest velvets and silks, and the most splendid brocades, to plain woolens and leather. None among the Parisian designers has made more delightful and alluring use of silk velvet, the material de luxe, which fashion prophets and manufacturers of dress goods have long urged upon style lead-

Velvet Is the Material of Inset Border and Sleeve Effects.

ers. Its present popularity is due largely to the manner in which the foremost artists have adapted it. In one particularly chic gown of black velvet, done by Martial et Armand, the especial treatment of the flare this house is featuring is shown in a charming manner. The entire scheme of trimming is at the back of the gown. The bodice, which has a round high neck, a flat lace collar and long plain sleeves, is drawn long and snug over the hips, and caught at each side of the back with two short pieces trimmed with buttons. The bodice and underskirt are one in front, and at the back is added a circular flounce, dipping in the middle almost to the bottom of the skirt and shortened at the sides. This tunic flounce is trimmed with a band of brown dyed squirrel with which the sleeves are finished at the wrist.

In another model of richness and dignity Martial et Armand apply the flaring flounce in a clever arrangement plain across the front but swinging full from side to side across the back. This gown, of soft green crepe, forms part of a handsome ensemble the coat of which, dark green ribbed silk, has a flounce around the bottom. This, too, is plain in front, flaring at the sides and back, where it is finished at the upper edge with an up-curved line. The flounce is divided at the middle of the back, and the band of beaver, which borders the bottom, is continued up the overlapping side, narrowing toward the top. The sleeves of this exceptionally smart wrap are plain and narrow with wide cuffs of beaver, and the high enveloping collar is also of beaver.

For the more elaborate daytime gowns, wraps and ensembles, these couturiers are using all the new rich au-

Flared Skirt Model in Velva and Matching Georgette.

tumn colors in velvet and the Bianchini fabrics. The green, blues, burgundy and bronze are especially lovely. Fur is seen on many of these, mostly soft close furs, such as beaver, squirrel, natural seal, and innumerable dyed furs. Fox is the one favorite among the longer furs, and Russian sable holds its own as ever before.

Elegance and Grace.

The Martial et Armand evening models are achievements in elegance and grace. In these, also, the materials are drawn from the widest range from the most delicate filmy clouds of tulle georgette and chiffon to the glittering lame cloths and metallic brocades. In these the fullness in drapery is all at the back. In several beautiful gowns this fullness is created by gathering the material across the back, and by hanging it almost, if not quite, plain across the front. This is done with success in a splendid dinner gown of gold lame. The bodice is plain, following snugly the lines of the figure. A wide, soft girdle of the lame, richly embroidered in jewels, is swathed about the hips in lines that cross in an original arrangement, with two short plaited ends. The width of lame gathered across the back has the uneven lower edge, now so fashionable, dropping almost to the floor at one side. In the softer materials drapery that depends from the shoulder in scarf or jabot effect is shown. An unusually graceful model of delicate green crepe chiffon has a deep flounce of the material, dotted with gold and silver beads attached to the back of its long, slim bodice. The crepe falls in a deep cascade, caught in a cluster of plaits on each shoulder and folded in a point several inches below the hem of the gown. This has the appearance of a slender cape in voluminous folds. The low V decollete neck is outlined with a band of gold and silver embroidery which is used also to finish the top of the flounce across the front of the dress.

Jeune Fille Models.

Some engaging jeune fille models are presented in original designs. The latest materials show the autumn woodcolors, warm reds and greens shaded from dark ivy and myrtle to bronze green, with a glint of gold, revived from the color fashions of long ago. Navy blue and the duller shades are passe this season, and royal blue is popular. Black is used for many youthful frocks and suits, also much scarlet, often in combination with black. The materials include the new reps both in the fine and the heavier lines, diagonals, mixtures, velvets and plaids to some extent, though less than heretofore.

Fullness that gives freedom at the bottom of the skirt is the point illustrated in almost all of the new models. It is done with a circular, bias or plaited use of the material.

AILMENTS OF YOUNG GIRLS

Relieved by Lydia E. Pinkham's Vegetable Compound School Teacher's Experience

Evanston, Wyoming.—"A few years ago I had troubles every month such as girls often have, and would suffer awfully every time. I was teaching school and it made it hard for me as I had to go to bed for two or three days. One day my mother suggested that I take Lydia E. Pinkham's Vegetable Compound, which I did, and it did wonders for me. In the course of a year I married and after my first baby was born I got up too soon and it caused a displacement. This troubled me so that I could hardly walk or do my housework. I knew what the Vegetable Compound did for me before so I took it again. It strengthened me and now I have five little kiddies. The eldest is six, the baby is five months old and I have twin boys three years old and a boy of five years. I do all my own housework, washing and ironing, and I never felt better in my life. I owe my health to your wonderful medicine and I recommend it to all my friends."—Mrs. VERBENA CARPENTER, 127 2nd Avenue, Evanston, Wyoming.

Spoiled children always belong to the neighbors.

Don't Let That Cold Turn Into "Flu"

That cold may turn into "Flu," Grippe or, even worse, Pneumonia, unless you take care of it at once.

Rub Musterole on the congested parts and see how quickly it brings relief.

Musterole, made from pure oil of mustard, camphor, menthol and other simple ingredients, is a counter-irritant which stimulates circulation and helps break up the cold.

As effective as the messy old mustard plaster; does the work without blister.

Rub it on with your finger-tips. You will feel a warm tingle as it enters the pores, then a cooling sensation that brings welcome relief.

Jars & Tubes

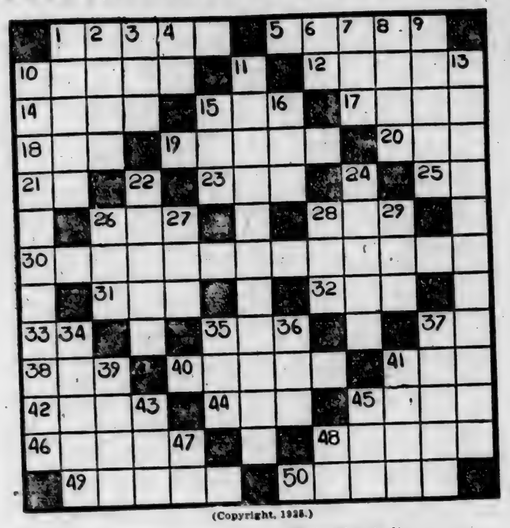
CROSS-WORD PUZZLE



(Copyright, 1925.)

Horizontal.

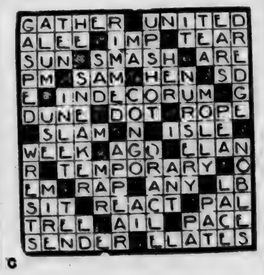
1—A sore
5—Keen
10—Pressing implements
12—To burn with boiling water
14—A part of speech
15—Belonging to him
17—Actual
18—A kind of fish
19—Various clasps or fastenings
20—Printer's measures
21—Road (abbr.)
23—A pig pen
25—A prefix meaning "two"
26—A little devil
28—A cushion
30—State of decision
31—To declare
32—Small
33—Beheld
35—To partake of a meal
37—A proposition
38—Breed, class
40—A certain liquid
41—Five hundred and two (Roman numerals)
42—To abound
44—Condensed moisture from the air
45—A game played on horseback
46—To surrender
49—Twelve
48—A region of the earth
50—Avidity

Vertical.

1—The young of birds
2—Noisy
3—A girl's name
4—Exists
6—High school (abbr.)
7—Part of a play
8—Unusual
9—A little mass or weight of lead
10—Skepticism
11—To deal or apportion
13—Name
15—Possesses
16—To look furtively
22—To spread
24—Prices
26—Belonging to it
27—To look closely
28—Foot of certain quadrupeds
29—To pass away
34—Pertaining to oil
35—Sorrowful
36—A seat in a church
37—Was ill
39—The bottom of a ship
41—To slumber lightly
43—One thousand and fifty-one (Roman numerals)
45—An American poet
47—Doctor of medicine (abbr.)
48—Doctor (abbr.)

The solution will appear in next issue.

Solution of Last Week's Puzzle.



HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

MAILS DELIVERED BY RADIO PLANE

A scheme has just been put before the French government whereby letters and parcels can be delivered to certain centers throughout the country by pilotless airplanes, guided entirely by electricity and wireless.

The airplanes will take the form of cylinders to hold the mails, with planes on each side of them and automatic motors in the bow. The whole system will be controlled from a central tower.

The cylinders, driven by their engines and guided from the wireless plant, will travel at a high speed, while their every movement is followed on a large, illuminated screen by the engineers in the tower. The mail bags will be stowed in separate compartments, according to their destination, and by operating a switchboard in the central tower the contents of each compartment can be released, with parachute attached, when the airplane is over the receiving station. No slackening of speed on the part of the cylinder will be necessary.

Women in Industry

Twenty-three out of every 100 women and girls over fifteen years old are employed in gainful occupations, according to an analysis of census figures by the women's bureau of the Department of Labor. The number increased from 3,750,000 in 1890 to 8,250,000 in 1920, the greatest gain being shown in "typical city industry," such as factories, trade and clerical occupations.

Wages and working hours are not yet on a par with those of men in the same fields, according to the report, which also shows that the majority of women in a number of states work more than 48 hours a week.

Ten of the thirteen states included in the bureau's survey allowed more than one-half of the working women to labor longer than eight hours a day.—Popular Mechanics Magazine.

Marble Statuary

For cleaning marble statuary and ornaments there is a paste that comes to anoint the statue, and after it has stood for an hour a clean cloth dipped in cold water will remove it. Nothing that has ever touched grease should be used on marble. If after the silver has all been cleaned properly and is back in a cabinet or closed closet, place a small piece of gum camphor on a shelf and it will keep the silver bright for a long time.

Clerk Didn't Quite "Get" the Customer

A friend with a taste for books, has picked up an old volume or two at a second-hand store.

Passing the store later she paused and asked the young man at work in front:

"Have you any old books in this morning?"

The young fellow was new in the place and a bit fresh in other respects it would seem, for he grinned at what he took for a pleasantry and he answered in the affirmative.

"Where are they?" my friend asked as she stepped inside and failed to see any books about.

"Why back there by the stove, a-talkin'," the young fellow directed, surprised at her question.

"What books!" my friend exclaimed. "Oh, books, ma'am! Why I thought you said old bucks!"—Indianapolis News.

Exposition Attractions

Modeled closely after Biblical descriptions and other data scholars have discovered, reproductions of King Solomon's temple, the pool, the palace he built for one of his wives (who was the daughter of a pharaoh) and other edifices that graced Jerusalem in ancient times are to be shown at the Philadelphia exposition in 1926. One of the outstanding features of the city will be the 240-foot tower of the temple. The entire project is expected to cost nearly $3,000,000.

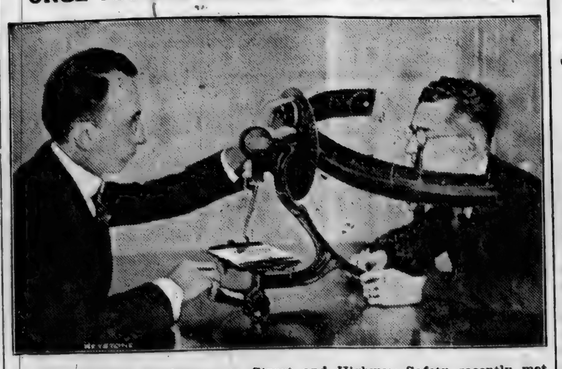
Excellent Advice

Be humble and gentle in your conversation of few words, but always pertinent when you speak, hearing out before your attempt to answer, and then speaking as if you would persuade, not impose.—Exchange.

Indian Sites Mapped

Nineteen hundred sites of Indian culture, including remains of villages camps, burial grounds and the like were reported in eastern Pennsylvania in a recent survey.

URGE PSYCHOLOGICAL TEST FOR DRIVERS



The National Conference on Street and Highway Safety recently met at Atlantic City, N. J., and one of the first things to be advocated was psychological tests for auto drivers.

These tests show their range of vision, hearing and judgment of distances, which are necessary to a good driver.

CARE OF YOUR CAR IN COLD WEATHER

Draining Crank Case Often Is Important During Winter Months.

Much damage and loss of time may easily result from the neglect of your automobile during the winter months. A few suggestions are offered by the mechanical engineering department of the Colorado State Agricultural college, which if followed will result in not only a saving of money and time but also in the lengthening of the life of your automobile engine.

Drain the crank case oil often, for two reasons, first because a good deal of gasoline is not burned when using the choker in starting and passes by the pistons, thinning the crank case oil. This thin oil is not a good lubricant and may cause premature wear and possibly allow the bearings to burn out. Sometimes the oil may actually seem to increase in quantity without any fresh oil being added, but a decided loss in body or thinning may also be noted.

Water Collects in Crank Case.

Second: If you have ever allowed your breath to blow against the inside of a window pane on a cold day, you have noticed that there is a considerable quantity of moisture formed on the inside of the glass. This is what happens on the inside of the crank case of an engine; because the engine also "breathes" due to the movement of the pistons in the cylinders. The water which collects on the inside of the crank case does not mix with the cylinder oil but settles to the bottom, usually collecting around the intake screen of the oil pump.

This water sometimes freezes and closes the screen, so that even with plenty of oil in the engine, none of it will get to the places where it is needed.

Use Care in Grade of Oil.

Do not be satisfied with your own judgment as to what grade or weight of oil to use. Be guided by the instructions of the car manufacturers, or better still, the oil company from whom you buy your oil. Several of the large oil companies issue booklets of information which are given away free of charge.

If it becomes quite hard to shift gears in very cold weather, add about a pint of warm cylinder oil to the transmission just before driving your car. This will thin out the transmission grease or oil so that the gears may be more easily shifted. When warm weather approaches, drain the thin oil, and refill with the proper weight of lubricant.—E. B. Dale, Department of Mechanical Engineering, Colorado State Agricultural College.

You Can Drive Car, but Can You Answer These?

How much do you know about an automobile?

Try to answer the following questions and see how much you know. Some of them are easy, others are hard:

1. What driving experience have you had?
2. How often and why should motor oil be changed?
3. How often should lubricant in transmission be changed?
4. Name three different types of lubricants and tell where used.
5. What evil results from too liberal use of choke and how may a driver prevent a too rich mixture?
7. What is retarded spark and when should it be used?
8. What is the proper way to crank a motor?
9. What clearance at the push rod or tappet and valve stem may be called standard and why is this clearance necessary?
10. Why does "no compression" result in no power?
11. Tell three things that may correct overheating of motor.
12. If you were instructing a driver what advice would you give concerning clutch?
13. What advice about using the brakes?
14. What advice about using reverse gear?
15. What advice about going down a hill?
16. What argument would you make to the owner to have the brakes repaired?

Use of Accelerator Is Cause of Waste of Gas

The owner will tell you that his car shows considerably more fuel consumption when he drives around city streets than it does when driving is done in the country. The reason is the frequent starts and stops, acceleration and little continuous driving all require a great deal of fuel. It has been shown that even heavy cars, those weighing more than 4,500 pounds, can be made to give 12 to 18 miles a gallon if the operating conditions are right. On fixed throttle a car will show less fuel consumption than on variable throttle movement; that is, if the accelerator pedal is pressed and released alternately as some drivers control it it will require more fuel to do a given work. Even slight acceleration enriches the mixture. On a long steady drive one may cut the fuel down enormously by a careful and not too frequent use of the accelerator.

Poor Engine Operation Very Common Complaint

Poor engine operation at low speeds is a common complaint with the usual cause in the carburetion system. Often an air leak throws out the carburetor adjustment so that an insufficient amount of fuel is fed. Wide spark plug gaps with a magneto having weak magnets is a combination which may induce this same trouble. With a battery system in use the ignition may be neglected until the carburetion system has been attended to, and if this fails to locate the trouble the ignition should then be overhauled.

Jack Up Front of Auto in Draining Crank Case

The man who takes pride in his automobile makes a practice of draining the crank case about every 500 miles. This is a messy job at best, but it will make the work easier and the draining more thorough if the front of the car is run up the incline to the garage as shown.

If the incline to the garage is not great enough, then it will be worth while to jack up the front of the car as indicated. This will make it

Running the Car Up an Incline and Jacking the Front Wheels Simplifies the Job of Drawing Oil From Crank Case.

much easier to get at the drain plug with a wrench, and tipping the motor will drain out the oil in the splash pockets under the connecting rods.

Another advantage is that the oil can be run directly into a regular bucket rather than into the shallow pan that often is necessary because of lack of clearance under the crank case.—Popular Science Monthly.

Urges Courtesy on Road as Big Safety Measure

Courtesy on the road among motorists is akin to safety, and a new courtesy series of suggestions is now being issued for the thousands of motorists in this section of the country.

Lack of courtesy, it is pointed out, often leads to recklessness, which in turn leads to accidents. Therefore, motorists are asked to read the following courtesy rules and see if they wish them:

1. When a man approaching you from behind sounds his horn as a signal that he wishes to pass, don't "step on it." Draw over to the right and let him go by.
2. Do not use more than your half of the road, thus crowding others into the ditch.
3. It is not courteous to "steal" a parking space from a man who is just getting ready to back into it.
4. Do not imagine that every motorist on the road who tries to pass you is starting a race. He may be on important business.
5. When you pass a man from behind going in the same direction, do not cut in directly in front of him. This is discourteous.
6. Do not shove another man's car along the curb to make room for yours, thus jamming his car against a fireplug or the car ahead.

"DIAMOND DYES" COLOR THINGS NEW

Just Dip to Tint or Boil to Dye

Each 15-cent package contains directions so simple any woman can tint soft, delicate shades or dye rich, permanent colors in lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings—everything!

Buy Diamond Dyes—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.

Hardly Fair

"How is she as a neighbor?"

"She'll borrow butter and try to pay you back with gossip."

Cuticura Soap for the Complexion. Nothing better than Cuticura Soap daily and Ointment now and then as needed to make the complexion clear, scalp clean and hands soft and white. Add to this the fascinating, fragrant Cuticura Talcum, and you have the Cuticura Toilet Trio.—Advertisement.

The first of the labor banks was established in Washington, D. C., about 1920, by the International Association of Machinists.

The charm of a bathroom is its spotlessness. By the use of Red Cross Ball Blue all cloths and towels retain their whiteness until worn out.—Advertisement.

Men are like rivers; the deeper they are the less noise they make.

If Worms or Tapeworm persist in your system, use the real vermifuge, Dr. Peery's "Dead Shot." Only 50 cents at your druggist or 372 Pearl St., N. Y. Adv.

He that falls in love with himself will find no rival.—Franklin.

GASTRITIS IS DANGEROUS STOP IT QUICK

When your stomach is bloated—when it is so distended with gas that pressure on the heart almost suffocates you

What are you going to do?

Take a chance or get rid of the gas quick?

The one big selling stomach medicine today is Dare's Mentha Pepsin and its mighty power to relieve terrible gastritis, acute or chronic is a blessing to tens of thousands of people who have been unable to get help from any other source.

It's splendid for any stomach trouble—is Dare's Mentha Pepsin.

So when your food won't digest or gas, bloating or shortness of breath cause you to become nervous or dizzy or have a headache always remember that you can get one bottle—of Dare's Mentha Pepsin from your druggist and if it doesn't help your disordered stomach—your money will be returned.

MOTHER GRAY'S POWDERS BENEFIT MANY CHILDREN

Thousands of mothers have found Mother Gray's Sweet Powders an excellent remedy for children complaining of Headaches, Colds, Feverishness, Worms, Stomach Troubles and other irregularities from which children suffer these days and excellent results are accomplished by its use. They break up colds and regulate the bowels. *Used and recommended by Mothers for over 30 years.* Sold by Druggists everywhere. Trial package FREE. Address, Mother Gray Co., Le Roy, N. Y.

AT PUBLIC AUCTION

80 ACRE FARM WITH BUILDINGS 80

Located: 1½ miles north and ½ mile west of **BRYAN, O.**, or ½ mile west of the government air field, on a good gravel road.

Known as the David Calvin Farm

MONDAY, DECEMBER 14, 1925

Sale Starts promptly at 1:30 o'clock

This splendid and "**MOST PRODUCTIVE**" farm will be "**SOLD ABSOLUTELY WITHOUT RESERVE** and **REGARDLESS** of **PRICE** to the **HIGHEST BIDDER**" on sale day.

DESCRIPTION: 8 room frame house, stone foundation, basement with cement floors, excellent well of water piped in the house and to the barn, also large cistern. Barn 32x80, stanchions for 12 cows with cement floors, stalls for 4 horses and 1 box stall, also granary. Garage and tool shed 16x20, two good corn cribs, chicken coop 10x30, brooder house 10x12 and other buildings.

The soil is of a "**RICH GRAVELY CLAY LOAM**," "**HIGHLY PRODUCTIVE**" easily handled and adapted for **CORN, CLOVER** and **ALFALFA**, well tiled (with the exception of 11 acres of new ground.) The fences are wire, nearly new and very good. The land lays level (just enough slope for good drainage) with the exception of about one acre in which there is a small stream of spring water flowing that never goes dry. Making it unexcelled for stock.

PRIZE: Every person over 16 years of age gets a "**FREE TICKET**" to the "$25.00 IN GOLD" which will be given to the person, or persons guessing the nearest to the "**PRICE**" the farm sells for, but you must be on the ground when the sale starts.

TERMS: $500.00 cash on day of sale, $1000.00 on or before January 30th, 1926, balance in 10 equal semi-annual payments, deferred payments to bear 6% interest, payable semi-annually, or can pay all cash.

STATEMENT: This is an "**OUTSTANDING FARM**" as far as productiveness is concerned. The buildings are not new, yet good. The location is excellent, being the "**BEST**" of any farm "**KNOWN OF**" for sale. Just two miles from one of the best towns in Ohio, which means more than can be realized. An excellent trading point, where the markets are always the best. The Van Camp Milk Condensery being located at Bryan makes it mighty handy to draw your nice sum for milk each month in the year. "**THINK IT OVER**," set the 14th aside and be on hand to take advantage of any sacrifice that might be made. For any other information call or write J. A. Elder, Bryan, O., or Alfred R. Moore, Garrett, Ind.

Obituary

Margarst Griest, daughter of Nathan and Lucinda Stafford, was born in DeKalb County, Indiana, May 24, 1846 and passed away December 5, 1925 at the residence of her son, L. O. Griest where she has resided a part of the time during the last year.

She was united in marriage to David Griest in the year of 1866 at Newville, Indiana, to this union was born two sons, L. C. and B. F. Griest, who reside at Hicksville, O. Her husband having preceded her to the great beyond, leaving to mourn their loss three sisters and four brothers, two sons. She was one of the pioneers of DeKalb County, where she with her husband and family spent her life. She did the best she could in the voyage of life. She has gone to meet her God with whom she made her peace years ago. The great apostle Paul said, "Death has been swallowed up in victory, Oh death, where, is thy victory? Oh grave, where is thy sting?

The funeral was held in the Newville U. B. Church, Monday afternoon at 1 o'clock, P. A. Hubbard, pastor, officiating. E. R. Kinsey, funeral director.

The death of Mrs Harry Hathaway occurred Thursday morning at her home on Sprott street at 9 o'clock from cancer of the lungs after an illness of twelve weeks. The unusual disease which claimed her life started with cancer of the breast.

Before her marriage the deceased was Mary Peters, a daughter of Charles and Augusta Peters and was born west of Auburn forty-one years ago on the 28th of February.

She was married January 5, 1907 to Harry Hathaway of Auburn and to them were born three children, Thelma, Harry William Jr. and Austin.

Mrs. Hathaway was a member of the St. Mark's Lutheran church and also was one of the active workers in the woman's auxiliary of the Ku Klux Klan which organization held a short service at the home preceding the funeral services at the St. Mark's Lutheran church Sunday afternoon. Rev P. A. Socrenson officiated. Burial was made in Woodlown cemetery. —Star.

Club Work News

From Concord Boys and Girls

Oyster Supper

The Boys and Girls Club projects have been completed.

Club members are looking forward to the State Round up to be held at Purdue University the first week in May.

For the purpose of paying part of the expense of the trip, the Club members are giving an Oyster Supper at the School House, Friday eve, December 18, from 5 to 7:30. A plate lunch will be served for those not caring for the Sea Food.

Come and get a good old fashioned Milk Stew at the old fashioned price of Two Bits. Coffee served with each supper.

Come and Bring your friends, eat supper with us and attend the P. T. A. meeting at 7:30.

The boys returned Friday morning from Chicago and report a fine time. Likes is sure a sound sleeper. What's that? Ask C. Likes.

THINGS TO THINK ABOUT

It's easier to tell others how, than to do it. Oh, what a nation it would be if we would practice what we preach. It's very easy to see others faults but how about our own. Hear say: "Very few real people today." I say: "Am I real." Stop, Look, Listen.

Birthday Surprise Saturday Evening

Mrs. Roy Wade was given a birthday surprise Saturday evening at the home of her son, Russell and wife on Widney avenue. The plan was that Mrs Wade with her son and family were going to the D. R. Kosht home to visit for the evening, before Mrs. Wade left for Detroit. As Mrs. Wade failed to be ready on time, Russel took his mother into the house until his family could get ready and she was greeted by the Tod Kosht and John Engle families. Marvin Engle in reporting the event was still full of oysters, chicken and everything Some feed. The birthday cake was there adorned with candles.

Game Club Ready For Their Hunt

Sides have been chosen for the Fish and Game Club's hunt to be held December 21-26. The losing side to furnish the winners with a supper and entertainment on Wednesday night, December 30.

The week to be spent in hunting pests, which are hawks, crows, owls, weasles, rats, mice and sparrows, with a rabbit hunt on Saturday, all points to be turned in by eight o'clock on Saturday night.

The captains with their teams are:

Ed Storer, Captain.

Club Work News

From Concord Boys and Girls

Club work in Indiana has been running for several years and some counties have been doing some real work. Last year DeKalb county reported the largest potato club in the United States.

1926 is being planned so as to make it the largest club year in its history.

Club work tends to bring about competition and encourage every one to learn the more economical ways of doing things Doing is the way to learn. 1926 finds being offered the following clubs:

One thousand calf club. Any calf to weigh 1,000 pounds in one year.

Ton litter club. Litter to weigh one ton when six months old.

Gold medal sheep club

Dairy calf club.

Potato club.

Pig club. Both breeding and feeding club wanted if five members are interested.

A trophy is offered to the county doing the most live stock club projects.

St Joe and community always does their part. Every one interested call E Stinson, our County Agent or H. J Renner, Vocational teacher, and they will give the particulars of each. Each project is your gain

---

The Boys and Girls Club members are giving an Oyster Supper, Friday evening from 5 to 7:30, to aid in sending members to Purdue in May to the Round up Plate Lunch served to those who do not like oysters. Come and give them your support.

Home Bureau Activities

On Friday, December 11, at the country home of Mr. and Mrs. Hollis Dilley, occurred the last meeting of the Home Bureau Club for this year. At the noon hour the tables were ladened with oodles of good things to eat, to which about thirty five guests and club members did ample justice. Several members coming for afternoon only.

Immediately after the noon hour a miscellaneous program was rendered. One of the featurds was a debate—"Apples vs Pickles" which provided much merriment Two of the oppone ts were very much versed on the subject as they are every day dealers on which they represented. The judges rendered their verdict in favor of the pickles because one drinks apple cider and gets boozy and it takes a pickle to sober them up Clothing and candy demonstration by Mrs. Beulah Coburn.

At the conclusion of the final business session for the year a Christmas exchange was held, all receiving a gift. At a late hour all departed for their homes expressing their gratitude to Mrs. Dilley and the committee, consisting of Mrs. Minnie Pepple, Mrs. Ann Sechler, Mrs. Agnes Monroe and Grace Leighty.

"Now I Am Well and the Mother of Two Children"

Just Another Story About the Goodness of PE-RU-NA

Mrs. Anna Linder, R. F. D. No. 1, Box 44, Dassel, Meeker County, Minn., writes: "For two years I suffered with that terrible disease, chronic catarrh. Fortunately I saw your advertisement and took Pe-ru-na. Now I am well and the mother of two children. I owe it all to Pe-ru-na. I would not be without that great remedy for twice its cost, for I am well and strong now. I cannot speak in too high terms of its value as a medicine."

For more than half a century Dr. Hartman's Pe-ru-na has been performing just such wonderwork as this.

Pe-ru-na is sold everywhere in both tablet and liquid form. Insist upon having genuine Pe-ru-na.

TO FIGHT

SYNOPSIS.—With David, half-breed guide, Brent Steele, of the American Museum of Natural History, is traveling in northern Canada. By a stream he hears Denise, daughter of Col. Hilaire St. Onge, factor at Wailing River, play the violin superbly. He introduces himself and accepts an invitation to make the post his home during his stay. He finds the factor worried and mystified. The "log chateau" is a real home. From St. Onge he learns of the mysterious creature of evil, the "Windigo," and the disappearance of a canoe and its crew, with the season's take of furs. Then at night the "Windigo" gives a weird performance. Even Steele is mystified.

CHAPTER II—Continued

—5—

Steele strained from the window, waiting for a repetition of the wail. But the voice which had defiled the night was hushed. From the clearing came the whimpering of awed huskies, the wolf challenge smothered in their throats. Among the dim shapes of the Indian shacks beyond the trade-house not a light flickered. They were as the houses of the dead. The post people lay in their blankets, stiff with fear. Like a shroud, panic had fallen on Wailing River.

Throwing on his clothes, the man swung from the window and dropped to the grass below. The house, also, was dark—St. Onge doubtless drugged with cognac, but she? Did she lie numb with fright, or was she gallantly struggling with the mystery?

As he approached Michel's dark shack, Steele was puzzled. Had the Iroquois and David also weakened? But two silent shapes, carrying something in their hands, met him at the door.

"You heard it, Michel?" demanded Steele, searching the swart face of the half-breed, as they left the shack, for traces of excitement.

The features of Michel were set like stone as he said: "De Windigo get de fur cano'; now he get de pos'."

"What d'you mean?" quickly demanded Steele, fearing that the Indian in the head man had at last triumphed over his intelligence—that he, too, had succumbed to the general terror.

"Michel mean," explained David, "that de Indian will leave de pos' after tonight."

The white man was relieved. These two, at least, had not been stampeded by the nameless thing on the ridge. And then, as they reached the shore, it began again.

From the crest of the ridge came an unspeakable mewing, now strangely cat-like, now unearthly; followed by the moaning of a mangled thing in torture.

It ceased. The white man heard the rough breathing of the men beside him. Slowly the click of steel on steel marked the cocking of two rifles. Then upon the heavy silence broke the prolonged wailing of an Ojibway woman for her dead.

Rigid, the three men listened. The wailing climaxed in maniacal shrieks. Again the night was soundless.

Turning to Steele, Michel muttered: "Tete-Boule ees right; dat ees ver' bad t'ing to hear."

"What is it, David?" Steele demanded of his hard-headed friend.

"Eef David was on dat ridge, he tell you," was the dry response.

"There's nothing on four feet in this country that could do that. There may be something in this Windigo story, after all. Is it beast, bird, or devil, Michel?"

"Eet may be crazee wolverine; eet may be devil; eet may be Windigo—but eet feenish dees pos' all de same." As the half-breed sadly shook his head, the caterwauling began anew.

With heads thrust forward the three men on the shore strove to pierce its mystery. But this time, as the voice rose to a climax, flame shot from the muzzles of two rifles and the shrieks were smothered in the report of the guns echoing from the ridge. Again silence blanketed the valley.

Thus did David and Michel fling back their challenge of lead to the powers of darkness which menaced the fur fort.

"The Windigo knows now that there's some fighting blood left in Wailing River," chuckled Steele, when he heard approaching footsteps.

"Who's there?" called the voice of St. Onge. "Who fired those shots?"

"Michel and David, colonel; did you hear it?" asked Steele, curious to knew the state of the factor's nerves.

St. Onge approached and gripped Steele's arm. "I've been listening—with my daughter," he said in a strained voice. "I went to rouse you, but you had gone. It's the last straw, monsieur. My Indians will not stay after this."

"What d'you think it is?" asked Steele, closely watching the features of St. Onge in the dim starlight.

"Who can say?" replied the Frenchman, with a shrug. "It may be some crazed beast—wolverine or lynx or bear. And then," he looked hard into Steele's eyes, "it may be—the Windigo."

At the words, David, who had been listening, turned to Michel in surprise. But the face of the head man was wooden. The Ojibway's narrow eyes shifted to those of Steele, and for a space white man and red held each other's gaze.

Was the Frenchman, after all, superstitious? Steele wondered. Had his nerve softened, after what he had now heard with his own ears; or was he playing a game?

"Colonel St. Onge," said the American after a space, "this thing has got to be followed up—run down—scotched! To you, it's vital! To me, as a scientist, it's the opportunity of a lifetime. With your permission, David and I will stay here and lend a hand until the winter threatens to break."

The factor impulsively offered his hand. "Thank you, monsieur! I shall be most grateful for your aid."

"And Mademoiselle St. Onge?" asked Steele, deeply curious. "She heard it all?"

"Yes, she called me when it began. She was very brave, but there have been so many things lately—" St. Onge suddenly checked himself. "Michel," he said, swiftly changing the subject, "we must look after the Indians at once. But what can we tell them now, after this?"

"We tell dem de Windigo weel ketch dem on de riviere eef dey leave now," replied the ready-witted head man.

As Steele again stretched himself on his cot, he wondered if there would be sleep that night for the girl downstairs—what thoughts were hers as she lay facing the problem of her future; a problem of which the sole solution seemed at that moment to rest with Monsieur Lascelles at Fort Albany.

* * * * * * *

There was no one in the living room when Steele entered early the following morning, but from the direction of the kitchen came the sound of women's voices. He was examining the shelves of French and English classics when he heard the light footfall of moccasins behind him. Diffident at meeting Denise St. Onge whose humiliation of the night before must have been deep, but naturally curious as to her mental condition after the night wailing, he turned with:

"Good-morning, mademoiselle! We are all here, you see, safe and sound, in spite of the serenade of our friend."

The fine eyes of the girl were heavy with shadows, but to his relief, were not unfriendly. She has not slept, thought Steele. The Windigo has got her, too.

"Good morning, mademoiselle! We turned in a voice without spirit, and there was no life in the colorless face as she went on: "Yes, we are still here, as you say; but after last night I trust you realize what my father faces in this terrible valley."

"It is most mysterious," he said, "but you must not allow it to get your nerve. You are an educated woman, mademoiselle; you must hold your mental grip. Nerve-racking? Of course it is, but there is a solution—mad wolf or wolverine probably." As he spoke, he strove to pierce the reserve of her dark eyes to the thoughts they masked.

"But it was horrible—ghastly!" she replied. "Is it to be wondered at that the Indians are in a panic—and these poor women whose husbands were with the fur canoe; they are imbeciles from terror. I found them this morning in a cabin, too frightened to cook the breakfast of the children."

"So you cooked it for them," he hazarded with a smile. Surely, Mademoiselle St. Onge had not lost her nerve, if she could think of the children."

The girl flushed. "One could not have them suffer, monsieur." Then with a flash of white teeth, went on, "But we all feel better, now that the sun is out."

Steele smiled at the human touch.

"Has your father told you that I am staying here, with his permission, to follow up this Windigo?"

She glanced up in surprise. For an instant her eyes fell, the dark brows contracting in thought; then she met his quizzical look.

"You are going—to fight—the Windigo?—You, a stranger—who have—no interest?"

"But I have a very great interest, mademoiselle. I am sent into the field by the museum to study this sort of thing. Michel, David and I are going to fight him—and solve him."

"But you do not know the danger!" Her face was very grave as she faced him, and he now knew that his surmise had been correct. There was much that he had not been told.

"I do not understand what you mean. Not being superstitious, Michel, David and I have nothing to fear," he protested, hoping to draw her out.

"Oh, monsieur, you do not know all! There are so many—" The abrupt entrance of St. Onge cut off what Steele sensed she had intended as a warning.

"Good-morning, Monsieur Steele!" cried the factor, with what was palpably a forced liveliness of manner. "You have not changed your mind since our talk, eh? You will honor us by spending September at Wailing River?"

"Father," Denise protested, "Monsieur Steele does not know—"

St. Onge turned petulantly upon his daughter.

"Monsieur Steele is a brave man and a scientist; he has no fear of your Indian devils and Windigoes."

"But he has a right to know all, if he is—"

"He shall know all, my dear," broke in the factor, evidently desirous of stopping further reference to what was blind mystery to the younger man.

"We shall have a week, mademoiselle, before David and Michel return, to make our plans," added Steele in defense of his host; but throughout the simple breakfast of trout, toast and coffee, his active brain was busy with the strange attitude of St. Onge and its cause.

At the trade-house the factor and his guest learned from the still shaky Tete-Boule that Michel and David had packed a canoe and provisions over the portage at daylight. But before starting down river on his quest with David, Michel had done his work well. Not an Indian dared leave the post because of the demon which the wily head man had assured them was lying in wait for them. So, for a time St. Onge could count on keeping his post servants, and then—

"Well, who can foretell what is on the knees of the gods, monsieur?" he said with a characteristic shrug.

Through the following days while he impatiently waited for the return of David, Steele occupied his time with the study of two interesting subjects—Tete-Boule and Denise St. Onge. And he found in each much to stimulate his curiosity. The Indian, once a twist of nigger-head tobacco and the gift of a skinning knife had established friendly relations, was led to repeat the tales of huge tracks in the muskeg and night wailing which he had brought to the post during the summer. To Steele, familiar with shamanism and the practice of sorcery among the Ojibways and Crees, this squat red man, with his high cheek bones and close-set eyes, was something of a puzzle. Steele soon learned that Tete-Boule—who owed his name to the likeness of his broad face to the Tete-de-Boule Crees—was possessed of more than ordinary intelligence.

"Tete-Boule," demanded Steele in one of their conversations on the river shore, "why should this Windigo wish to harm this post; the people, here, have never done him an injury?"

The mink-like eyes of the Indian widened with fear at the mention of the dread name, which was taboo.

"Dis ees heas countree. Long tam ago, he cum here on dis riviere," the Indian muttered, evidently ill at ease.

"Was it the Windigo who drowned the men with the fur canoe?"

For a space the Ojibway smoked in silence, then spat far into the water before he answered.

"De crew ov de fur-cano' not drown'—eat up!" And he opened his wide mouth and snapped his jaws.

"Will he come again by night to the post here?"

The Indian slowly nodded.

Further than repeating to Steele that in August he had seen huge tracks in the muskeg and heard cries at night similar to those which had wakened the post, Tete-Boule could not be led to talk. But what interested the American especially was to hear, later, from Denise St. Onge, that the squat post hunter was bewailing with the already stampeded Indians the fate which menaced them.

"This Tete-Boule ought to be suppressed," he suggested to St. Onge. "Your daughter tells me that he keeps the Indians in a ferment with his wild tales of demons and Windigoes."

"I've told him to stop it. But he is very superstitious. When he first came here from Albany, he was a most valuable man—very intelligent."

"He's doing a lot of harm, now. I wish Michel were here. You need him."

"Yes, he understands the Indians, and can quiet them," agreed the factor wearily. "And he is wasting his time down river."

"I am not so sure of that. They may find something." And Steele smiled into the Frenchman's eyes quizzically, but met a blank stare.

Well, with Steele on its trail, the "Windigo" is likely to have a lively time. And Steele?

(TO BE CONTINUED.)

Clock Has Only One Hand

An ingenious clock with but one hand is installed in an office in Portland, Ore. An English naval officer, who was wrecked, is credited with the invention. After being shipwrecked and thrown on a desert island, he found that among the few effects he had saved was a watch with the minute hand gone. Necessity of telling time with only the hour hand inspired the officer to divide the dial into spaces indicating one-minute intervals and from this rough pattern a marine clock was fashioned that serves its purpose as well as the old type with two hands.

Lesson for December 20

CHRISTMAS LESSON

LESSON TEXT—Matt. 2:1-15.

GOLDEN TEXT—"For unto you is born this day in the city of David, a Savior, which is Christ the Lord."—Luke 2:11.

PRIMARY TOPIC—Wise Men Visit the Baby Jesus.

JUNIOR TOPIC—Wise Men Follow the Star.

INTERMEDIATE AND SENIOR TOPIC—The Christmas Spirit.

YOUNG PEOPLE AND ADULT TOPIC—The Prince of Peace.

Note: For this Sunday's lesson the lesson committee has given us an option of a Christmas lesson or a summary of Paul's life. It is presumed that most teachers will prefer the Christmas lesson since Paul has been the central figure for six months.

I. The Wise Men Seeking Jesus (vv. 1:2).

These wise men who sought Jesus were either Arabian or Persian astrologers, students of the stars. The appearance of an unusual star attracted their attention. Perhaps they were acquainted with the famous prophecy of Balaam (Num. 24:17). Doubtless through the influence of the Jews who remained in Chaldea, or the direct influence of Daniel extending to this time, they had become acquainted with the hope of a Messiah. The light they had was dim, but they lived up to the best they had. We learn from them:

1. That All True Wisdom Leads to the Savior, for He Is the Fullness of Wisdom.

2. That God's Word Shall Not Return Unto Him Void (Isa. 55:11).

The seed cast upon the Eastern waters brought forth fruit after many days. This ought to bring confidence to many ministers and Sunday school teachers who have not as yet seen the fruit of their labors.

3. The Grace of God Calls Men From Unexpected Quarters.

Some who have the least opportunities give the greatest honor to Christ, while others, blessed with the richest opportunities, shut Him out.

II. Herod Seeking to Kill Jesus (vv. 3-8).

The news brought by the wise men struck terror to Herod's heart. He was not alone in this for all Jerusalem was troubled with him. A glimpse at the social customs in and about Jerusalem in that day will enable us to understand why this news brought uneasiness to the people. They were living in the greatest luxury. Beautiful apparel, sumptuous feasts, palatial houses, etc., led to gross immorality. We can thus readily see why Herod and all Jerusalem should be troubled. They did not want a Savior who would save them from their sins; they wanted to continue in them. Herod demanded of the priests and scribes information as to where Christ should be born. They were soon able to tell him. These people had a technical knowledge of the Scriptures, but had no heart for the Savior as set forth therein. Conditions much like these prevail today. This reception of the Savior shows that perverseness of heart is the cause of so many being indifferent to Christ, and of their opposition to Him when His claims are presented. It is true today that the luxuries of wealth, the frivolities of the fashion-lovers, and the gross immoralities to which these lead, make Jesus Christ unwelcome in many quarters.

III. Jesus Found (vv. 9-12).

The wise men, having obtained the desired information, started immediately to find Jesus. As soon as they left the city the star which had guided them from the East appeared again to lead them on—not that it had disappeared from the sky, but no doubt the city buildings shut out its light. The star guided them to the place where Jesus was. When they found Him they worshiped Him. In this they displayed true faith. They did not see any miracle, only a babe, yet they worshiped Him as king. Blessed are they that have not seen and yet have believed (John 20:29). Note God's overruling providence in all this. Many hundred years before the prophet had said that Christ should come from Bethlehem (Micah 5:2). God so ordered affairs that Mary should be brought to that city to give birth to Christ. Let us be assured that nothing can thwart the divine purpose. God so ordered that these men should depart another way, thereby defeating Herod's wicked purpose. Through these wise men the Lord gave gifts into the hands of Joseph and Mary before their going to Egypt. Doubtless this served a good purpose in meeting their expenses during their stay there. Truly all things work together for good to them that love God (Rom. 8:28).

Life

Life is but a day, and the hours flee. Soon it is high noon, then afternoon, evening, night, when all service ceases. —R. P. Anderson.

Simplicity and Purity

"Simplicity and purity are the two wings by which a man is lifted up above all earthly things."

A Wrong Deed

A wrong deed should be immediately repented of and confessed.

WHY SHOULD ANYONE SUFFER WITH INDIGESTION OR ANY STOMACH MISERY?

If you want to fix up your dyspeptic, out of order stomach so that you can relish what you eat with not the least bit of after distress, do what tens of thousands of people have already done.

Getting rid of gas, bloating, belching, heaviness and that feeling of near suffocation isn't such a hard matter as you may think—You've been getting hold of the wrong medicine—that's all.

But better late than never—ask your druggist for a bottle of Dare's Mentha Pepsin—a real stomach medicine and a very pleasant one. For acute indigestion one or two doses is enough, but when the trouble is chronic, two or three bottles may be needed to put your disordered stomach in good healthy condition and make life worth living.

Making a start is the main thing, so why not get one bottle today with the distinct understanding that if it doesn't help you the purchase price will be returned.

Let Yeast Foam *build you up!*

Everyone knows the tonic property of yeast—how it builds up your weight to normal—how it strengthens and invigorates the whole system.

Just try this: drop a cake of Yeast Foam in a glass of water; let stand for five minutes; stir; let settle and drink the milky water, including the white precipitate.

Or, if you prefer, eat the yeast with a cracker or a piece of butter.

SAMPLE CAKE FREE

WHERE YOU MAY CROSS STREET

Motor Club Cites Need of Laws That Establish Responsibility.

Unmeritorious personal injury suits arising out of the use of the automobile, clutter up the courts and cause many motorists a great deal of anxiety, and in numerous cases a financial loss, according to the accident prevention department of the Chicago Motor club. This department of the club is now engaged in an investigation of personal injury cases, and it finds that these injuries which are listed in the records kept by various cities range from real injury such as broken limbs, to the rather vague injuries listed as "shock." In many cases a shock is a real injury while in others it is flimsy in character.

"A person injured very slightly has no trouble in bringing suit," continues the bulletin, "and many suits are started because of the rather widespread, but erroneous opinion, that any injury caused by an automobile is in itself sufficient grounds upon which to base a suit and obtain recovery.

Injustice to Drivers of Cars.

"Motorists who have become involved in an accident are frequently astonished to find suit brought against them, when they know that they have in no way contributed toward the accident. There is nothing in law, however, to prevent anyone from bringing suit, and this has led to the cluttering up of our court calendars and to injustice to the drivers of automobiles.

"When a motorist is sued he must file the proper legal papers in answer to the plaintiff's declaration, and he is forced to defend his case even though he knows the plaintiff is entirely in the wrong.

"The cost of procuring the attendance of his witnesses, lawyers' fees, and the fees of court reporters falls upon the defendant in such a case, and even if he is given a favorable verdict he finds himself considerably out of pocket.

"When the general public begins to realize that an injury is not in itself sufficient grounds for recovery, but that the liability of the driver must be shown, there will be fewer suits of this nature entered in our courts.

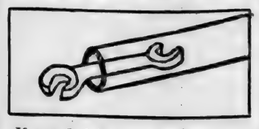
Attempts Made to Defraud.

"In some cases, of course, a deliberate attempt is made to defraud the car owner. The injured or supposedly injured persons are willing to gamble that the sympathies of the jury will be with them, and that an adverse verdict will not be found in the higher courts.

"The remedy lies in the enactment of laws that will definitely establish the responsibility of pedestrians. The railroads have a different condition to face than has the car owner. The only concern of the railway is to avoid willful, wanton neglect. The man who ventures upon a railroad right of way is a trespasser, but the motorist in the street has no right of way. Our laws were framed when our population was a pedestrian one, but today with 17,500,000 automobiles in use on our highways a more equitable distribution of responsibility is being demanded.

"This demand does not consider allowing the driver of a motor vehicle to travel at any rate of speed he may see fit to use, but rather it considers establishing certain places where the pedestrian may cross a street and be within his rights, and others where he would be a trespasser. Crossing the street in the middle of the block is the direct cause of numerous accidents, and it should be made an act of trespass. When such laws are enacted there will be fewer unjust suits brought into our courts."

Loosen Nut With Wrench



If you find it hard to loosen a nut with a small wrench, you may add leverage and power by fitting an iron pipe over the free end of the wrench.

Releasing Clutch Will Help Storage Battery

"How many people throw out the clutch before they put their foot on the starting button?" asked a distributor of a big automobile concern in discussing the care of storage batteries the other day.

"Not one in ten, according to my observation," he resumed. "In spite of the instructions furnished by the battery manufacturers and the service stations, few, apparently, appreciate the importance of this little stunt which adds to the life of the battery in their car.

"When the engine has been idle for any length of time in cold weather the grease in the transmission gears stiffens to the consistency of putty almost. This places a tremendous additional load on the engine in starting.

"Everybody knows how much elbow-grease is required to turn the handle of an ice-cream freezer after the contents begin to get stiff. An automobile is up against a similar proposition in turning the transmission on a cold day.

"This extra burden pulls the battery down, since it may be necessary to call on the battery four or five times before the engine gets under way without stalling. It is some job to churn a load of cold grease.

"The remedy is so simple and has been stated so often that you would suppose every automobile driver practiced it, but apparently, a majority release the clutch only when shifting gears or applying the brakes."

Speaking Tube Is Used to Direct Bicycle Rider

The photo below gives a close-up of the speaking tube used by the motorcyclist to direct Jean Brunier, who broke the record for speedy bicycling when he attained a speed of 74 miles

Bicyclist Breaks Record at 74 Miles an Hour.

an hour. The race occurred recently at the Mont Chery track near Paris, France. The specially constructed motorcycle paced Brunier during the record-breaking run.

Ten Hints for Motorist Who Polishes His Auto

In the Motor Coach Work, the official publication of the New York Motor Coach Manufacturers' association, appeared these ten hints for motorists who use polish on automobile bodies:

If you must use polish, do not apply it before the varnish on your car is at least three or four months old, which will by that time be well hardened.

Select a polish that does not leave an oily film after it has been wiped off.

Use it sparingly, and above all do not use any oily polish that is shot out of a squirt-gun.

Do not apply polish on more than one or two panels at a time.

Rub off immediately and pay particular attention to remove all polish out of corners.

Rub in straight strokes (never in a circular motion).

Do not polish car outdoors, especially when exposed to the sun and do not polish the hood when hot.

Keep polish off the nickel-plate parts, as it will cause them to rust.

Do not polish car unless all mud and dirt has been removed by water.

Above all, do not polish very often The less the better.

UNIQUE SIGN WARNS KANSAS MOTORISTS

Not far from Chapman, Kan., almost half way to Abilene, this sign will be seen by the motorists going over this particular stretch of road: "For the motorist who must exceed 35 miles an hour, the cops are lying in wait."

Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

DR. W. B. CALDWELL AT THE AGE OF 63

Mother! It's Cruel to "Physic" Your Child

To Dr. W. B. Caldwell of Monticello, Ill., a practicing physician for 47 years, it seemed cruel that so many constipated infants and children had to be kept constantly "stirred up" and half sick by taking cathartic pills, tablets, salts, calomel and nasty oils.

While he knew that constipation was the cause of nearly all children's little ills, he did not believe that a sickening "purge" or "physic" every day or two was necessary.

In Dr. Caldwell's Syrup Pepsin he discovered a laxative which regulates the bowels. A single dose will establish natural, healthy bowel movement for weeks at a time, even if the child was chronically constipated. Dr. Caldwell's Syrup Pepsin not only causes a gentle, easy bowel movement but best of all, it is often months before another dose is necessary. Besides, it is absolutely harmless, and so pleasant that even a cross, feverish, bilious, sick child gladly takes it.

Buy a large 60-cent bottle at any store that sells medicine and just see for yourself.

Dr. Caldwell's SYRUP PEPSIN

Be ashamed only of sin.—Wesley.

Red Cross Ball Blue is the finest product of its kind in the world. Every woman who has used it knows this statement to be true.—Advertisement.

Popularity can be troublesome.

SKIN IRRITATIONS
For their immediate relief and healing doctors prescribe
Resinol

Thousands of women testify to the truth of this from their own experience.

"But constipation *is* serious, Grace"

"Not so long ago I was like you—headaches a good deal of the time, sleeping badly, and the least bit of housework tired me out. My complexion too, was bad.

"Finally, I went to see Dr. Farman. He showed me that it was constipation that was back of my troubles. He said that it was a very serious thing because poisons from clogged waste matter were picked up by the blood and carried to every body organ. And if I didn't correct it in time I might become a victim of one of those terrible organic diseases.

"He made me drop laxatives altogether, changed my diet, and put me on Nujol. I don't think I've ever felt better. I sleep well, my headaches have disappeared, and you can see for yourself what an improvement there is in my skin. Nujol has done wonders for me."

Nujol Works Like Nature

Constipation is dangerous for anybody. Nujol is safe for everybody. It is neither a food nor a medicine. It does not gripe. It is gentle and natural in its action and is prescribed by leading medical authorities.

Nujol simply makes up for a deficiency—temporary or chronic—in the supply of natural lubricant in the intestines. It softens the waste matter and thus permits thorough and regular elimination without overtaxing the intestinal muscles.

Nujol can be taken for any length of time without ill effects. To insure internal cleanliness, it should be taken regularly, in accordance with the directions on each bottle. As Nujol is not a laxative, it does not form a habit and can be discontinued at any time.

Ask your druggist for Nujol today and begin the perfect health that is possible only when intestinal elimination is normal and regular.

Give Us A Trial--We'll Prove It.

Beams & Company

SPORTING GOSSIP

Spencerville played and won its fourth game of basket ball last Friday evening at Spencerville. The victims of the onslaught were the fellows from Leo. The game ended with a 22 to 18 score. There is no question about it, but that the Spencerville boys played one of the fastest and hardest games ever seen on the Spencerville floor. Leo started the game by quickly caging a basket. The score tied then Leo forged ahead, at one time gaining a five point lead. However, the Spencerville boys fought hard and came back so that at the close of the first half the game stood 12 to 11 in Spencerville's favor. One other time Leo was on the long end of the score, but did not stay there very long.

Nuenschwander, Leo's star forward, made twelve of its eighteen points, but was kept so thoroughly smothered by the defense of the Spencerville team that he was unable to prove his usual and touted flashiness Spencerville covered every man that had the ball with a speed that finally swept Leo off its feet so that during the last four minutes of the game, Leo just tried to keep from being beat worse than it was.

The game was all the more remarkable in that it was generally conceded by many of the basket ball sharks of Spencerville to Leo. However, the Spencerville fellows showed they had the right stuff and put up the best game seen here this year.

Next Friday Spencerville plays Waterloo at Waterloo, and on December 23rd play at Harlan.

Referee, Risk.

David Hogg Receives Appointment

Congressman David Hogg was Monday elected to a major committee appointment on the Committee of Postoffices and Post Roads in the House of Representatives. Hon. W. W. Griest, the dean of the Pennsylvania delegation in congress, is chairman of the committee.

The election of Congressman Hogg to fill a major committee appointment is an emphatic recognition of his ability and places him in closest touch with administration leaders. There were many contenders for the position and the election of Mr. Hogg is a distinct compliment not only to him but to the Twelth District of Indiana.

Mr. Hogg has been in Washington continuously since November 10 and has devoted his time exclusively to a serious study of proposed bills and of extending his acquaintances among fellow representatives.

Santa and His "Calling List"

Dorinda and Her Christmas Locket

She Decides to Reveal Mysterious Picture Back of Tiny Glass.

By MARTHA BANNING THOMAS

DORINDA'S hair was so pretty that you almost forgot to look at her face, but when you once looked at her face, you forgot all about her hair. At least that's what Sandy McQuinn said, and he ought to know, if anybody. Sandy had made a thorough study of Dorinda at all seasons when it was possible. In fact his research work would have done credit to a scientist.

There were times when Sandy felt exuberant, and there were other times when he called himself a complete idiot. This simple barometer of emotions indicated the various moods of Dorinda. Dorinda could scintillate with wit and mischief; Dorinda could droop in lovely wistfulness; Dorinda could be severe, and Dorinda could be

Strode About the Room Like a Pirate.

dazzling. One never knew which Dorinda, of her many selves, one would find.

"And," declared Sandy to his mother, who had gently inquired about his restlessness, "she keeps wearing that silver locket. She won't say who gave it to her and she won't let me peek inside. If she's got some other chap in there I'll just drop her! She need not think she can lead me around by the nose!"

Sandy struck an attitude of great superiority and strode about the room like a pirate. His mother smiled a little, but said nothing.

After a few dark mutterings and final gestures, Sandy said he was "going out" but would be in early. He lifted his hat from a hook in the hall and went straight as his feet could carry him, to the house of Dorinda Kent.

This sort of thing lasted all fall. By Christmas time Sandy had worked himself up to a great state of nerves over the locket. Dorinda was quite sweet about it, but also quite firm. She would never let Sandy see the contents.

Christmas eve Sandy's mother gave a little party to her son's friends. It was done chiefly for Dorinda, so Sandy's mother would have the opportunity of judging the girl's charms for herself. Sandy was earnest and solemn about all the arrangements, and even went to the point of asking his mother if she had dusted the back part of the piano—was she sure?

"We'll probably sing, you know," he said, "and I want everything to look just right."

"Yes, my son," answered his mother.

Dorinda floated in like a bit of thistledown. She was the last to arrive. Immediately she became the lively center of a laughing group. But she had not forgotten her manners: pushing the young people away, she went up to Sandy's mother, and captured her in half a minute. Mrs. McQuinn did not even know when she surrendered. "No wonder," she mused aloud, when the lovely girl had returned to the others, "no wonder poor Sandy is temporarily out of his head—she is a witching lass."

Of course there was dancing; of course there were good things to eat, and of course there was a bit of mistletoe cleverly concealed in an obscure corner. Sandy had privately seen to this. In fact the whole party revolved around this particular bit of mistletoe.

Just before the last dance Sandy lured Dorinda into that corner by saying he had something very important to tell her. When she stood directly under the tiny bough, looking up at Sandy with her dark, laughing eyes, Sandy opened his campaign. He put his arms around her and kissed her on her soft, flushed cheek.

She was furious. In the resulting scramble, the silver locket snapped its ring and dropped to the floor. Here was opportunity! Sandy ducked, evading the swift reach of the girl's hand. He had the locket in his grasp. It was open!

"You sha'n't look at it!" cried Dorinda, looking stormy but adorable.

"I've got it!" announced Sandy, "and if you don't let me look at it I shall probably kiss you again!"

Dorinda stamped her little satin slipper. "Oh, well, I don't care!" she said and shrugged her shoulders.

Sandy looked down at the open locket. It was perfectly empty.

"There!" triumphed Dorinda. "See what you have for your pains. Nothing but a locket to let."

Sandy drew her farther into the corner. "Why not put me in as tenant?" he suggested coaxingly.

And do you know what happened? After five minutes of battle, of Dorinda growing prettier every minute, of Sandy's profound arguments, the girl took the locket from him, and after prying up the tiny glass from one section, and removing a blank paper, said shyly: "Look, Sandy McQuinn!"

And Sandy found his own grin beaming up at him out of the silver square of the locket. It was a snapshot taken in the summer when Dorinda and he had been on a picnic.

* * * * * * *

"Was the party a success?" asked Sandy's mother as they were parting for the night.

Sandy was inarticulate. He waved his arms about in excited circles. He made funny little noises in his throat. At last he was able to speak.

"I guess she likes me, all right!" he said. "I found out what's in that locket!"

Hoosier News Briefly Told

Prof. Paul L. Saye of the Indiana university law school at Bloomington, has been named editor of the Indiana Law Journal.

Two mines in the Terre Haute field, Willow Creek mine, near Seeleyville, and Glenco, idle for several months, have reopened.

Thirty bank vigilantes of Laporte county have received deputy sheriff badges and will be armed in their efforts to run down bank bandits.

Edwin P. Thayer of Indianapolis, long prominent in Republican politics, was selected by the Republican conference at Washington to be secretary of the senate.

Governor Ed Jackson was the principal speaker at dedicatory services for the new $70,000 home of Millersville Masonic lodge No. 126, Millersville road and Kesler boulevard, Indianapolis.

The state board of finance, at a conference held in Indianapolis, decided to retire only $1,000,000 of the state's present outstanding note debt at the close of the present year, when the $2,000,000 worth of notes, now held by an Indianapolis bank, mature.

State Senator L. G. Bradford of South Bend was elected president of the Indiana state division of the Izaak Walton League of America at the closing business session of the annual convention of the body held at Elkhart. Senator Bradford succeeds Dr. Karl T. Brown of Muncie.

Senator Arthur R. Robinson of Indiana, young Senator LaFollette of Wisconsin and Senator Williams of Missouri, all in the senate to fill vacancies caused by deaths, stood in a group on the dias of the senate chamber at Washington, D. C., when the oath of office was administered by Vice President Dawes, presiding officer of the senate.

The formal request of the Muskegon (Mich.) police department for the reward of $1,000 supposed to have been posted by the Delaware county commissioners for the capture of George (Dutch) Anderson, "dead or alive," has been received by the commissioners at Muncie, but will be refused because no appropriation for such a reward was made.

The reduction of local taxes is wholly dependent on concerted action before the proposed annual budgets are accepted, was the assertion made by W. C. Nusbaum, attorney with the Indiana Taxpayers' association, in an address at a chamber of commerce luncheon at Columbus. Many states, Mr. Nusbaum said, are favorably considering the Indiana budget tax plan.

An audit of the finances of one of the principal motor bus routes in Indiana, completed by the public service commission at Indianapolis, indicates that not a bus company in the state is making money. The audit, made by John S. Powell, chief accountant for the commission, shows that in order to pay it would be necessary for the companies to charge a fare rate approximately 5 cents a mile.

During the fiscal year which ended September 30, the state of Indiana spent $35,751,064.59 in conducting its state government, a resume of the figures in the office of L. S. Bowman, auditor of state, at Indianapolis, shows. The gross receipts for the year were $52,856,192.69, but the net receipts are arrived at by subtracting from the gross a sum of $13,839,877.17, which represents advancements and transfers.

Indiana again has obtained one of the best dates of the fall season for the 1926 state fair, it was announced at Indianapolis by E. J. Barker, secretary-treasurer of the state agricultural board, and Lin Wilson, president, who have just returned from the national convention of state and sectional fair managers at Chicago. The Indiana fair will open Labor day, September 6, a particularly strategic time next year.

The seasonal hunting weather and the presence of large quantities of wild game are viewed by George N. Mannfeld, head of the fish and game division of the state conservation department at Indianapolis, as the leading factors in the increased number of hunting licenses sold in October and November compared with the number sold a year ago. State game wardens in October arrested 174 persons for alleged fish and game law violations, and 164 paid fines and costs amounting to $3,155.50.

Gov. Ed Jackson and Adjt. Gen. William H. Kershner, who have been on a hunting trip in southern Indiana for several days, paid an unexpected call on the residents of Oaktown, late at night, when their automobile stuck in the mud on state highway No. 10, one mile south of Oaktown. Several farmers were awakened from their sleep to entertain the state executive and a trip was made to Oaktown for a service car before the governor got under way to continue his trip to his home in Indianapolis.

Four quarantine law violators were fined at Evansville in an effort to curb the scarlet fever epidemic raging in Evansville.

Gary Knights of Columbus will erect a $1,000,000 structure of nine stories to house their activities there, officials announced.

Following an announcement of the county hospital board that her salary had been cut from $2,700 to $1,500 a year, Miss Harriet Jones, superintendent of the Cass County hospital at Logansport since December 1, 1924, resigned.

TAILORED SUITS THE MAINSTAY; INTEREST IN BLOUSES REVIVED

THAT long-time mainstay of every woman's wardrobe—the severely tailored, plain, two-piece suit—has been conspicuous by its absence from the streets during the passing fall season. It has not lost any of its trim appeal, but styles have tended toward greater elaboration in day frocks and new lines in coats, and the novelty of these modes has compelled attention to them at the expense of the tailored suit. But anything so dependable and so chic cannot remain long in eclipse, and now new tailored suits are making their appearance and challenging other street clothes to comparison.

These new suits, while strictly tailored, have great vivacity and very interesting new style points. Plaid

Typical Tailored Suit.

materials or combinations of plaid and plain goods are featured in many of them and pleasing new colors are employed, as cloud gray, blue spruce, Flemish blue and bottle green. In plaids, grays predominate barred with white, green, yellow or blue, and occasionally, a fine line of red. But the staple dark colors are well represented as navy, brown and black.

Skirts in tailored suits, preserve the straight line, but are provided with "kick" plaits as shown in the picture at the front, or with plaits at the sides. Some coats are short and straight, reaching only to the hip line. Others are longer and introduce a flare in the skirt portion. Vests or waistcoats in contrasting, plain colors are sometimes substituted for blouses. The ensemble idea is carried out in suits with plaid skirts, plain coats, lined with plaid, and vests in contrasting color. A snappy model of this kind is shown in the picture. Other suits made entirely of plaid material have shorter coats and are worn with blouses, but usually the coat is buttoned up at the front. There is a pretty fad for wearing a flower on the coat, repeating the dominant color in the bars that cross the material, thus a chrysanthemum in yellow is pinned to the right lapel on a gray coat with an inconspicuous bar in yellow.

Once again one may achieve almost any character of costume by acquiring a velveteen and a satin skirt and with them a variety of blouses. The growing popularity of two-piece modes has revived interest in blouses and blouse makers have taken advantage of it by adding blouse-ensembles to their displays—that is, they present blouses with skirts to match in color either of which can be worn separately. The displays include over blouses, in simple and in formal types, costume blouses, tunic models, tailored and sports styles.

Materials featured in the less expensive models, for ordinary wear, begin with rayon fabrics, balbriggan and flannel and end with velveteen, satin and crepe; velveteen leading in interest. For formal types tinsel brocade and other tinsel fabrics, moire, chiffon velvet and satins are conspicuous. Finger-tip or wrist lengths are popular along with high necks and long sleeves but neck lines are much varied. Many tailored blouses have convertible collars that may be worn fastened up about the throat or turned down to form a small "V"-shaped opening at the front.

One of the most popular models in dressy blouses is shown at the left of the two illustrated, where a tinsel fabric is used. This blouse is finger-tip length, with long sleeves and round neck. It is bordered with bands of georgette and velvet, in contrasting colors and trimmed with an applique

Two of the Modern Blouses.

floral pattern of velvet finished with a tiny cord. It is worn with a velveteen skirt. Moire blouses with velveteen collars and cuffs are similar in character.

Flannel and balbriggan, for sports and utility wear, are successful rivals of velveteen and washable crepes. They are made in varied, simple ways with long sleeves and more or less high necks, which may or may not have contrasting materials in the collars. A pretty flannel blouse is pictured with belt and tie of self-material and a crepe collar.

Solution of Last Week's Puzzle.

HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indented in the definitions.

WILLING TO TRAVEL ON DOG'S TICKETS

"The nations of Europe are great bargainers. We must remember that fact in arranging with them for the payment of their war debts," said Prof. Harold North Fowler, the noted archeologist of Cleveland.

"The Latin nations especially are great bargainers. A Spaniard from the country once walked into the ticket office at Malaga to take a railroad trip.

"'What's the fare,' he said, 'to Fuengirola?'

"'Five pesetas, senor.'

"'Caramba! Too much. I'll give you two, spot cash.'

"'We don't higgle here,' said the ticket agent.

"'Well, I'll give you three, then.'

"'Five pesetas is the price—take it or leave it.'

"'Look here, amigo, I have a dog with me. Can he come along?'

"'Yes, in the dog compartment, if you buy a ticket for him.'

"'How much?'

"'One peseta.'

"'Good! Let me have two dog tickets, please.'"

South American Drug Has Odd Properties

A new drug that has been recently brought to this country for chemical examination is called by the natives of the Colombian territories of the Putumayo and Caqueta rivers, where it grows, by the peculiar name of "yaje." The drug is prepared from the stem of a rather leafless shrub, which averages about nine to twelve feet high. What leaves there are are counterpoised and a dark olive green in color. The infusion made from the stem by heating in water is reddish with greenish fluorescence, and on keeping this changes to a topaz having a beautiful bluish green fluorescence.

Under the influence of the drink the natives jump, scream and run wildly about, making a great uproar. Accordingly it is highly prized for ceremonial occasions, fresh potations being taken as the effects of the preceding ones wear off.—Washington Star.

Cause of Emotions

There is a great deal of unmapped country within us which would have to be taken into account in an explanation of our gusts and storms.—George Eliot.

Not So Novel, at That

Line from future novel: "Elise appeared at the door, weary and bedraggled, with two days' growth of beard on the back of her neck."—Kansas City Star.

Rainbow Has Many Names

What the English-speaking people call the rainbow has many names in other countries. In France it is "the arch in the sky," in Italy "the flashing arch" and in different parts of southern Europe the "arch of St. Martin," the "crown of St. Bernard," the "bridge of the Holy Spirit" and the "girdle of God." In Sanskrit it is known as the "bow of Indra." The Annamites call it the "little window in the sky" and the Kabyles in North Africa name it as the "bride of the rain."

Evidently Made to Last

R. H. Price of Nocona, Texas, has a watch 200 years old, which was made by Smitton & Hutton in London. This ancient timepiece has been passed down in his family for generations. Although somewhat large, wound by a key and of the "chain drive" variety, it keeps good time.

Parisian Perfume Shops

Paris is said to have more perfume shops than all other cities in the world combined. There are 10,000 perfume establishments in Paris, and about 15,000 hair-dressing shops which carry perfume as a side line.

His Great Oversight

Once a musical critic spoke a good word for a comic opera, and before he could correct his mistake the paper had gone to press.—Florida Times-Union.

RADIO

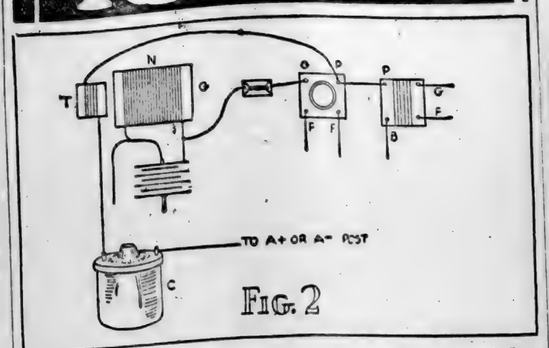

FIG. 2

Diagram Showing the Tickler System Which Is Really Better, Since It Provides a Certain Regeneration Control Over the Entire Wave-Length Band.

By BRAINARD FOOTE
In the Philadelphia Public Ledger.

Five-tube tuned R. F. sets, home-made, are noted for their excellence of performance on short wave lengths and their failure on long waves. On wave lengths higher than 400 meters reception of DX stations is seldom satisfactory, although locals, of course, are well received. Below this dividing mark reception improves, and in the vicinity of 300 meters is ordinarily very fine indeed.

Many well-made receivers, neutrodynes and other five-tube T. R. F. outfits are provided with an automatically varied device which increases the coupling for longer waves or otherwise varies the amplification so that long-wave reception is as good as on short waves.

But receivers not so well made do not have such extra equipment, and the user who is interested in DX must either be satisfied with DX around 300 meters or else resort to an outside attachment to even up matters for high waves and, perhaps, very short waves, this latter in case the set gets into oscillation near 200 meters.

One of the most common methods adopted to provide equalized amplification in the two R. F. stages is to employ three 45-volt "B" batteries and a series variable resistance to permit varying the voltage and thus force the tubes into greater sensitivity by mere "brute" application of voltage from the "B" batteries.

Other methods call for variation of coupling by changing the position or number of turns on the primary windings of the R. F. transformers, but these methods are difficult, troublesome, and make it necessary to take the transformers out. One of the very best schemes consists in making the detector regenerative and is the method preferred by the writer.

Persons not interested in DX work need not touch this control and it may be left at zero.

Tickler on Variometer.

The regeneration may be added in two ways—with a tickler coil or with a variometer. The latter is certainly simpler, and to do it the circuit of Fig. 1, is followed. The detector (middle in the five-tube set) socket is shown and to the right of it the audio transformer for the first stage. The connections originally were according to the dotted line, from the plate or "p" terminal of the transformer.

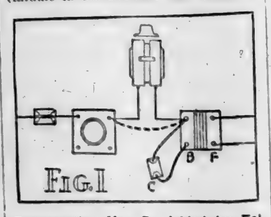

FIG. 1

Regeneration May Be Added by Following This Diagram.

A fixed condenser is usually connected across the primary of the transformer from "P" to "B." This instrument is labeled (C) in the figure.

The variometer is inserted between the plate (P) of the socket and the (P) post of the transformer. It may be placed outside the set or on top of it, and the wires to it should be well insulated to prevent any short circuits. Manipulation of the variometer will make the detector oscillate and will cause a whistle. When moved slightly to stop whistle the best condition of regeneration is found and will result in a remarkable increase in sensitivity.

The variometer, however, is not quite as satisfactory as it might be, but the method is proposed for the benefit of those in position to try the method. The tickler system is really better, since it provides a certain regeneration control over the entire wave-length band, whereas the variometer does not always do so with complete satisfaction.

This plan is shown in Fig. 2. (N) is the third neutroformer or tuned R. F. coil which is connected to the detector. In front of it is shown its associated variable condenser. To the right is the detector socket and to the extreme right the audio transformer, as in Fig. 1.

Tickler System Is Simple.

The tickler system suggestion is quite simple, in that it does not mean installing a shaft and dial on the tuned R. F. coil. A tickler circuit with a fixed tickler coil and variable condenser for controlling the regeneration is given instead.

In making this addition it is necessary to remove the fixed condenser (C) mentioned in connection with Fig. 1, since this would "by-pass" R. F. energy needed for regeneration. The result is an improvement in both volume and tonal qualities, apart from the gain by using regeneration. The tickler coil itself consists of from 10 to 30 turns of wire of most any convenient size, preferably small, wound on a short piece of tubing slightly smaller than the tuned R. F coil.

Care must be taken that in inserting the tickler its wire cannot come into contact with any of the binding posts, soldering lugs or wire already on the coil, and, moreover, it is to be situated at the filament end of the coil (N).

This can readily be determined by noting which end of the coil is connected to the unmovable plates of the variable condenser and also to the grid condenser, shown between the coil (N) and the (G) post on the socket.

If the tickler (T) is wound in the same direction as (N) the ends of (T) will be connected as indicated. In case of doubt (T) can be inserted one way and, if no regeneration results, it can be taken out, turned around and inserted the other way. The variable condenser (C) is preferably an instrument already mounted and located outside the set.

Later on, if you like the results, you may install this extra condenser on the panel, with an external knob or dial. The size of the condenser (C) is not of especial importance, since, if it is too small, more turns can be used on coil (T) and, if too large some taken off.

The regular 23-plate condenser is suitable. One of its terminals is connected to the tickler (T), while the other goes to one of the "A" battery binding posts or to any convenient point on the filament circuit. The wire used should be insulated to avoid accidental contacts and the connections ought not to be too lengthy.

Operation.

Making the detector regenerative in this way permits you to employ the whistle to tune for DX stations. The set must be carefully neutralized to prevent radiation, but even then it is better not to allow the detector to oscillate when you are on the wave length of any local station simply because there is a chance that you might interfere with some one.

When the "whistle" has been heard and the R. F. dials accurately set, the capacity of condenser (C) is reduced until the whistle ceases. A slight touch of the tuning condenser for coil (N), the detector coil will bring it voice or music. On long wave lengths it will be found necessary to increase the capacity of (C).

And on short wave lengths it may be necessary to set (C) at zero. Where the natural period of the antenna interferes with reception around 220 meters, as it so often does, the regeneration control will offset this trouble.

Where it is never necessary to use more than a quarter or a third of the capacity of (C) to produce regeneration the tickler should either have fewer turns or should be moved partially out of coil (N). In case regeneration cannot be obtained on the high wave lengths it follows that the tickler should have more turns.

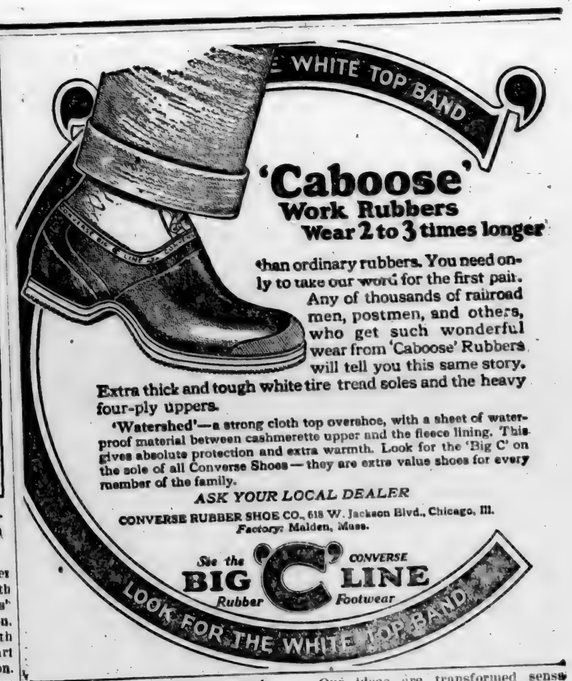
On account of the two stages of tuned radio-frequency in such a set the added "feedback" for making the detector oscillate will be very slight and much less than the amount of regenerative action required where there is only one stage of tuned radio-frequency. The difference in sensitiveness on waves formerly sort of "dead" is truly astonishing.

Connect Plugs Correctly

When building a set be sure to note to which side of the jacks you connect the plus terminal of the "B" battery. Then be just as sure to connect your phone cords to the plug so that the phone terminal marked with a colored thread will connect in the "B" battery plus in the jack. Both phones and loud speakers work much better connected correctly and the magnets do not lose their strength.

Handle Phones Carefully

Headphones, when well made, are delicate instruments and should be handled just as carefully as a fine watch. One should never let them drop, or handle them roughly, any more than one would willingly let a glass tumbler fall on the floor.



Time is the surest sense of truth.

Freshen a Heavy Skin

With the antiseptic, fascinating Cuticura Talcum Powder, an exquisitely scented, economical face, skin, baby and dusting powder and perfume. Renders other perfumes superfluous. One of the Cuticura Toilet Trio (Soap, Ointment, Talcum).—Advertisement.

A Vermont man wore a pair 25 months. Ask your shoe dealer for new shoes with USKIDE Soles. If either has them or can get them for you.—Adv.

Silence best speaks the mind.

DECORATOR NOW ENJOYS HEALTH

Samuel L. Martin

Samuel L. Martin, 713½ Main Street, Evansville, well known painter and decorator, says, "Of course I look younger. I feel younger, thanks to Tanlac, but two years ago I was all run down.

"I was weak all the time because I had no appetite and what I did eat gave me no energy. The only thing I got from food was indigestion, bloating and much constipation. I'd get up tired in the morning. It was discouraging.

"One day a friend said, 'Your trouble is sick digestive organs. Your food is not digested; it causes bloating, heartburn and headaches. Tanlac is a tonic for sick digestive organs. Take Tanlac and you'll help your digestive organs give you health.'

"I took his advice and now Tanlac has given me a healthy body. I sleep fine. Eat everything. I have much more strength. Even ceiling decorating does not tire me."

Over 40,000,000 bottles have been sold. Endorsed by many Indiana people and millions elsewhere. Get Tanlac today at your druggist's.

Tanlac Vegetable Pills for constipation, made and recommended by the manufacturers of Tanlac.

Green's August Flower for Constipation, Indigestion and Torpid Liver

Relieves that feeling of having eaten unwisely. 30c and 90c bottles. AT ALL DRUGGISTS.

Let Cuticura Soap Keep Your Skin Fresh and Youthful

Sample Free. Ointment, Talcum free. Address: Cuticura Laboratories, Dept. M, Malden, Mass.

In Case of Accident

Wherever there are children, accidents are likely to happen. Porter's Pain King Salve has powerful healing and antiseptic properties. Recommended for burns, cuts, bruises, sores, wounds, chapped and cracked skin, boils, piles, felons, itch, cold in the chest, croup, lumbago, varicose veins and eczema. Made of healing drugs combined with lanoline (pure wool fat).

Our ideas are transformed sensations.—Condillac.

Notice Of Determination To Issue Bonds

Notice is heredy given to all interested tax payers of DeKalb County, that the Board of County Commissioners have determined to issue bonds in a sum not to exceed thirteen thousand nine hundred fifty-seven dollars and fifty cents ($13,957.50) to pay for the construction of the Robertson Nicholls, et al, improved highway in Concord Township, the same being the estimated cost thereof, including all expenses connected therewith.

Said bonds are to bear interest at the rate of four and one half (4½) per cent per annum, payable semi-annually, and all to mature within a period of ten (10) years.

Said bonds will be charged to said Concord Township and a tax will be levied upon said township by the taxing officers of DeKalb County for the purpose of paying for said bonds, all in the manner as is provided by law.

FRANK SHOOK,
Auditor, DeKalb Co., Ind.
C. M. Brown, Atty. 50t2.

Attend the play and entertainment at the school house Saturday night.

Be sure and guess on the Beans at Curie's for you may get one of the 3 prizes given away Dec. 24th at 3:30.

A. Haner is ill with pneumonia.

Harry Cole of near Hicksville, was a Sunday guest of his brother, Glen Cole.

Mrs. Fred Hart spent from Tuesday until Friday of last week with Edith Widney.

VOL. XXXIX | ST. JOE DeKALB COUNTY, INDIANA, THURSDAY DEC. 24, 1925 | NO. 51

Today we issued checks to our **37 Customers for $1,947.50.** Already we have an increase in depositors for the New Club and many of them children.

A Christmas Your Children will Remember

It is the Christmas Day on which you give them a Bank Book as a gift, with a Savings Account started in it for them. We offer you every facility of this Bank in getting this most desirable of gifts ready.

New Christmas Savings Clubs are now starting at this Bank, and you are most cordially invited to join. A small amount deposited weekly will insure you a handsome sum for next year's Christmas Shopping.

Every day we are adding many new members to our Christmas Savings Club, and almost all of our old members are starting in the new Clubs. They have found it an excellent plan to insure them extra money for Christmas shopping, and they have told their friends about it. If you have never investigated this successful plan, now is a splendid time to do so.

Come in and ask us to EXPLAIN the CLUB to YOU.

St. Joe Valley Bank, A State Bank.

Hart Child Dies Suddenly

St. Joe is experiencing a diphtheria scare as the result of a very sudden death of little Miss Gladys Hart, nine year old daughter of John Hart and wife, of the west part of town. Less than 24 hours after Dr. Shook was called the little girl was dead. While examinations did not prove the disease, yet the physicians were satisfied with the verdict. No other member of the family has taken sick The little one died Thursday evening and burial was made on Friday with only the grandfather to accompany Mr. Kinsey and the pastor, Rev Jones to the Spencerville cemetery. The Victor Brown family is also at the Hart home but the two men are continuing their work as linemen and minister to the needs of their families. There is no liklihood of an outbreak of the disease as no one is complaining as yet.

Joseph Koch Rescues Lad

The News-Sentinel Gives The Following Account of Rescue:

"When Gilbert Brown, aged 7, son of Mr. and Mrs. James A Brown, 1520 Columbia avenue, broke through ice on Delta lake, at Lakeside park, while on his way to school last Thursday afternoon, Joseph Koch, 1030 Columbia avenue, who was passing in his machine, dived through the ice to rescue the boy.

The boy was sinking for the second time when Mr. Koch reached him. Pulled from the lake, the boy was stiffened by the icy waters. He was taken home, where physicians began a battle to avoid pneumonia.

The rescurer was being attended by physicians this afternoon to avoid pneumonia from exposure.

The boy stepped onto the ice, which other children were crossing. A soft spot gave way and the lad was thrown into six feet of water.

Mr. Koch was the first to approach at any point near the accident. Another man opposite the spot telephoned police headquarters and physicians and the police boat were rushed to the scene."

Joseph Koch was a former St. Joe boy, having been born and raised at this place, the younest son of Mr. and Mrs. Chas. Koch.

C. R. Brunson of Fort Wayne, is visiting relatives here this week.

License Plates Must Be Visible

As a warning to motor vehicle operators in the state, Robert Humes, chief of the state police, has announced that the provisions of the law requiring license plates to be plainly visible will be rigidly enforced after the beginning of the year. The warning is issued at this time, he said, in order that motorists on obtaining the new plates would have an opportunity to place the plates on their automobiles correctly.

The plates must not be fastened behind bumpers or other objects that obstruct the view of the numbers, Mr. Humes said. He also cautioned truck drivers that the law provides the plates shall not be placed more than four inches from the farthest rear projection of the vehicle. This precludes the possibility of hanging the licenses on the axle of trucks whose bodies project far out beyond the axles.

Dyed Fur Popular for Winter Wear

Fur should be worn logically in cold weather for warmth and protection. As a matter of fact, writes a fashion correspondent in the New York Times, fur has little to do with weather, climate or anything else but fashion. To have a fur wrap or a frock ornamented with fur is no longer a distinction, and to be without fur is to be unusual. The manner of adding the fur swings from one extreme to the other, varied with all possible ingenuity from year to year. Far more discrimination in the use of fur is being shown by the designers this season than previously. Some of the models presented are real achievements. The fashion of using a fur border at the hem of an otherwise untrimmed coat persists. This practice does not come as a rule from the authorities. It is just among the things one sees en passant. Almost any sort of fur may be used with modishness, depending largely upon the individual and the type of garment. Many new furs, or fur with new names, were introduced at the beginning of the present season. Few of them had the appearance of genuine quality and many were obviously of the humblest origin. Squirrel and rabbit skins which take dye beautifully are very popular. Even more so is Belgian hare used on the choicest gowns and wraps designed by Parisian couturiers. It is still of a price which admits of its use by women who may not buy the costlier furs. A large hare said to be Australian is attractive in its natural color, shading from light to dark gray, in wide stripes.

The Charm of Dyed Fur.

Fur dyed to match the material of a frock or wrap met sudden response this season. It has undeniable charm, especially when trimming the latest colors in cloth and velours, the new green, king's blue and a pastel blue with a bit more vitality than pervenche, violet, mauve, tobacco brown, saffron and citron. The beauty in shades so far outweighs the artificiality of this novelty that it has taken well and endures as novelties do not always do. Among the Parisian designers no one has illustrated the possibilities of these matching furs more successfully than Madelaine Vionnet. A model of her fancy, a gown and coat of quartz-green velours, with collar, cuffs and deep hem-bands of fur dyed the same shade, is lovely. Another, in violet, is built of the season's version of broadcloth, bordered with hare of a slightly deeper tint. The olives, yellows, lemon, orange, flame, nasturtium, mustard in cloth and velvet, with fur sometimes short and soft and again longer and more shaggy, are among the intriguing things chosen particularly for the jeune fille type.

Fur Trimming Used for Tailored Coat of Scarlet Needlepoint.

Foxes are more fashionable than ever and more expensive. Women of fashion have become so sophisticated in such matters that they demand the genuine article in expensive furs. They are connoisseurs to a canny degree. The full-skin neckpiece came back this autumn stronger than ever. Every variety of fox is being worn in collars and cuffs and borders and in the new style muffs one sees occasionally.

The most important creators of styles in Paris, London and on this side of the Atlantic have put their best talent and best workmanship into the new fur wraps. One may have a coat of almost any skin—sables, mink, ermine, sealskin, caracul or any one of the countless new furs that have lately appeared.

One is advised by the furrier that sealskin is no longer fashionable, yet there are women who will have one seal coat or wrap, whatever the novelties are. It is the most flattering of all furs. Its beauty in the dark shade, long known as "seal brown," is accentuated by the addition of collar and cuffs, and sometimes other trimming of a different fur—sable, fox, kitfox, beaver or kolinsky. The most interesting variant offered in sealskin is the new gold-dyed seal,' a shade seen in some of the handsomest coats shown this season. A particularly distinguished model has a deep shawl collar and wide flaring cuffs of Russian sable. Mink holds its own year after year. Even when its glory is dimmed for a season it comes back better than ever. In a few years mink has come out of the "old lady class" and is worn by the smartest of the younger set. The latest wraps of mink done by the best designers are unusual and entirely new in design. The fur is used in strips to attain certain shaded effects, roundabout, perpendicularly, diagonally or in other unique arrangements. Nothing is considered smarter for trimming the neck, sleeves and border of an evening wrap than strips of mink or mink tails. This is a particular favorite of Phillippe et Gaston, who use mink on some of their most superb wraps of brocade and metallic cloths. Lucien Lelong illustrates the beauty of snowy white fox as a supplement to a wrap of royal ermine, and uses it with the most entrancing effect on his evening wraps of lame.

Ensemble of Black Embroidered Velvet, Beige Fox Trimming.

Some rare and very beautiful furs not generally known, are coming into use from South America. They are real "finds." One is the vicuna, from the Andes; soft, silky and tawny yellow in color. Another is llama, the historic beast of burden. Baby llamas provide the lovely furs obtainable only from a few exclusive houses. Not unlike the llama is alpaca; black, white and brown and chamois, resembling vicuna somewhat, in a lighter shade of yellow. The latest whim of the most chic Americans is for skunk, always becoming and always stylish.

The Scarf Ensemble.

A set of ten chiffon scarfs tells the time of day and suggests the weather Even a thunderstorm is included. Is each of them a single color predominates, except in the casino and the rainbow scarfs. For dawn there is pink, orange for sunrise, yellow for mid-day, gray for the clouds, brilliant flame for lightning, starry and silvery tones for evening, gray, black and red for the casino, green for dancing and blues for midnight. These scarfs may serve a double purpose. They may be draped around the crown of a hat with their ends wound about the neck.

Slave chain necklaces and bracelets have made their appearance this season in most elaborate style. Plain and enameled links alternate. There are loops of jade, onyx and lapis, and some are set with brilliantly colored stones or pearls.

Hat ornaments in such odd and striking shapes as anchors and streaks of lightning are used on evening and afternoon dresses to give a certain "touch" to a sash or drapery.

Shoe horns measuring 19 inches, with a hooked end that may be held firmly between the thumb and forefinger, will be a joy to the lady who does not like to bend over. They come in all colors and are decorated with a hand-painted figure and a rhinestone border.

A rich-looking powder box is of black enamel and gold and is small and flat enough to fit into the palm of the hand, yet is big enough to carry an evening's supply of powder. A flower inset of platinum or white gold gives it an antique look.

Dutch-shaped pouch bags with either a strap band or lift handle come in tan, brown and black calfskin. An ivory ornament completes the clasp opening. Lining and fittings are of silk moire in contrasting colors.

Ankle bracelets are now on display in the shops. They are made of fine chains, interspersed with loops of various colors and small pearls.

THE KITCHEN CABINET

(©, 1925, Western Newspaper Union.)

Good talk is like good scenery—continuous, yet constantly varying, and full of the charm of novelty and surprise.

An apple a day keeps the doctor away.

A CHAPTER ON APPLES

The wholesome apple is such a well liked fruit that it needs no one to sing its praises. A fresh, juicy apple eaten at least once a day is the best of medicines. For the ill a baked apple is easy of digestion and always appetizing. As a dessert nothing can be more wholesome than a good apple well baked.

Baked Apple With Raisins.—Pare and core apples, fill the cavities with sugar, raisins and pieces of butter. Bake fifteen minutes. Remove and fill the centers with more sugar and cinnamon and butter. Replace in the oven and baste with boiling water to make a sirup. Bake until the apples are soft. Serve hot with cream.

Apple and Brown Bread Pudding.—Take one pint of brown bread crumbs, one pint of chopped apples, two-thirds of a pint of finely chopped suet, one cupful of raisins, one egg, one tablespoonful of flour, one-half teaspoonful of salt, and one-half pint of milk. Mix the apples and bread crumbs. Add suet, raisins, egg, flour, salt. Mix with milk and boil in a buttered mold for two hours. Serve with lemon sauce.

Lemon Sauce.—Take two teaspoonfuls of cornstarch or arrow root, two cupfuls of water, one cupful of sugar, one and one-half tablespoonfuls of butter, the rind and juice of one lemon. Mix the starch and sugar, add boiling water and cook twenty minutes. Add flavoring and butter and serve hot.

Onion and Apple Salad.—Chop fine a small Bermuda onion, add two cupfuls of finely diced apple (good flavored tart apple), add a handful of dates cut fine, a sprinkling of chopped green pepper and mayonnaise enough to moisten. Serve on heart leaves of head lettuce. Sprinkle with paprika as a garnish. A spoonful of apple sauce on top is both appetizing and decorative.

Apple Dumpling.—Take four cupfuls of sliced apple, one-half cupful of water, two cupfuls of flour, four teaspoonfuls of baking powder, one-half teaspoonful of salt, one-fourth cupful of sugar, one cupful of milk and a little grated lemon rind. Mix and sift the dry ingredients, except the sugar. Add milk. Fill a buttered pudding dish with apples, add sugar, water, lemon rind, cover with flour mixture and steam one and one-half hours. Serve with lemon sauce.

Potato Pancakes.—Peel three large potatoes, grate them, add salt, pepper, a little milk and flour enough to make the batter the right consistency to fry. Heat the griddle hot, add fat and fry long enough to thoroughly cook them. Serve with apple sauce or jam of any kind.

Nourishing Soups.

A cream soup is sufficiently nourishing to serve as the main dish. Where the dinner is served at noon, a hot soup is greatly appreciated for the night meal at this season of the year.

Celery with potato or onion with potato makes a good flavored soup that satisfies all.

Cream of Potato Soup.—Boil two large potatoes and mash well, adding a cupful of cream, season with salt and grated onion. Blend two tablespoonfuls each of butter and flour, add two cupfuls of cold milk and cook until smooth. Serve hot with croutons.

Sweetbread Soup.—Reheat one quart of veal stock and add two cupfuls of cream which has been blended with two beaten egg yolks. Take from the heat, season to taste, add one cupful of parboiled sweetbreads cut into fine pieces. Garnish with whipped cream and minced parsley.

Egg Soup.—Butter six slices of stale bread, sprinkle with sugar and brown in the oven. Reheat two cupfuls of veal stock and two cupfuls of milk beaten with the yolks of three eggs. Add a tablespoonful of butter; season with salt and pepper, minced parsley and a grating of nutmeg. Pour over the toast; cover for ten minutes and serve.

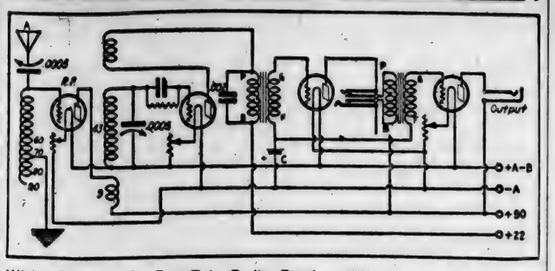
Cream Veal Soup.—Chop fine three pounds of lean veal and one large onion. Cover with two quarts of cold water; simmer three hours, strain and cool. Thicken with two tablespoonfuls of flour blended with a little cold milk, add three well-beaten eggs and a pint of milk. Season with salt and pepper and minced parsley.

Veal and Celery Soup.—Cut up three pounds of veal, break the bones, cover with four quarts of water and simmer for four hours; strain and return to the fire. Add two bunches of celery and two chopped onions, simmer until the vegetables are soft. Press through a fine sieve, thicken with two tablespoonfuls of cornstarch mixed with two cupfuls of milk; add two tablespoonfuls of butter in small bits, reheat and serve with diced fried bread.

Blood stains of woolen goods, if fresh, may be completely removed if saturated at once with dry starch. It absorbs the moisture and when dry all the stain will brush out.

Nellie Maxwell

RADIO



Wiring Diagram of a Four-Tube Radio Receiver Which Employs One Stage of R. F. Amplification.

By GEORGE M. MEYER,
In the New York Herald-Tribune.

How would you like to build a four-tube set that would give volume almost equal to any five-tube receiver on the market? It can be done. The receiver about to be described may be constructed without the use of "low-loss" parts or trick-wound coils. It is an excellent receiver and as for volume and clarity of reception, nothing more could be desired.

The circuit makes use of a stage of radio-frequency amplification which seems to supply tremendous volume to the detector tube.

It is the writer's opinion that greater radio-frequency amplification per stage can be obtained when the circuit is tuned in single circuit fashion; that is, with a condenser connected in series with the antenna tuning coil rather than across a coil having an untuned primary winding. In past experience with receivers employing a stage of tuned radio-frequency ahead of the detector results have shown that greater amplification of radio-frequency currents is possible with the series circuit. In fact this type of circuit has been known to produce as much amplification as two stages of tuned radio-frequency employing condensers shunted across secondary coils and nontuned primaries. It is for this reason that this four-tube set will produce as much volume and receive as much DX as some five-tube tuned radio-frequency receivers.

Special couplers or coils are not necessary, as the two coils in this receiver may be home-made. Below is a list of the parts required to complete the set:

The Parts Needed.

One panel.
Two .0005 variable condensers.
One .00025 grid condenser with mounting.
One four megohm leak.
One .002 fixed condenser.
One tube 3 inches in diameter, 4 inches long.
One tube 3 inches in diameter, 4½ inches long.
One pair of audio transformers.
Seven binding posts.
Four sockets.
Two single jacks.
Two 20 ohm rheostats.
One 10 ohm rheostat.
Two 4-inch dials.

A careful selection of the parts is essential.

Designers of some of the highest class receiving sets have specified flexible stranded copper wire for all filament and plate battery connections. These leads are all bunched together and tied to keep them out of the radio-frequency circuit. The wires running to the sockets, binding posts and rheostats should be kept near the baseboard of the set. A receiver wired in this fashion will not be subject to squeals or high-pitched notes common to a great many home-made sets in which the "A" and "B" battery circuit is allowed to traverse the tuning circuit.

Secondary Tuning Coil.

The secondary tuning coil which feeds the detector tube should be carefully made and wound tightly with No. 24 D. C. C. or D. S. C. copper magnet wire. There are three separate windings on this coil, one for the plate of the radio-frequency tube, the secondary and the plate coil of the detector circuit. The tube should be three inches in diameter and four and one-half inches long. Start about half an inch from one end and wind nine turns of wire, being careful to prevent the wire from coming unwound. Fasten each end of this small winding through small holes made in the tubing.

Then in the reverse direction wind the secondary coil with 43 turns of wire. Leave one-quarter of an inch between the first winding and the secondary. Remember the secondary coil is wound directly opposite to the nine-turn coil. Both ends of the secondary winding should be fastened through holes in the tubing. Skip a half inch and wind nine more turns of wire in the same direction as the 43-turn winding. You now have completed the coil. It may be mounted in back of the secondary tuning condenser and placed at right angles to the antenna coil.

If the antenna coil is mounted upright from the base the coil with the three windings should be mounted parallel to the baseboard. The two coils should be a half-inch apart. The latter may be mounted on brass brackets or by means of small blocks of wood fastened to the baseboard.

The secondary of this coil is shunted by a .0005 variable condenser. The reversed winding is in the plate circuit of the radio-frequency tube. The end nearest the secondary connects to the "B" battery of the detector tube. The outer end connects to the plate terminal of the radio-frequency amplifier tube. After the set has been tested, it may be well to try reversing these connections.

The nine-turn winding which follows the direction of the secondary is connected in the plate circuit of the detector tube. When the circuit is under test, if it regenerates or squeals this coil is wound too near the secondary. Slide this coil away from the secondary another quarter inch. This will prevent the regeneration to the extent of stopping oscillation. There will still be a certain percentage of regeneration present which is necessary in order that the receiver function on distant stations. However, the set should not squeal on any wavelength. It will not radiate, due to the blocking effect of the stage of tuned radio frequency.

"C" Battery Is Included.

A "C" battery seems to be in style, and so one has been included in the circuit. It will improve reception as well as prevent excessive drain on the plate batteries. Ninety volts "B" battery will require a "C" battery of 4.5 volts. If one of the new RCA power tubes is used in the last stage a great increase in volume over the 201A will be obtained.

A word or two of explanation concerning the tuning of this receiver is given to enable those who have constructed similar outfits to obtain the best of results. There are but two controls as far as actual tuning is concerned. One of these to the left of the panel is employed to tune the first stage of radio-frequency and the antenna circuit. The second tuning condenser is used to tune the detector circuit. This adjustment is in control of the wave lengths and may be called the "station selector," as it is used to pick out the stations. If the set has been properly constructed, this tuning dial should be fairly sharp on all stations. It may be logged.

The radio frequency coil is wound on a 3-inch tube about 6 inches long. No. 24 double cotton or silk-covered wire is required for the winding. The entire coil contains 90 turns of wire, with 4 taps take-off at intervals. Start the winding about half an inch from the end of the tube, and before taking the first tap, wind 50 turns of wire. Make a loop or twist which may be cleaned later for connections. Continue winding the coil in the same direction until the seventieth turn. Take another twist and proceed to the eightieth, where another tap is taken. Finish the coil at the ninetieth turn and leave a short end for connecting the bus bar wire.

Two small brass braces can be screwed to the bottom of the coil for holding it in an upright position on the baseboard.

This coil should be placed directly in back of the aerial tuning condenser and about an inch away. The .0005 variable condenser which tunes this coil is connected to the top turn. This should be made to the fixed or stationary plates of the condenser, in order to avoid any possible "body capacity." The rotor plate connection goes to the antenna binding post on a strip at the rear of the baseboard.

Connects to Grid Terminal.

The top of the coil also connects to the grid terminal on the radio-frequency tube socket. Make the lead as short as possible and direct to the socket, avoiding bends and fancy-shaped wires.

The antenna series condenser aids in bringing about resonance between the primary radio-frequency circuit and the detector circuit. The adjustment of this dial may not be so critical as the other dial across the secondary tuning condenser. It may be well to experiment with the taps on the coil winding. Pick out a tap which will give a dial reading on the antenna condenser which takes in wave lengths between 200 and 550 meters. It is difficult to state offhand which tap will be correct. Once the proper turn is located the lead wire to the condenser may be fixed permanently. In some cases, however, it will be found more efficient to try fewer turns when tuning to some of the stations around 250 meters or thereabouts. Too many turns may cause tuning on the shorter waves to be a trifle sharp. It is possible to log this dial as well as the other.

Radio Operators' Speed

To pass the government examinations for a first-class commercial radio operator's license it is necessary to qualify in both transmitting and receiving the international Morse code at a speed of 20 words per minute. An amateur is required to receive at a speed of 10 words per minute.

PE-RU-NA
FOR STOMACH CATARRH

Few, if any, remedies can equal the value of Pe-ru-na for catarrh of the stomach.

At this season it is estimated that every third person is more or less troubled with this form of catarrh.

Tells Why He Can Now Eat Hearty

"A letter which I read in the paper about Carter's Little Liver Pills fitted my own case so closely that I could not help trying them and am very happy I did." So writes Mr. Frank J. Trumbull of Jersey City, N. J., whose letter goes on to say, "I had heard about Carter's Little Liver Pills for years but never knew they helped overcome poor appetite and sour stomach, until I read about another man in the same plight who took Carter's with good results. I tried them and can honestly say that they freed me of nasty gas on stomach, so that I can now eat without getting bilious, and they improved my appetite fully 100%. You can rest assured that from now on I will boost Carter's Little Liver Pills whenever I can."

Only Two Cases of Chicken Pest

Losses in All Instances Have Been Caused by Common Ailments.

(Prepared by the United States Department of Agriculture.)

Fear of recurrence of European fowl pest, which appeared in the United States for the first time about a year ago, has caused many poultrymen in the Central West to feel alarmed at any sign of sickness among their birds. Numerous investigations have been made by representatives of the United States Department of Agriculture during the past two months at the request of poultrymen in these states. In all instances the findings have been that the losses, which in a few shipments have been quite heavy, have been caused by some of the common ailments, such as roup, or by dietic disturbances, apparently the result of hardships attending the transportation of birds, aggravated by improper feeding and confinement in insanitary quarters.

Only Two Outbreaks.

Only two outbreaks of fowl pest have occurred since last spring, one in New York and the other in Delaware. In the former state the disease made its appearance about July 1 in a flock of 900 chickens near East Hampton, on Long Island. In the latter state about 200 chickens on a farm near Dover were involved early in August. The usual slaughter and disinfection methods were employed in combating these outbreaks and there has been no subsequent spread.

While the department does not wish to minimize the importance of watchfulness for fowl pest by the poultry raiser, it is desirous of impressing on those engaged in concentrating and distributing poultry the importance of maintaining their plants and equipment in a sanitary condition and improving their feeding practices. Some progress has been made, says the department, but much remains to be done. Many of these common ailments which have worried the poultrymen might largely be avoided by exercising greater care to create sanitary conditions and to adopt approved methods of feeding.

Keep Close Watch.

Veterinary inspectors employed at the department's substations maintained for animal disease and meat inspection work in each of the chicken-raising states are keeping in close touch with the producers, distributers, and slaughterers of poultry. When any unusual losses are reported to the bureau of animal industry of the department, employees experienced in poultry disease work are detailed to investigate. The bureau is prepared to act quickly in the event there should be a recurrence of either fowl pest or infectious bronchitis.

Ration Largely of Corn Not Favored for Sows

Practical feeders and breeders have known for a number of years that brood sows, when fed on a ration composed largely of corn, have not produced thrifty, healthy litters. The young from such animals have been weak, unthrifty and very unsatisfactory in the breeding pen or fattening lot. This can be accounted for due to the fact that corn is rich in carbohydrates and fats and contains but a small quantity of protein and very little ash. On the other hand, brood sows that are fed on corn which was supplemented by high-protein feed stuffs such as tankage and alfalfa hay, farrow strong vigorous young. This is not due solely to the protein feed which is added, but is also due to the fact that these high-protein feeds carry a large percentage of mineral matter or ash. The better informed breeders realize that it is impossible to raise pigs profitably unless their corn ration is supplemented with these high-protein feeds, which provide more mineral matter than they get in their ordinary grain ration. Most swine feeders use mineral feeds with their fattening herd.

Winter Pasture for Sows Will Benefit Youngsters

Brood sows can make excellent use of pasture in the winter time. Perhaps the statement winter pasture sounds somewhat peculiar because we are in the habit of thinking of pastures as being useful in the summer time only, but rye, oats, wheat, barley or rape can be used to as good advantage as winter pasture. The cows can get out on warm, sunny days, will be able to obtain some green feed and take exercise which is very important.

A brood sow upon good pasture before she farrows will never have weak and hairless pigs. A brood sow should have from one to two pounds of grain for every one hundred pounds live weight, with good pasture or hay through the winter before the pigs are born.—B. W. Fairbanks, livestock specialist, Colorado Agricultural college.

Elements for Alfalfa

Since alfalfa when inoculated can gather its nitrogen from the air, a sound policy is to supply it with the other mineral elements in a commercial form rather than through manure, because the manure can usually be used more profitably on other fields which need nitrogen. Nevertheless it is very important to apply manure when [illegible] is seeded.

Thinning Improves the Farm Woodlot

Winter Is Season to Get Out Defective Trees.

Nearly every farm woodlot can be improved by the removal of dead, dying and defective trees, and some of the less valuable kinds as well. The foresters at the New York State College of Agriculture at Ithaca make this statement and say that this work can best be done in the winter months when other work is slack. Winter is also the best season of the year at which to cut timber, since those species which sprout naturally from the stump will do so vigorously in the spring. The work of chopping and handling logs likewise is much easier in winter.

The way to go about making these cuttings follows: First, remove all dead and dying trees, or those which are suffering from disease or insect attack. Second, remove those which are crooked and defective, or which may be hindering the growth of others more valuable.

It should, of course, be kept in mind that the stand of trees is not opened up to such an extent that grass and weeds will grow where young trees should be growing. In other words, the "crown cover" should be kept so that about one-half shade will be provided Nearly all species of trees will reproduce naturally without special effort, and a second crop should be obtained without any difficulty.

In the case of failure from this source, it is possible to plant young nursery trees to take the place of those cut.

If there is no local market for the material removed from the woodlot, it is always possible to convert it into firewood with a small portable buzz saw. Cordwood has been commanding a good price in nearly all parts of the country this year.

The college of agriculture will be glad to send bulletins describing in more detail the work of thinning.

Cream Layer on Bottled Milk Will Vary Much

Some conclusions regarding the effects of various factors on the creaming ability of market milk have been drawn by the United States Department of Agriculture and the Minnesota state board of health as a result of an experimental study of the different methods of pasteurizing, cooling, storing, and handling market milk. A discussion of the results of the study has been published in Department Bulletin No. 1344 which has just been issued and is now ready for distribution.

In the pasteurization of milk, some difficulty has been experienced with variations in the depth of the cream layer on bottled milk. A uniform and satisfactory cream layer is regarded as of great commercial importance because of the housewife's habit of judging the richness of milk almost wholly by the depth of the cream layer rather than by the butterfat content as determined by laboratory test. The study has indicated that the cream volume varies with various methods of processing, sometimes as much as 30 per cent A study of the results of the test conducted to show the effect of the various milk-plant practices on the cream volume should be of value to the plant operator in determining how he can best secure a satisfactory cream layer

A copy of the bulletin may be secured free of charge, as long as the supply lasts, by writing to the United States Department of Agriculture Washington, D. C.

Permanent Tame Pasture Returns Most Net Money

We have been finding out lately that permanent tame pastures return more net money than most of the acres that are cropped.

Alfalfa is the most permanent of the grasses are kept out. If one wants to treat it as a cash crop, it is good for around $60 a year counting on three tons of $20 hay.

The acreage of alfalfa in some sections has increased a thousand per cent in the last year. Some of the store-box gentry allow that in a year or two alfalfa hay won't be worth cutting. It was ever thus. One banker made a pretty apt reply to this objection when he said:

"Well, sir, maybe alfalfa will be cheap enough then so you can afford to feed it to your cows."

Making long-time investments such as growing alfalfa is generally a mark of shrewdness.

FARM FACTS

The most effective method of ridding cattle of lice is by dipping.

* * *

The wise farmer will keep his eye on the wheat market of the world.

* * *

Help the valuable birds through the winter. They will repay for your kindness next summer.

* * *

If you are not receiving the benefits of a systematic rotation now is the time to plan one.

* * *

To adjust production to the demands of the market is the pertinent problem of farm management.

* * *

Scales have proven their value in the feed rooms, in the cow stables and many other places on the farm. Do you have them working for you?

IMPROVED UNIFORM INTERNATIONAL

Sunday School Lesson

(By REV. P. B. FITZWATER, D.D., Dean of the Evening School, Moody Bible Institute of Chicago.)
(©, 1925, Western Newspaper Union.)

Lesson for December 27

REVIEW—FROM ATHENS TO ROME

REVIEW—From Athens to Rome.

GOLDEN TEXT—Therefore, being justified by faith, we have peace with God through our Lord Jesus Christ.—Rom. 5:1.

PRIMARY TOPIC—How Paul Helped the Poor.

JUNIOR TOPIC—Helping Others by Our Gifts.

INTERMEDIATE AND SENIOR TOPIC—Paul, the Missionary.

YOUNG PEOPLE AND ADULT TOPIC—Paul the Christian.

The lessons of the quarter gather about Paul. The review therefore will have to do with his character, service and teachings. A good method of review is to study the salient points with the leading teachings of each lesson. The following suggestions are offered:

October 4.

Paul took advantage of the opportunity to preach the gospel to the Jews in the synagogue at Athens, and to such of the Gentiles and Jews as were found in the market-place, calling upon all to repent because of God's appointed day of judgment by Jesus Christ.

October 11.

Though compelled to work for a living while getting a foothold in Corinth, Paul zealously preached the gospel even in the face of violent opposition In this time of his great need God encouraged him by giving him a vision. God always comes to the help of His servants in their greatest need.

October 18.

The Spirit's best gift is love. It is best because of its essential qualities and also because every believer can have and exercise it.

October 25.

Paul with dauntless courage preached the gospel at Ephesus, and here his preaching resulted in a glorious awakening. Where the gospel is preached in the power of the Holy Spirit men will believe in Christ and turn from their wicked ways, even giving up wrong kinds of business.

November 1.

The Christian has a strong enemy to fight, a personal being called the devil. He must meet him in offensive and defensive warfare. His strength and armor are from the Lord. The way to get strength to wage the conflict is by prayer to God.

November 8

Paul with undaunted courage pressed on toward Jerusalem, knowing that bonds and affliction awaited him. As he took leave of the Ephesian elders he warned them of the false teachers who would arise among them, and assured them that he had declared the whole counsel of God.

November 15.

Despite Paul's eagerness to conciliate the people in Jerusalem, he was arrested. Because of his passion to preach the gospel, he witnessed to the angry mob which was striving to kill him.

November 22.

Though falsely accused and arraigned before the wicked governor, Paul with becoming dignity and courteay defended himself in such a way as to win the favor of Felix.

November 29.

Paul defended himself before Agrippa and so wisely and confidently used the Scriptures as to almost persuade Agrippa to become a Christian.

December 6.

Paul's behavior on the voyage and during the shipwreck displayed his sublime faith in God as well as his remarkable bravery and common sense.

December 13.

Upon Paul's arrival in Rome he was greatly heartened by the reception given him by the brethren who came to meet him. Paul was intensely human. He, like his Lord, craved human fellowship.

December 20.

If the summary of Paul's life was the lesson used on this Sunday, the review should be the vision of the veteran soldier of the cross, near the close of his life, declaring, "I have fought a good fight, I have finished my course, I have kept the faith: there is therefore laid up for me a crown of righteousness which the Lord, the righteous judge, will give to me at that day."

If the Christmas lesson was used for this day, the method of review should be to picture the wise men seeking Jesus, Herod seeking to kill Him, and the finding of Jesus in Bethlehem.

Our Thanks

Our thanks should be as fervent for mercies received as our petitions for mercies sought.

Must Enjoy Work

No one who does not enjoy work can truly enjoy anything else.—Raymond.

Faithful

"He that is faithful in that which is least is faithful also in much."

The HAPPY HOME

By MARGARET BRUCE

(Copyright.)

Sit Down to Your Work

"I was much interested in your article about sitting down to do some of the ironing," writes a reader of this department. "I wonder if some of your younger housewives know just how much they can do sitting down. Some years ago, when I found that what was tiring me most in my housework was being so constantly on my feet, I began working out plans for sitting down as much as possible.

"Between my kitchen table and near a pleasant window, I placed a low, armless chair with a cushion on it. I formed the habit of dropping into this chair to beat up a cake, or mix t batter for pancakes. I made mayonnaise there, and even sat down to whip cream, egg-whites and souffles. The necessary ingredients for everything can rest on the table edge, and stirring and beating is done more easily on the lap than on the table, as the arms do not have to be lifted so high.

"The next thing I did was to have a drop-leaf pastry shelf made. The shelf dropped back against the wall when not in use, similar to the disappearing table you described recently. When I was going to make pies, I pulled the shelf up, put the flour sift-

er, pyrex pie plates, filling, and tools on it, and sat peacefully down to make my pies. You can't imagine how restful it is.

"I even sit down to wash my dishes. I had my sink lowered so that I could reach it easily from a stool, and by sitting a little sideways I can wash and wipe as well as when standing up. As a matter of fact, I don't know of anything you have to stand up for in a kitchen until the actual serving of a meal comes.

"Curiously enough, with all my sitting-down schemes, it had never occurred to me that I might iron sitting down! So you see you have given me a new idea, for which I am most grateful."

Curtaining the Bedroom

Recently we had a talk about adjustable glass-curtains for the bedroom window, which should conceal the dressing or undressing occupant through the lower sash and yet admit a flood of light through the upper sash. The windows in that case had no overdraperies and the curtains were made of a demure sprigged muslin, which harmonized well with the patchwork quilt on the bed, the hooked rugs on the floor, and the rush-seated chairs.

There are bedrooms of a more imposing elegance, however, and for these overdraperies are appropriate, especially when silk bed covers, bureau scarfs, and cushions are used. Such a bedchamber is suggested in the sketch today, where the sheer white curtains against the sash are made of fine filet net with a little vertical pattern wrought in it. Both upper and lower sets of these net casement curtains are fastened top and bottom, but are so loosely shirred that they slide easily back and forth when privacy is desired or when the view is wanted.

Over these dainty net curtains are draperies of a charming simplicity but an effect of richness. At the sides hang straight falls of soft green silk poplin, with the ribs running horizontally. The valance above is mad. of heavy striped drapery silk of grosgrain and satin alternating. The grosgrain stripe is of old gold and the satin stripe is in the same shade of soft green shown in the side draperies. The valance is laid in very wide box plaits.

With this window treatment goes a beautiful silk coverlet, with a full valance of the plain green poplin all around the bed, reaching to the floor. The top of this coverlet and the pillow-strip are made of the striped material in gold and green. The coverlet is cord-shirred at the mattress line, and the pillow-strip is finished with an old gold fringe. A fringed scarf of the plain poplin is laid over the dressing-table, and a square of the gold and green striped fabric is placed on the bedside table.

In this beautiful bedroom the rug is of black with a border of soft green around its oval edges, and a fringe of the green finishes it.

Do You Know That—

Doves usually lay two white eggs in April.

The portable X-ray is used by plumbers in finding pipes and timbers.

A new type of electric motor, totally inclosed, has been designed for use in gaseous mines.

Electric advertising signs with moving letters are used in Berlin as a means of notifying policemen on their beats and also enlisting the aid of the public in running down lawbreakers.

Riveting May Go

There is a general tendency in the building industry to adopt the welding process in steel construction, and discard the riveting process. It is claimed that welding costs less and produces a stronger joint. Another benefit claimed for welding is the elimination of terrific noise that always accompanies the erection of steel structures.

DEMAND "BAYER" ASPIRIN

Take Tablets Without Fear If You See the Safety "Bayer Cross."

Warning! Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians for 25 years.

Say "Bayer" when you buy Aspirin. Imitations may prove dangerous.—Adv.

Sweden Divides Land

Old-time country estates in Sweden, some of them owned by the same family for 000 years or more, are being displaced by small holdings and modest cottages. Modern economic conditions make the cultivation of large estates unprofitable, it is claimed.

SPENCERVILLE

Mrs. John Bachmann is visiting relatives in Fort Wayne this week.

The Methodist Ladies Aid Society met with Mrs. Ethel Bowser Thursday afternoon. At this time the following officers were elected: President, Mrs. Audra Wade; Vice President, Mrs. Ethel Bowser; Secretary, Mrs. Lena Zimmerman; Treasurer, Miss Arminta Steward; Chairman Silverware, Mrs. Minta Rhoads; Chairman Tablecloths, Mrs. Louie Beam

You can get transfer paper at News office in large or small sheets.

Miss Kathryn Hursh, the second daughter of Mr. and Mrs. Eck Hursh, and Paul Dean, only son of Mr. and Mrs. Floyd Dean, of south of town, were quietly married at the Lutheran parsonage by Rev. S. D. Steffey, Saturday evening at 6 o'clock.

The following guests were entertained Sunday at the home of Raymond Bowser and wife: Roy Bowser and wife of St. Joe, Theo. Bowser of Huntertown and James Reed and wife. For supper and evening guests were Gerry Wasson and wife and Beatrice Miller.

Forrest and Garnet Beams, who are attending Wittenberg college, have returned home for the holidays.

The Ladies Aid Society of the Lutheran church met in a business meeting Wednesday afternoon with Miss Pearl Goldsmith. The officers elected for the year are: President, Mrs. Flossie Rhoads; Vice President, Mrs. Mandy Rhodes; Secretary, Mrs. Marie Palmer; Treasurer, Mrs. Lucy Beams.

Members of the C. C. Club spent a very pleasant day at the home of Mrs. Mandy Rhodes Friday. The ladies came with well filled baskets and at the noon hour potluck dinner was greatly enjoyed. A short program was rendered consisting of songs and readings closing with the Lord's Prayer. Mrs. Clara Hosler is the newly elected president. After the business session the Christmas exchange was enjoyed, following this the hostess served refreshments.

Good Cheer! Good Will! Good Health! Good Luck! All through the New Year is the wish of this store to its vast number of Customers.

Last Minute Purchasers will Find

that our store can still suggest some very appropriate gifts, in fact that's what we've done all thru the Holiday Season. Look here:

Handkerchiefs, linen, 3 in each box.
Ladies Silk Scarfs.
Groceries, Candy, Fruit and Nuts.

Frank Beams The General Store

SPORTING GOSSIP

The Spencerville high school basket ball team went to Waterloo to play a game of basket ball Friday night. Instead it had to play the referee and the Waterloo team. Whenever this happens the team loses. The referee was so partial that both Mr. Smith, the principal of Spencerville H. S., and the coach raised a vigorous protest during the game. At the end of the second half they protested so strongly that the referee was removed. The coach of the Waterloo team finished refereeing the game, but the damage was done before. The action of the first referee was of the type that is killing basket ball in many parts of the state. It also instills in the players a feeling toward a team that employs such a referee that no good is boded. Such refereeing is a disgrace to the game and all such referees should be barred from officiating.—Ashby.

Just Try This

When your car gets stuck in the mud and the rear wheels merely spin around and your friends advise you to call for help, get a bunch of newspapers, slip them under the rear wheels, turn on the juice and see the car come out of the mire. When your business gets into a rut, the newspapers will help you out if you use the advertising columns. Great is the power of the press.

Our Hired Man

Now that there's talk of Henry Ford putting out his air flivver, maybe it's too late for good roads.

But then his talk about a mechanical cow didn't amount to much.

The boss says the International Live Stock Show takes the conceit out of a lot of folks.

A cow's udder used to tell how good she was—now-a-days, folks won't believe anything but a written record.

The boss snickered when I told him how Charlie Munks sold a scrub cow at a sale—and replaced her at another sale for $25 more with a nice looking grade that turned out to be the same old scrub—all clipped and clean and looking like a regular producer. "Some folks don't know what their own cows can look like," says the boss.

Cash paid for false teeth, dental gold, platinum and discarded jewelry. Hoke Smelting & Refining Co., Otsego, Mich.

To greet you with very best wishes for Christmas and the New Year.

Father John's Medicine

BEST FOR COLDS AND THROAT TROUBLES

OVER 70 YEARS OF SUCCESS

NO DRUGS

Pimples

What can I do?

"OH, why can't I have a skin like other girls? Why do I have to have these ugly pimples, blotches and blackheads?

"If I could only find something that would clear up my skin and give me back my soft, rosy complexion, I know I would be the happiest girl in the world! What can I do?"

Is that you talking? If it is, you don't have to worry a minute! Just build up the rich, red blood in your body. Then your skin will be as clear and soft as anybody's.

That's what S. S. S. has been doing for generations—helping Nature build rich, red blood! You can build red blood-cells so fast that the impurities that cause breaking out on the skin hardly get into the system before the pure blood annihilates them—kills them right out—stops them from breaking out through the skin.

And then this rich, red, pure blood feeds and nourishes the tissues of the skin and keeps it looking healthy.

That's all there is to it. Healthy, vigorous, red blood such as S. S. S. helps Nature build, makes you healthy all over. It beautifies your skin—drives away pimples, blackheads, blotches, rash, boils and eczema—gives you back your appetite—builds firm, plump flesh and fills you full of new life and energy.

All drug stores sell S. S. S. Get the larger bottle. It's more economical.

S.S.S.

An ounce of hint is often worth more than a pound of advice.

Pretexts are easily found.

Is Your Work Hard?

Is your work wearing you out? Are you tortured with throbbing backache—feel tired, weak and worn out? Then look to your kidneys! Many occupations tend to weaken the kidneys. Constant backache, headaches, dizziness and rheumatic pains result. One suffers annoying kidney irregularities; feels nervous, irritable and worn out. Don't wait! Use *Doan's Pills*—a stimulant diuretic to the kidneys. Workers everywhere recommend *Doan's*. They should help you, too. *Ask your neighbor!*

An Ohio Case

J. E. Green, prop. of barber shop, Depot St., Loogootee, Ind., says: "I think standing so much put my kidneys in bad shape and I had sharp pains in my back. I had to get up several times at night to pass the kidney secretions. Dizzy spells were common and specks darted before my eyes, making it hard to see plainly. I used Doan's Pills, and they cured me."

The Valley of Voices

By GEORGE MARSH

Author of "Toilers of the Trail" "The Whelps of the Wolf"

(Copyright by the Penn Publishing Co.) (W. N. U. Service.)

"MY VALLEY!"

SYNOPSIS.—With David, half-breed guide, Brent Steele, of the American Museum of Natural History, is traveling in northern Canada. By a stream he hears Denise, daughter of Col. Hilaire St. Onge, factor at Wailing River, play the violin superbly. He introduces himself and accepts an invitation to make the post his home during his stay. He finds the factor worried and mystified. The "log chateau" is a real home. From St. Onge he learns of the mysterious creature of evil, the "Windigo," and the disappearance of a canoe and its crew, with the season's take of furs. Then at night the "Windigo" gives a weird performance. Even Steele is mystified. David, Steele's Indian, and Michel, St. Onge's headman, leave for the scene of the canoe's disappearance in an attempt to solve the mystery.

CHAPTER III

As the days passed at Wailing River, and the dread voice failed to break upon the crisp September nights with a recurrence of its horror, the people timidly took up the old order of their days. The rabbit snares in the forest were again visited and reset by the women, who traveled in pairs for mutual encouragement, and one day Tete-Boule was prevailed upon by the factor to go out with another Indian after moose, for the fort needed fresh meat. As he left, the Ojibway gravely shook the hands of the fearful women and children gathered on the shore, bidding them look upon him for the last time, for by night he and his comrade would be mangled flesh in the maw of the Windigo.

"Did you hear that fool?" Steele asked St. Onge, standing near him on the beach.

"This thing has ruined him as a hunter," replied the factor, "he will never recover from it."

"I think I'll run upstream to the riffles this morning and catch some dore for supper," said the younger man as they returned to the trade-house.

Later, a second canoe quietly left the post, but when the boat reached the riffles, a mile above, the occupant did not stop to fish but continued upstream following the shore. And when the flash from the paddles of the craft above ceased, and the spot on the river which was the canoe, moved to the shore, the boat following, also turned in, and was lifted and hidden in the alders. Then the premonition of Tete-Boule attained a partial fulfilment, for on the shores of the Walling started a man hunt; but the incentive in the hunter was not a craving for human flesh, but a mild curiosity.

Before sunset the safe return to the post of Tete-Boule and his partner was heralded with joy, although they had failed in their hunt. But it was well after dark before the second canoe slid silently in to the stony beach.

"You had no luck this afternoon, monsieur, you caught nothing?" laughed St. Onge as Steele appeared for supper.

"As a matter of fact, Colonel, I went hunting, but the game was too tame for sport."

St. Onge's black brows lifted.

"You are cryptic, monsieur."

"Well, to confess," laughed Steele, "I was interested to see how much hunting your men would really do—and I found out."

"You followed Tete-Boule's canoe?"

"Yes, I watched them for a few hours, but as they showed no sign of taking to the bush, I traveled over to those ponds Michel told me about. Tomorrow, if you have a man who will help me pack the meat, I'll get a moose."

"And Tete-Boule never left the river?"

"Not while I watched him."

The factor shrugged significantly. "He's 'bush shy' now and will not hunt. But what is there to do?"

"Have you thought that he might be shamming to avoid work? Is he lazy?"

"No, he always was a good packer and hunter. It's the Windigo."

In the week past, Steele had seen all too little of the girl whose personality had so vividly aroused his interest, whose moods, defying analysis, only added to her charm. Convinced that beyond a dread of the ugly alternatives which the future might present to her choice, beyond any possible fear of the manifestations of the supernatural which the post had witnessed, there lurked a tangible cause for anxiety, his active mind had been ceaseless in its groping for a clew to its nature. Two days following the night of terror, he had spent searching the big ridge for sign of wolverine, lynx or wolf, had produced nothing in explanation of the mysterious cries, but while his eyes swept the dry floor of the forest to right and left, his thoughts had dealt with the reiterated query: "Whom did she fear at the rapids? What was she about to tell me when St. Onge interrupted? She had said, 'But you do not know the danger!' and, there are so many—' Many what? Clearly there was something more than the Windigo in this warning. But what could it be?"

So Steele returned from his profitless search of the ridge to wait for the return of David and Michel, when a definite plan of campaign could be framed.

* * * * * * *

On a morning when the warm September sun, lifting the low-lying river mists, rolled them back on ridges, here and there already flecked with the yellow and gold of a frost-painted birch or poplar, Denise St. Onge appeared at breakfast in whipcord and heavy boots. Steele stared in surprise at the change in face and manner of his hostess. The ghost of worry had left her eyes, which shone with high spirits. Her mood of silence had given way to a gayety foreign to his knowledge of her.

"This beautiful morning, monsieur, Charlotte and I go to wave an au revoir to the summer which passes."

"Charlotte is to be envied," he replied, charmed with the note of cheerfulness.

Her eyes lighted with amusement. "It is possible that it might be arranged that we take with us a bodyguard," she said archly. "Of course, it is not for ladies to demand the presence of cavaliers—"

"Take me, oh fair lady, as thy knight!" he begged.

"Laggard though you are, you may escort us to my watch tower, where Charlotte and I go to play the spring north, and to wave a bon voyage to the last of the geese."

"It is charming of you, mademoiselle, to allow me to go," he said, delighted at having the girl to himself in her gay mood.

Accompanied by the stolid Charlotte, carrying a birch bark basket containing the lunch, and whose swart face

"And This Message—Is It a Secret?"

betrayed misgivings she dared not voice, Denise St. Onge appeared at the trade-house.

"You will not go without your rifle, monsieur?" queried St. Onge as Steele joined them.

"Is the Windigo dangerous in broad daylight?" facetiously asked Steele.

The bronze face of the factor reddened.

"The Windigo may strike in the day or night, monsieur. Who knows? It is well you go armed." And he handed the Mannlicher to the American, who took it, mystified, irritated, that the man to whom he had offered his services should withhold his confidence.

Led by the girl, hardly recognizable in her sudden metamorphosis from a creature of reticence and aloofness to one quick with life, vibrant to the magic of the sunlit September hills, they took the trail to an isolated ridge about a mile back from the river.

The Watch tower was aptly named, for unlike most of the high land of the country, the hill was capped by a bare brow of rock commanding a little valley studded with a chain of miniature lakes. Beyond, a sweep of rolling forest faded into the haze of the southern horizon.

"Is it not beautiful—my valley, monsieur?" she asked with a wide sweep of her arm.

"Beautiful!" he repeated, "And you come here often?"

"Yes—that is, we used to come here; but lately—" She caught herself up sharply, then continued, "This valley, monsieur, I call my Vale of Tempe. It is enchanting to watch the spring slowly sweep it with its magic—paint in, here and there, the soft green of the young birch leaves, the silver of poplar, and balm of gilead; then rim that brook with the red of the willow buds. And the first flowers of the forest—hepatica, purple and pink and white; violets and wood anemone and trillium—"

She paused, the dark eyes grew wistful—the voice throaty, as she continued: "Once there was no terror in these green forests; once we searched, unafraid, Charlotte and I, for the flower treasures they possessed. 'Come and find us!' they called, and daily we sought them and brought them home to transplant in our garden, but now—"

"But now?" he repeated, wondering if he were, at last, to know—to be made a sharer in her secret.

But she eluded him. "Charlotte and I often came here to dream and play away the day—that is, I did," she laughed, "Poor Charlotte at times was bored, oh, so bored! Was it not so, Charlotte?"

"Enh, enh! Yes!" mumbled the Ojibway woman, who sat on a rock apart from the two, her restless eyes sweeping the scrub below them.

"Charlotte is not bored now; she's scared to death," suggested Steele with a laugh.

"Has she not reason, monsieur?" protested Denise. "But we have not been here, she and I, since midsummer. And I miss it so."

"You fear to come here now—believe in this thing?" He welcomed the opportunity to put the question directly.

The dark eyes frankly met his. "Is there not good reason, monsieur, for fear in a woman? After the fur canoe—and that night?"

Natural as had been her reply, Steele intuitively sensed that she was dissembling—to avoid his inevitable questioning was willing to have him believe that she, too, was a victim of the general superstition. But she had betrayed herself the morning her father cut short her half-uttered warning. Well, the day was young and he feared to press her then for an explanation of what she patently desired to avoid. So with a nodded assent to her question, he changed the subject.

"We are to have gay music today, mademoiselle. You remember, you promised we should be merry."

"Yes, today the violin shall sing of joy; it is too beautiful here to be sad. Even though the first gray geese of the year pass south, I shall send them no message."

"And this message—is it a secret?"

"A secret, monsieur? What secrets can a woman cherish in these forests?" Her reply had been spontaneous, innocent of subterfuge; then, in his lifted eyebrows and humorous curl of lip, she caught the reflection of the double implication of her question, and her face flushed to the temples.

"Have you ever longed to journey south with the passing geese?" he quickly asked, gallantly covering her embarrassment. "As you play them down the skies, do you not wish to join them?"

"Why, Monsieur Steele, you have stolen my dreams," she cried, radiant with surprise. "Always, as they pass, I stand here calling to them to lend me wings to follow—follow into the south. I try to lure them back with my violin—but no, they pass. So I send them down the wind to a mad quick-step—my bon voyage, my farewell—until spring pipes them north."

She had risen. And her eyes, shining with emotion, her face, vivid with the color of her thoughts, strangely stirred the man who listened. The lines of her straight body, from shoulders to trim feet, held his eyes.

Watching her, Steele asked himself what this strange girl, tense as the strings of her violin, with her moods of aloofness and silence, followed by swift changes to whimsical gayety and lightness of spirit, was coming to mean to him. As her eyes again met his he wondered what memories he should carry down to Nepigon in October.

"And the message you send with the geese?" he asked. "There is homesickness in it for your France—your Touraine?"

"Ah," she sighed, "is it not natural, monsieur? I do long for the roses and the poppy fields—the warm sun on the white roads and the laughter of the people. There is no laughter at Wailing River—now." She raised her hands in eloquent gesture. "The winter here is so long—so cold. The eternal wind in the spruce—does it not speak to you, too? To me there are always the voices—voices of hunger and pain—and death."

"Yes, summer or winter," he said, "the voices are everywhere, in the white-waters, the spruce, the hills. And often, in the breeze, the forest becomes one great orchestra."

"You have heard it, too?" she cried, "the sweep of the violins, the moaning of the cellos?"

"I always hear them in the summer, from a river; with the drumbeat of rapids as accompaniment."

"Ah, there is much of the poet in you, monsieur." And for an instant there was a light in the girl's eyes which set wild thoughts stirring in his brain. "But our winter is beautiful, also, in moods," she went on. "The quiet days with the sun on the snow—I love then to walk in the forest. And the winding snowshoe trails; do they not call you to follow?"

Evidently Steele has fallen in love with the beautiful French girl. And her feelings?

(TO BE CONTINUED.)

Flat Feet and Rheumatism

Many persons think they have rheumatism of the legs or back when they have flat feet or broken arches, according to Dr. Solomon Strouse in Hygeia Magazine.

A young man fell as he was escorting his lady down the aisle of a theater. Much embarrassed and fearing himself a victim of serious rheumatism, he stayed in bed nursing his illness. When he finally called on a physician, his flat feet were discovered and his illness disappeared in a pair of properly adjusted shoes.

HOW TO KEEP WELL

DR. FREDERICK R. GREEN
Editor of "HEALTH"

(©, 1926, Western Newspaper Union.)

A HUMAN INTEREST STORY

EVERY newspaper man knows what a human interest story is. Newspapers exist to print the news. It isn't a newspaper's business to supply its readers with lectures on morality or religion or ethics. Neither is it a newspaper's business to appeal to its readers' emotions. News, plain, cold news, is what the reporters and editors try to prepare for the pages of their paper.

But every once in a while something happens that is news and that also has a touch of the common, elemental impulses of humanity. A child lost in a crowded street; a man found dead, with nothing in his pockets but a woman's picture; a little girl struck down by an automobile, her stiffening fingers still clutching a rag dolly; a woman, old and worn with her mind hopelessly gone, who thinks that she is still young and beautiful. These are all human interest stories.

These Keeping Well stories which go into newspapers all over the country must necessarily be impersonal. Although they tell of man's age-long struggle with disease and death, his eternal foes, and deal with questions which closely touch the every-day lives of all of us, they are general rather than individual. Naturally, many letters come to me from readers, some criticizing, some asking for further information. And then the other day came the human interest story.

From a small town in a Central state came a letter. The writer, a hard working woman past middle life, enclosed a clipping from her town weekly, one of the papers which has been running the Keeping Well stories in a health column. She said she had been reading these articles with great interest and that one, she thought, was written specially for her. It was the one about Doctor Joslin's experience with insulin in treating diabetic children.

She has had diabetes for ten years. She has been able to keep working until a few months ago. She is now too ill to work. She has only $15 a month to live on. Until she read my story, she had never heard of insulin and did not know that there was any help for diabetes. How and where could she get this wonderful remedy and get well enough so she could go back to work.

The town in which she lived was a small one, 500 miles away. I knew no one there. But nine miles away was a larger city in which was a modern hospital, the medical head of which was a professional friend, of high standing. I wrote him, enclosing the letter and simply saying, "I don't need to tell you what to do. Here's a woman who needs help." This morning came a reply saying, "I have arranged to have her admitted to the hospital and given treatment until she is well."

And I'll bet that when the editor of that paper knows about it, as I intend he shall, he'll think that the health column in his paper has paid big dividends.

MILK FOR MEDICINE

ONE of the largest mail order houses in the country has about 9,000 employees. Thousands of orders are handled every day. Every person in that huge machine has to work at high speed from 8:15 in the morning until five at night.

One year, just before the holidays, when work was at its highest point, the superintendent was puzzled at the number of cases in the different departments of the girls fainting at their desks. What was the cause of it nobody knew but they did know that it was demoralizing the plant.

The perplexed superintendent called in the medical director, Doctor Welland. What was the cause of all this? Doctor Welland didn't know but he said he'd try and find out.

The first thing he did was to call for a report from each department head as to the number of girls who had fainted and all the circumstances. When he got them all together he studied them carefully. Then he made a curious discovery. Most of the girls who fainted, fainted between ten and twelve in the morning and three and five in the afternoon. Seemed almost as though they fainted by schedule. Funny, but these were the facts.

Then Doctor Welland began to think hard. Studies of large numbers of workers by many observers showed that a worker in any line will start in at eight and work better and better up to ten. Then his energy begins to run down and goes down until lunch time. The rest and food refresh him and up goes his energy curve from one to three. Then it sags slowly until closing time.

Inquiry showed that many of the girls in order to get to work on time, ate hasty and sometimes meager breakfasts. If a girl had been out to a party or a dance the night before and had overslept, this was especially apt to occur. By ten, she was "all in"; by 10:30 or 11, she had gotten to the limit of her strength and toppled over.

What did Doctor Welland do? Simplest thing you know. Ordered every girl in the plant served with a large glass of milk at ten and at three. The fainting stopped.

MRS. WILHELMY SAVED BY FRIEND

Doctor Advised Operation Friend Said Try Lydia E. Pinkham's Vegetable Compound First

St. Paul, Minnesota.—"I was all run-down from overwork and worry, had no appetite, could not sleep at night, and looked like a corpse. I have six children (five boys and one girl) and did not get any strength after my last baby was born. I was getting worse and thinner every day. The doctor said I had to go to the Hospital but this I could not do on account of my family. So I went to a friend of mine and told her what the doctor had told me and she said, 'Now do as I tell you. Try Lydia E. Pinkham's Vegetable Compound as I have done. It helped me.' So I started taking the Vegetable Compound and I noticed after the first few bottles that I felt considerably better. After taking 9 or 10 bottles I got over my fainting spells. Everybody who sees me now notices the great improvement in my health. I am gaining in weight and strength and am feeling fine. Eat well and sleep good nights. Any woman can write to me and I will answer her letter." — Mrs. MARY WILHELMY, 309 Duke Street, St. Paul, Minnesota.

Not Looked For

"Arthur, what is experience?"

"It's what you get while you are looking for something else."—White Mule.

Gains 20 Pounds

Never knows a sick headache; stomach perfectly well, after taking Beecham's Pills.

"I have taken Beecham's Pills and NO OTHER MEDICINE with the best results for the past fifteen years. I started taking them for sick headaches, from a catarrhal stomach, and general debility. Now I don't know what a headache is, and my stomach is perfectly well.

"From a frail woman weighing less than a hundred pounds, I have become well and healthy and tip the scales at one hundred and twenty."

Mrs. Fanny A. Burgess, Billerica, Mass.

A clean inside means a healthy body. Sufferers from constipation, sick headaches, biliousness and attendant ills should keep the system clean by the regular use of Beecham's Pills.

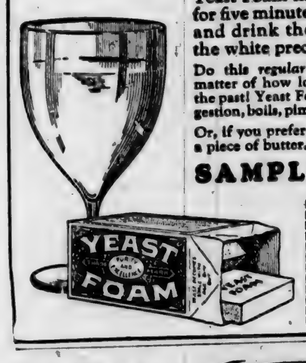
Conquer Constipation *with* Yeast Foam!



For constipation try this: drop a cake of Yeast Foam in a glass of water; let stand for five minutes; stir with spoon; let settle and drink the milky water, including the white precipitate.

Do this *regularly* and your constipation—no matter of how long standing—will be a thing of the past! Yeast Foam is equally effective for indigestion, boils, pimples, lack of weight and strength.

Or, if you prefer, eat the yeast with a cracker or a piece of butter.

Husband—Listen, I don't want to play bridge again tonight.—Life.

Old Folks Need a Mild Laxative —Not a "Physic"

DR. W. B. CALDWELL AT THE AGE OF 83

Most men and women past fifty must give to the bowels some occasional help, else they suffer from constipation. One might as well refuse to aid weak eyes with glasses as to neglect a gentle aid to weak bowels.

Is your present laxative, in whatever form, promoting regularity for weeks and often for months—or must you "purge" and "physic" every day or two to avoid sick headache, dizziness, biliousness, colds or sour, gassy stomach?

One dose of Dr. Caldwell's Syrup Pepsin will establish natural, healthy bowel movement for weeks at a time, even for those chronically constipated. Dr. Caldwell's Syrup Pepsin not only causes a gentle, easy bowel movement but, best of all, it is often months before another dose is necessary. Besides, it is absolutely harmless and pleasant to take.

Buy a large 60-cent bottle at any store that sells medicine and just see for yourself.

Dr. Caldwell's SYRUP PEPSIN

HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

FACTS BROADCAST BY RILEY REZZIDEW

"I once knew a man who had a fad of collecting boils," stated old Riley Rezzidew of Petunia. "He had 47—count them—47, on his person at one time, and also had a son on his hands who didn't know which way was east. I knew another man whose fad was wearing the name of J. J. J. Joseph J. J. J. Johnson—he had been christened by a stuttering preacher. I once knew a boy whose first name was 'Chestnut'—he was the fourteenth and last son of his parents, who were poor but dishonest people. But I am sanguine that the quaintest fad of all was that of a gent who would never wear any kind of a boot but a left-handed one. He was cursed with only one leg, which was on the south side of his body when he faced east. You might think that was his right leg, but it was only partly so. He had had his other leg cut off, and of course this one was left."—Kansas City Star.

Florida City Like Part of Old Spain

Ybor City is the center of the cigar industry in Tampa, Fla., and of its population more than 25,000 people are of the Spanish race. A great many of them use the Spanish language almost exclusively.

Ybor City was named after one of the progenitors of the Ybor family, early settlers in Tampa. It appears as a city transplanted from Spain. The traditional love of the Spanish for music and drama resulted in the erection of the Centro Asturiano, a handsome opera and clubhouse, where metropolitan stars have frequently entertained.

Other Latin elements also are found in Ybor City, notably the Italians, who have built a beautiful auditorium as an adjunct to their club.

Local activity in real estate has affected Ybor City and resulted in the displacement of some landmarks, but the Latin element pursues its way uninfluenced by such material matters as land values.

Correct

A class of older boys in a public school was being given a lesson in English. The pupils were asked to give illustrations of the different senses in which the word "relief" could be used. The work of the "relieving officer" being mentioned, the teacher asked, "What does the relieving officer relieve people from?" Without hesitation and simultaneously the reply came from two of the smartest

Gigantic Ocean Plant Holds World's Record

No land animals can compare with whales in size, and the tiger of the jungle is small compared with the tigers of the sea, the great sharks.

But it comes as a surprise to learn that the largest plant in the world is a gigantic seaweed. It beats even the giant trees of California for height and girth, frequently growing to a height of more than 400 feet.

It is commonly called the rope-tree because large quantities of it are dried and used as ropes in the South seas.

This vast growth is buoyed up by a sort of natural balloon, which grows toward the surface and increases with the size of the plant until it is sometimes over six feet in diameter. A grove of these submarine trees may become a hindrance to navigation.

Three-Eyed Creatures

Some of the islands off the coast of New Zealand are the home of curious creatures known as tuaterna, which are supposed to be the oldest living type of animal. They are distinguished by a quaint organ on the top of the head, known as the pineal gland, which is in reality a third eye.

Organized Chinese Army

An American soldier of fortune, Frederick Townsend Ward, organized the Chinese "Ever Victorious Army" against the Taiping rebels and was made high-grade mandarin and admiral general. He was killed in 1862.

Brief Essay on Knowledge

The fellow who doesn't know much, but knows enough not to let others know that he doesn't know, knows more than some of the knowing ones know.

Absolutely Harmless—No Opiates. Physicians everywhere recommend it.

Grasshoppers a Plague

Grasshoppers have been much more prevalent than usual this year in New England, the middle Atlantic states and the Ohio valley.

$1,000,000 an Hour

During the twenty-five months of the World war the expenditures of the United States amounted to about $1,000,000 an hour.

"They haven't missed a single day at school!"

"They're well all the time. The doctor says they are the healthiest children he knows.

"He told me *constipation* is what makes so many growing children sickly. Poisons from the waste matter spread through the little bodies, and lower their resistance to disease. So I'm very careful to guard against constipation. I simply give them a little Nujol every night.

"Nujol isn't a laxative at all, you know, but it keeps them just as regular as clockwork. They like it, and the doctor says it's just the thing for them."

Nujol helps Nature in Nature's own way

Mothers are the best friends of Nujol. When their children's health is at stake they seek the remedy that medical authorities approve because it is so safe, so gentle, so natural in its action.

Constipation is dangerous for anybody. Nujol is safe for everybody. It does not affect the stomach and is not absorbed by the body. Nujol simply makes up for a deficiency—temporary or chronic—in the supply of natural lubricant in the intestines. It softens the waste matter and thus permits thorough and regular elimination, without overtaxing the intestinal muscles.

Nujol can be taken for any length of time without ill effects. To insure internal cleanliness, it should be taken regularly in accordance with the directions on each bottle. Unlike laxatives, it does not form a habit and can be discontinued at any time.

Nujol
THE INTERNAL LUBRICANT
For Constipation

Ask your druggist for Nujol today and let your children enjoy the perfect health that is possible only when their elimination is normal and regular.

In Society

Mrs. H J. Renner was hostess to the annual Christmas Party of the Ladies Literary Club on Wednesday eve, December 16, at her home on Widney avenue.

The spirit of the approaching holiday season prevailed in the effective decorations of the home Miniature Christmas trees and tall red tapers formed attractive table appointments in both living room and dining room on which were grouped the gifts constituting the Christmas exchange.

Everything was under the supervision of section Two of the L. L. C. including Mesdames Renner, Woodcox, Leighty, Wiers and Johnson.

The features of the program were: Club Collect, Mrs. Leighty; several Christmas Carols were given on the Victrola; Christmas Story, Mrs. Woodcox. A very pleasing reading was given by Miss Faye Bangs contests followed. One of especial interest was the Radio broadcasting from Station LLC conducted by Mrs. Franc Wiers.

After the exchange of gifts very dainty refreshments were served.

Somehow not only for Christmas
But all the long year through
The joy that you give to others
Is the joy that comes back to you.

A fine audience greeted the Home Bureau entertainment Saturday evening, December 19, given in the St Joe High School room. Program opened with a number of pleasing selections by the young peoples orchestra of our town The program was excellent throughout. The financial returns to be used for the support of the Girls' Club work in Concord township, was very satisfactory.

The Home Bureau leaders are grateful to all who so willingly aided in making this entertainment a success.

If we could watch some bluebirds,

Writes to Old Santa

St Joe Ind Dec 15

Dear Santa
I. am a Little Boy 5 years Old What I want for Christmas, Please Bring me, 1 Mechanical Set and a. Electric Train, Some Candy and Nuts some oranges.

James Monroe

Dear Santa:—

Pleare give me a accordion, a pair Roller skates, a long pants suit and Bobbie wants a train of cars, a kiddie car and new suit also Santy Junior wants a set of Boxing gloves

Junior & Bobbie Curie

Dear Santa

I'm a little girl in the first grade and my name is Jean. I want some goloshes, Santa, to keep my feet dry I don't like rubbers. Do you, Santa? I want a Doll, Too that cries, walks laughs, talks and has long curls with pretty blue eyes. I want a cradle for my dolly to sleep in I want a little rocking chair.

I like pretty beads and a bracelet to match

I want lots and lots of Good Candy, Santa. Daddy says candy rots my teeth but I don't care Dr Price can give me some new ones when they get rotten.

Oh! Please Santa bring me all these nice things and I'll give you a great big kiss when I see you.

Good Bye Santa.

From Jean,

P. S. Santa! I forgot that I wanted a doll cart.

I want to tell you where I live, so you won't get in the wrong house, we've moved since last Christmas. We live on the corner, right up town, in a yellow house You'll see it Santa Jean Ridgway.

Parent-Teacher Association

The Parent Teacher meeting was held at the school house, Friday evening Because of the bad weather and much sickness in the community, the attendance was small.

The community singing was led by Wid Williams, Mr. Woodcox being unable to be present. The piano duet by Mrs. Leighty and Mrs. Koch and the song by the male quartette, were enjoyed by those present.

Mr. Walfred Lindstrom gave an excellent address on the subject, "The School and the Community," emphasising the closer relationship which should exist between these two organizations, and the responsibility each bears to the other. This relationship can best be brot about through the efficient work of the P. T. A.

A short business session was held and the Association extended to Mr Lindstrom a vote of thanks

The Boys' and Girls' Clubs served supper before and after the meeting.

The next regular meeting will be held on Friday evening, January 8, 1926. Program will be announced later.

Thanks To Our Friends

On last Thursday evening, at the close of the prayer service at the Lutheran church, the pastor and his family were surprised to be invited to remain and in due time were invited into the auditorium of the church where was found an old fashioned "Pounding," consisting of vegetables, groceries, canned goods of all kinds, eggs and poultry and several checks and lots of mighty nice words. Then came the splendid refreshments and the social hour which was enjoyed by the large crowd. It is nice to serve a people who show their appreciation of the efforts made in their behalf.

Please accept our sincere thanks for these and many other favors shown us.

S. D. Steffey and Family.

Your magazine subscriptions can be handled at News office and save you expense and trouble. Come in and see us.

There will be no issue of The News following Christmas or on December 31st. Persons wishing advertising at this time will please notice. January 7th, will be the first issue after the Christmas issue.

A Very Merry Christmas

To Our Friends and Patrons:

We're always glad when Christmas—Time comes 'round again. For it gives us an opportunity to express our appreciation for your goodwill and friendship, and to thank you for the business you have sent our way in the past.

May this Christmay bring you all the many things your heart desires, and the New Year prove a full twelve-months of Happiness and Prosperity.

ST. JOE NEWS.

VOL. XL ST. JOE DeKALB COUNTY, INDIANA, THURSDAY JAN. 14, 1926 NO. 2

Life of Ada Basset Is Closed, Will be Missed by Friends

Mrs. Ada Myrtle Bassett, daughter of Aden and Jenny Brunson, was born in Allen county, Indiana, Sept. 6, 1877 and passed away Jan. 5, 1926 at 12:45 at the Lutheran hospital, Ft. Wayne, where she had been taken that day.

She was united in marriage to Clifford Bassett July 3, 1898 at St. Joe Ind., where she has resided for the last 13 years. To this union was born three sons, one dying in infancy; surviving are her husband, Clifford; two sons, Charles, of this city, and Carl of Ft. Wayne, Ind., one grandchild, three brothers and mother.

Mrs. Bassett will be sorely missed in the active church work of St. Joe. Upon her arrival here she became an earnest worker and held the position of township Sunday school secretary and treasurer for a great many years, and at the time of her departure, much credit being given her for the high standard of recognition that has been accorded Concord township. For two years she served as superintendent of her Sunday school, was a teacher of the young people, nearly all the time, and besides was present enrollment secretary. Of the Ladies Aid and Missionary society she was the acting secretary and treasurer, showing that her enjoyment was in keeping the records of her societies.

She has been an active and devoted member of the W. C. T. U. during her residence in St. Joe, holding office of Secretary and Treasurer most of the time. She always willingly and cheerfully did whatever she was called upon to do. The cause of temperance was very dear to her heart, and her influence will be a lasting memory to the cause she loved.

Mrs. Bassett was a busy woman indeed. For a number of years she was employed by the local paper as local news gatherer, and she sold her time also to the Evening News-Sentinel, Ft. Wayne and News-Tribune, Hicksville, O., all of which will find it hard to get another who could be depended upon as she. Her daily visits about St. Joe homes and her friendly telephone call, when she was not able to call personally, will all be missed by the entire populace of St. Joe.

She was baptized July 1, 1895 at Newville and became a member of the Church of Christ.

Leaves have their time to fall,
And flowers to wither at the
north wind's breath,
And stars to set—but all,
That hath all seasons for thine
oh death.

Funeral services were conducted from the Christian church last Thursday afternoon, with burial in Riverside. Rev. Joseph Scholes officiating. E. R. Kinsey, director.

Out-of-town relatives attending the funeral were: Carl A. Bassett, Ross Brunson, Miss Beulah Brunson, Miss Ella Brunson and Mrs. Cassie Sweet of Ft Wayne, Sterlin Brunson of Waterville, Ohio, Mr. and Mrs. Clayton Fetters, Mrs. Clara Brunson of Newville, Mrs A. D. Brunson and Tom Brunson and family, also Sidney Brunson.

Card of Thanks

Our sincere thanks and appreciation go to those who assisted us during our bereavement. To the friends, neighbors and those who contributed flowers.

C. C. Bassett and Children.

The News of Fourty Years-Appreciation of a Reader-It's Our Birthday

Glancing at the date line of the last issue of The St. Joe News, the writer of this article was made aware of the fact that this issue will be first number to begin the fortieth year of its existence.

Wonder if there are many towns the size of St. Joe that can boast of a newspaper for that length of time? Many of our older readers can remember The News as a mere infant, and was not much larger than a hand-bill. Its father, M. E. Olds, a merchant in the early days of our little city, started it with a view of advertising his wares, and incidentally throwing in a few local items, served in a spicy manner. Many of the early readers will remember the Bareus Q. Hippenhammer articles, written in a style that might well cause Artimus Ward to turn green with envy. The advertisements extolled the virtues of Stew Pan T. and Nimble Nicked Soap. Mart sold many safety pins in those days as early copies of the paper will attest. You did not subscribe to the paper in those days. A convenient cigar box attached to the front door of the store was accessible to all, first come, first served. Later the paper was enlarged and subscriptions were taken for same. The News passed into other hands in due course of time. Bowman and Johnson, I believe were the successors to Mr. Olds, then followed, (perhaps not in the order here set forth,) Williams, L. W. Yeiser. L. O. Tustison and Wm. Quance had temporary charge at different periods, while the paper was owned and controlled by F. B. Leighty the present manager and publisher. I wonder how many of the present day readers ever paused to reflect what difference it would make to this community in its business and social affairs if this paper would at once cease to exist; or looking at it from a slightly different angle, what would the community be like today had it never existed? This is a thought that has come to me often. I wonder if any other person has wondered, that's all. As a reader of papers local and papers metropolitan I want to say this, each has its sphere, its influence in its own way. Neither can take the place of the other. As an instrument fostering a community spirit, and as a means of creating and upholding of moral institutions it ranks with the school and the pulpit, there is a tendency upon the part of cosmopolitan papers to jeer and caricaturize country journals and country people. When we look upon the pages of some of our city papers, read their jests at law that does not harmonize with their desires, hear the flings at reformers, see the trash that is supposed to be funny in the so-called comic strips, we feel that the short comings of the country editor will place him on the credit side of the ledger, when the accounts are squared. That is one thing we have never seen in the pages of a country weekly, connivance with, or, at least condonment of lawbreakers, cynical slams at things religious, and jibes at those who are not tolerant toward indecency. The hope of our country lies in its plain people, and the country Editor is of the plain people among them, his problems are their problems, his hopes, his desires and his ambitions, are akin to their own. With those who rejoice he can rejoice, and when sorrow comes he can come near for in a country community we are never strangers. (Reader).

At last we are back on the job. It was not the editor's intention to miss two publications, as we have, but we had no say in the matter as to last week. After being housed up for a week with a severe cold or attack of the lagrippe, we venture out now to take up our daily task of putting THE NEWS into your home each week for the year 1926.

JUDGE ENDICOTT ISSUES ORDERS

The following is a copy of a letter received by Marshall C. McCann, as sent out by Judge Endicott, to each officer in DeKalb County, asking their cooperation in controlling juvenile delinquency.

"The writer, together with the prosecuting attorney, is attempting to work out some plan whereby crime committed by juveniles may be reduced.

"We have found that a majority of these crimes occur at night when these children should be at home with their parents. The law as to juveniles proves that children under 16 years of age who are roaming the streets at night and loaf on street corners without being in custody of their parents or some other person, or when not on their way home from some public gathering are violating the law as to juveniles, which forbids those children being on the streets unattended at night. I am writing this letter, requesting that you make an effort toward having children under 16 off the streets at night after 9 o'clock, unless returning from some public gathering or in company of their parents or some other adult person.

"You are urged to watch this situation, and upon the first occasion of this kind to send the child home and should you again see such child, boy or girl, to take the matter up with H. C. Springer, prosecuting attorney, or with his deputy in either county, and have charges filed against these children, so we may be able to take some action. By this plan the writer believes a great amount of crime may be eliminated, and you yourself saved a vast amount of trouble with these children.

"In doing this, you realize you should at all times exercise good judgment, and when you do so you may rely upon the support of the writer, as well as the prosecuting attorney."

Parents in St. Joe need not find fault with the local officer if he should act as he is instructed. No misdemeanors have been committed in St. Joe of late, but this step is only a precaution.

FREE TUBERCULOSIS CLINIC

The DeKalb County Tuberculosis Society will hold a Free Clinic, in the assembly room of the Court House, Thursday January 7th from 1 to 4 P. M. Any one having throat or lung trouble are urged to attend.

C. H. Rice, proprietor of a drug store at 2223 Miner street, Fort Wayne, was held up and robbed late Monday night of last week by two young men, probably 18 or 20 years old. Only $7 or $8 was secured by the youths. They were dressed in light overcoats and light caps, were unmasked and carried automatic pistols.

Fred Thornton and family are now enjoying the balmy California air, and maybe not so balmy after all as the cold wave extends to the south and west. They expect to be gone for two months at least, and the children will enter the San Diego schools. Mr. León Parkhurst will take Mr. Thornton's place at H. K. tower, his family arriving last Friday and keeping house in the Mrs. Ada Berry Home.

THE TRACKS

SYNOPSIS.—With David, half-breed guide, Brent Steele, of the American Museum of Natural History, is traveling in northern Canada. By a stream he hears Denise, daughter of Col. Hilaire St. Onge, factor at Wailing River, play the violin superbly. He introduces himself and accepts an invitation to make the post his home during his stay. He finds the factor worried and mystified. The "log chateau" is a real home. From St. Onge he learns of the mysterious creature of evil, the Windigo, and the disappearance of a canoe and its crew, with the season's take of furs. Then at night the Windigo gives a weird performance. Even Steele is mystified. David, Steele's Indian, and Michel, St. Onge's head-man, leave for the scene of the canoe's disappearance in an attempt to solve the mystery. St. Onge tells Steele that Lasalles, the company's manager at Fort Albany, seeks his ruin in order to compel Denise to marry him to save her father. Steele and Denise fall in love.

CHAPTER III—Continued

—7—

"Like the white roads of your Touraine?" he replied. "I think I prefer the northern winter to the summer, but, of course, it is often grim and lean for the families of the hunters—for the women and children."

Her eyes clouded. "It is always so, for the women and children—they find life hard—here—in the north." For a long interval she was silent and he knew that her personal problem again haunted her thoughts.

Then the music-hungry Steele handed the bag containing the violin to its owner, with: "Please, anything you care to play that is not sad. Today, you know, you were to forget," and he smiled significantly.

Stretched at length, with hands behind head and closed eyes, Steele listened as the violin of the girl ran the gamut of the composers. Rhapsodies, love songs of many peoples, fragments of melodies he had never heard, mad dances of the Slavs, of the plains of Hungary, serenades of Spain and Italy, a riot of love and joy, redolent of moonlight and fragrant gardens, of ivied towers and old romance, she conjured for the enchanted ears of the man lying on a Canadian hilltop. For two hours the violin sang on the height above the forest.

And as he watched and listened, Steele often compared this girl he had known but days, to other women, who in the past had caught his fancy; and to his surprise, as he conjured them up, and contrasted them with the vivid personality of Denise St. Onge, the memories of the former blurred to insignificance. Slight as was his knowledge of her, the quality which was so patently a part of her—the mystery of personality, had wrought its spell.

At length she ceased playing, and asked:

"Now would you like to hear something of my own?

"It would be delightful!"

"I call this, 'When Spring Comes North,'" And she broke into a gay melody filled with the rush of the brooks, the soft wind in the young birch leaves, the love songs of the returning birds.

"You have caught it all—the spring!" he applauded. "Please play it again!" But she shook her head.

"Now I am to break my promise by playing 'Farewell.' We were to be gay today; if you do not care to hear it—?"

"Please play it! You mean farewell to summer?"

Her face darkened as she replied with a characteristic shrug:

"Farewell to summer—to everything!"

"Oh, you cannot mean that!"

Without replying she drew her bow across the strings in a low minor and swiftly lost herself in a stark revelation of grief and despair.

As he listened he heard again the moaning of a heart without hope, the anguish of a tortured soul, which had first met his ears at the rapids. Seemingly she was voicing through her violin what she could not express in words, and the sympathy of his quick understanding went out to the lonely girl with her unknown burden.

She ceased as swiftly as she had begun, and stood gazing out on the tranquil valley. He respected her mood by his silence, his brain active with conjecture, his emotions dangerously out of hand. Then the warning of the low sun called the girl from her brooding. She turned a wistful face as she said:

"I have broken my promise and have been very sad, monsieur."

"You have been telling me much, in your 'Farewell,' mademoiselle. I only wish you could trust me—that I could help you." There was momentarily in her eyes that which whipped the blood to his face as she said: "It was because you have the heart of a poet that I played my 'Farewell.' And I do trust you, Monsieur Steele, some time you may know—"

"Why some time, why not now, if I am to aid you?" he demanded impulsively.

But she only shook her head.

Carrying the violin and rifle, Steele led the way down the trail to the post. They had reached a hollow at the foot of the ridge where the soil was spongy and moist, even in September, because of the springs beneath. Here and there in the forest mold, flowers vividly blue and fringed, bloomed on graceful stems beside the trail.

"Here are my gentians, monsieur!" cried Denise. "Are they not beautiful? I cannot make them grow so lovely at home, it is not damp enough."

She bent and touched the petals of a flower, and looking up said: "I think I love them more than the other autumn—" she suddenly checked herself, her eyes widening. The man was staring at the trail beyond them.

"Monsieur!"

He turned to her, his puzzled look shifting to a smile. "Pardon me, your gentians are beautiful—but we should hurry or we shall be late at the post, and your father will wonder," he said, and started briskly up the trail, followed by the bewildered girl. He had walked but a few yards when a scream stopped him. With the lunch basket at her feet, fallen from shaking hands, Charlotte swayed in the path behind them, her face gray with terror.

"Oh, what is it, Charlotte?" cried Denise St. Onge, as Steele strode past

"Then I Found More, Staying Here, Than You Did Down the River."

her, and seizing the palsied Ojibway by the arm, half carried her forward to her mistress.

"Please, mademoiselle," he insisted, "hurry along! I'll take care of Charlotte. It's nothing. She thinks she sees something, but it's only imagination." And he started with the moaning Indian, numb with fright.

"Nia! Nia!" wailed the Ojibway, finding her feet. "De trail! I see trail, m'am'selle! Run! Run!" And with feet spurred by fear, Charlotte led the way back to the post.

"What was it that you tried to hide from me?" demanded Denise, as she walked rapidly at his side, "I saw your face. There was something."

"It was nothing. It looked like a bear trail, only a bear trail, Charlotte is full of Tete-Boule's myths and was stampeded. She's been uneasy all day."

The doubting eyes of the girl searched his as they walked.

"It is kind of you, monsieur," she said, "but you must not deceive me, I have to face this thing."

"You are not afraid—you do not believe in—"

"Afraid?" she cried passionately, "yes, I am afraid, of, oh, so many things. You do not realize—it is so hopeless!"

He was walking close to her, overconscious of her nearness. Her shoulder touched his, and his pulse leaped at the contact. A loose strand of her hair brushed his cheek, and he felt the blood in his face. He was perilously near rash action, but he coveted her good will—and he feared the mystery in her—and the dignity.

"But is there no way out?" he managed to say, fighting for mastery of himself.

"Way out?" she repeated in a strained voice, "There is no way out—for the lost," and as she quickened her pace, the heightened color of her face betrayed her. Like the strings of her violin she had vibrated to his emotion. Beyond the mystery and the despair, there was the woman, and he followed her swift feet over the trail with an elation he had never before known; with the resolve to fight through to the root of this mystery if it meant a winter on the snow.

"No way out for the lost," she had said, and he smiled as he repeated to himself. "But the lost has been found; the lost has been found." Mystery, Windigo, intrigue at Albany, were as nothing now that he had seen the blood leap to her face at his touch.

He did not follow up her strange words. It would have profited little and his mind was full of what he had seen beside the trail—unmistakable tracks in the mud, mammoth and strange, beyond his experience.

Shaped they were, somewhat resembling bear tracks, with deep indentations of claws, but the weight was not distributed as in the track of a bear, and there were separated pad marks, like the track of felines. Yet no lynx or cougar ever owned feet so misshapen and huge. He would return at daylight and follow them up. Here at last was something tangible to work on. In the meantime, Charlotte would have the post people mandlin with fear. It would be a bad night for Wailing River.

As they entered the clearing, Steele saw a knot of men gathered before the trade-house. With a swift goodbye, Denise hurried to her kitchen while Steele joined the factor, who announced:

"Good evening, monsieur, it seems our friends have returned." From the head of the portage moved a canoe, above the familiar legs of David. Following him came Michel, doubled under a heavy load slung from his tumpline.

"What have they got?" queried St. Onge.

"Give it up; maybe some of the fur!" hazarded Steele.

"We shall never see that again," muttered the factor.

Near them the post people discussed the safe return of the search party in awed whispers. Then, as Michel approached, Steele grinned. "Meat!" he announced drily.

"Good, we need it!" added St. Onge with a sigh of relief.

Swinging the canoe from his shoulders, David wiped his brow with his sleeve and grinned into Steele's questioning face as the latter gripped his hand.

"Back safe and sound, David?" Steele looked hard into the snapping eyes of his friend.

"Ah-hah! Safe an' soun'! Bo'-jo' Meester St. Onge!" and the Ojibway took the proffered hand of St. Onge.

"Well, Michel, you found moose, if you didn't strike anything else," Steele said to the inscrutable Iroquois. "Don't see any signs of teeth on you; you must have run too fast for the Windigo," he suggested, but the head man glanced significantly at the post Indians and made no reply.

Steele drew David from the group, congratulating Michel on his escape from a hideous death down river and asked: "Any luck, David?"

"We fin' noding of canoe, but we see some sign. Ver' strange sign, boss."

"What was it?"

"Wal, we fin' de ins' camp of fur-cano', but no sign of cano' or men. Den we follow river shore an' noding there. Den we circle back from de camp an' two smokes into de muskeg we fin'—" David stopped short to scowl past Steele into the face of a hovering Indian, who quickly advanced with extended hand.

"Bo'-jo'! bo'-jo'! Daveed," greeted Tete-Boule as David seized his proffered hand.

"Bo'-jo', Tete-Boule!" and the iron grip which was known from Nepigon to Lac Seul closed on the unsuspecting interloper.

"Ough! Ough!" cried Tete-Boule doubling with pain over his crushed fingers. "Why you shak' de han' so hard?"

The broad face of David wrinkled in amusement as he surveyed the writhing victim of his handshake. "W'at de trouble wid you, Tete-Boule? W'en I ver' glad to see you, I give de good shakehand."

As Tete-Boule left them nursing his fingers, Steele muttered; "He won't forget that soon. Trying to hear what you are saying, was he?"

"Ah-hah! De nex' tam eet weel be hees neck."

"But what was it you found in the muskeg?"

"In the muskeg we fin' ver' beeg track of somet'ing. We nevaire see such strange sign before." The Ojibway shook his head. "But de rain wipe eet out."

"Then I found more, staying here, than you did down the river."

"W'at you see?"

"Well, David, I've seen the trail of the Windigo, and I've made another little discovery. We've got a Wabeno at the post and I let you guess who it is."

"A Wabeno!" echoed the surprised David. Then with a grimace he added, "I t'ink dat Wabeno got a sore han' now, but de Windigo trail—w'ere you fin' eet?"

"I'll tell you and Michel what I know after supper; they are calling me now." And the two friends parted.

Evidently the Windigo is sufficiently real to make a hideous noise and leave a huge track. What is the thing?

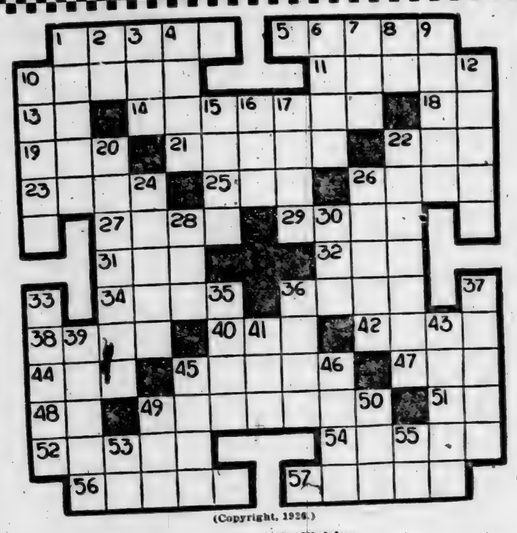
CROSS-WORD PUZZLE



(Copyright, 1926.)

Horizontal

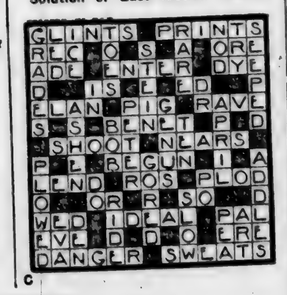
1—A form of entertainment
5—Two beings born at the same time
10—An eating car on a train
11—To make reparation
13—A printer's measure
14—Marvels
18—Upon
19—To grow old
21—Sixteen ounces
22—Exist
23—A musical instrument
25—A man's nickname
26—A particular in an enumeration
27—Price
28—Dispatched
31—Part of the verb "to be"
32—To regret
34—A portable lodging
35—A place for storing hay
36—A points (slang)
40—The complete self
42—To prepare for publication
44—Total
45—A growth of hair
47—A pig pen
48—A printer's measure
49—Prepares, as steel
51—Popular name for the governor of New York state
52—Domesticates
54—A passageway in a building
56—Resting places
57—Sufficiently

Vertical

1—Grimy
2—One
3—Modern
4—Harvest
6—A district
7—Possessive pronoun
8—A negative
9—To make a noise while sleeping
10—Distributes
12—A foe
15—Not any
16—Appointed to arrive
17—Finishes
20—An error in writing or printing
22—Is present at
24—Auriculate
26—To pass into use
28—A numeral
30—An epoch
33—Opposed to "liability"
35—To abound in
36—To afflict with ennui
37—Fashion
39—Cougars
41—A mountainous ravine
43—A country in southern Europe
45—A superlative
46—A small measure
49—A beverage
50—To drink slowly
53—Another form of "I"
55—Sergeant at law (abbr.)

The solution will appear in next issue

Solution of Last Week's Puzzle.



HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

Chinaman Given Credit for Inventing Paper

The credit for making the first sheet of paper, according to the American Forestry association, is due to a scholarly eunuch named Ts'ai-lun of China, a member of the court of the Han dynasty, in the year 75 A. D. For his achievement, Ts'ai-lun 40 years later was raised to the rank of marquis.

It appears that Ts'ai-lun, believing that old bamboo tablets and stylus had outlived their usefulness, set for himself the task of making new writing materials. After 30 years he produced the first hand sheet of paper and it was made from the bark of a mulberry tree.

Prior to Ts'ai-lun's day, leaves of trees and various barks used in crude form had served the Egyptians, Romans and other nations as paper, says the New York Times. Ts'ai-lun, however, did not use the crude inner bark of the tree as the final material on which to make his records. He did use the bark, but merely as a raw material from which he produced a finished sheet of paper by a series of processes which, crude as they may seem today, were the forebears of paper manufacture as it is known today.

For eight centuries after Ts'ai-lun's discovery, China monopolized the art of papermaking. She managed to keep the process secret until it was captured by the Arabs, who improved upon it by forsaking the mulberry tree and using linen or cotton rags instead. Thus wood, as a raw material for papermaking, passed into oblivion until the dawn of the Nineteenth century. Even up to 1860, rags were the principal material used in papermaking.

Most authorities on papermaking date the first wood-pulp process from 1840, but the American Forestry association cites evidence to show that it was 40 years earlier. A quaint little volume, dedicated to George III, was printed in London in 1800. The writer of the book was one Mathias Koop. Most of the pages of the book are made from straw, but the appendix appears quite different, and as to it, Koop says:

"The following lines are printed on paper made from wood alone, the produce of this country, without any intermixture of rags, waste paper, bark, straw or any other vegetable substance."

What wood Koop used, or what process he employed, is not known, but it is now historically conceded that he made paper from wood pulp 40 years before the ground wood process was officially discovered.

Noisy Air Waves

By means of layers of sound-deadening material built into the walls, roof and floor of the saloons an effort is made in four new airplanes to make conditions quieter for passengers. It has been found that it is not merely a question of silencing engines or of the noise made by propellers. Waves of air beating upon the sides of an air liner, just as sea waves do upon the hull of a ship, make a continuous drumming noise.

Clocks and Watches

To keep the works of a watch clean and so insure that it will run smoothly cut a piece of white paper the size of the watch cover, and after soaking the paper in petrol, place it in the inner watch case. The paper should be periodically removed and a fresh piece, also soaked in petrol, substituted. The same plan may be adopted for small and medium-sized clocks.

Odd, but Interesting

All during the testimony he hardly moved in his chair. For the most of the time he rested his head on his chin.—Fort Worth Telegram.

Busy Factories

Every week the factories of the great English industrial city of Birmingham turn out 14,000,000 pens, ten tons of pins, 6,000 metal bedsteads, 7,000 tons of rifles and numerous other articles.

Oh, Yes, to Be Sure

Boss—What's this item on your expense account, "Overhead expense $4?"

Traveling Salesman—That was an umbrella I bought.

Not a Matter of Money

Hale Holden, the railroad magnate, said in a Y. M. C. A. address in New York:

"I hate to hear the rich telling the poor how much nicer poverty is than wealth. Contentment, after all, isn't a matter of money."

Mr. Holden shook his head and added:

"Contentment, after all, consists in being perfectly satisfied with what you haven't got."

For true blue, use Red Cross Ball Blue. Snowy-white clothes will be sure to result. Try it and you will always use it. All good grocers have it —Advertisement.

Continuous Charger

Lady Driver (at garage)—Do you charge batteries here?

Proprietor—Sure we do.

"Then put a new one in this car and charge it to my husband."—Judge.

Pin Money

"Your wife says she only asks for pin money."

"Yes, but the first pin she wanted had 12 diamonds in it!"—Judge.

Some sinners are perpetually praying for forgiveness and never resisting temptation.

You never can tell. Many a prodigal son isn't worth his veal.

TWO MORE SICK WOMEN BENEFITED

By Taking Lydia E. Pinkham's Vegetable Compound for Their Illness

Detroit, Mich.—"I have found that Lydia E. Pinkham's Vegetable Compound does me a lot of good. One day I saw your advertisement in the 'News' and told my husband I was going to try it. I had bearing-down feelings and was very weak. After the first bottle I began to feel better and I took six bottles. I feel like a new woman and have recommended it to others, and they say the same. I keep a bottle of it in the house all the time for sometimes I have a backache and I take the medicine and am all right."—Mrs. WM. KRAFT, 2838 Vinewood Avenue, Detroit, Mich.

Rockford, Illinois.—"I have had nervous break-downs many times, but not since I started to take Lydia E. Pinkham's Vegetable Compound. I was weak and run-down, but the Vegetable Compound has helped me and I feel better now. I recommend it to all women who need more strength."—Mrs. GUST. GREEN, 401 Lincoln Park Blvd, Rockford, Illinois.

Trying to Oblige

A certain actor gave a gratuitous performance at one of the big hospitals and after the show the students tried to press all sorts of refreshments on him.

"Have a whisky and soda, Mr. —?"

"No, thank you very much."

"Well, have a cigar, then?"

"Don't smoke them, thanks."

"Oh, I say, do have something," protested one student. "Look here; have a leg off?"

Dr. Peery's "Dead Shot" not only expels Worms or Tapeworm but cleans out the mucus in which they breed and tones up the digestion. One dose does it. Adv.

Standard Bean Grades

More than 1,600 samples of beans were recently analyzed by the United States Department of Agriculture in an effort to form standard bean grades.

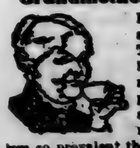
Tarantula Gets Far Inland

When a bunch of bananas was unloaded by the Ryan Fruit company at Wallace, Idaho, recently, workmen found a live tarantula and a beautiful colored snake.

Snow Fleas Like Wet

Snow fleas can stand cold but not dryness, says Nature Magazine. Evaporation is so rapid through the delicate skin of these soft-bodied little insects that dry air is quickly fatal to them.

Garfield Tea
Was Your Grandmother's Remedy



For every stomach and intestinal ill. This good old-fashioned herb home remedy for constipation, stomach ills and other derangements of the system so prevalent these days is in even greater favor as a family medicine than in your grandmother's day.

The HAPPY HOME

Avoiding Petty Disputes

Father had essayed to relate an anecdote, as he and mother and Mary-Girl had gathered around the living-room table after dinner. It had to do with an amusing scene he had witnessed at luncheon in a restaurant that noon, in which a very fat lady, a very thin gentleman, and a comical-looking youth were concerned, and which suggested a certain amusing story to the business man with whom father had been lunching. In his introduction and lead-up to the story, father said:

"The boy looked like that Peterson boy, you know—Charlie Peterson—only he was even funnier-looking."

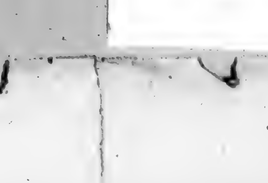
Mary-Girl spoke up. "Why, that Peterson boy wasn't named Charlie—his name was Fred, wasn't it, mother?"

"I don't know," said mother slowly; "wasn't Fred the older one? I thought Charlie was the little poetic looking one. There was another Peterson boy—Philip—wasn't he the boy we used to laugh about?"

"No, Fred!" insisted Mary-Girl. "I know it was Fred."

"Well," said mother, "I remember how Philip used to go by every day and we always laughed—but go on with your story, dear."

But father, whose story had been interrupted and spoiled by a useless digression concerning the name of a boy whom nobody really remembered—and which didn't matter anyway—retired into an annoyed silence. He



could not go back with any enthusiasm to the relating of the slight incident which he had thought would interest his family. The moment for telling the story had passed, and all because of a thoughtless dispute over a matter wholly irrelevant.

What difference did it make whether the boy was named Fred or Charlie or Philip? Why not let father continue without an utterly irrelevant discussion of this sort? How many of us do just this sort of thing, in our zeal to correct details which are entirely non-essential? Mother should have gently quenched Mary-Girl's interruption and taught her not to fasten attention upon these unimportant points when a sustained story is being told. It is a lesson for all of us.

Speaking of Walls

"Do you know what I think makes so many walls uninteresting?" asked a home decorator, studying the walls of the living room in which she was sitting, having tea with the hostess and a friend or two.

"But you surely don't call these walls uninteresting," broke in one of the friends, with a hasty glance at the hostess.

"Indeed I don't—that's just why I spoke," answered the decorator. "Do you notice how our lady hostess here has the wall spaces of this room broken up by objects having varied outlines? The trouble with most walls is that there is nothing on them but pictures, and square or oblong pictures at that. There may be variety in size, but there is generally little variety in shape or grouping. Pictures, pictures, pictures! Many women seem to think that nothing else is appropriate on a wall, except mirrors perhaps, and they are similar in effect.

"But look at these walls. Look at that lovely wall clock in exquisite polychrome, with its black ornamental iron frame in delicate tracery. See how it lightens up the corner there, contrasting with the square picture on the next wall space. Not only its color but its outlines make its corner interesting.

"Over on that other wall you see she has broken up the monotony of the pictures by that wall-vase filled with trailing English ivy. These colorful majolica wall-vases are exceedingly decorative in a living room or dining room, especially when hung in a narrow panel between two windows. I'm particularly pleased, too, with that old carved wall-bracket in the shape of a gargoyle, with the quaint lantern hanging from its mouth. In fact, the walls in this room are delightfully different from the ordinary living-room, with walls blocked off with pictures like a checker-board."

"My, you make me blush," said the pleased hostess.

Hoosier News Briefly Told

The St. Mary's Catholic church of Barr township, about 15 miles east of Washington, was destroyed by fire, with a loss of about $25,000.

State game wardens guarding the state park preserve in the Dune region of north Porter county caused the arrest and conviction of scores of persons who invaded the state's property and cut down small pine trees.

Purchase of the Revere automobile plant at Logansport by the Universe Manufacturing company of Chicago and a group of men who will form the Polaris Electrical Refrigeration company, was announced.

Guerrilla warfare which threatened in the town of Dale dwindled into a single-handed arrest when Sheriff Woods arrested Harrison Criswell for slaying Walter McCallister, town marshal.

Mrs. Nancy A. Helzer, age eighty-eight years, sister of Mayor Samuel Lewis Shank, died at her home at Indianapolis. She was the widow of Cyrus C. Helzer, a veteran of the Civil war, who died six years ago.

Dewey Staley, twenty-seven years old, was found guilty of the slaying of Wallace McGinnis, twenty-eight years old, by a jury in Circuit court at Martinsville. The man was sentenced to two to twenty-one years at the Indiana state prison.

Cecil Hendrickson, nineteen years old, who escaped from jail at Noblesville, was captured at Fort Benjamin Harrison, where he sought to enlist in the army. The young man was brought to Noblesville and lodged in jail again.

Fire Chief Frank Miller announced that he would ask the state fire marshal to institute an investigation into a fire at Terre Haute which destroyed the building and stock of the Anchor Furniture company. The loss is estimated at $75,000.

Impressive services marked the funeral of Gen William James McKee at Indianapolis. General McKee was a thirty-third degree Mason and was active in Masonic circles. Rev. Lewis Brown, pastor of St. Paul's Episcopal church, conducted the services.

The town of Daylight was threatened with destruction by fire that burned a grain elevator and threatened for a time to burn the homes of every one of the 300 inhabitants. Carl Schults and James C. Heubner were severely burned. The loss was estimated at $50,000.

A new 11-story home now being constructed on Meridian street, will house the Indianapolis Chamber of Commerce after July, 1926. The new chamber of commerce building will be of Gothic architecture. The building will represent an investment of $1,250,000.

One man was almost frozen and several others were frostbitten while fighting a fire in a business block in the central part of Mooresville. The fire is believed to have originated from an overheated furnace in the basement of the building owned by Fred J. Lindley.

William H. Nicholson, sixty-six years old, founder of Cuzco, near Jasper, was buried in the graveyard of the town which he controlled. Mr. Nicholson became famous when it became known that every deed for a lot which he sold in the town carried the provision that no intoxicating liquor would be sold on it.

One hundred and seventeen persons, including the Clear Creek high school pupils and teachers, the township trustee and bus drivers, narrowly escaped death from fire that destroyed an old barn which was used temporarily for school purposes while the new high school building was being completed.

Compensation amounting to $2,806.615.22 was paid in closed cases—cases where the compensation period has expired or where the full compensation liability has been discharged in lump settlement—in Indiana during the fiscal year ending September 30, according to a report just completed by the Indiana industrial board at Indianapolis.

Appointment of Benjamin S. Peirce as superintendent of buildings and grounds of the state of Indiana was announced at Indianapolis. Mr. Peirce has been employed as an investigator in the arson division of the state fire marshal's office. Mr. Peirce is a native of Wayne county, where he attended school as a boy with Gov. Ed Jackson. He was custodian of the Marion county courthouse for several years.

Another chapter was written in the history of the hydro-electric development of the Tippecanoe river at Monticello when the Monticello dam was blown out by dynamite. The first dam was thrown across the Tippecanoe river here in 1849. In 1906 a new corporation, the Tippecanoe Electric and Power company, began to improve the dam, and it has been in constant use until the two larger recent projects made it unnecessary.

Three years to the day, and almost at the same hour after he suffered a stroke of paralysis in 1922, Leonard M. Quill, age fifty-seven, Indianapolis business man and long active in Republican politics of Marion county and in affairs of the Elks lodge, died suddenly of heart disease.

Edward Allison, fifty-two years old, of Elkhart is held incommunicado in the St. Joseph county jail on order of U. S. Commissioner Talcott, following his arrest on a charge of robbing post offices in Wisconsin. His bond has been fixed at $25,000.

BLACKS CLOTHED IN FRENCH-MADE ARMOR

Wear Coats of Mail Dating From the Crusades.

The different races of central Africa may be divided into two groups—those who have been Islamized by Arabian penetration, the Mohammedan colonies, and those who, taking refuge in the equatorial forests, have followed indigenous customs or fetiches. The recent Harrdt-Audouin-Dubreuil expedition to Madagascar crossed the boundary between Islamism and fetichism at the Shari river, which flows into Lake Chad.

The River Touaregs, of which the Ollimiden tribe is the most important, have black skins. They drape themselves in indigo veils and conceal their faces with the classic litam. They have a sharp penetrating glance and a proud bearing, the warriors carrying hide shields decorated with the Maltese cross, and their weapons are the lance and the scimitar.

Their general appearance and the prevalence of the cross in their drawings and in the written characters of the Targui language have suggested very fascinating hypotheses on the ancestral relations between the Touaregs and the Crusaders.

Whatever the facts may be, traces of the Crusades are still found in the vicinity of the Niger. The Djermas at Niamey and Dosso, on important occasions, adorn themselves and their mounts in trappings of a character which recall the coats of mail and the helmets of the knights of Saint Louis.

An even more striking evidence of this survival of the Middle ages waited the expedition at Maradi, a Niger village not far from the borders of the British protectorate of Nigeria. This is the region of the black sultanates of which a few near Zinder have clung to the heritage of the past.

When the sultan Serky Mousse approached in great pomp, surrounded by his red-turbaned attendants, to welcome the strangers, he was preceded by true heralds at arms sounding trumpets and wearing authentic coats of mail and morions of steel and leather which unquestionably dated back to the Thirteenth century. A close examination of the coats of mail showed that they were of European, and not of Saracen, make.

In reply to questions the natives said that they had always had these "iron coats," which were very ancient and dated back "at least to the times of their grandfathers." The blacks invariably used that expression to designate an uncertain origin, for their notion of time is very vague.

How do such things happen to be found at Maradi? It is probable that they were transported across the desert from Tripoli in ancient times and that they were the spoils of war waged against the French Crusaders.—From L'Illustration, Paris. (Translated for the Kansas City Star.

Library's Centenary

The Royal University library at Zagreb, Crontia, celebrates its three hundredth anniversary this year. Its founders were a religious body, and it was natural that the earliest contributions to the collection took the form of manuscripts and books dealing with religious subjects. Its growth was small, its field limited, and it was not until the middle of the Nineteenth century that the number of volumes increased to any great extent, when a large law library was added to it.

Zagreb has, besides its university, a technical college, a school of arts, several museums and several other educative institutions. It is a modern town, for when under Hungarian rule all funds granted by Budapest were spent wisely in furthering education among the people.—Christian Science Monitor.

Spread of Lutheranism

On October 31, 1517, 308 years ago, Martin Luther, then thirty-three years old, affixed his famous "Ninety-five Theses" to the door of the principal church in Wittenberg, Germany, and started the Reformation. Today there are 80,000,000 communicants in Lutheran churches throughout the world, 2,600,000 in the United States, says Capper's Weekly.

In the majority of Lutheran churches English only is used, but some have services both in English and in some other tongue for the members who love to join their prayers and hymns in the language of their native Sweden, Norway, Germany, Finland or some other fatherland.

New Money Boycotted

Boycotting in a new form has made its appearance at Tzelutsing, Szechuan province, China, where 1,000 merchants closed their places of business rather than accept paper dollar bills of a series just issued by the military governor. All food supplies are being held up in the country, transportation being denied them on the same grounds. The only business not paralyzed is the opium trade, since the military chieftains are not seeking to impose the new currency upon opium dealers. The boycott is being engineered by the merchants' guild.

Uncle Sam's Land Holdings

In spite of strenuous and often ill-advised efforts to rid itself of land, with all the enormous grants to states, railroads, colleges and settlers, the government still owns close to 20 per cent of all the land area of this country, exclusive of Alaska.—Albert W. Atwood, in the Saturday Evening Post.

Guide Evidently Had Little Ear for Music

Mr. Fritz Kreisler is not one of those ardent souls who devote vacation times to expending three times as much physical effort as they ever would endure under the guise of work. When he rests, he rests, and last summer, spent in a camp in the Maine woods, was no exception to the virtuoso's general rule.

This odd conception of rest did not appeal, however, to the personal guide attached to Mr. Kreisler by the management of the camp.

"He no fish; he no hunt," the guide complained. "Pay me $4.50 a day, and all I got to do is sit around and listen to him play d—n fiddle."—The New Yorker.

Small Maiden Sang Her Own Selection

Wilma's mother was surprised one Sunday recently to see her little girl, who was sitting several seats ahead of her in one of the churches of the city, singing with the congregation.

On the way home afterward the delighted mother said: "Why, Wilma, I noticed you sang all the hymns this morning. I did not know you knew them."

There was another surprise in store for her, however, when the little singer answered, very much pleased with herself, "Oh, I don't know what the rest of them were singing. I was singing, 'It Ain't Goin' Rain No More!'"

A torpid liver prevents proper food assimilation. Tone up your liver with Wright's Indian Vegetable Pills. 372 Pearl St., N. Y. Adv.

An Indication

"Mrs. Babb was telling me today that Sam Sconover committed suicide last night by shooting hisself through the head with a revolver," related Mrs. Johnson, upon her return from a neighborhood call. "They had had company all day—four or five brothers-in-law, I understand, amongst the rest—and when they left after supper, promising to come again as soon as possible, Sam just grabbed up the pistol and shot hisself."

"That there's a hint of just about how much a feller can stand from brothers-in-law," replied Gap Johnson, of Rumpus Ridge. "I don't blame him."—Kansas City Times.

Just say to your grocer Red Cross Ball Blue when buying bluing. You will be more than repaid by the results. Once tried always used.—Advertisement.

"Put on the Dog"

Little Mary Catherine was paying a social call at a near neighbor's house when the lunch hour arrived. She was invited to stay but replied that she would have to ask her mother. Home she went and in a short time was back, face all smiles, her mother having agreed that she could accept the invitation.

"And now, Mary Catherine, as you are going to stay for lunch, I guess we will have to put on a little dog," said her hostess. "Indeed, I don't believe I will be able to eat any of the dog," said the little guest, "but I will have some of the gravy."

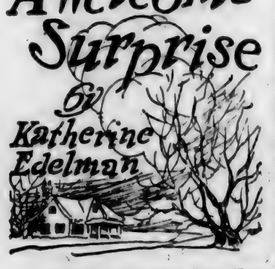
A Welcome Surprise

By Katherine Edelman

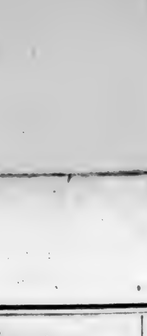


"HAPPY New Year, daddy!" Helen Danvers called out as she ran to where her father was seated at the breakfast table. Then, noticing the gloom upon his usually cheerful face, she cried out: "Why, daddy, where is your smile, and on New Year's, too?"

Robert Danvers raised a white and strained face to meet his daughter's kiss, then his eyes fell upon his plate.

"Whatever is the matter?" Hilda persisted. "You know you have always said that the best thing to do when something is troubling you is to get it out of your system. Why not practice what you preach, daddy, for it can't be anything very dreadful?"

Robert Danvers, however, did not seem inclined to speak. Instead, he sat stiff and tense in his chair for a long time, then he raised his head and made a motion to speak. But Hilda could see that the effort was costing him dearly.



Lovingly she went over to his chair, and pressing her cheek against his, said softly: "Never mind telling me, daddy, if you don't want to. Maybe it will be alright in a little while and then we can talk about it."

With a relieved look upon his face Robert Danvers left the breakfast table and went to his room. There, he struggled with himself for a long time. Why should he tell Hilda, he reasoned; there was a chance things would come right, and even if they did not, perhaps he could make good the loss within the year. He was really being kind to keep the knowledge of her loss from her. It would be a shame to tell it, and just at the New Year, too. He would have to make an effort to be cheerful.

Somehow the thought of the New Year brought Robert Danvers to himself. What a coward he was, trying to soothe his conscience as he was doing, starting out on the New Year with deceit and subterfuge for companions. He would tell Hilda, even if she despised him for what he had done—even that would be better than to feel that he was acting the part of a coward. The truth was best—even though its telling should wound them both!

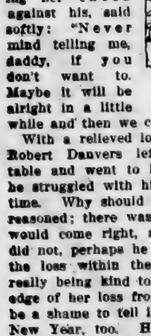
Going downstairs again, he found Hilda gazing pensively out of the window. This was unlike her, and he knew that she was troubled.

Timidly he approached the chair. "Hilda," he said, going right into the heart of the matter. "You remember that stock we talked about last week—the stock where I had you put the money your mother left you? Well, dear, I'm afraid it is all lost—that every cent of it is gone—and I know I am all to blame about it, for I advised and counseled you to do it."

"Is that the thing that is troubling you, daddy?" There was a queer light in Hilda's eyes as she spoke.

"Yes, dear," her father answered, "ever since I heard about it last night I have been almost crazy. To think I, of all people, should advise you to do this foolish thing. But I thought it was so safe, so sure."

"Then, daddy, cease your worrying at once." Hilda cried joyously, "for I never mailed the letter you wrote. It and the check are still reposing in the desk. I felt rather afraid of it, you will remember, so I thought I would wait some time before sending it in. You see, daddy, I have inherited some Scotch canniness from my mother, and I am rather fearful of the things that promise big profits. But even if the money had been lost I never would have blamed you, and we could have gotten along without it."



Robert Danvers looked ten years younger before Hilda finished speaking. Catching her hands in his, he pulled her to her feet and cried: "Hilda, I feel so happy that you just must come with me and celebrate. Look up the best show in town and phone the hotel for dinner reservations. Forget about expense today—make it a real New Year celebration."

And Hilda, in spite of her Scotch canniness, did.

A New Year's Wish

By Edith L. Smith, in the Outlook

THis wish for you: That past rough roads unheeded
You march ahead,
Undaunted with the hope of trust besotten
To win life's bread;
To wear a smile e'en when tears be your portion,
With sighs unsaid.
To find fair blooms from last year's brown leaves springing
Upon your way;
To reap the worth of deeds gone by that left you
A bit more gray,
A bit more strong to live and love with others
From day to day.
In fruitful fields may Time think wise to give you
A gentle part,
With love of home and friends to twine about you
May this year start—
Blue skies to cheer and peace of God to guide you,
O faithful heart!

A New Year's Offer

By Eleanor E. King

SOME one opened the door. A chill draft swept in. She shivered.

"Could you tell me the price of this?"

"Is my parcel ready yet?"

"Has my change come back from the cashier's cage?"

"How many yards are there in this piece?"

"Could—you wait on me, now, please?"

"I want to return this article."

Strange to say, the girl, at whom all these questions were being hurled in the last minute, mid all the uproar and clamor around her, was as calm and sweet, answering all the questions of these last-minute holiday shoppers.

Alice, seemingly combating the storm of customers assailing her counter,

cheerfully and quickly took care of them. One couldn't help but admire her. Her golden hair, with its natural wave, her stately, well-formed features gave one the opinion that unfortunate circumstances must have forced her to her present position, for she seemed entirely out of her sphere.

The floorwalker of the department wasn't missing a thing, as he answered questions and gave directions. He smiled as he viewed the chaos about him.

"Funny how these folks never think of getting things until the last minute, and then they want them in such a hurry."

That evening, closing time found the floorwalker engaged in conversation with the clerk at counter "Sixteen."

"You have certainly had a hard day. I am inclined to think you will have to have someone see you home."

"It was a rather trying day," admitted Alice.

So, Mr. Grell and Alice taxied to her home together. To their surprise, they found each other's company most agreeable.

Christmas past, Alice was again busy. It was now almost New Year's. People were hurrying to exchange the gifts that hurried Christmas shoppers worked so hard to get. Demure, sweet Alice was again putting things away, covering counters in preparation for

the New Year's holiday when the dignified floor-walker, Mr. Grell, interrupted the procedure. He placed an envelope in her hand.

"I asked if I might deliver this in person because I wanted to accompany it with a little request. The company appreciates the help and services you have rendered at this time of year when most of our clerks lose their heads and accomplish nothing. This envelope denotes a substantial raise, but—I am going to play traitor to my firm—a thing which I shall never do again, but in this case I think I am justified. In other words, beginning with the first of the year, New Year's Day, I am asking you to come and take charge of my special domain and manage it as you have this one."

Alice blushed and hung her head.

HILLCREST ON NEW YEAR'S EVE

By Marion R. Reagan

NEW YEAR'S EVE brought with it special problems for Mrs. Thorpe. She had been separated from her husband for over six months. In the meantime, however, she was in rather an awkward position socially. Hostesses never knew whether to treat her as a married or an unmarried woman. Besides, she was never sure that matters wouldn't be further complicated by meeting Jack Thorpe, her erstwhile husband, at one of the parties.

Helen had received six invitations to New Year's eve parties, but decided to decline them all.

The Thorpes had had a little house on a quiet road in Surrey, and as the holiday season advanced, Helen began to long more and more for the comfortable fireside and the peace of the little red house. Forthwith she packed her things and left word that she would not return to London until after New Year's.

Jack Thorpe opened the last of a pile of letters on his desk. A great many were invitations to holiday parties.

"Dash it," said Thorpe, "I'm sick of all this tiresome business. I'd like to get off a thousand miles from everyone. I have it! Hillcrest. There will be no one there!"

And that night he packed his bag and left word with his valet that he would be alone at his old home in Surrey, if anything important should turn up.

He sank back in the comfortable cushions of his coach, happy with the prospects of spending three whole days alone in the little old red house.

"Great Scott!" he exclaimed when he opened the door. "This looks like old times! Who the devil's been in here?" Everything was clean and in order. Then he noticed there were flowers on the table—chrysanthemums—Helen's favorites! Could it be—good Lord!—was Helen in the house? He was about to leave when a frightened voice called from the kitchen, "Who's there?" And before anyone could answer, the door opened and Helen, in a large white apron stood, wide-eyed, staring at her husband.

"Jack Thorpe! How dare you come here?" she asked, when her surprise had ebbed sufficiently to allow her to speak.

"Don't trouble," Jack interrupted, "I'm going immediately. You don't suppose I came here to see you, do you? You don't suppose that if I had any idea you were within five miles of this place, I'd have bothered to come?"

"Jack Thorpe, you beast."

Another of their old-fashioned quarrels followed, which was all the more heated since they were both very much in love, but each felt a tremendous grievance against the other. Soon Helen was in tears. Jack never could stand to see her in tears.

"Here, take these," he said, and handed her the smelling salts. She pushed them aside, and their hands met. Jack looked up at her wistfully. Why in heaven did she have to go and cry? She was altogether disarming in tears.

"I'm a dog, Helen, an out-and-out beast, and I loathe myself for saying such things. I've treated you miserably. Lord, Lord, if I ever could do anything to make it up to you! But it's too late, of course, it's too late." His voice betrayed all the heart-breaking remorse he had stored up in the six months of their separation. Helen put her hand tenderly on Jack's shoulder.

"Don't talk like that, Jack, please don't. I've been such a miserable cat to you!"

That evening, New Year's eve, was the happiest the Thorpes had spent since the days of their courtship.

"Thank goodness for a New Year," said Helen. "I want to put the old one behind me and forget every day of it, and the new one"—her face brightened—"the new one, Jack, I'm going to dedicate to happiness and spend every minute of it trying to be the most perfect wife in the world."

(©, 1925, Western Newspaper Union.)

Resolutions Of Respect

Whereas Mrs. Ada Bassett has been removed by death from our midst to join the church triumphant

Resolved, That we the members of the Loyal class of the Sunday School of the Church of Christ, extend to the family our sympathy in their loss.

Resolved, That the Church, Sunday School and Class have lost a worthy helper, a christian whose example may well be followed and one who will be missed in every department of the church work

Resolved, That a copy of these resolutions be presented to the family and published in the St. Joe News.

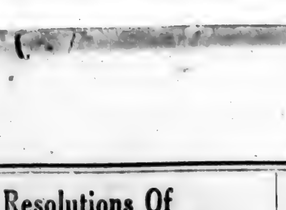
Beulah Coburn, Com.

A NEW YEAR PROMISE

by Frank Herbert Sweet



THEY sat across the table from each other, the father's lined face was impassive, the boy's openly defiant.

"Parting of the ways for us, of course, Dad," said the youth, flippantly. "Question is, how much loot do I take along?"

The man across the table did not speak. He was looking toward his son.

"This seance was called for more New Year resolutions, naturally," went on the youth, "but the first of January don't mean a thing to me."

Still the weary, far-away gaze.

"Now, see here, Dad," angrily, "spit it out! Am I going to be furnished with any ballast or not? Remember, a lot of the money was mother's, and she—"

He stopped abruptly, his lips suddenly trembling. "No, no, father, I don't mean that. Let's not bring

mother into it. But you have so much you can spare some, especially when you shanghaied my best friend, after despoiling him. And I may as well tell you," defiantly, "that Sid Kyler writes me of the wonderful chances in Chile, and for me to join him there."

His father seemed to bring his thoughts back with an effort.

"Beg pardon, Robert," he apologized. "I was thinking of your mother. She—left us so recently that I can't seem to adjust myself to the loss. And New Year's is as much a day of business accounting and readjusting as of making new resolutions."

Robert's face began to clear.

"You are going to let me have something, then?"

"As you know," his father went on, "much of the money expansion here came from your mother. I had only a little business of my own in California. We—had our honeymoon there, and—Robert, I plan to go back and spend the rest of my days where I was happiest. So this New Year's day seems a fitting time for me to make everything over to you."

"And a little warning, son. It may hurt, but is necessary for your safety. No one ever despoiled Sid Kyler of anything. He spent his father's fortune in debauchery, secretly. I gave him a position of trust for your sake and he abstracted a large sum. I might have saved him, but he had stolen

from others and had to flee. You should know him now, or he will bleed you long as there is a drop of blood left."

"But how—how could I—"

"Think, Robert," significantly.

Five minutes, then suddenly a great light came to the young man. He threw himself upon his knees beside his father.

"I see it. I—I believed everything Sid Kyler and his kind told me, against what you said, and we drifted apart But listen now, Dad. On this New Year day I promise to carry on the business as you and mother would have me do, I But, Dad, won't you stay and help, or advise me?"

Some of the lines left his father's face. His eyes lighted.

"If you wish it, son. I think you mother would like it that way."

Old Dobbin came into his own at the annual agricultural conference at LaFayette, Ind., Monday when G I Christie, director of the Purdue University Experimental Station urged the farmers of the state to breed more horses.

At the meeting of the St. Joe town board a week ago, the following organization was perfected: J. C. F Abel, President; D. C. McCann, Marshal and E R. Kinsey, Health Officer. All meetings will be held in the Town Hall where th public can feel free to assemble with the board.

Wm. Curie has been re elected as trustee of K of P lodge for a term of [illegible] years For six years he has served in this capacity and the boys appreciated his services as such officer, as he has given much of his time in the care of the cemetery records, deeds and finances.

Dr. Sheffer has contracted for sale of his drug store to Walter Zonker, who is now conducting a closing out sale at the Mintzner drug stock at Ashley. He will move his remaining stock here in about ten days. Dr. Sheffer will move his drugs to his home where he will continue to practice medicine.

The following persons have been appointed by Judge Endicott as members of the county board of children's guardians: W Ellis Rhoads of Auburn and Mrs Kate Leighty of St. Joe, for three years; George W Crooks of Waterloo and Mrs Pauline Capp of Butler, for two years and Mrs. Grace Hines Case beer of Auburn and Mrs Helen Green of Garrett for one year.

Road paving is the topic of importance in this part of the county. A petition with more than enough signers has been circulated for the paving of the road from County Line thru St. Joe to Butler, and is being filed in the commissioners report for action. This road is considered the second important one in the county from standpoint of county maintainance and will receive sanction of county officials from this standpoint in particular. The road is receiving the sanction of the people in the county very freely.

The Ladies Aid of St Joe M. P. Church was invited to attend an all day session of the Concord Aid on last Thursday. After the splendid dinner which was served at the noon hour a fine program was given. One feature deserving special mention was an up-to date playlet given by a number of the ladies and was well rendered in the fastest style. A very pleasant social time was enjoyed by all present. It was good to be there.

December 24th, at Auburn, by Rev. Sorensen, occurred the marriage of Paul R Clark and Alice Josephine Doll. They were accompanied by Rudolph Schlimmer and Esther Cathryn Doll The young couple are at home at 818 Fulton St., Fort Wayne, where they are employed. This date was also the thirtieth anniversary of the bride's parents, Mr. and Mrs. John Doll, who entertained the immediate families Christmas day.

Mrs. Roy Kinsey is on the sick list, but is about at times.

John Barger and family were entertained Sunday in the Curtis Hursey home.

Lost: Man's small purse with change and check or two. Call News office.

Mrs. George Baker has been on the sick list but is much improved at this writing.

The Methodist Aid Society will meet Thursday afternoon with Mrs. Blanch Leighty.

Alma Altekruse of Fort Wayne, came Thursday to be a guest in the Harvey Kimes home for a few weeks.

Mr. and Mrs R. J. Hillegas of Huntertown and Mr. and Mrs. J. P. Buckingham, spent Sunday with Mr. and Mrs J. E. Foltz.

The new spring McCall Quarterly is here and it is chuck full of splendid styles. Pictorial Quarterly also on sale and display at News office.

Mr. and Mrs. H. E Brandt, of Montpelier, Ohio, were Sunday guests in the R W. Brodbeck home. Mrs. Brandt and Mrs Brodbeck are sisters.

Verne Monroe, wife and son, W. J. Staman and wife and Mrs Mary Sechler, were Sunday guests of S. S Widney at Harlan and also Rube Reichelderfer and family.

Senior Class Play, Minstrel and other attractions, January 15, 16 at school auditorium. Admission 15c. Everybody come.

John Barger left Wednesday for Fort Wayne where he will submit to an operation for inward goitre His health has been failing for the past three months although he has continued to care for his business.

We call to the attention of corn growers the fact that the question of seed for the 1926 crop may prove even more serious than the present price question Exhaustive tests indicate that corn of the 1925 crop does not germinate well. Unless the grower does a thorough job in selecting and testing his seed he may be confronted a year from now with a high price for corn and have little to sell.

Miss Ethel Lindley had an auto collision last Saturday afternoon, at the Copp corners, with a National Biscuit Co. truck. Miss Lindley was coming to town and the truck leaving The truck driver admitted is guilt by being on the inside of the corner and not seeing the approaching car. The truck axle was broken. The Lindley car was banged up some and Miss Ethel has a sore lower lip, being cut thru. Dr Sheffer cared for the wounds.

Senior Class Play Minstrel and other Attractions January 15, 16 at school auditorium. Admission 15 cents. Everyone come.

"The county roads are in good condition for winter travel," Byron Platt, county highway superintendent, reported last week.

"We are now resurfacing a mile and a quarter of the Auburn-Concord road. We are also doing some work on a mile and a half of the Leighty and Shutt road in Spencer township and on five-eighths of a mile of the Stafford road in Jackson township. Our projects for the year 1925 will then be complete.

"During the year sixty one miles of gravel roads have been constructed and taken over by the county. Contracts have been let for nine miles more that will be built next year. The total county road mileage will then be 224.

"The county has spent about $60,000 on county roads this year. Most of it was for maintenance, making the largest sum ever expended for that purpose. On account of the increased mileage, it will not be possible for the county to spend any considerable amount of money hereafter for construction. We will have about $77,000 available in 1926 and practically all of it will go for maintenance."

SPENCERVILLE

Robert Bachmann and family of Fort Wayne, were Sunday guests in the John Bachmann home.

Mrs. Joel Betz is slowly improving from an attack of grippe. Mrs. Ora Billman is caring for her.

Harry Deuter, wife and son, Billy, of Fort Wayne, were Sunday guests in the Jerry Markle home.

James Reed and Roy Bowser visited Saturday with their grandfather, Theodore Bowser of near Huntertown.

The Home Missionary Society of the Methodist church will meet Thursday afternoon with Mrs. Ethel Bowser.

Pictorial and McCall patterns ordered at News Office. Phone your orders to us.

William Summers and wife were Saturday dinner guests of Mr. and Mrs. Jacob Baltz. Rolla Moffett and wife were supper guests in the same home.

A teacher training class was organized last Thursday evening at the Methodist church with about thirty members. Rev. Brown is acting as teacher.

Clesson Miller of Fort Wayne and R. U. Bowser and wife were Sunday evening supper guests of Gerry Wasson and wife.

"A Scrap of Paper" a play will be given Thursday night at the Community Hall by the young people's class of the Methodist Sunday School.

Mrs Lucy Beams very pleasantly entertained the members of the C. C. Club Friday. Two guests, Mrs. Violette Erick and Mrs. Rebecca Beams, were present.

Thirty young people very pleasantly surprised Irene Webb Saturday evening in honor of her birthday anniversary. Games, contests and Radio music furnished the evening's entertainment after which delicious refreshments were served.

NEWVILLE

Mrs. Helen Gillingham has been on the sick list for several weeks.

Mrs. Belle Crum. with her son and his wife, moved to Garrett last week.

Byron Miller and his parents spent Friday at Auburn guests of Dewey Miller and family. Mrs. Miller remained over night, attended the movie and saw the battle in the Argone woods. We never want to see it again.

Mrs. W. D. Reasoner of Lansing Michigan, remained with her daughter, Mrs. Omo Richmond two weeks to care for her. Mrs. Richmond has been seriously ill with pneumonia. Dr. Brunson is the attending physician. She is improving at present. Mrs. Reasoner received word that her grandson had died and she left for home last week.

SPORTING GOSSIP

LaOtto ably seconded by a twelve foot ceiling handed the second defeat of its basket ball season to Spencerville high school last Friday night. In spite of the low ceiling that made anything save underbasket shots impossible the Spencerville team forced LaOtto to two overtime periods to win. From allobtainable information this was the fastest and most hard fought game played on the LaOtto floor. LaOtto has been accustomed to win on its own floor by a wide margin. The home floor is generally accredited with 6 points, but in the case of the LaOtto floor the floor is accredited with nearer twenty points. To force this team to two overtime periods to win means that Spencerville played a good game. The game was a little weak at two critical times in defense. The Spencerville team proved to LaOtto that the defeat it handed to LaOtto at the first of the season was not a happen so affair.

Next Friday night Spencerville mixes with Leo at Spencerville. Spencerville has already handed one defeat to Leo. Leo was handed another defeat by Huntertown last Friday night—so some good fast playing is promised

The game:

Spencerville (23)	LaOtto (25)
Beams	McDuffie
Furnish	E. McKee
Wilmot	F. Rhodes
Vallieu	L. Rhodes
Bowser	L. McKee

Substitutions: Hollobaugh for Furnish, Furnish for Hollabaugh; Sheurich for McDuffie, McDuffie for Shuerich.

Field goals: Beams, 4 Wilmot, 5; Bowser, 1; McDuffie, 5; E. McKee, 1; F Rhodes, 1; L. Rhodes, 3.

Foul goals: Wilmot, 1; Beams, 2; McDuffie, 2; F. Rhodes, 2; L. Rhodes, 1.

Since the last report of basket ball from Spencerville has been published in the paper Spencerville handed the fast team from Harlan two defeats—one on Wednesday before Christmas by a 30 to 25 score. This game was played at Spencerville. A return game was played at Harlan the Wednesday before New Years. This game resulted in a 27 to 18 score in favor of Spencerville.

So far this season Spencerville has won six games and lost only two. This leaves a percentage of .750, a record that will be hard to beat by any other county team.

Senior Class Play, Minstrel and other attractions, January 15, 16 at school auditorium. Admission 15c. Everyone come. ST. JOE.

Spencerville High School Notes

Mid-term examination this week Thursday and Friday.

Leo high school will play basket ball with the Spencerville High here Friday night. Ashley grades will play the home grades at the time.

In a flag raising contest among the four high school classes, each class had charge of raising and lowering the flag for one week at the proper time, the proper way. The Junior class has the honor of making the fewest mistakes during the week.

The following students were neither absent nor tardy during the First Semester: Frankie Allen, Berniece Wade, Kent McCrory, Irene Webb, Howard Beams, Ada Bishop, Harry Laux, Violet Pflaumer, Ellen White, Earnest Pflaumer and Hilda Volkert.

Solo . . Dorothea Scholes

Talk—The P. T. A. and the School, Co. Supt. Clarence Green.

Business Session

Social Hour, during which time a lunch, consisting of sandwiches, pie and coffee, was served.

Rev. Spayd Writes Concerning Wife

The following card was received in the Clifford Bassett home Monday of last week, from L. W. Syayd, former St. Joe pastor:

"November 5th wife had an appoplectic stroke—the rupture of a brain blood vessel which greatly damaged her sight and mind—memory in particular. After eight weeks she can not see to dress self yet. Much she wants to talk she cannot because memory does not recall to her the names of the persons and things she would speak of. I fear she will never be better of these impediments effected by the stroke. I cannot answer all her letters from old friends as she wrote all social letters and received many. I being good housekeeper, cook and nurse have the sole care of her. Have missed church eight Sundays in succession as I could not trust her to care of others. Love to all of you in St. Joe and environment.

OBITUARY

Mrs. Pearl Kimes-Keller, age 28 years, wife of Marion Keller who resided about a half mile west of Newville, died Thursday, December 24, and was buried from Mt. Pleasant on Sunday following. She was the daughter of J. Wesley Kimes formerly of the Coburntown community. Her mother died when she was two years old, and her father from Ft. Wayne and a brother of Michigan still survive. Besides her husband, she leaves three children, ages two, four and seven years. P. A. Hubbart, U. B. pastor officiating with C. R. Kinsey funeral director.

Word from E. J. Smith of Paris, France, is to the effect that a daughter has arrived in his home.

YOU PAY

Local Briefs

Roy Maxwell is on the sick list.

For Sale: Dry wood. See Henry Shroyer.

Notary work of all kinds attended to promptly at News office.

Wm. Hull of near Ashley and Harry Clouse of Waterloo, were in St. Joe calling on friends Tuesday afternoon.

George Kinsey and John Willett and their families, were recent guests of Fred Jenkins and family at Fort Wayne.

The Bowser & Reed Tin Shop will be open Wednesday and Friday evenings for repair work of any kind.

The first load of hogs shipped from St. Joe yards for many months was shipped last Saturday by John Engle, Wm. Staman and Strong Bros. The load was double decker and contained 65 head. Out of the load 15 of the largest straight hogs weighed 6530 or an average of 448 pounds. The shipment was made to Buffalo market.

RHEUMATISM

While in France I obtained from a noted French physician a prescription for the treatment of Rheumatism and Neuritis. I have given it to thousands with wonderful results. The prescription costs me nothing I ask nothing for it. I will mail it if you send me your address. A postal will bring it.
Write today.
Paul Case, Dept. B104 Brockton, Mass

Honey for sale. Phone or call Mrs. Henry Shroyer.

Edward Kimes returned from a visit with Michigan relatives, Friday.

M. E. Leighty of Auburn, was a recent supper guest of his daughter Mrs. Virgil Perry and family.

Lost: Gold Medal Fountain Pen, large barrel. Finder return to News office, please.

Harry Kinsey and family of Fremont, Indiana, were guests in the George Kinsey home a few days ago.

Six members were added to the Concord church membership last Sunday. Rev. Otis Jones is the pastor. Special services are now in progress.

Senior Class Play, Minstrel and other attractions, January 15, 16 at school auditorium. Admission 15c. Everyone come.

Miss Juanita Kinsey spent her vacation in the Dr. C. S. Johnson home at Greedcastle and reports them all well. Robert has signed up for the Chautauqua season.

The funeral of Alexander Provines of Auburn, was held Monday morning at the Lutheran church. The body was placed in the mausoleum at Woodlawn cemetery.

Lester Pugsley has discontinued his trucking business and his family is now at Butler for the winter. Lester will leave soon for Toledo where he expects to start working for the Overland Company. He regrets that it became necessary for him to leave St Joe, but because of infringements on his business and the franchisment and license requirements, he feels that he has been forced to quit. Whether St. Joe will have truck service or not, is not known.

Velvet Leads for Dressy Occasions

The tea dance demands something more formal than a tailored suit or the ordinary all-day outfit that of late has served even the most modishly dressed women who drop in to tea and stop for a dance or two. The extreme severity of line in the styles of late seasons has softened. The gowns one sees now at the smart rendezvous, observes a fashion authority in the New York Times, have more elaboration of detail and a general "dressy" air. This season's materials are rich and colorful; velvet, fine cloths, metal, silk and satin brocades and novelties of the most delicate quality and the highest degree of art in design and color.

The best-known names in the center of styles creation are attached to the models one sees in the smartest places. One with a background of prestige is Drecoll, past master of the art of dress as presented by the woman of elegance. It is said of Drecoll's gowns, wraps and ensembles that they are never "out of style." Some of the happiest creations of his career are shown in this season's collection. Drecoll, always noted for his use of handsome materials, is handling velvet with skill in many unusual designs and in original combinations. Without the slightest suggestion of clumsiness or overelaboration, he treats velours with as much freedom as if it were chiffon. In one of the most stunning models shown by this house gold lame and black velvet are combined. The metallic tissue is finely plaited and the velvet is added to a straight-line foundation in the form of a circular flounce. Drecoll treats with equally happy results several interesting combinations of sheer and heavy material. He adds wide bands of velours to a gown of georgette, fur to chiffon and velvet to any one of several fragile fabrics in a manner both original and attractive.

Among Drecoll's Creations.

Nothing more fascinating among the fashions has emanted from Paris this season than Drecoll's models. His treatment of the latest silhouette, in which the natural line of the body is followed, is most clever. This is apparent in some charming princess gowns for afternoon, made of velvet and the new brocaded chiffon velvets. It is shown also in gowns, with the hip-length bodice and gathered skirt. Drecoll treats the lifted front line of the skirt very skillfully. The hem is invariably uneven, and the skirt fullness is distributed in different ways according to the style of the frock. A design of which the Drecoll atelier apparently never tires is the surplice front, with a slightly cascading drapery at one side. This season's models

Afternoon Gown of White Crepe Combined With Black Velvet.

are distinguished and rather more than ordinarily beautiful, with nothing of the bizarre. Some of the models are done in the new shades of gray, with silver; in metallic fabrics with warm shades of wine, plum and rose velvet and in striking combinations of black with the metal brocades. Drecoll uses much fur, but his models have little of the cheap furs one sees on so many of this season's gowns. Mink, real fox, lynx and ermine are shown on some of his best models. In a particularly handsome ensemble of metal brocade and velvet, the wrap is bordered all around with black lynx.

A distinguished feature of Drecoll's creations is the sleeve. All of the gowns for afternoon have sleeves, most of them long, but few absolutely plain, either on gowns or on coats. The puff and gathered-under sleeves are shown in several variants. On one model a puff is introduced between a narrow cuff at the elbow and the top of the sleeve. In another the sleeve is plain from the shoulder to the point of the elbow, where the lower part is gathered on full. It is held by a narrow band at the wrist.

Paton, in creating an elaborate afternoon wrap of a Blanchini fabric, cuts the sleeve tight at the top and flaring wide at the hand. In an afternoon coat in the same collection he adds a wide lower sleeve of fur to a plain tightly fitted foundation of cloth This corresponds to a deep, flaring flounce and high, spreading collar of the same fur.

Interesting Sleeve Designs.

Worth has presented several interesting sleeve designs. In one coat model he makes the cloth sleeve fit snugly, with a wider oversleeve of fur three-quarters up from the hand held with a narrow band of the stitched cloth. In another, this same

Wrap of Metallic Brocade Is Trimmed With Silver Fox.

couturier tucks the material finely from a band of fur above the elbow to another at the wrist. In still another novel design he has a tight fitting sleeve from the shoulder to the elbow, with a puff the rest of the length, gathered into a narrow wristband. Phillipe et Gaston are showing some late models of gowns in which the sleeves are long and very full widening below the elbow, but invariably gathered into a close cuff at the hand. Bernard treats the sleeves of both gowns and coats in a somewhat tailored fashion with wide cuffs. Those from Beer are done in much the same fashion. Martial et Armand are showing some designs in sleeves that are cuffed below the elbow in a rather extreme manner. Jean Magnin presents two models of striking and unusual design. In one, a handsome wrap of silver lame and black velvet, an enormous sleeve cut in one piece with the coat is of two materials, the upper part of lame, with velours gathered in full underneath. The whole tapers to the hand, where it is finished with a narrow wristlet of fur, matching the band with which the wrap is finished down each side of the front and around the bottom From this couturier comes an entirely different design. In this the sleeve of a velvet afternoon coat fits tightly from shoulder to wrist, where a narrow scarf of white satin is added with two ends hanging free.

Metal Cloths Fashionable.

In the very latest models for afternoon some of the most important fabrics of the season are presented. Metallic cloths and metal brocades are exceedingly fashionable, particularly for coats and wraps. The newest coat, which will be featured for the Southern resorts and for the spring season in town, of silk and metal or all metal cloth, is straight or flaring slightly. It must be but 36 inches long. It is almost invariably trimmed with some sort of fur, and marabou is coming into vogue again. The usual model is conventional, only the sleeve being in novel design.

Crepe and crepe satin are tremendously popular and the ribbed silks, bengaline, velvet and fine wool rep are used a great deal. For the most elaborate gowns many of the new brocaded chiffon velvets are seen These are of infinite variety in pattern, in the most gorgeous colors, the warmest tones of red, delphinium blue, green, brown, burnt umber and all the tints of the most colorful flowers of mid-summer and autumn. Some of these materials are dyed in shades with charming effect. They are so ornate that no trimming is required Gowns of plain material are ornamented in different ways with fur, passementerie, stunning motifs or the new girdle of silk in a contrasting color, or handsomely brocaded ribbon. Though the lines are a matter of individual design, many models have the flare at the side and in the back. Some have a definite suggestion of the bustle or pannier. In this detail Martial et Armand have done some interesting things. Premet is fond of the one-piece gown with a decided in-curve at the waistline and a flare at the sides.

The KITCHEN CABINET

(©, 1926, Western Newspaper Union.)

Don't talk so much about your hardships. Conserve your energy and use it to plan, create and work. If you suffer keep still about it until you have succeeded and then probably you won't feel so much like talking about it.—Maz.

FOOD FOR THE FAMILY

To serve a variety and at the same time maintain economy, is the aim of every thrifty housewife.

Combination Salad.—Take one cupful of chopped cabbage, one-half cupful each of diced pineapple and apple, shredded almonds and diced marshmallows. Mix the ingredients, sprinkle with salt, add boiled dressing, using pineapple juice and lemon instead of vinegar. Garnish with spoonfuls of whipped cream and almonds. Serve on lettuce.

Fruit Imperial.—Arrange on rounds of cake, halves of peaches. Cook together one-quarter of a cupful of water, one-half cupful of brown sugar, two tablespoonfuls of flour; when thick, add a tablespoonful of butter and one and one-half cupfuls of peach sirup; then add one-half cupful of raisins. Arrange the peaches on the cake and pour over the fruit sirup Serve hot or cold.

Peppers Stuffed With Raisins.—Parboil six medium-sized peppers in salt water five minutes, after removing the tops, and seeds. Fill with two cupfuls of bread crumbs, one-half of the pepper tops, a few chopped walnut meats, a little minced ham, three fourths of a cupful of raisins, salt and butter to taste. Moisten with soup stock or water and bake, setting the peppers in gem pans in a little water Bake one hour.

A delicious sauce to serve with sliced roast beef is:

Bordelaise Sauce.—Take two tomatoes, one small onion, one green pepper, two tablespoonfuls each of butter and flour, a clove, half a teaspoonful of salt, a salt spoonful of red pepper and a half cupful of water. Chop the vegetables, except tomatoes, add seasoning and simmer five minutes, rub through a sieve. Melt the butter, then add the tomatoes, and water. Simmer ten minutes, add another tablespoonful of butter. Serve hot.

Cheese Soup.—Melt two tablespoonfuls of butter and add two tablespoonfuls of cornstarch; cook until smooth and thick, add a quart of milk and boil five minutes. Add one tablespoonful of minced onion and two tablespoonfuls of minced parsley, one and one-half teaspoonfuls of salt and three-fourths of a cupful of grated snappy cheese. Serve at once as the cheese is melted. If a more nourishing soup is desired beat up one or two eggs and pour the hot soup very slowly over them, beating well.

A tablet of aspirin dropped into the water of a vase of flowers will keep them fresh much longer.

Foods and Diet.

It seems reasonable when thought is put upon it, that our food and health are closely related. An unvaried diet is often the cause of stomach trouble, so it is wise to have a variety of foods, not all at one meal, but varied during the menus of all the days of the week.

Green leaves such as lettuce, chard, spinach, watercress, cabbage and beet and turnip tops contain the valuable vitamines, without which we cannot grow or be healthy. The strictly vegetarian diet is not generally accepted as good. We need fresh milk, milk products, eggs and a moderate supply of meat and fish to have a perfectly healthy body. Too much meat is considered bad diet.

White bread, though called the staff of life, is lacking in vitamines, but does supply energy as do potatoes cooked in their jackets. Whole wheat bread, graham and cornmeal are all wholesome for breads and should be freely used.

Eggs cooked in the shell, using a pint of boiling water to an egg, closely covered and placed on the back of the range where the water will not cool, may be served, hard cooked in thirty minutes, yolks well done, dry and mealy, while the white is tender and delicious. For medium boiled remove at fifteen; for soft boiled six to eight minutes.

Sugar should not be used on fruits by those who suffer from rheumatism.

Professor McCullom of Johns Hopkins tells us that liver and kidneys are more nearly complete foods than lean meat of any kind, which is lacking in calcium, sodium, chlorine and the three types of vitamines.

Grated carrots served in various ways are especially recommended for toning up the blood. Use them with finely minced celery, a little chopped onion, a few minced nuts with a good portion of salad dressing. Serve on lettuce leaves at least twice a week. Vary with apple, green pepper, cabbage or with other vegetables. Raw carrots are richer in these food adjuncts than they are when cooked.

Nellie Maxwell

RADIO

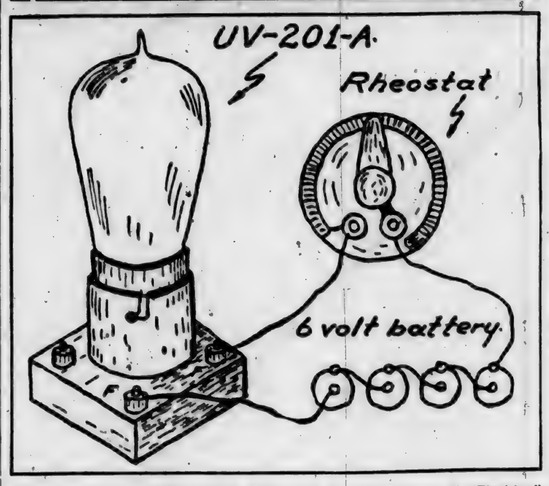

Diagram Showing UV201A Tube Connected for the Purpose of "Flashing" the Filament.

By ARTHUR F. MORASH, S. B., in Boston Herald.

Many radio fans have, no doubt, heard about some sort of a process by which inactive tubes may be restored to their former activity, but according to the many questions concerning it, there has been evidently a shroud of mystery cast over the process.

Some know from observation, and many others know through sad experience, that the vacuum tube contains a filament that becomes luminous when a current passes through it. This filament receives its current from the A battery. Contrary to the popular belief, the filament is not put in the tube for illumination purposes, but to serve as a source of the electrons necessary in the "mechanism" of the vacuum tube. A more technical term for the filament is "hot cathode," and simply means that it becomes a source of negatively charged particles known as electrons when it reaches the proper temperature. This temperature is obtained by passing a current through the filament. For this reason it would perhaps be more to the point to call this current the "heating" instead of the more common expression, "filament" current.

Treating Filaments.

The first filaments were of pure tungsten, carbon, platinum, etc., but it was soon discovered that the number of electrons emitted by the hot cathode, or filament, could be enormously increased by coating the surface of the filament with certain chemical compounds. The compounds that proved to be the most active in this respect are the alkaline earth oxides, such as barium, calcium, strontium, etc.

However, a still more active material was discovered in recent years, and is known as "thorium oxide." It may be of interest to know that it is of the titanium series of chemical elements, and is used in the formation of incandescent gas mantles. Another very interesting fact is that it is radio-active.

Because of the compounds, two general types of filaments have come into prominence, they being the oxide-coated filaments and the thoriated filament. The WD11 and 12 are examples of the former, while the UV199 and UV201A tubes are in the latter class. As the oxide-coated filament cannot be rejuvenated, I will not discuss it any further in this article, but will focus my entire attention on the thoriated style element.

This type of filament consists of a tungsten core that has been treated with thorium oxide, not merely coated with the compound, but actually impregnated, so that the amount of active material on the surface of the filament is comparatively small in comparison with the total amount. It is because of this feature that a tube employing a filament of this variety seldom goes out of service because of a burned-out filament, but because the emission has dropped below the necessary value. When this condition has been reached the tube is said to be inactive. The real significance of this expression is that most of the active material has been evaporated from the surface of the filament, and as a consequence the number of electrons emitted is reduced to a very low value. Now, you will remember that I just said that the filament is impregnated with this active material, so it becomes evident that if, by some hook or crook, we can bring some of this remaining oxide to the surface we shall have a tube that is theoretically, as good as new. This is exactly what the process known as "flashing" is supposed to do, and in many cases actually does.

How to "Flash" a Tube.

This process merely consists of burning the filament by passing a current through it, but with the B battery totally disconnected. Why should the B battery be disconnected during the reactivating measures? Well, this is necessary because with the B battery connected, the positive high voltage charge on the plate would cause the material to become exhausted as fast as it came to the surface, which is at best a very slow rate, hence it is necessary that we remove the cause of the exhaustion.

There seems to be quite a diversity in opinion as to the proper voltage that should be impressed on the filament during this "flashing" process. Some seem to think that a very high voltage, say 22, for a few seconds is more effective than burning the filament at normal brilliancy, that is, rated current for a period, or vice versa. However, my observations have been that burning the filament at slight overload for a short time and then at rated current for a long time is very successful. However, in either case, the purpose of the process is to "boil" out to the surface of the filament some of the dormant active material.

In the accompanying diagram, I have shown a UV201A tube connected for the purpose of "flashing" the filament. The only connections necessary are the two leads from the filament posts of the socket connected in series with a rheostat and a 6-volt battery. As to the time required for flashing, I suggest that those who try this process to impress the full six volts across the filament for about one minute, and then by means of the rheostat reduce the voltage until the filament burns at normal brilliancy Then allow the filament to burn for a period of 12 hours or more. If the tube is still found to be inactive after this treatment, it may be "flashed" for a second or so by connecting a 22½-volt B battery to its filament terminals and then "cooked" for a longer period at normal brilliancy.

The same reactivating process may be applied to the UV199 tube or any others having a thoriated type of filament.

To Prevent Leakage of Audio, Radio Currents

By-pass condensers are now used largely in the more efficient types of receivers. Their work is to prevent the leakage of the audio and radio frequency currents into parts of the circuit where they would cause trouble, or in other words, to confine these frequencies to their proper place in the circuit.

Usually the by-pass condensers are placed across the positive B and the negative filaments. These condensers must not only be able to stand a short-circuit test, but must stand a leakage test also. If one of the by-pass condensers is leaking, it will allow B battery current to flow through the circuit all the time, and will not only drain the B battery very rapidly, but will also ruin the tubes.

To make a leakage test, first connect up two 45-volt B batteries, so

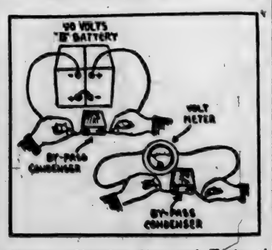

Diagram Showing Use and Tests of Condensers.

that you have 90 volts; now connect a piece of flexible wire to the negative and another piece of wire to the 90-volt terminal. Hold the ends of these wires across the condenser connections for a few seconds. This will charge the condensers. Now lay the condensers aside for about 15 minutes, then take the voltmeter and connect a piece of wire to the positive and another piece of wire to the negative connection on the voltmeter; then touch the ends of these wires to the condenser connections If the hand of the voltmeter moves the condenser is O. K., for it shows that it held the charge you gave it from the 90-volt battery. If, however, the hand on the voltmeter shows no movement at all then the condenser is leaking and should not be used as a by-pass condenser.—Philadelphia Record.

Lesson for January 10

FIVE MEN BELIEVE ON JESUS

LESSON TEXT—John 1:35-49.

GOLDEN TEXT—Behold the Lamb of God which taketh away the sin of the world.—John 1:29.

PRIMARY TOPIC—Five Men Follow Jesus.

INTERMEDIATE AND SENIOR TOPIC—Seeking and Finding Jesus.

YOUNG PEOPLE AND ADULT TOPIC—Bringing Others to Christ.

Through the testimony of John the Baptist, his disciples were pointed to Jesus. This same testimony he gave the previous day.

I. Two of John's Disciples Followed Jesus (vv. 35-37).

As a result of the Baptist's testimony, two of his disciples left him and followed Jesus. One of these was Andrew (v. 40) and presumably the other was John. When the Baptist pointed out Jesus as the Lamb of God, the long-expected Messiah, these disciples sought further acquaintance with Jesus. In view of John's request, they looked upon the Lord. This look was sufficient to induce them to follow Jesus. When they looked they believed. The proof of their belief was their following after Him. John speaks, the disciples hear and follow. The whole plan of salvation is wrapped up in this simple testimony and action.

II. The Two Disciples Abiding With Jesus (vv. 38, 39).

1. Jesus' Question (v. 38). When Jesus saw the disciples following Him, He inquired, "What seek ye?"

2. The Disciples' Reply (v. 39). They answer His question by inquiring as to His dwelling-place. Their reply showed their desire to go apart privately where they could disclose their hearts to Him. Knowing their hearts, He invited them to His place of abode; therefore, for the remainder of that day, they held sweet intercourse with the Master.

III. The Disciples Bringing Others to Jesus (vv. 40-46).

The very genius of Christianity is self-propagation. The usual method is to begin with those nearest us, home folk and relatives and pass out to ever-widening circles. The disciples who were with Jesus in blessed fellowship, went at once to tell others of the priceless treasure they have found.

1. Andrew Brings Peter (vv. 40-42). This is a beautiful example of brotherly affection, expressing itself in bringing another to Christ. How can a true brother who has found Christ do aught but go and tell his brother? The best place to begin our testimony for Christ is among our kinsfolk (Luke 8:39). When Andrew had witnessed to Peter, he brought him to Jesus where he could speak with Him personally.

2. Philip Bringing Nathanael (vv. 43-46). Christ found Philip the following day as He would go forth into Galilee. Philip followed Him in response to a personal invitation. As soon as Christ found him, Philip found Nathanael and witnessed to him concerning the messiahship of Jesus. He said unto him: "We have found Him, of whom Moses in the law, and the prophets did write, Jesus of Nazareth" (v. 45). Christ is the sum and substance of the Old Testament. Nathanael was somewhat skeptical, but he was honest. Philip had the wisdom not to argue with him, but brought him to Jesus. It is frequently unwise to rebuke the skeptical for their lack of faith. The better way is to invite them to put Christ to a test.

IV. Nathanael Seeing and Hearing Jesus, Testifies of His Divinity (vv. 47-49).

As soon as Nathanael heard and saw Jesus all his doubts rolled away. Jesus proved that He was the omnipotent One. We do not know what Nathanael was doing under the fig-tree. Perhaps he was praying for heavenly light and guidance, but Jesus saw him. He was evidently sincere. He who is willing to be led and to do shall surely come into the light (John 7:17). He who acts upon the light given shall see greater things (vv. 50, 51). Angels ascending and descending upon the Son of Man, with the open heavens, show that Jesus Christ is the means of communication between earth and heaven (Heb. 10:19, 20; Eph. 2:18; Gen. 28:12). This narrative concerning the experiences of the first disciples exhibits the following stages of Christian experience:

1. Hearing about Jesus (v. 36).
2. Looking upon Jesus (v. 36).
3. Following Jesus (v. 37).
4. Abiding with Jesus (v. 39).
5. Witnessing for Jesus (vv. 41-45).
6. Bringing others to Jesus.

Accomplishing Things

To think we are able, is almost to be so; to determine on attainment, is frequently attainment itself.

Live Near to God

Live near to God and so all things will appear small to you in comparison with eternal realities.

From Lowest Depth

From the lowest depth there is a path to the loftiest height.—Carlyle.

0431

Chronology of the Year 1925

Compiled by E. W. PICKARD

(©, 1926, Western Newspaper Union.)

INTERNATIONAL

Jan. 2—France informally offered to pay United States debt in ninety years, starting with ten year moratorium.

Jan. 19—International opium conference reopened in Geneva.

Jan. 20—Japan and Russia signed treaty of mutual diplomatic recognition, with clause giving Japan naval oil reserve on Sagalin.

Jan. 22—Costa Rica withdrew from League of Nations.

Feb. 6—United States withdrew from international opium conference.

March 1—Marshal Foch's allied military committee found Germany's violations of the Versailles treaty extremely grave.

April 20—United States marines landed in Honduras to protect foreign interests during revolution.

May 4—International conference on control of arms traffic opened in Geneva.

May 11—Abd-el-Krim declared a holy war against Spain and France.

May 30—French defeated Riffians near Fez, saving that city.

May 31—Allies informed Germany of her failures to disarm as required by treaty.

Riots in Shanghai started anti-foreign movement throughout China and American and Italian bluejackets were landed.

June 5—Plots of Russian bolsheviks to start civil war in China exposed.

Geneva arms conference agreed to outlaw poison gas in warfare.

Germany yielded to some disarmament demands of allies, refused others.

June 8—Veinstra of Belgium won Bennett cup balloon race.

June 12—Secretary of State Kellogg warned Mexico she must protect lives and property of American citizens and meet her international obligations.

June 14—President Calles of Mexico replied defiantly and indignantly to Secretary Kellogg's warning.

June 23—Chinese situation approaching crisis as more foreigners were attacked.

July 1—French reported repulse of Riffians after ten days of fighting, but evacuated two towns.

July 10—France ratified the Washington treaties concerning China.

July 14—Riffians began offensive against French on 300 mile front.

July 25—French in Morocco repulsed Riffian offensive after evacuating several outposts.

July 23—German reichstag approved Stresemann's security pact proposals.

July 31—Fifty thousand Poles in Germany and Germans in Poland repatriated by force.

Aug. 5—Greece prepared to invade Bulgaria because of murder of Greek merchant in Bulgaria.

Aug. 3—United States marines evacuated Nicaragua after 12 years.

Aug. 6—Belgian debt commission arrived in United States.

Two treaties of Washington conference relating to Chinese customs and open door went into effect.

Aug. 11—French and Spanish armies united for drive on Riffians.

Aug. 12—Germany asked that United States return property seized during the war, valued at $300,000,000.

Marshal Petain given chief command in Morocco.

Aug. 17—Opening of fourteenth Zionist congress in Vienna marked by great anti-Semite riots.

Aug. 18—Agreement for settlement of Belgian debt to United States reached; interest on war obligations canceled.

Aug. 25—French and Belgians evacuated Dusseldorf, Duisburg and Ruhrort, the "sanction cities."

Aug. 26—Great Britain granted liberal debt settlement terms to France.

Aug. 28—Great Britain renewed full diplomatic relations with Mexico.

Aug. 31—French and Spanish warships and planes destroyed Adjir, capital of Abd-el-Krim.

Sept. 5—America, Japan and Great Britain agreed to send judicial representatives to inquire into the Shanghai riots. Other European powers and China refused to co-operate.

Sept. 7—Sixth annual assembly of League of Nations opened in Geneva; Senator Raoul Dandurand of Canada elected president.

Sept. 8—Spanish army effected landing in Alhucemas Bay after hard fight with Riffians. Capture of Tetuan threatened by Riff forces.

Sept. 12—Allies invited Germany to security pact conference.

Sept. 19—Mosul dispute referred to The Hague court by League of Nations.

Sept. 22—Great Britain accused Turkey, before League of Nations, of violating the Mosul frontier.

Sept. 24—French debt commission headed by Caillaux arrived in Washington.

Germany accepted allies' invitation to security pact conference.

Sept. 26—League of Nations assembly adjourned.

Oct. 1—Caillaux's offer on French debt rejected but he took back American offer to accept $40,000,000 a year for five years when negotiations will be resumed.

Interparliamentary Union sessions opened in Washington.

Oct. 6—European security pact conference opened in Locarno, Switzerland.

Oct. 7—International commission began inquiry into Shanghai riots.

Oct. 9—Terms agreed on for funding Czechoslovakian debt to United States.

Oct. 13—United States troops, at request of President Chiari of Panama, entered Panama City and suppressed Red rent riots.

Russia and Germany signed commercial treaty.

Oct. 16—Ministers of Great Britain, France, Germany, Belgium, Italy, Poland and Czechoslovakia at Locarno signed the Rhine security pact and accompanying arbitration treaties.

Oct. 15—Greeks and Bulgarians fought on frontier near Demihissar.

Oct. 21—Greece sent ultimatum to Bulgaria, demanding indemnity and apology.

French cabinet rejected temporary arrangement concerning debt to America and planned new offer.

Oct. 22—Greek troops invaded Bulgaria, shelled the town of Petrich and several villages; Bulgaria appealed to League of Nations.

Oct. 25—League of Nations council ordered Greece and Bulgaria to cease hostilities and withdraw from each other's territory at once.

British case in Mosul dispute submitted to international court of justice; Turkey declined.

International conference on Chinese tariff opened in Peking.

Oct. 27—Greece and Bulgaria agreed to obey League of Nations council.

Nov. 3—International conference in Peking agreed to give China tariff autonomy not later than 1929.

Nov. 11—Germany agreed to all the allied demands on disarmament.

Nov. 13—Agreement reached for funding Italian debt to United States.

Nov. 16—British parliament ratified Locarno treaties.

Nov. 21—Chile withdrew from Tacna-Arica plebiscite commission.

Nov. 25—Egypt yielded to Italy's frontier demands and gave up rich oasis of Jarabub.

Nov. 27—German reichstag ratified Locarno treaties.

Dec. 1—Locarno treaties signed in London by seven nations, promising peace and security for Europe. Evacuation of Cologne to be completed by January 31.

Chile protested to League of Nations against Pershing's alleged retarding of Tacna-Arica plebiscite.

Agreement for funding Rumania's debt to United States reached in Washington.

Dec. 31—Abd-el-Krim opened peace negotiations with France and Spain.

FOREIGN

Jan. 1—Chinese government proclaimed amnesty to all except ex-President Tsao Kun and his parliamentary supporters.

Premier Mussolini of Italy began suppression of opposition organizations and newspapers.

Jan. 5—New German reichstag convened.

Premier Mussolini reorganized Italian cabinet.

Jan. 18—Dr. Hans Luther formed new cabinet for Germany, in which monarchists and nationalists were strong.

Jan 17—Italian chamber adopted Mussolini's electoral law and adjourned.

Jan. 22—Navy junta government of Chile overthrown by group of young army officers.

Jan. 28—Russian mercenaries of Marshal Lu Yung-hsiang took possession of Shanghai.

Chilean army and navy reached agreement on government, recognizing President Alessandri.

Jan. 31—Ahmed Zogu, leader of recent revolt, elected president of Albania.

Feb. 3—Russian government granted amnesty to counter-revolutionists.

Giacomo di Martino appointed Italian ambassador to Washington.

Feb. 8—Elections in Yugo-Slavia resulted in establishing virtual dictatorship of Premier Pachich and the military junta.

Feb. 25—Indians of Panama rebelled, burning a town.

Feb. 27—Turkey began big mobilization to crush Kurd rebellion.

American marines landed on San Blas coast, Panama, where Indians were in revolt.

March 2—Japanese lower house passed universal manhood suffrage bill.

March 3—Turkish cabinet resigned owing to Kurd revolt and row with Greece.

March 5—Panama made peace with San Blas Indians.

Ismet Pasha again made premier of Turkey.

March 9—Tacna-Arica boundary dispute between Chile and Peru, was advanced toward final solution by decision of President Coolidge that the ultimate disposition of contested province should be by popular vote.

March 29—Germany failed to elect President in its first popular election.

March 31—New Finnish cabinet formed by M. Tulenheimo.

April 6—Premier Theunis and cabinet of Belgium resigned.

April 8—Field Marshal von Hindenburg nominated for President of Germany by Nationalists.

April 10—French cabinet, defeated in senate on financial bill, resigned.

April 14—Communists attempted to assassinate King Boris of Bulgaria.

April 15—Paul Painleve made premier of France.

Infernal machine explosion in Sofia killed 150 and wrecked cathedral.

April 16—Painleve formed new French cabinet with Caillaux as minister of finance and Briand as foreign minister.

Kurd revolt ended, leaders captured.

April 18—Bulgaria under martial law; 400 Reds executed.

April 19—Former Crown Prince Wilhelm of Germany found not guilty of war crimes.

April 26—Field Marshal von Hindenburg elected President of Germany.

May 11—Eight men sentenced to death for Sofia cathedral bomb outrage.

May 12—Paul von Hindenburg inaugurated president of Germany.

May 13—Aloys van de Vyvere formed new Belgian cabinet.

May 20—Chang Tso-lin occupied Pe-king, Feng Yu-hsiang withdrawing his troops.

May 21—Amundsen hopped off for the pole from Spitsbergen with two planes.

May 22—Belgian cabinet resigned.

May 30—Serious riots started by native students in Shanghai followed by fatal fights with foreign police forces.

June 5—Extensive plot to assassinate king of Spain uncovered.

June 11—Presbyterian, Methodist and Congregational churches of Canada merged into United Church of Canada.

June 17—Viscount Poullet formed new Belgian ministry.

June 18—Amundsen party arrived at Spitsbergen safely. Flew to within less than 150 miles of pole, lost one plane and returned in other.

June 26—Greek government overthrown by military and naval revolt and new one installed under General Pangalos.

June 26—Pangalos became premier of Greece.

June 29—Sheik Said and 21 other leaders of the Kurdish insurrection executed by the Turks.

July 19—Druse rebels in Syria besieged the French garrison of 700, in the fortress of Suedia.

July 21—Premier Da Silva and cabinet of Portugal resigned.

July 25—Leaders of Turcoman revolt in Persia executed.

Aug. 3—Serious revolt of Druses in Syria against the French.

Aug. 15—President Kemal of Turkey by presidential decrees divorced his wife, Latife Hanoun, and removed all restrictions on women's dress.

Aug. 25—Seven Egyptians executed for murder of Sir Lee Stack, the sirdar.

Sept. 1—Bolivian congress annulled the election of Villaneuva as President.

Sept. 24—French routed Druse rebels at Suedia.

Oct. 1—President Alessandri of Chile resigned.

Oct. 4—Russia entirely abandoned prohibition.

Oct. 15—Revolt of Druses in Damascus suppressed by French in one day after bloody battle. City partly destroyed by bombardment.

Oct. 24—Emiliano Figueroa elected President of Chile.

Oct. 27—Premier Painleve and the entire French cabinet resigned when Finance Minister Caillaux refused to quit after his financial program had been disapproved.

Oct. 29—Painleve formed new French cabinet with himself as premier and minister of finance.

Conservatives led by Arthur Meighan won Canadian parliamentary election.

Oct. 31—Persian parliament deposed Shah Ahmed Mirza, and Riza Khan, premier and dictator, assumed the throne as King Pahlavi.

Nov. 4—Bakry Bey, rebel leader, proclaimed Syrian republic.

Plot to assassinate Premier Mussolini and overthrow the government foiled by Italian police; all Masonic temples seized by authorities.

Nov. 5—Plot to assassinate king of Rumania thwarted.

Archbishop of Canterbury appointed committee to study faith healing.

Nov. 11—Gen. Feng Yu-hsiang took control of Peking and members of the cabinet resigned. Marshal Chang retreated toward Manchuria.

Nov. 13—Poilan cabinet resigned.

Nov. 15—Syrian rebels won battle in Lebanon and captured several towns from Christian forces.

Communist governor ousted by state legislature of San Luis Potosi, Mexico.

Twelve Russian officials sentenced to death for graft.

Nov. 20—New Polish coalition cabinet formed by Premier Skrzynski.

Nov. 21—Egyptian parliament held rump session and voted lack of confidence in government.

Nov. 22—French chamber of deputies rejected part of government's financial project and Painleve cabinet resigned.

Nov. 25—Doumer and Herriot both failed to form new French ministry.

Army revolt against Chang Tso-lin in China reported.

Nov. 26—King Rama of Siam died and was succeeded by his brother, Prince Prajatipok.

Nov. 27—Gen. Feng challenged Marshal Chang to quit Chinese politics or fight.

Briand formed new cabinet for France with Loucheur as finance minister.

Nov. 28—Italian parliament passed laws making Mussolini dictatorship complete.

INDUSTRIAL

Jan. 19—Federal railway labor board raised pay of 97,000 railway clerks.

Feb. 12—New York garment workers' strike ended with increase of pay.

March 21—Dodge Automobile company sold to syndicate of bankers for $75,000,000 cash.

April 16—Great Northern and Union Pacific telegraphers granted wage increase of 2 cents an hour by U. S. railway labor board.

April 13—U. S. supreme court held unconstitutional the compulsory arbitration of labor disputes under Kansas industrial court act.

May 13—Secretary of Agriculture Jardine warned Chicago board of trade to end grain price manipulation or lose its charter.

May 19—International Harvester company exonerated of trust charges by special federal court of equity.

June 1—U. S. Supreme court held the gathering and dissemination of information by trade associations on costs, prices, etc., are not necessarily violation of anti-trust laws.

June 9—Burley Tobacco Growers' Co-Operative Marketing association enjoined from doing business in Tennessee.

June 16—Plasterers of [illegible] began general strike because of row with the bricklayers.

June 23—F. W. Sargent, elected president of Chicago and Northwestern railway, W. H. Finley retiring.

July 10—Anthracite miners presented demands for 10 per cent wage increase.

Dissolution of the Grain Marketing company, co-operative concern, announced.

July 13—Standard Oil company of New Jersey changed from 12 to 8 hour day for its oil fields, with new wage scale.

July 17—American Woolen company announced 10 per cent wage cut in mills.

July 23—International Association of Machinists notified members to quit all relations with communist organizations or lose cards.

July 28—Grain Marketing company formally dissolved.

Aug. 1—First union of cemetery workers organized in Chicago.

Aug. 3—American Federation of Labor reverted to its non-partisan political policy.

Aug. 4—Anthracite coal wage negotiations broken off; operators refused higher wage scale and check-off; miners refused arbitration.

Aug. 23—Shipping strike began in English ports.

Aug. 27—President Lewis of the miners issued order for anthracite strike on Sept. 1.

Aug. 28—Shipping strike on in ports of South Africa.

Sept. 1—Strike of anthracite miners began.

Sept. 14—Secretary of Agriculture Jardine dismissed federal charge against merger of Armour and Morris packing plants.

Sept. 22—John V. Farwell Co. of Chicago, wholesale dry goods, bought by Carson, Pirie, Scott & Co., forming a $100,000,000 a year combination.

Oct. 2—Jurisdictional dispute between bricklayers' and plasterers' unions that had long tied up building construction settled.

Oct. 4—Four hundred million dollar merger of Ward, General and Continental Baking companies announced.

Oct. 5—Italian confederation of industry, representing employers, and confederation of Fascist labor unions, agreed to close co-operation.

Forty-fifth annual convention of American Federation of Labor opened in Atlantic City.

Oct. 8—Chicago Board of Trade adopted stringent rules to prevent market manipulation, as demanded by Secretary of Agriculture Jardine.

Oct. 12—Seamen's strike called off in South Africa ports.

Oct. 16—American Federation of Labor turned down all propositions for co-operation with Russian trade unions on recognition of the soviet government; President Green and other officers re-elected.

Oct. 19—U. S. Supreme court ruled against Arizona minimum wage law for women.

Nov. 2—S. M. Felton resigned as president of Chicago Great Western railway, Col. N. L. Howard succeeding him.

Nov. 29—Anthracite miners accepted Pinchot plan for ending strike.

British seamen's strike in Australian ports ended without gain for men.

Nov. 30—Chicago cemetery workers went on strike in five cemeteries.

Anthracite operators rejected Pinchot plan for ending strike.

Dec. 18—French manufacturers offered to mortgage nation's industries for $400,000,000 loan to government.

Dec. 26—King Ali of Hedjaz abdicated following capture of Jedda by the Wahabis.

DOMESTIC

Jan. 4—Associate Justice Joseph McKenna of Supreme court resigned and President Coolidge named Attorney General Harlan F. Stone to succeed him.

Mrs. Nellie T. Ross sworn in as governor of Wyoming.

Jan. 6—Senate upheld President's veto of postal salary raise bill by one vote. Senate passed Interior department bill and house passed emergency deficiency bill carrying $157,000,000.

Jan. 7—Senate passed treasury, post office and agriculture supply bills.

Jan. 8—House passed army appropriation bill carrying $331,000,000.

Jan. 10—President Coolidge announced that Secretary of State Hughes would resign from the cabinet on March 4 and that Frank B. Kellogg had been selected to succeed him.

Charles B. Warren nominated for attorney general.

Jan. 12—Presidential electors met in the state capitals and cast their votes. Coolidge and Dawes being formally elected.

Jan. 13—Alanson B. Houghton, ambassador to Germany, selected to succeed Frank B. Kellogg as ambassador to Great Britain.

Senate passed deficiency bill carrying $168,000,000.

Jan. 14—Senate passed the Underwood Muscle Shoals bill.

Jan. 15—C. Bascom Slemp resigned as secretary to the President and Everett Sanders of Indiana was named to succeed him.

Rt. Rev. W. M. Brown, former bishop of Arkansas, found guilty of violating Episcopal doctrine by church board of review and his expulsion from ministry recommended.

Former Secretary Denby exonerated and Fall condemned by minority report from senate committee on oil inquiry.

Jan. 20—President Coolidge announced completion of work of United States railroad administration created during the war, cost to nation was $1,674,500,000.

Senate adopted majority report on Teapot Dome oil scandal, censuring Fall and Denby.

Mrs. Miriam A. Ferguson inaugurated governor of Texas.

Jan. 30—Col. Charles R. Forbes, former director of the veterans' bureau and John W. Thompson, millionaire contractor of St. Louis, found guilty by a jury in Chicago of having conspired to defraud the government in contracts for soldiers' hospitals.

Emile Daeschner, new French ambassador, presented credentials to President Coolidge.

Senate passed postal pay and rate increase bill.

Jan. 30—Dog teams carrying antitoxin for diphtheria-stricken Nome started on 666-mile run.

Feb. 2—Serum reached Nome in record-breaking time.

House passed bill for $150,000,000 for public buildings program for six years.

Delaware and Utah rejected child labor amendment.

"THE STORE THAT DOES THINGS" WAYNE AND HARRISON

Fish and Game Club Banquet

Enjoyed by 46 Men, Losers were Good Sports and Everyone Pleased with Evening

The annual hunt, this year, included 48 members of the St. Joe Fish and Game club, and the results were just as Ed Storer and his gang had planned, "They were the Victors." Clare H. Hull and his gang served the supper in the school house, Wednesday evening, Dec. 30. Clarence Hart, H. J. Renner and Merritt Sechler were eats committee, but of course Merritt was the cook, the other two members were penalized in this way because Hart does not enjoy defeat at all and Renner turned in the head of his wife's canary bird.

The luncheon, however, was enjoyed and consisted of Oysters, any style, fruit salad, pie, pickles, coffee, sandwiches, and lots of it. And the boys sure did eat and enjoy themselves.

H. M. Widney was chairman of the program and gave a splendid talk on sportsmanship and what it meant in the true sense, to always be a good loser as well as a good winner. The community is far better off for the hunt that is just finished, in that it is minus many of the rodents that would otherwise be at liberty to destroy grains of all kinds, as you will note in the tabular report of the hunt. The chairman also gave some interesting experiences in his hunting trips to the Maine woods.

I. W. Pence, Game Warden for this territory, was present and gave a talk of interest to sportsmen, showing how little, as a rule, the violators are when caught in the act of violation, and what excuses they advance for their actions. Most violations are in communities where public sentiment is at a low tide. It is the duty of the game club members to sponsor law enforcement and report those who refuse to obey.

Frank Leighty, deputy warden was present and offered his services to this community at any time violations were being carried out.

The club voted their sympathy and best wishes to Henry C. Hathaway, who at the time was laid up from wounds received at the hands of a game violator when he was shot in the left jaw or cheek. Henry is recovering and will soon be on duty as deputy warden.

The Blue Jay Quartette made two attempts at warbling, but the bill of one was too short and the other three were too full of eats and giggles. THEY BLEW UP!

The following is the list of the winners and their toll of game and pests:

Ed Storer, Captain.

B. E. Widney, Herbert Curie, Byron Woodcox, Ralph Sechler, F. B. Leighty, Harcourt Miser, V. R. Monroe, Del Nelson, E. R. Kinsey, F. R. Bowman, M. W. Yeiser, Paul Tustison, L. B. Meek, Wm. Keeler, Frank Milliman, Francis Hickman, Ed Leighty, George Tustison, Donald Hart, Roy Koch, Merwood Rhoads, Wm. Staman, Carl Tustison, Rolla Wiers.

Pest	Winner	Loser	Total
Sparrows	1508	691	2199
Mice	173	92	265
Rats	7	48	55
Crows	—	2	2
Owls	1	1	2
Hawks	1	1	2
Moles	—	2	2
Weasels	—	2	2
Rabbits	1	15	16
Woodchuck	—	1	1

The Boys That Paid For The Fun

C. H Hull, Captain.

Wm. Harman, Lloyd Curie, H. J. Renner, H. M. Widney, Frank Sechler, C. S. Hart, Glenn Cole, Carl Perkins, M. C. Sechler, Wm. Maxwell, Clayton Keeler, Russell Tustison, Clav Coburn, Lester Coburn, C. R. Price, Wm. Hamilton, S. A. Mumaw, Harry Hursh, Ward Woodcox, J. C. E. Abel, John Hart, Victor Brown, Sam Kees, Vernon Woodcox.

Russel R. Reidenour
ATTORNEY
Auburn, Ind.

Well it's all over
And the winners won
But say boys,
We all had fun.

Clarence Hart, although defeated, brought in 6 entries or different rodents.

H. M. Widney turned in 31 rats out of 48—and no one knows to this day where he caught them all.

Next year all persons wishing to pass canary bird heads on the Judges will prepare to serve the banquet.

President Tom Abel made a short speech and he brought the house down, not the school house, but with cheers.

Clare Hull had 38 mice, 2 rats and Lester Coburn 34 mice and 2 rats. Bet these guys got a move on themselves or else hired kids to catch 'em.

Wilbur Yeiser, a winner only could find 132 mice and 5 rats. He prepared a slide for life at the elevator and every one that attempted to beat it failed.

H. M. Widney, although a loser, challenged anyone to match his $1.00 bill for a two year membership, and there were 22½ others stepped up to accept it. And they were a sporty bunch too.

Frank Bowman, do you think he could hunt, turned in 13 mice and they were all caught trying to carry pennies out of the bank in broad day light. While thirteen is supposed to be unlucky yet he was on beating side.

All the late magazines at News office. Place your order—we will save one for you.

Catarrhal Deafness

is often caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or Imperfect Hearing. Unless the inflammation can be reduced, your hearing may be destroyed forever.

HALL'S CATARRH MEDICINE will do what we claim for it—rid your system of Catarrh or Deafness caused by Catarrh.

Sold by all druggists for over 40 Years.
F. J. Cheney & Co., Toledo, Ohio.

For good glasses see Griest at American Building Hicksville, Ohio.

Dan Herrick, for fourteen years owner of Herrick's restaurant on East Seventh street, Auburn, who sold out to McDonald's is again in charge of the restaurant as manager for John Konger of Columbia City. Mr. Konger leased the restaurant to Guy and Lawson Berkley, who have been in charge for about nine months. Mr. Konger has again taken over the lease.—Star.

NOTICE FOR SALE

The undersigned, commissioners of the Circuit Court of Allen County, Indiana, will offer for sale on January 14, 1926 at 10 o'clock A. M. and thereafter until sold, the farm of One Hundred Sixty (160) acres of land of the Jesse Grice Estate, formerly mayor of Fort Wayne, located one-half (½) mile west of Leo in Allen County, Indiana. The farm is located almost in a perfect square, facing two (2) important highways and twelve (12) miles northeast of Fort Wayne; has a twelve (12) room house, numerous outbuildings, a large barn about 40 x 90 feet long. Buildings in good shape. Farm well-fenced for stock farm and one of the show places in that community. The whole farm presents a beautiful appearance. Any correspondence addressed to the undersigned will be given prompt attention. Howard Benninghoff can be addressed at 103 East Main Street, Fort Wayne, Indiana, and Harry Hogan at Dime Savings & Trust Building, Fort Wayne, Indiana. Act quick if interested by seeing us.

Howard Benninghoff

THE Isbell Wholesale Stores were established several years ago to furnish wholesale buyers of Sugar a new kind of service.

There are now 57 Isbell Wholesale Stores, located in 25 cities.

Proving that the Isbell idea has met with success.

It is the Cash and Carry Plan applied to Sugar in wholesale quantities.

No delivery expense, no charge accounts, no bad debts, no book-keeping or collection costs.

This saving in overhead enables Isbell Wholesale Stores to sell Sugar at *lowest possible prices.*

Anyone can prove this by comparing Isbell quotations with others.

Every day the Isbell Wholesale Stores are completely stocked to meet the requirements of customers: all grades, all kinds of Sugar, in any quantity from a single case, or 100 lbs. bulk, to a carload.

Isbell Wholesale Stores, for the special convenience of grocers, are always located in the vicinity of City Markets.

You will find, too, that Isbell service offers all customers the pleasing assurance that their trade is appreciated.

ST. JOE NEWS.

VOL. XL — ST. JOE DeKALB COUNTY, INDIANA, THURSDAY JAN. 21, 1926 — NO. 3

Spelling of Years Ago and of Now

How did you spell "Constantinople" when you were a youngster? Here's why I ask—a week ago was published the following under the head of "Jayhawker Observations on an Orthographical Problem:"

Our parents spelled by syllables Mother amused us often by chanting "c-o-n con, s-t-a-n stan, t-i ti, n-o no, p-l-e ple, Constantinople."—Eldorado Times.

Now up at Old Carlyle. The way they spelled it there 60 years ago was: "C-o-n con, s-t-a n constan, t-i ti, constanti, n-o no, constantino, p-l-e pull, Constantinople."—Iola Register.

We understand that this gid-dap and whoa-back system of spelling is no longer employed. By the way, is spelling taught any more, and if so, how?—Lawrence Journal-World.

"And when, and by whom?"—Fort Scott Tribune.

This may be correct. We don't know. Here's our version:

A C and a sigh
A constant in I
An opal or a nopal
Spells Constantinople.

What Retailers Think of Local Papers

Newspaper advertising was viewed as the most efficient advertising medium for retail lumber dealers by several speakers at the session last week of the Indiana Retail Lumbermen's association in Indianapolis. The same would apply to any other retail business, and if you don't believe it to be true, try it.

Meat Market Has Moved To

CAN YOU SAVE $100

If you are careful with your earnings, can you save $100 every year? Not sauch a great amount is it? You could do it if you would try.

Well, here is what would happen to you if you started in at 20 years of age, depositing $100 every year at compound interest and leaving it alone. If you lived to be 70 years old, your total at the bank would be over $30,000.

Worth trying, now isn't it?

The St. Joe Valley Bank, A STATE BANK

Program Tri-Township Farmers Institute Sessions

Will be held in Community Hall Spencerville, January 28-29. The program will be in charge of Clyde Hart. Special corn display will be a feature and on Thursday evening the St. Joe Dramatic Club will put on a play, entitled "The Road to the City.

Thursday A. M.

Mahala Wade Will Probated

The will of the late Mahala Wade of St. Joe, was probated in the DeKalb circuit court Friday. It was executed last September, with Mrs. Rose Hullinger and Minnie Vanderbosch as witnesses. Mrs. Wade bequeathed $500 to her great-granddaughter, Phyllis Rickett, payable when the girl reaches the age of twenty-one years or before that if she marries. After the death of George W. Wade, husband of the testator, Phyllis Rickett is to have the furniture and bedding that she wishes to select with the exception of a few pieces that the girl's father, Roscoe Rickett, may want. Mrs. Wade nominated F. R. Bowman for executor.

Obituary

Dessie Alda Cooley was born in Jackson township, June 27, 1865 and departed from this life January 14, 1926. Age 60 years, 6 months and 20 days

She leaves to mourn her departure her husband, George Cooley, two sons, John F. Cooley near St. Joe, James B. Cooley of Garrett, three daughters, Nettie Joy Baron, Newville, Helen Lucile Cooley, Chicago, Bonnie May White of Concord township, three brothers Samuel Stafford, Cleveland, Ohio, John Stafford of Hicksville, Ohio, Joe Stafford of Jackson township, two sisters, Jennie Stafford of Defiance, Ohio and Inez Grovenor of Detroit, Mich. Besides these she leaves an aged mother who could not attend the funeral on account of her health. She also leaves other relatives and many friends, among whom are three grandchildren, George Baron 11 years of age, Harry Baron 1 year old and Robert White 3 months old.

Two daughters have preceded her into eternity Gladys Cooley who died March 29, 1886 and Zetta Cooley June 8, 1901.

She was a member of the Methodist Church at Hicksville, Ohio.

She was married to George Cooley, September 16, 1884.

Funeral services were conducted from the home by Rev. A. K. Mumaw of Harlan and Rev. Otis Jones, St. Joe. E. R. Kinsey, funeral director and burial was made at Hicksville.

Card of Thanks

We desire to thank the friends and neighbors for their assistance and words of sympathy in the loss of our mother, also for the Concord choir and floral offerings.

The Children.

Home Bureau Activities

On Friday, January 15th, Mrs. Anna Tustison entertained the Home Bureau Club. Mrs. Tustison was assisted by Mesdames Hattie Widney, Beulah Coburn, Inez Hadsell, Aletha Sechler and Grace Dilley. A special feature of the program was a melody sang by the "Long Hair" quartette, which was well rendered and highly received. After the regular business session, Mrs. Beulah Coburn was called on to give her work, "Clothing." At this meeting Mrs. Coburn closed a two-year course on this subject and has attended every Clothing Project meeting held in Auburn the past two years. The Club gave Mrs. Coburn a vote of thanks for the help they have received and for the effort she has put forth to bring before the club the many good points and helpful demonstrations in sewing. Every club member has received much benefit from her work. During Mrs. Coburn's work she has been assisted by Mrs. Daisy Woodcox, Mrs. Vera Jackson and Mrs. Millie Shull.

Mrs. Beidler, of Auburn, could not be present so her work, "Denison Rope Weaving," will be given at a later meeting. At the conclusion of the meeting a dainty luncheon was served, consisting of sandwiches, pickles, fruit with whipped cream, light and dark cake and coffee

The next meeting of the club will be held February 19th, at the home of Mrs. Rose Watt.

Harmon Moves Meat Market

Wm. Harmon moved his meat market Tuesday from the Buckingham rooms to the room vacated by Dr Sheffer, next to the postoffice. A new refrigerator and show case have been added to his equipment and as soon as weather permits a room will be built on the rear to accomodate the working equipment. Mr. Harmon is enjoying a good business and asks that his patrons remember his new location.

Rev. Steffey Has Resigned

Last Sunday the St. Joe and Spencerville Lutheran congregations were tendered the resignation of their pastor, Rev S. D Steffey, who has served the churches for the past four years, same to take effect April 1st. He has accepted a call to Carroll county, two churches one a distance of five miles in the country, and in a community that he is well acquainted with.

Because of the daughter. Miss Lillian, being a member of the Spencerville high school senior class she and Mrs. Steffey will remain until the school term has closed.

Mr Steffey has been a hard working pastor and as a result the church has been built up in membership.

TETE-BOULE

SYNOPSIS.—With David, half-breed guide, Brent Steele, of the American Museum of Natural History, is traveling in northern Canada. By a stream he hears Denise, daughter of Col. Hilaire St. Onge, factor at Wailing River, play the violin superbly. He introduces himself and accepts an invitation to make the post his home during his stay. He finds the factor worried and mystified. The "log chateau" is a real home. From St. Onge he learns of the mysterious creature of evil, the Windigo, and the disappearance of a canoe and its crew, with the season's take of furs. Then at night the Windigo gives a weird performance. Even Steele is mystified. David, Steele's Indian, and Michel, St. Onge's head-man, leave for the scene of the canoe's disappearance in an attempt to solve the mystery. St. Onge tells Steele that Lascelles, the company's manager at Fort Albany, seeks his ruin in order to compel Denise to marry him to save her father. Steele and Denise fall in love. Steele finds the track of the Windigo—huge and much like a bear's. David finds the same thing.

CHAPTER IV

—8—

As he met Denise at the door of the factor's quarters, Steele said quietly: "Let's not talk of the bear trail tonight, mademoiselle." And the grateful look she gave him was ample reward for his tact.

"As I feared, monsieur, the men found nothing down river," said St. Onge as they sat down to the simple meal.

Not knowing whether Michel had as yet confided in the factor, Steele didn't mention the strange trail.

"It is certainly a puzzle, Colonel."

"Yes, a riddle which will be solved in only one way, monsieur—by time. Some day when we have left the Wailing River we may hear of the fate of my men."

"Then you have no faith in the Windigo theory of their disappearance?" Steele boldly challenged, with a curl of the lip.

The tired eyes of St. Onge twinkled. "So far as our Indians are concerned, monsieur, the Windigo will drive us out of the valley. But I am not prepared to say that the Windigo have my fur."

Brent Steele was narrowly on the point of demanding that his host put his cards on the table face up. St. Onge's failure to take his guest fully into his confidence was irritating to a degree. As he ate in silence, the American promised himself that there should shortly be a showing of hands or he would go south at once. Then the brooding eyes of Denise St. Onge met his and he realized what it would mean to leave Wailing River to its fate—what memories he should leave behind when he started south for the Nepigon.

That evening, three men, heads together, smoked on the beach. Slowly and in detail Michel and David told Steele of their search and discovery of the strange footprints.

"What were they like, Michel?"

"Dey were long lak' de bear, but no bear een dea countree mak' dem so big."

"Queer t'ing de bear w'at mak' de track," broke in David, "was starv', for dey not seenk far een de mud. An' he have seex-seven toe on fore feet."

"Just like the ones I'll show you in the morning!" exclaimed Steele. "And you found no trail of the men with the canoe?"

"No sign but 'round de camp—no trail in muskeg."

"Well, Michel, what do you think? Could the brute that made the track you saw, howl like the one on the ridge here?"

The Iroquois' small eyes narrowed to slits. He puffed hard for a space before answering. "De howl on de ridge was no bear—bear onlee yell w'en he get hurt. Michel not know w'at howl on de ridge but he fin' out before de long snow melt."

"What do you think made the trail, David?" Steele grinned into the set face of his friend.

David shook his head. "I nevaire see so beeg bear track."

Then Steele told of his search of the ridge for signs of the night wailer, and of the tracks he had seen that afternoon. But cudgel their brains as they would, the three men were at a total loss for a solution of the riddle of their origin.

The night shut down but the three men on the river shore still sat smoking, hard at their council of war. In the middle of a sentence, David suddenly stopped, raising his head as though listening. Then, silently rising, he plunged into a clump of alders close by! A low curse—the sound of a scuffle.

"By gar! W'at you got, Daveed?" demanded Michel as he and Steele followed to the brush.

"I show you somet'ing!" was the muttered reply, as the dark shape of the Ojibway dragged an indistinguishable, struggling mass from the alders.

"Tete-Boule!" gasped Michel, peering into the face of David's prisoner. "W'at you do dere?"

"So you t'ink to hear somet'ing, Tete-Boule?" growled the angry voice of the Ojibway shaking the man he held in the vise of his two hands as a husky dog shakes a rabbit. "You crawl lak' de mink, but I smell you lak' de wolf smell de wood mouse," and the man from Nepigon shifted a hand to Tete-Boule's throat. The mouth of the trembling eavesdropper gaped for air.

"Now I geeve you somet'ing to leeson to, Wabeno! Shaman! Maker ov de Beeg Medicine! Eef you don' be ver' careful, David, de Nepigon Wolf, will tear de devil out ov your t'roat." And with a wrench he sent Tete-Boule sprawling on the beach.

"Guess he won't eavesdrop again in a hurry!" laughed Steele, as the cowed Indian disappeared in the shadows. But Michel seemed so strangely silent that the American asked:

"What's the matter, Michel, don't you like to see him handled so roughly?"

The Iroquois made no reply.

"Wake up, Michel, and tell us what you think?"

"I t'ink," said the head-man slowly, "dat de long snows will be red in dees valley."

"What, you don't think that fool Tete-Boule will make trouble?"

"Tete-Boule ees no fool." He would say no more.

The house was silent when Steele, filled with the events of the day, went to his room. Late into the night his thoughts were busy with the hours on the ridge with Denise St. Onge, with memories of her flushed response to his emotion, of her abandon to the feeling which had swept her when she played her "Farewell," of her reticence and yet her desire to make clear the situation which her father seemingly feared to reveal to Steele. Then the matter of the tracks in the mud; what manner of beast could be loose in the "bush"? In the morning they would take up that trail and follow it, but when they lost it in the dry going, what next? Well, they had a plan for the next month, but the Frenchman would first have to show his cards. If he refused, there was nothing to do but get on to Nepigon. On the way there was Ogoke and Monsieur Laflamme. That ought to be interesting. But little did Steele realize as his drowsy brain dwelt for an instant on the call on Monsieur Laflamme, free-trader, just how interesting that visit was to be.

* * * * * * *

At daylight three men were bending over tracks which ran through a wet hollow less than a mile from Wailing River.

"Well, Michel, did you ever see a black bear that would leave these behind him?" asked Steele as David and the head man carefully inspected the peculiar trail.

"Ver' beeg track but ver' strange bear," laconically vouchsafed the kneeling hunter.

"How about it, David?"

David bared a set of strong teeth in a characteristic smile.

"W'en we start up river for de Nepigon, I tell you. You laugh at me eef I say w'at I t'ink now."

Michel took up the trail forward while David and Steele followed it back only to lose it shortly in the dry birch leaves. On their return they found Michel waiting.

"She don' run far," he announced. "I don' followed eet far in de dry bush."

Then the three made a wide circle, but failed to pick up the elusive tracks. Disappointed, they were returning to the post by another route than the trail to the ridge overlooking the "Vale of Tempe," when Michel, who was leading suddenly stopped in his tracks, raising his hand in warning.

Stiff as the spruce around them, the three stood listening. Faintly to their straining ears came a low chanting, accompanied by the rhythmic beating of what sounded like a drum. Steele turned a questioning face to David, who grinned broadly, nodding his head in time to the far drum beats.

"What in thunder!" queried the curious scientist.

"You hear dot down on de Nepigon, one tam," dryly returned the Ojibway.

"It sounds like it. Somebody doing some conjuring, eh?"

"Tete-Boule, de beeg shaman, mak' heseff some medecine dees morning."

"Is he driving away the Windigo, or is he trying to get you bewitched for shaking him up last night?"

"I t'ink he try to call de Windigo for to mak' de beeg medicine togedder," laughed David.

"Do the post people know that Tete-Boule is a Wabeno, Michel?" Steele asked of the silent man who had vouchsafed no comment.

"Tete-Boule mak' medicine for long tam, to drive away de Windigo. De people t'ink he ees beeg shaman, for sure."

"Well, the first thing for St. Onge to do is to get rid of this nuisance, Tete-Boule. He keeps the post Indians stirred up with his mumbo-jumbo, and ought to be kicked out. What do you think, Michel?"

For answer, the tall Iroquois drew an ugly skinning knife from its sheath in his belt. Then he said, "It be good t'ing eef I put dees een hees back?"

"No, not without orders from your chief," replied Steele, amused at the literal interpretation given to his suggestion. "But this Tete-Boule will make trouble all winter with his sorcery."

As they talked, the low droning continued, accented by the beating of the drum.

"Let's see what he is about," suggested Steele, and they crept forward.

Within a hundred yards they made out a small, round skin tipi from which the sing-song emanated.

"Naske awass, Windigo!" moaned the voice inside. "Ahuah! ahuah!"

"He tell de Windigo to go away," whispered David to Steele.

Then Michel wormed his way to some small balsam near the tent, while the others watched.

Presently a low mewing from the Iroquois stopped short the wailing in the tent. Then from the balsam rose the caterwauling of a lynx in the mating season.

The drumming started furiously, accompanied by vociferous shouting. The scream of the lynx rose to a maniacal shriek. The drumming ceased, and the maudlin cries of a creature frenzied with fear filled the tent. Presently the flap was thrust aside, and a grey-faced Indian scrambled out and fled like a deer in the direction of the post, leaving behind him a white man and an Ojibway doubled with laughter, and beside them, his face set like stone, a tall half-breed deep in thought.

"Why did you do that, Michel? He will only make things worse at the post."

"I try eef he scare ov de Windigo heeself."

"Well, are you satisfied?"

"Yes. Eet ees ver' strange he ees so scare." And the head man shook his head doubtfully. "He talk to de Windigo, an' w'en he cum, he run."

Back at the post Steele related to St. Onge the events of the morning.

"This Tete-Boule, Colonel, is only a source of trouble here. He is filling the minds of the Indians with the Windigo, and then makes medicine to drive him away, doubtless for a consideration."

St. Onge shrugged with indifference. "It will not matter. I am expecting a packet from Albany any day ordering me to abandon the post."

Steele stared at his host in surprise. Where was the old fighting blood in this veteran? What hidden cause had paralyzed his nerve? And his love for his daughter—that at least should drive him to fight through to the bitter end.

They were on the river shore and alone, so Steele grasped the opportunity for which he had waited. The matter between them had to be cleared up if he were to give his best efforts and those of David in the days to come.

"Colonel St. Onge," he began, "I am deeply interested in your situation here. I have offered the services of David and myself, in an attempt to aid you in your trouble; but I must say, candidly, that you are not meeting me half way. If I am to put it the next three weeks in an effort to run this thing down, I must first have your full and complete confidence. I must know—what you know—and think. This is due me. If you cannot take me into your confidence, I shall be compelled to thank you for your hospitality and bid you goodby, deeply as I shall regret it."

St. Onge listened patiently, as the speaker thought, hopelessly, to the ultimatum.

"Let us sit down and talk it over, monsieur," he replied.

The two men moved to a rock and lighted their pipes.

"Monsieur Steele," began St. Onge, "I am in a net from which I see no escape. You came here a stranger, claiming to be a scientist, interested in the study of Indian customs and folk-lore. That is all I knew about you. As it was, I told you too much that first night."

Evidently this Tete-Boule has something to do with the Windigo. Who is back of him?

(TO BE CONTINUED.)

Crude Hooks in Use by Early Fishermen

In France several caves have been found in which men are believed to have lived about 200,000 years ago. In these were found what are probably the oldest fishhooks so far known to have been used by man.

These first-known hooks consist of a stone ground down into the shape of a small banana with a ridge cut in the middle, the string, or whatever was used for a line, having been tied around the stone in this ridge. Cavemen of ages ago took this banana-shaped stone and covered it with meat. Then they kindly allowed a fish to swallow the whole thing.

Then the fisherman would give a pull on the string, or whatever it was. The "hook" would straighten out horizontally and therefore refuse to come out of the water without the fish, so, when the fisherman hauled in, the fish with the hook caught in his gullet, would keep the crude fishhook company.

Around the lakes of Switzerland scientists have found various kinds of hooks considerably later than those crude relics from France. Many of the Swiss hooks are of bronze, some having barbs, but the really ancient ones were barbless and consisted of two hooks at right angles to each other.

President Polk was the oldest of ten children.

The HAPPY HOME

By MARGARET BRUCE

(Copyright.)

Freshly Ironed Clothes

When I was a little girl I used to have wonderful times playing house under the shelter of an old-fashioned clothes-horse, on such days as this bulky piece of household furniture was not in use to hold the week's ironing. I stretched a big carriage robe over the outspread arms of the "horse," and made a tent in which many rainy mornings were spent.

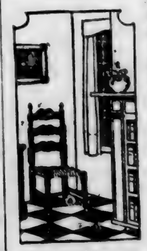
Where in the world would we find room for that wide-spreading clothes-rack, I wonder, in our modern city apartments, where every inch counts! As I remember it, it entirely filled the center of a large room, when opened wide enough to stand alone. Those were the days of roomy kitchens, with other rooms to match. Nowadays anything that took up as much space as that old clothes-horse would crowd all the rest of the furniture out of the apartment, to say nothing of the tenants.

The modern clothes-dryer is designed to stand in one corner of the smallest of rooms. It has been squeezed in and contracted and pared down until it takes up only one square yard of space when wide open, and almost no space at all when closed. Yet it holds just about as many freshly ironed articles as its older and far larger sister. It is light in weight, too, and can be moved from room to room easily and conveniently. Its arms drop down to its sides when it isn't in use, and when the arms are raised they alternate in such a way that the garments on the rack above drop down between two of the arms on the next row, and so on.

There are a number of these small-space clothes driers in the shops, all following more or less the same lines. They are a boon to the mother with a baby, whose dainty things must be washed often, and to the laundress on wash day as well. They can stand in a sunny window, or before an open fire, or in one corner of the bathroom, by the radiator. When closed they look much as the artist has shown us, in the accompanying sketch, where the open rack is in the foreground and the collapsed one stands in the rear.

The Occasional Chair

That's what the makers call it—the occasional chair. It isn't one of a set, or a special living room or dining room or bedroom chair. It is just a charming individual affair that can stand in the library or the hall, the sunroom or the guest room, PS may be, and seem entirely appropriate there.



Sets of furniture have all but disappeared, anyway. Do you hark back to the time when every "parlor" had its big sofa, its armchairs, rocker, and six straight small chairs, all upholstered alike in black horsehair, red velvet or green rep? Them was the unhappy days! On the horsehair you slid, if you were very small; and all the chairs were too high and too hard, and they stood in stiff stark rows back against the wall.

Now, blessed be the thought, our furniture is built for comfort. Our great divans are regular mothers' laps, for restfulness and relaxation. Chairs are not made in sets, although there may be one or two deep-cushioned fireside chairs that are upholstered alike. Beyond these, the spaces are attractively filled with "occasional chairs" — some large, some small—that give each corner an individuality of its own. It may be a little mahogany fiddle-back chair, with needlepoint seat, or a quaint old painted chair, with garlands of faded, partly vanished flowers on the back. It may be a tall, straight Jacobean chair, or a padded wing chair suggesting grandfathers with gout.

The little occasional chair shown in the sketch today is a low, stocky chair of maple, with its seat woven of beautiful old rushes. It stands handily near a table, a window, and a bookcase, from where it can be lifted to join a group round the tea-wagon, seat a fourth at bridge, receive the afternoon caller, or be placed in a row with others when the study class meets. If needed, it can be taken up to the guest room. It doesn't have to match anything, and it seems able to adapt itself to almost any setting. It would be particularly good in a hall.

Wars for Silesia

Frederick the Great of Prussia waged three wars against Austria to gain possession of Silesia. The first was from 1740 to 1742; the second in 1744 and 1745, and the third from 1756 to 1763.

Disabased

Mrs. Homebody—So you've been in Boston? How did you find the beans?

Mrs. Benaway—About the same as the western nobs. This Bostonian culture is very much overrated.

Be sure of good bread; use **Yeast Foam**

Children Cry for

Fletcher's CASTORIA

MOTHER:— Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of Chas. H. Fletcher. Proven directions on each package. Physicians everywhere recommend it.

It is better to appear ungallant than to give people the impression that you love to hear yourself talk.

One of the alimony payers says that a woman's change of mind is an effect without cause.

Thousands of people who are sufferers from constipation do not become aware of it until they seek out the cause of their frequent headaches.

"Those bilious headaches can be prevented"

"I know how agonizing they are. For years I was a chronic sufferer.

"And the headaches were not the worst part of it. The strong drugs I used to take to relieve the pain upset my stomach and slowly but surely undermined my general health.

"Finally I found out that my headaches were due to constipation. My doctor advised Nujol. After taking it regularly a few weeks the trouble disappeared.

"Since then I have never had another headache. There is no reason why I should, for the cause has been corrected."

Nujol Corrects Constipation in Nature's Way

Constipation is dangerous for anybody. Nujol is safe for everybody. Nujol simply softens the waste matter and thus permits regular and thorough elimination without overtaxing the intestinal muscles. Medical authorities approve Nujol because it is gentle, safe and natural in its action.

You can take Nujol for any length of time without ill effects. To insure internal cleanliness, it should be taken regularly. Unlike laxatives, it does not form a habit and can be discontinued at any time.

Ask your druggist for Nujol today and begin to enjoy the perfect health that is possible only when elimination is normal and regular.

WOMEN OF MIDDLE AGE

At This Critical Period Let Lydia E. Pinkham's Vegetable Compound Help You Safely Through

Milwaukee, Wis.—"I have always wanted to tell you what a good medicine I think the Vegetable Compound is. Over a year ago I became weak and run-down, and my back hurt all the time. I was not able to do my light housework. I went to my family doctor and he treated me for over a month and didn't help me. I saw your name in the paper and the name of Lydia E. Pinkham's Vegetable Compound, and I said to my husband, 'I will try that and see if it will help me.' I have taken six bottles and am feeling much better, but I am still taking it as it is the Change of Life with me and I will keep on till it is over."—Mrs. ANNIE KWINSKI, rear 526 1st Ave., Milwaukee, Wis.

Brewton, Alabama.—"During the Change of Life I suffered for some time during each month with headaches and backache, and was hardly able to do my work at those times. A friend recommended Lydia E. Pinkham's Vegetable Compound and since taking it I feel like a different woman."—Mrs. MATTIE ADAMS, Downing Street, Brewton, Ala.

IF MOTHERS ONLY KNEW

During these days how many children are complaining of Headache, Feverishness, Stomach Troubles and Irregular Bowels and take cold easily. If mothers only knew what Mother Gray's Sweet Powders would do for their children no family would ever be without them for use when needed. These powders are so easy and pleasant to take and so effective in their action that mothers who once use them always tell others about them. Used by mothers for over 30 years. Sold by druggists everywhere. Trial Package sent FREE. Address Mother Gray Co. Le Roy, N. Y.

Monkey Is Nest Robber

Jiggs, a monkey known to thousands in and around Cape May, N. J., while being cared for on a farm near that place became observant of the chickens and whenever he hears a hen cackling, dashes out to find the nest. He has become a proficient robber of nests.

Colds

By millions ended

Hill's stop millions of colds every winter—and in 24 hours. They end headache and fever, open the bowels, tone the whole system. Use nothing less reliable. Colds and Grippe call for prompt, efficient help. Be sure you get it.

The Wiring Diagram of the Amplifier Herein Described.

By SIDNEY E. FINKELSTEIN, in New York Herald-Tribune.

The honors in audio-frequency amplification seem to be divided more or less evenly between the transformer and the resistance coupling methods. Each system has its stanch adherents, who are ever ready to fling masses of facts, figures and fancies into each others' faces whenever a discussion of relative merits arises. The transformer supporters are just as firm in their belief of the superiority of their instruments as the resistance henchmen are in their views on the advantages of their devices.

The writer has used both transformers and resistances in the construction of a large number of sets, and after studying the general results obtained from them has come to the neutral conclusion that both systems are good, but that they are even better if they are combined, in the journalistic fashion, to the retainment of the best features of each.

The advantage of the greater amplification per stage afforded by the transformer, combined with the flawless reproduction but lower amplification of the resistances, makes the ideal combination in the majority of sets.

A complete amplifier of this advantageous type can be made at home at surprisingly little trouble and expense, and once on hand it finds application to receiving circuits of all kinds. It may be built permanently into a set or it can be left available as a separate unit for connection to experimental tuners. For the last purpose it is especially convenient, as it saves the constructor of a new set the worry of providing suitable amplification to follow the detector tube.

Parts Required.

An amplifier such as the one shown in the illustration will require the following parts, which can be purchased at any radio store: Hard rubber or composition baseboard 12 inches long, 4¾ inches wide and ¼ inch thick; one heavy audio transformer not above 3½ to 1 ratio, three standard tube sockets, two resistance coupling units with two 100,000, one 500,000 and one 250,000 ohm resistors; one .0005 mfd. fixed condenser, eight binding posts and the usual busbar and mounting screws.

A definite assembly procedure should be followed. First the general location of the instruments should be determined and all the necessary screw holes made in the panel before anything is fastened down permanently.

The devices should be pushed closely together (there is no danger from interstage howling, as there is only one transformer), so as to allow room on the right and left hand short edges for input and output binding posts.

The wiring will give no trouble. As a start the "P" and "B" posts of the amplifying transformer should be connected directly to the two binding posts on the extreme left, which are designated as the "input" terminals. The .0005 mfd. fixed condenser is also placed across the wires and can be hidden comfortably out of way beneath the bottom of the baseboard. Of course small holes will have to be drilled in the composition to pass the wires wherever necessary.

The Filament Posts.

Next the filament posts of the three sockets, which are all marked "F," are wired as shown in the diagram, and lead finally to the A battery binding posts. These should be the left hand two of the row of four along the long edge of the baseboard.

With this much done the secondary of the transformer can now be wired to the grid and filament posts of the first tube socket. Progressing across the condenser and resistor terminals are wired in the manner indicated in the accompanying hook-up. With the resistor units that were employed in this particular amplifier the protruding soldered tabs of the spring mountings make the placement of the wires a short and simple task.

The two posts on the extreme right are the output. To one is run a wire from the P terminal of the last socket, and to the other a wire from the B plus post, which is immediately adjacent. The A plus and B minus posts, it will be noted, are joined together.

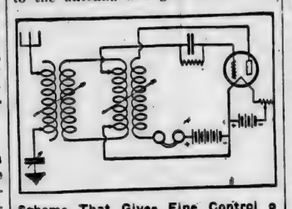
All the wiring should be done with standard round or square tinned busbar. The wire need be insulated with cambric tubing only in places where two wires unavoidably pass each other very closely; very little covering will be found necessary. The connections to the transformer, the tube sockets and the binding posts, which are all equipped with strong screw binding posts, need not be soldered, but those to the fixed condensers and the resistor mountings must be.

The B battery should be of 132 volts, which is the standard requirement for resistance amplifiers. With this voltage the 100,000 ohm resistors should be employed in the plate circuits of the first two tubes, while the 500,000 ohm leak goes between the first and second bulbs and the 250,000 ohm resistance between the second and third in the grid leak positions. This is clearly shown in the wiring diagram.

Two Variocouplers Make Circuit Very Selective

While a regenerative circuit may be readily obtained by inserting a variometer in the plate circuit, it is not so simple a task to obtain a tickler feed-back with ordinary apparatus on the market unless honeycomb coils are used. There are, of course, couplers with fixed tickler windings. With ordinary apparatus, however, the double coupler feed-back circuit is easily arranged, the objections to single-circuit action are overcome, and there is complete tuning in every circuit and any desired degree of coupling between them.

As commonly employed, the primary switches of one coupler are connected to the antenna and ground as usual.



Scheme That Gives Fine Control of Amount of Inductance.

The secondary of this coupler, however, is connected to the ends of the primary winding of the second coupler. The switch points of the second coupler go to grid and filament like the usual secondary connections. The secondary terminals of the second coupler are connected to the plate circuit.

The wave-length of the primary circuit is adjusted by the switch points on the first coupler, aided by the condenser in the ground circuit. This variable condenser should have a capacity of .0005 mfd. (23 plates). The coupling between the primary and secondary is adjusted by rotating the rotor of the first variocoupler. The secondary circuit is tuned by the switch points on the second coupler and the coupling between the secondary circuit and the plate circuit tickler is adjusted by the rotor of this coupler. The secondary of the second coupler acts as the plate tickler coil.

This circuit should be very selective and give a little better than the average set's results.—Radio News.

CHECK SQUEALING

Stop squealing in the radio-frequency set by:

1. Moving the coil closer to the end plates of the variable condenser.
2. Cutting down the number of turns on the coil primary.
3. Adjusting the grid bias with a potentiometer.
4. Inserting a critical resistance, such as a rheostat, in series with the grid of the radio-frequency tube.

Allow Space Between Units When Building

When building a set a safe rule to follow is to keep each piece of apparatus at least two inches or more away from other units. The biggest mistakes often made in the construction of home-built receivers are trying to cramp the instruments in small quarters and the use of metal fixtures for the mounting. Coils and other inductances in the radio-frequency circuit should be placed as far to the rear and away from other pieces of apparatus as possible.

Winding of Coils

To space wires on coils the correct distance, start the coil with thread and wire, at the same time applying considerably more tension to the wire than when no thread is used. After the coil is wound and the end of the wire fastened, the thread may be unwound

FAMOUS TWINS IN HISTORY

EVERYBODY is interested in twins and especially in those rare cases of twins who are physically united. The Siamese twins have been dead over fifty years, yet their names are known everywhere. These celebrated twins were born in Siam in 1811. They were bound together by a band of flesh that ran from the lower part of the chest to the upper part of the abdomen. Although born in Siam and always known as the Siamese twins they were really Chinese. The king of Siam wanted to kill them, regarding them as bad omens that would bring evil on the country. But an English merchant persuaded the king to spare their lives. Falling into the hands of P. T. Barnum, they were exhibited all over the world. After earning a large amount of money they bought a farm in North Carolina and at the age of forty-four they married two sisters. They lived to be sixty-three, dying in 1874 within a few hours of each other.

The earliest case on record of "conjoined twins" was the Biddenden maids, born in Kent, England, in 1100. An old picture shows them joined together at the hips and shoulders. They lived to be thirty-four. One of them was taken ill and died in a short time. The surviving sister refused to be separated from her sister, saying "As we came together, we will also go together." She died about six hours after her sister.

About 1500 two Scotch brothers were born who had two bodies and two heads but were single from the waist down with only one pair of legs. This strange person (or persons) lived for twenty-eight years. They were taken to court, where the king took a great interest in them. They learned "to sing and to play on instruments of music," one singing soprano and one tenor. They must have had good minds, as they learned to speak Latin, French, Italian, Spanish, Danish, English and Irish.

Two sisters, joined together, were born in Hungary in 1701 and lived 23 years. Two colored sisters, united like the others, were born in the South in 1851. Joined sisters were born in Bohemia in 1879, two in Sweden in 1878 and two brothers in Italy in 1877. There was also a case of two sisters in Chicago a few years ago that attracted much attention. Another pair of sisters are now living in Texas and two Philippino twins in Washington.

Apparently these strange freaks of nature have always occurred. How two human bodies can grow together and live we do not know.

ARE BOOKS CARRIERS OF DISEASE?

IN THE very early days of our knowledge of germs, everything which came in contact with a sick person was shunned as a possible carrier of disease. But broader knowledge has freed us from fear, as it always does.

Today we no longer burn little Mary's books, after Mary has recovered from measles, scarlet fever or whooping cough. We know now that germs will not live in or on paper. Contagious diseases are spread by people who have them, not by books.

Different germs, like different people, have different habits. Some will live in one place and under one set of conditions, while some will live in another place and under conditions that would kill the others. But no investigator has been able as yet to find any dangerous germ that will live on paper.

When Johnnie gets diphtheria at school it isn't because he has used a geography that belonged to some child who had diphtheria last month, but because he has played with or come in contact with some child who has diphtheria or who is a diphtheria carrier.

A diphtheria carrier is a person who has the germs of diphtheria in his throat or nose. He may have had diphtheria and recovered, as far as any symptoms are concerned. But the germs are still present. Or he may never have had diphtheria, because he is immune. But the germs may be there, all ready to pounce on some child who is susceptible.

How many carriers there may be in any school is hard to say. In one school, carefully examined a few years ago, 57 carriers were found among 378 pupils. This is unusually high. Generally, not more than three or four are found in a school.

But in either case, whether from a carrier or from a sick child, the disease is conveyed from child to child. Any time one of the carriers takes a bite of Johnnie's apple or a lick from his all-day sucker or a nibble from his chocolate bar or a bite of his pie or cake at luncheon, he may leave behind a few diphtheria germs and Johnnie will then have a fine chance of having diphtheria.

What is true of diphtheria is equally true of scarlet fever, measles, mumps, chicken pox, pneumonia, tuberculosis and common colds. Children catch these diseases from one another, not from books. The child who is in danger of developing tuberculosis is not the child who used a book that had been handled by a consumptive, but one who is living in the same house with an open case of consumption.

Paris Plans to Have Markets Underground

The city fathers of Paris have hit upon a grandiose scheme to relieve the congestion in the streets, Pierre Van Paassen relates in the Atlanta Constitution. They figure that there is still plenty of room underground. Of course the idea is not quite new, for Paris has a perfect subway service. Under an eighth of the area under the city, however, is a great hollowed space. This was once a quarry, but in 1781 and later under Napoleon, immense piles of bones and skeletons were stored there, when cemeteries around the churches were abolished for sanitary reasons. Now certain members of the municipal council advance the idea of sinking city markets into these catacombs. With a lighting system and proper ventilation, it is believed, public markets can be installed here after the bones are taken out once more, a scheme that would allow the destruction of the present central markets, which occupy ground much too valuable for such purposes.

DEMAND "BAYER" ASPIRIN

Take Tablets Without Fear If You See the Safety "Bayer Cross."

The Ancient One Gives Advice

By Martha Danning Thomas

HE WAS very young. He was also very chubby. There was a kind of pink, shining newness about him delightful to behold. And he stood waiting on the near side of twelve o'clock midnight.

HE WAS very old. He was also very bent. There was a kind of shining sadness in his eyes, as if he had seen more than any one else in the world. And he stood on the far side of twelve o'clock midnight.

"WHAT I can't understand," chirped up Chubby, "is why anyone need look so aged when they are only a year old. People would take you for Methuselah, any day."

"What I can't understand," rumbled the ancient one, "is how I ever looked as pink and inexperienced as you!"

So there they stood regarding each other, Chubby and the ancient one.

"Why must you look so old?" persisted Chubby.

"Because I have lived more than a million lives!"

"Whew!" whistled Chubby, "How do you make that out?"

"You'll know well enough, my son," said the ancient one, "this time next year."

"But tell me now!" insisted the young cherub.

"I look old because I have been part of the sorrow, the gladness, the misery, the joy and happiness of every one in the world. I have been a year, every day, hour and minute in the lives of people all over the globe. They could no more escape me than I could lose them. We were one,—I and those teeming millions. I will live with them as long as they live, through the influence of what happened during our year of acquaintance. I may live after them, not only in memory, but in the good or bad they accomplished while they knew me, and I them."

Chubby wrinkled up his white, babyish brow and tried to follow the words of the ancient one. But he could not. It was impossible for him. He could see and feel and act, perhaps, but he could not think wisely: he needed experience.

"One-two-three-four-five— . . ." the bells began ringing out the midnight hour.

"Goodbye, son!" called out the ancient one; "May you see as much happiness as sorrow. And may you learn to read the high hopes in people's hearts, and see what they see, no matter how differently their lives turn out. This is all that really matters . . remember . . " the voice of the ancient one grew faint and far-away, "remember . . son,—it is their aspirations . . that really count . . not their visible and worldly success . . ."

He was quite gone now. He was part of yesterday.

Chubby stepped over the threshold into his first minute of being The Happy New Year.

"That's all very well," he thought, "but I can't understand why he should look so old!"

Perhaps he will by midnight of 1926!

LAST YEAR'S RESOLUTION

By PATIENCE EDEN

"THIS time last year," announced a feeble voice, "I was born. I was a fine, strong resolution. There was none so robust as I. I expected to grow . . . and grow . . . and grow. Now look at me!"

Some old ideas standing about laughed. Last Year's Resolution was indeed a pathetic spectacle. Thin, old and discouraged he stood among them, confessing his 12-months' experience.

"That's always the way with these silly human beings," growled wrinkled Idea. "I was born three years ago in a professor's head, and then he just let me kick around with hardly a thought. Ideas can't thrive unless they have a diet of thought, you know!"

Last Year's Resolution shook his head sadly. Here they were on the eve of a New Year, and most of them were so tottery they could hardly stand. A woeful sight. Maybe they would fade away altogether and never be heard of again. Oh, very, very pitiful it was. For even ideas enjoy their span of life, and as for Resolutions, they yearn to become the backbone of human existence.

Then, out of the air came a call. They all pricked up their ears.

"That's for me!" shrieked the wrinkled Idea. "It's my professor's voice. He wants me! He needs me! I must fly!" He was gone in an instant.

Those remaining looked about at one another in a startled fashion.

Then came another call. Clear it was, and it held a beseeching note.

"Come!" it begged. "Come quickly! This is New Year's Eve and I want you. This time I will support you, and you must support me!"

Last Year's Resolution became electrified. "He means me! He needs me! I must help him!" and away he flew just as the clock struck twelve.

(©, 1925, Western Newspaper Union.)

The New Year

A bower unknown, a book unread;
A tree with fruit unharvested;
A path untrod; a house whose rooms
Lack yet the heart's divine perfumes;
A landscape whose wide border lies
In silent shade, 'neath silent skies;
A wondrous fountain yet unsealed;
A casket with its gifts concealed:
This is the year that for you waits
Beyond tomorrow's mystic gates!

—Horatio Nelson Powers, in the Missionary Review of the World.

Red Letter Days

By GERTRUDE WALTON

MAX KING hurried into the busy office of Manning Bros. Mercantile company for a promised interview with Walter Manning, elder member of the firm. During the ten minutes which the office girl informed him that he must wait, Max seized the opportunity to closely scrutinize the details in the office of the noted capitalists to find if there be a clew here that contributed to the success of the famous financiers. He had not long to look, for the first thing that struck his attention were the red-lettered words above the calendar beside which were two mottoes in bold, black type in neat frames. The mottoes were both striking. One read: "May Every Day in Your New Year Calendar Be a Red Letter Day When You Are Free From Any Hindering Harness." Another motto read: "May the New Leaves You Turn Over in the New Year Never Be Blown Back by the Wind of Broken Resolutions."

During the interview Max called attention to the red-lettered words at the top of the calendar headed "Red Letter Days," under which were the words, "Serve Day." The prominent business man drew from his desk a handful of papers as he said: "You see but one of the slogans. As I need them a new one is placed at the top of the calendar. My wife tries the same plan at home; when she has a tendency to forget some task or obligation, or wishes to improve her physical or mental habits she places one slogan in red letters that reads: "Red Letter Day—Deep Breathing Day;" or "Order the Milk Day;" "Vocal Practice Day;" "Read an Article Day"; "No-Nag Day."

On the slips Max was reading: "Exercise Day;" "No Meat Day;" "On Time Day;" "Play Day;" "Pay Day;" "Save Day;" "Rest at Lunch Day;" Give Day;" "Save Day;" "Write a Letter Day;" "Keep Accounts Day."

With these "Reason Reminders" the great man seized time to say, "We try to patch the small tears that cause the big rents in our plans and success some times. They have helped to remind us of the cause of some of our failures in the past."

Half an hour later as Max King entered his own office he wrote on a slip of paper and tacked it above his calendar these words: "Red Letter Day," under which he wrote, "Never Too Old to Learn Day."

Remained as Cook, and Her New Year

Culinary Artist Agreed to Stay, but Added "Mrs." to Her Name.

By MARION R. REAGAN

MR. MALLOTIN was finishing his morning meal with the sense of satisfaction that belongs only to those men who have a palate that knows good food and the digestive process to appreciate it, when the dining room door opened. Mrs. Bell, who had been his cook for some fifteen years, stood in the doorway, fidgeting nervously with her apron. "Mr. Mallotin," she began timidly, "I've come to give you a month's notice. After the first of the year I think you'll have to be looking for another cook."

"What?" Mallotin asked at last. "You're going to leave? What's the matter—aren't you satisfied with your wages? I was just thinking the other day of raising your salary. Is there anything—"

"Oh, no, sir, it's nothing like that. It's just that—that I'm going to be married again."

Mallotin, fifty-seven, was a tactless bachelor. "At your age!" he exclaimed. Mrs. Bell drew herself up indignantly.

"I'm forty-six, Mr. Mallotin, but I should think one of your age would consider it young."

"Why, You're Old Enough to Be His Mother."

"A man under sixty is still very young," said Mallotin with great dignity. "May I ask who the fortunate gentleman is?"

Mrs. Bell hesitated a minute. "Arthur Horage, in Pack's grocery," she answered.

"That young chap?" asked Mallotin. "Why, you're old enough to be his mother."

"Mr. Mallotin, I came in here this evening to say I was leaving after January 1st—not to be insulted." With that Mrs. Bell slammed the dining room door and disappeared, leaving her employer in a state of complete bewilderment.

It was not long, however, that the excellent brain of Mr. Mallotin remained muddled. He simply had to find a way of retaining Mrs. Bell. There was not another cook in all New York who could even compare with her. He must have her. With determination in his eyes he left the house and started off in the direction of Pack's grocery.

Arthur Horage, a young man about twenty-six, was arranging cans on the counter. Mallotin drew him off to a corner of the store, and, the two talked together quietly for over an hour. Finally Mallotin pulled out his checkbook, scribbled something on it and handed a narrow slip of white paper to the eager Horage who held it out to read the amount more carefully. Mallotin left the store a happy man. He had never spent two hundred dollars so well.

It had been just as he had suspected. Young Horage was marrying Mrs. Bell entirely for the sake of the money she had saved. She was to have started him in business. Mallotin's offer of two hundred dollars looked so good to him, however, that he was willing to forego his wife and her dowry, take the two hundred and make off to Cleveland, as Mallotin had specified. "Now, to fix it with Mrs. Bell," said Mallotin. This he thought would be quite simple. Mrs. Bell would be grateful to him for saving her from such a foolish step and would willingly agree to continue in his service. And he was right—up to a certain point. Mrs. Bell was willing to give up her erstwhile sutton with only a little regret, but most important of all to Mallotin, was not willing to stay on in his service.

"You see, I get rather lonesome here, Mr. Mallotin; I'm tired of this dreary life, and even if I don't marry Arthur Horage there are other men I expect to get married."

Mr. Mallotin then became a little sentimental himself. He laid his hand tenderly on Mrs. Bell's shoulder. "Look here, Mrs. Bell, did it ever occur to you what a lonely life I lead here? Did you ever think how much more life might mean to me if I had a fine wife—like—well like yourself, to look after me?"

Mrs. Bell turned to him and smiled. "Well, I'll stay on then—after January 1st—but we'll begin the New Year as Mr. and Mrs. Mallotin, shall we not?"

"We shall," was Mallotin's ready and emphatic response.

(©, 1925, Western Newspaper Union.)

Happy New Year!

The New Year Comes

By Frances M'Kinnon Morton, in Christian Advocate

OVER the sunlit hills of time
The New Year comes on joyful feet;
Out of the night the sweet bells chime
Music of hope and promise sweet.

Into the dead past with our dead
Lay we the old, old year away;
Hopes we have had and tears we've shed,
Each well beloved yesterday.

All, all are in thy ageless hands;
What once was ours now is thine.
Where wrong upon the record stands
O blot it with they love divine!

Remember not the petty sins
That marred our troubled yesterdays;
Be with us as this year begins
And lead us on by fairer ways.

Still hold the dream before our eyes
Envisioned ever clear and sweet,
A star to bid our spirits rise,
A lantern to our stumbling feet!

Stop Complaining, Their Resolution

Family Agrees Mother's Suggestion Is Best One to Be Followed.

By FLORENCE HARRIS WELLS

"WELL, folks, I've made a New Year's resolution," Ben, home from college for the holidays, announced as he took his place at the breakfast table the morning of the very cheerful New Year.

Mother smiled gayly at her handsome and beloved only child. Grandmother looked adoringly across the table at her idolized grandson.

"Three guesses?" Father laughed. "You're going to get out of bed in the morning."

"Wrong," Ben grinned. "I haven't been doing it this vacation, I'll admit, but I've been up at seven every morning this semester. Guess again."

"You're going to bed before midnight," grandmother looked up hopefully.

"Nothing doing, grandmother. Your turn, mater."

"You're going to cease having a new girl every new moon and get down to business in school." Mother looked quizzically at her boy who had always seemed like a dear younger brother as well as a son.

"You've come the nearest, mother. Nix, on the girl part, but I'm going to finish my senior year with a bang instead of just getting through as in other years; though that isn't exactly as I worded my resolve. Now what are the rest of my fond family resolving, before we delve any deeper into mine? What about you, dad?" Ben beamed at each one, not waiting for any family verdict in regard to his new leaf.

Ben, senior, laughed boyishly.

"I'd resolved not to resolve anything, but as you insist, I'm going to turn over a new leaf and follow my wife's advice for a whole year and see what happens to me. Can't do much worse than I have done," he added, laconically.

"Some stunt, dad; mother's pretty shrewd, I think. What are you resolving, grandma?"

"It's pretty late for an old lady of eighty-six to be resolving anything. Guess I'll just try to be as good as I can."

"You're not so slow, grandma. You can't break it, because no matter what you do you've always got an alibi—being just as good as you can be."

"Now it's up to you, mother. Bet you never thought of resolving, did you?"

"Bet I did," mother retorted. "But I hadn't expected to broadcast it."

"You've got to though. It's only fair."

"All right. I'm going to stop complaining."

"Complaining, mother? I've never heard you complain. Have you, dad?"

"Not that I'd recognize," Ben, senior, agreed.

"Yes, I do. We've had a hard year. Finances have been most stringent. Mother broke her hip and we had a nurse for months. Father's partner wasn't square. Some folks didn't do their part, etc. I've enumerated those things; thought about them and talked about them."

"But, mother, you never whined. You always said things jokingly."

"That may be so, but in my heart I was rebelling and complaining; then, last week, your father came within a half hour of being asphyxiated—I thought a good many things in those hours he was fighting his way back. Two days later, son, you were in an automobile accident—the same kind of an accident in which many lose their lives. I've done a lot more thinking the last few days. I might have faced this New Year, a widow and childless; instead I am blessed with my loved husband and equally loved son, and mother is still with us. Hereafter," she resumed her usual bantering gayety, "I complain no more of everyday trials."

"There, dad, didn't I tell you, your resolution was a good one. Guess I'll word mine that way. I meant to say I'd work hard to please my beloved parents. I'll add, 'follow mother's advice,' as an amendment."

"All right, son, we'll follow mother's advice this year. The whole family will quit complaining. How's that, mother?"

And mother laughed. "Have some more coffee?"

First-Footing Ancient Scottish New Year Habit

First-footing is an ancient custom which still exists in Scotland. Late in the evening of Hogomany, December 31, in each year, thousands of the common people assemble in the vicinity of the Edinburgh Tron church to ascertain on good evidence when the new year commences. When the clock is about to strike 12 they cheer so loudly that the strokes are not heard. Instantly that it has finished, they depart for the purpose of first-footing—that is, each one tries to be the first person that year to cross the threshold of his friend's house and wish him the compliments of the season. It is considered bad luck to go into a house empty-handed, and good luck is supposed to attend the resident whose "first foot" is dark-complexioned and whose name begins with straight instead of curved and curly letters.

NEWS OF THE TOWN

Mahlon Baker of Auburn, called on old friends here Wednesday afternoon.

Writing tablets and envelopes at News office, also box stationery from 10c up.

All the late magazines at News office. Place your order—we will save one for you.

Auto Licenses are being issued at News Office. Get your application in now and get a small number this year. Be sure and know the weight of your car as this determines your fee.

The death of Mrs. Edna Walters occurred Monday afternoon at the family home three miles north of Newville. Mrs. Walters has been sick since last Thursday. Sunday her condition became critical, peritonitis causing her death. The funeral service will be held Thursday morning at 10:30 'clock from the United Brethren church at Newville and burial will take place in the Newville cemetery.

Patterson-Fletcher's Great Half-Price Sale

BEGAN TUESDAY MORNING

The great merchandising event of Fort Wayne's progressive clothing store, the Patterson-Fletcher Company, began last Tuesday morning. For more than thirty years, this Half-Price Sale has been an outstanding selling event and this sale is to be no exception to the rule—only that more merchandise will be offered than was ever placed in any of their previous sales. Their ad found elsewhere in this paper will give you a little idea of what is being offered in their wonderful sale.

THE WHY of SUPERSTITIONS

By H. IRVING KING

THE MOON AND INSANITY

HOW universal was formerly the belief there was a direct connection between the moon and insanity is shown by the fact that our words, lunacy and lunatic, are derived directly from Luna, the Latin name of the Roman moon goddess corresponding with the Greek Selene. Luna was the moon and she was only one of the various personifications of the moon which existed in all mythologies and of which Isis of the Egyptians appears to have been the original. It used to be a common belief, among sailors especially, that if a person slept in the moonlight he was liable to go mad. That superstition is still in existence as is also the more common one that lunatics are more violent when the moon is at the full. Even Thackeray, in his story of "Catherine," appears to credit this mistaken belief; and it is not so very long ago that responsible physicians began to doubt the theory.

It is very common superstition today that to sleep in the moonlight is dangerous—that "something will happen" to one who does so, a belief surviving from the insanity superstition.

This idea of the connection between the moon and insanity is derived from the belief of the ancients that inspiration and madness were closely connected. The prophetess of the Delphian shrine worked herself into a frenzy before she uttered her oracles and the priests of the moon goddess bathed themselves in her refulgent beams to obtain inspiration and declaimed from her altars after the manner of madmen.

Modern medical science declares that there is not the slightest connection between the moon and insanity and modern research shows that the whole idea is a superstition surviving from the days when the priests of Isis by the banks of the Nile waved their wild arms toward their shining goddess and with "eyes in fine frenzy rolling" declaimed her oracles to an awe-struck people.

Wit Saved Situation

The wastrel son had come to the end of his resources, and sent a piteous appeal to his father for funds, saying that if they were not forthcoming he would starve to death. He received this crushing reply in the form of a telegram: "As you have made your bed, so must you lie on it." The quick-witted scapegrace was equal to the occasion, and wired back: "Haven't a bed. The sheriff took it yesterday." A substantial check was the reward for his wit.

SPENCERVILLE

Miss Marcella Zimmerman spent Sunday with Miss Esther Lake.

The C C. Club will meet with Mrs. Cora Steward, Friday afternoon.

Pictorial and McCall patterns ordered at News Office Phone your orders to us.

Mrs. Moses Oberholtzer and children were Sunday afternoon guests in the B. F. Markle home.

August Baltzli and family and Floyd Kauffel all of Fort Wayne, were Sunday guests in the John Bachmann home.

Mr. and Mrs. Rolla Moffett of Auburn and Paul Adams and wife of Fort Wayne, spent Sunday with Mr. and Mrs. Jacob Baltz.

Joseph Koch and wife and Carl Fletcher and wife, of Fort Wayne, visited Sunday at the home of the ladies parents, Raymond Rhodes and wife.

A number of ladies attended the Round-up and Style Show of the DeKalb County Home Bureau Clubs, Saturday, which was held at Auburn.

Theo. Garstka, of LaOtto, was a Sunday dinner guest in the R U. Bowser home. William Reed and wife and Miss Vera Reed were Friday guests in the same home.

The Loyal Women's class of the Lutteran Sunday School will entertain their husbands and families at their annual meeting in the church basement on the evening of Tuesday, January 26th Potluck supper will be served at six o'clock

Mrs. Goldie Vallieu, wife of Wm. Vallieu Jr., died Monday afternoon at her home, at the age of 18 years. She leaves besides the husband, a daughter 18 days old, her mother, Mrs. Hughs of south of Concord and a brother, Orla Hughs. The funeral arrangements have been made for Thursday afternoon at 2 o'clock, from the M. E Church.

Mrs. Arcline Rhoades was surprised by a number of her friends and relatives from Auburn, St. Joe and Spencerville, Wednesday, January 13th, the occasion being her birthday anniversary. At the noon hour all were invited to the dining room where a bountenus cafeteria dinner was served. The afternoon was spent in a social way, all departing wishing her many more such occasions.

Coburn's Corners

A. W. Trostel and family entertained Forest Dermott and family at dinner Sunday.

Merwin Place has moved on the Alva Coburn farm and Virgil Freeburn and family are now living on the Charles Freeburn farm vacated by Place.

The Coburn Corners Aid have elected the following officers to serve the coming year: President, Nellie Perry; vice president, Pluma Hamilton; secretary and assistant, Gladys Hart and Dale Hart; treasurer, Minnie Gee; press correspondent, Marie Trostel.

Mrs C. M. Coburn fell, while going down cellar Monday and jammed her right leg so that she is unable to do her work. She has been troubled with rheumatism and at times during her work her right knee would give away, but she had never been where she had fallen as Monday. It is thought no bones were broken.

SPORTING GOSSIP

The Spencerville high-school basketball team went out over the week-end a .750 team and returned a 700 team—all of which means that Spencerville drubbed Leo by the tune of 33 to 26 and met defeat in a game in which ten men and the referee were all just coming out from under the influence of ether. In plain words, the Auburn seconds beat Spencerville in the most listless and uninteresting game played this year, 30 to 16. Incidentally this team scored more points on the Spencerville team than any other team has.

The game at Auburn Saturday night was so slow that most all the players and particularly the sleepy headed referee went to sleep between passes The refereeing was extremely loose and poorly done. No one seemed to care whether the game was played or not. Beams was handicapped by a sore foot, Vallieu was able to use only one hand. Too many nights in a row, helped write the defeat—Wednesday night they attended a basketball game, Thursday night a play, Friday night they played the fastest game played on the Spencerville floor for many a day, after which a rub down came. Oh, well, the game was lost, no feelings were hurt and the boys had the experience of playing on the Auburn floor, as they will have another chance before the district meet there in March. And that is really what they wanted.

As has been said the game last Friday night with Leo was a hot and last one. The referee was slow, but both teams played so fast that the referee had to wake up and get a move on him to keep from being ground into the floor. The referee permitted too much rough work—he has refereed his last game on this floor. But we had SOME game.

Spencerville started the scoring with two baskets before Leo got started. The home team kept scoring until it had ten points, and then somehow Leo wakened up and scored a total of thirteen, so the first half ended with Leo in the lead by a narrow margin of three points. Spencerville had been playing a defensive game, but the defense had not been entirely effective. When the second half opened the defense was shifted somewhat, and the offense was opened However Leo chalked up a five point lead several times, then had its lead overtaken, the score tied and so on until the end when Spencerville came out winner by a margin of seven points. This victory for Spencerville is all the more worthy and to be honored as all dope points Leo to be the Allen county Champions—no without doubt DeKalb county can whip Allen county in basket ball.

The Spencerville grade team handed the Ashley grade team assisted by a couple of freshmen a 14 to 5 lacing The game was slow on account of the slow referee.

Spencerville now has a two weeks rest. No game next week, but plenty of practice for the county tourney at Ashley. Spencerville meets Garrett in the first game at 7:30 on January 29th. This promises to be a good lively game. What the outcome will be depends upon how carefully the Spencerville team obeys training rules and how diligently they practice. Everyone hopes that they can give the dope bucket a good hard kick that will give Garrett the small end of the score. If the Spencerville boys can do that, they can wade through the semi finals into the finals and either have to whip Auburn or be whipped by them, for our dopster stirs the dope as follows: Waterloo will beat Corunna in the second game, Auburn will beat Ashley in the third game, then Spencerville after having downed Garrett will hand Butler a lacing (Harlan beat Butler on its own floor and look what Spencerville did to Harlan) no doubt Auburn will defeat Waterloo and that then leaves Spencerville to meet Auburn. Well this time two weeks from now we will know how truly our dopster stirs the dope.

RHEUMATISM
While in France I obtained from a noted French physician a prescription for the treatment of Rheumatism and Neuritis. I have given it to thousands with wonderful results. The prescription costs me nothing I ask nothing for it. I will mail it if you send me your address. A postal will bring it.
Write today.

Cnevrolet Car Stolen at Wayne Sunday

Delbert Furnish had his Chevrolet touring car stolen at Ft. Wayne Sunday night. There were seven others reported stolen to the police headquarters the same night.

No
Demonstration can reveal *all* of BUICK Excellence

Any time you drive a Buick you will wonder how such a remarkable car can be sold at such a moderate price.

In just a few minutes you will realize that you are starting, stopping, parking, driving with much greater ease and security. And that you are surrounded by quality and luxury which rank with the very finest.

But demonstration will tell only part of the Buick story, and you should know all of it.

A demonstration cannot show you the enduring stamina of body and chassis that belongs to Buick. Years are necessary for that. It can only suggest the powerful ability of Buick's 75 horse-power Valve-in-Head engine, built for hills. It cannot tell you how thoroughly the Buick "Sealed Chassis" and the Buick "Triple Sealed" engine will protect Buick performance on dusty, gritty roads.

And it cannot even hint of the mental ease you will enjoy, with Buick Authorized Service "just around the corner," everywhere in America.

Better Buick Six Cylinder Valve-in-Head motor cars range in price from $1125 to $1995, f.o.b. Buick factories. Among the Buick open and closed models there is one that will meet your desires exactly.

In Society

Miss Portia Hadsell entertained the members of the Bunco Club at her country home Friday night. The ladies were conveyed to her home via bobsled, driven by Roy Koch. The hostess served a dainty luncheon. On the way home the ladies seranaded Mr. Koch and others with "Jingle Bells" and "Good Night Ladies." The next meeting of the club will be held at the home of Mrs. Blanche Leighty.

St. Joe Locals

Receipt books on sale at News office.

Ralph Sechler and family spent Tuesday afternoon with S. S. Widney at Harlan.

For Sale or Rent: Business rooms with residence in connection. Call on Chas. Fry. 47tf.

Harry Dragg o of Auburn, was taken to the penal farm Monday by Sheriff Wm. G. Morr to serve a six months' term for driving an automobile while intoxicated.

Mr. and Mrs. Dan McCann are two happy folks, because of the fine donation of wood that Harry Kees made them, also because A D. Goodwin, Sam Malone and Clifton McCann gave their services in hauling and buzzing. They say thank you.

FOR RENT: 155 or 240 acre grain and stock farm, 50-50 proposition. A money maker. Located north of Auburn. Inquire Box 23, St. Joe, Indiana.

James Draggoo, a veteran of the Civil War and a member of the G. A. R., who has been very sick with influenza, was somewhat better Tuesday. Reports from his bedside at noon indicated that the aged man was resting easier than for some time.—Star.

The Senior entertainment given last Friday and Saturday nights, was well attended and the class netted a neat little sum. Besides the orchestra, one act play and minstrel, the youngsters sold candy, popoorn and hot wiener sandwiches. Everyone had a good time.

Ross Bishop and family of Hopewell, were Saturday guests of D C. McCann and wife. On Sunday George McCann and wife of Auburn were there, coming after Pauline and Donald, who spent a few days here with their grandparents. Nellie and Raymond Dall were also guests a few days.

The late Alex Provines left an estate of $4,000 in personal property and $15,000 in real estate. Roy Provines is administrator and the heirs are seven children, Harris G Provines of Oklahoma City, Okla., Effie Morr, Lola Carper, Roy Provines and Dorcas Shearer of Auburn, Mae Moore of Los Angeles, Calif., and Edna Gifford of Chicago.

Indiana Farm Bureau officers were warm in their commendation of the attitude of David. Hogg on prospective Farm Legislation. Although not a member of the committee, he has advocated an early hearing. He has never missed a roll call at opening or absented himself from the floor until adjournment at 5:30. The remainder of his time is taken up with looking after individual requests and study of legislation. Mr. Hogg will be in Wayne February 11.

Noah Hamman of Waterloo, a high school boy of that town Thursday won the $100 scholarship first prise in the Baltimore and Ohio Potato club competition at the Indiana Agricultural conference held last week at Purdue university. Ed Matson of Waterloo placed third and was awarded a cash premium of $15. Walter King of Waterloo, placed sixth, winning $8, Milton Clark of Auburn placed seventh, winning $6 and George Dilley of Waterloo was given second place in the Baltimore and Ohio advance Potato club, winning $12.

When The Paper Doesn't Come

MY father says the paper he reads ain't put up right;
He finds a lot of fault, too, he does, peruisin' it all night;
He says there ain't a single thing in it worth to read,
And that it doesn't print the kind of stuff the people need;
He tosses it aside and says it's strictly on the bum,
But you ought to hear him holler when the paper doesn't come.

He reads about the weddin's and he snorts like all get out;
He reads the social doin's with a most derisive shout,
He says they make the papers for the women folks alone;
He'll read about the parties and he'll fume and fret and groan.
He says of information, it doesn't have a crumb,
But you ought to hear him holler when the paper doesn't come.

He is the first one to grab it and he reads it plumb clean through.
He doesn't miss an item, or a want ad —that is true;
He says they don't know what we want, the darn newspaper guys;
"I'm going to take a day some time and go and put 'em wise;
"Sometimes it seems as though they must be deaf and blind and dumb."
But you ought to hear him holler when the paper doesn't come.

Notice Of Final Settlement

Cause No. 2884.

NOTICE IS HEREBY GIVEN to all persons interested in the estate of ROLAND BEARSS deceased, to appear in DeKalb Circuit Court, held at Auburn, Indiana, on the 21st day of Dec. 1925, and show cause, if any, why my Final Settlement Accounts with the estate of said decedent should not be approved; and said heirs, and all others interested, are notified to then and there make proof of heirship or claim and receive their distributive shares.

Witness, my name, this 21st day of December, 1925.

WILLIAM CURIE,
Administrator

H. C. Springer, Atty. 2 t 3 p

The new spring McCall Quarterly is here and it is chuck full of splendid styles. Pictorial Quarterly also on sale and display at News office.

The Ashley News, which has been published by W. E Bower of Auburn for the past six months, passed out of existence with the closing of the year 1925, because of lack of patronage by the local people. This is just another chapter that many small towns are writing, and they never miss the water 'till the well runs dry. The Waterloo Press has taken over the subscription list.

SALESMAN WANTED IMMEDIATELY
Reliable, steady, intelligent, and well recommended man, from 25 to 60 years of age, to sell farmers in this State. Knowledge of farming and farm conditions desirable. Must be willing to work six days a week. Selling experience not necessary, personal training under local manager. Big pay every week. Good territory. All year work. Permanent position. Advancement. State if now employed, when you can start and if you have a car. Address Home Office Sales Manager, Dept. CDW. Box 1632, Philadelphia, Pa. 1t3.

THAWING WATER PIPES

The middle of a frozen pipe should never be thawed first; because expansion of the water confined by ice on both sides may burst the pipe. When thawing a water pipe, work toward the supply, opening a faucet to show when the flow starts. When thawing a waste or sewer pipe, work upward from the lower end to permit the water to drain away.

Applying boiling water or hot cloths to a frozen pipe is simple and effective. Where there is no danger of fire, a torch or burning newspaper run back and forth along the frozen pipe gives quick results. Underground or otherwise inaccessible pipes may be thawed by opening the frozen pipe on the house end, inserting a small pipe or tube, and with the aid of a funnel at the other end of this small pipe, pouring boiling water into it, pushing it forward as the ice melts. More thaw pipe should be added at the outer end until a passage is made through the ice, when the thaw pipe should be quickly withdrawn.

Newest Hats Are of Medium Size

The tradition held to by ladies of an earlier day that the bonnet and the boot gave tone and style to the costume is equally applicable to these times. A modification of the severe cloche, writes a fashion correspondent in the New York Times, has been gradually becoming apparent and many of the new hats are fashioned to show something of the hair. They are turned back from the face, or rolled at one side, though all of the shapes are still worn low on the head. Some of the handsomest hats, in both the stiff and the draped models, show the influence of old styles such as the picture hats taken from old masters' portraits of great ladies. The genuine Gainsborough, though, has not yet made its appearance, and from present indications its return is a long way off. But the new hats follow more generous, graceful lines. The most marked compromise of the present season is the hat of medium size with more trimming than any have lately shown. The hat with larger crown and fuller arrangement of drapery is welcomed by many women on whom the tiny tight shapes are trying.

Some of the dressy new hats are distinctly reminiscent of the Charlotte Corday, the Directoire, the early English poke bonnet and other historic shapes. But they are cleverly adapted to the mode of the hour and show a tendency toward individuality for which the best designers strive.

The cloche has not disappeared altogether, though its form is modified. It still represents simplicity itself, but with variants that make for grace and beauty. The small tailored or semi-tailored hat remains the correct hat for day-time dress, for street wear, sports and even for afternoon dress, in a somewhat softer treatment. All of the prominent milliners present the small hat. Monsieur Guy, Reboux, Agnes have done some charming things this season, notwithstanding the limitations to a style of such extreme simplicity.

Changes in Shapes.

Most of the models are felt, beaver or some sort of cloth. The material is not inexpensive, since it must be of a quality to stand the cut edge. The changes in shape are marked. The inverted kettle, which the original cloche resembled, is seen no more. Instead, there is a model with a crown like that of a man's silk hat and a little brim gently rolled at one side. Another model that is especially popular among younger women has an oval, ribbed crown looking much like a football and a narrow flange that turns back from the face. A crease across the crown, a slight fold in the material or a slash in the brim with two ends finished at the back, are among the slight touches that vary the latest models of the best Paris houses.

The season has brought out some conspicuous styles. Some of the smart milliners have gone in for exceedingly eccentric things. Reboux, Maria Guy, Camille Rogers, Charlotte Hennard and Monsieur Guy and Lewis have made some strikingly original hats with success, conforming, to some degree, with the conventional, but establishing some things of unusual type and artistic value. A black felt helmet completely covering the head and ears, with a metallic ornament in front, has a decidedly Cleopatra look. A brimless cloche is made of cloth with the crown completely covered with long stitches of embroidery silk, a stiff feather with two brush ends covering the back at a sharp angle. Another must have had its inception in a royal Russian headdress. The high up-turned brim in front is embroidered in mother of pearl and beads of steel and scarlet.

Designers are inclined to vary the small hat as much as possible. The widened brim, the draped crown, the entire hat covered softly with a fabric and the turban in several variants are examples of the latitude in the fashions of the moment. Felt continues to be used in utility hats particularly, but the novelty of the season which promises to carry on is velours. This is a flattering material equally adaptable for sports hats or for more elaborate dress. Two materials in different colors are seen in some of the handsomest hats. This treatment gives a more "dressy" appearance to a hat of simple contour, with little or no trimming. Some rather extraordinary liberties are taken by the combination of gilt lace with cloth or velours in a semi-tailored shape bearing the label of a recognized authority in millinery designing.

Ensemble Idea in Millinery.

The ensemble idea in millinery is most attractive. A strictly tailored hat, Empire in feeling, of Oxford gray beaver is matched by a collar of the same material. The hat comes well over the eyes and is set at the angle at which men's hats are worn. The collar, straight, detached and high enough to cover the ears, is shaped like a cravat, and drawn through a loop at one side. This comes from Franklin Guy. Another, the creation

Turban That Is a Perfect Complement to Smart Afternoon Costume, Expressed in Hatters' Plush.

of which is not revealed, is done in Scotch plaid. The hat is one of those melon or football shapes with a flange of cloth matching the red of the plaid turning back flat against the high-ribbed crown. A straight scarf, like a muffler, is made of the plaid wool. Pretty turbans of metallic brocade or plain silk in lovely colors are sold with scarfs of the same fabric. In some of these decorative ensembles fur is added to the scarf ends. From an important Parisian house has been received a toque of gold lame and Russian sable with a scarf of the sable in diagonal stripes, faced with lame.

Colonial buckles always were and always will be stylish. But each season witnesses some slight change in their size or shape. During the season squares, oblongs and ovals will vie with one another for first place. After all, the selection of one of them should depend solely on the type of foot of the wearer. It is only natural that these three types of buckles should give a different aspect to the shoe. The square buckles are solid, whereas the ovals and oblongs are more often seen with open centers with or without center bars.

Quite popular in Paris just now as a jewelry "novelty" are those little enamel perfume balls (made like tiny censers) on a fine gold or platinum chain that were first seen in America about 1916. The call for them has had plenty of time to die out meanwhile and will probably reawaken with intensity. Paris has also suddenly taken to wearing pearl necklaces, both real and imitation, hanging down the back.

Modified Evening Gowns.

A compromise has been reached in regard to the modern fondness for undress evening clothes. The new "backless" evening gowns are not really backless at all. They have flesh colored chiffon shoulders, or backs to the waist, where the colored material of the gown begins. They are much more nude in effect than the real decollete. The one great advantage, however, is that whereas few backs are really beautiful enough to wear a waist-cut gown, even the skinniest back looks well under a veil of pale pink chiffon.

The fashionable long sleeve solves many difficulties. The smartest little frocks are being exhibited by all the fine lingerie shops, in the thickest and warmest of crepe de chine, with regular Sarah Bernhardt sleeves, coming down to the hand, in white, cream, pale pink, blue and mauve. They are the most enchanting things, elaborately with drawnwork, tucks and hemstitching. There is very little embroidery and flares are giving place to plaits. On the Riviera these frocks will be worn often with fur coats. Shoes and stockings will be light.

The latest stockings to startle the French capital have an insert up the front shaped like the old lace ones in which our mothers used to rejoice, of heavy embroidery, in colors and gold. It is a fashion that requires fine ankles, and as that is a thing very few French women have, it is unlikely to spread to any great extent.

He who would bring home the wealth of the Indies must carry the wealth of the Indies with him, says the Spanish proverb. So it is in traveling; a man must carry knowledge with him if he would bring home knowledge.

CULINARY HINTS

A well-made, nicely flavored and long-baked pumpkin pie is a work of real art in cooking. It should be snappy with ginger, sweet, but not too sweet, and rich with good milk and well-cooked pumpkin. Two eggs will be sufficient for an ordinary-sized pie, and a few drops of lemon extract or a little grated peel will make the pie different from the ordinary. When serving for a special occasion add whipped cream in which a little grated cheese has been stirred.

A pretty winter salad is prepared by using canned pears. Lay halves of pears, flat side down, on a crisp leaf of lettuce. Decorate with blanched almonds, putting them into the pear pointed down. Serve with any desired dressing. Frozen whipped cream, sweetened and flavored, then packed in ice and salt, and when firm served with bits of preserved ginger with the sirup or candied cherries makes a pleasing dish.

Apples cored and the centers filled with bananas cut into strips to fit the cavity, add butter and sugar and a little water, then baste while baking.

A quick dessert enjoyed by those who are fond of chocolate is Dresden crumbs: Take one cupful of bread crumbs, one-half cupful of grated chocolate, two tablespoonfuls of sugar and a pinch of salt. Stir and mix well and bake until the chocolate is melted. Serve with sweetened whipped cream.

When a child or an older person who is ill refuses to drink milk or cocoa which is provided for them, give him a straw or two through which to drink.

Milk toast is a wholesome dish for child or adult and should be one of the common dishes served at least once a week. It is especially good for a hot supper dish.

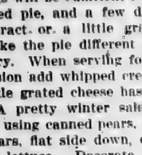
Calves' hearts are tender and delicious cooked gently in a little butter after cutting into thin slices. Brown well and serve with the gravy, which may be thickened or not.

When preparing a meat loaf add one-half to one cupful of cooked oatmeal to the meat and arrange two or three hard-cooked eggs in the loaf so that when sliced they will add to its appearance.

When the housewife and mother makes the statement that her family will not eat this or that, which are valuable foods and needed in the diet, it is only admitting her lack of properly training her family to eat the things they should. It is not easy, but it has been done in thousand of homes where intelligence about foods is used.

Try These.

Oysters are so well liked and served in such a variety of ways that one never tires of them.



Oyster Roast.—Put a pint of oysters in an omelet pan, after heating it hot and adding a little butter; season with salt and pepper and cover to cook two minutes. Serve on buttered toast moistened with the hot oyster liquor.

Apple Meringue Pie.—Take one and one-half cupfuls of left-over apple sauce which has been sweetened, add two egg yolks, cinnamon and a bit of nutmeg and a tablespoonful of melted butter, with a cupful of cider. Place in a pastry-lined pie plate and bake until the crust is brown. Cover with a meringue prepared from the two egg whites and two tablespoonfuls of sugar. Brown lightly.

Cuban Eggs on Toast.—Cook together for five minutes one-fourth of a cupful of sausage meat and one teaspoonful of onion, grated. Add to the pan six beaten eggs, one-fourth of a teaspoonful of salt and a dash of pepper, stir until the eggs are creamy. Pour over slices of well-buttered toast and garnish with fresh tomato, sliced and sprinkled with chopped green pepper.

Cuban Codfish.—Pick into pieces enough codfish to fill a cup, after it has been freshened. Fry an onion sliced thin in a little butter, add the fish, mix well, then cover with boiling water; add one-half a can of tomatoes, a tablespoonful of chopped green pepper and simmer gently for half an hour. If the tomatoes are very juicy less water will be needed. Serve the mixture well seasoned and hot on hot buttered toast.

Barbecued Mutton.—Make a sauce by melting two tablespoonfuls of butter, to this add the juice of half a lemon, one-fourth cupful of currant jelly, one-fourth teaspoonful of prepared mustard, one-half teaspoonful of salt, a few dashes of cayenne and one teaspoonful of grated orange peel. Reheat the thin slices of cooked mutton in the sauce. Serve hot, but do not cook.

HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

Stories of Longevity Can Be Accounted For

At a meeting of the Winnipeg Health Psychology and "Live a Hundred Years" society the audience heard Dr. Julian P. Thomas, formerly of New York, tell "How to Live a Hundred Years."

Doctor Thomas stated that animals generally live from five to seven times the length of time it takes their bodies to mature to the point of being capable of bearing offspring, but man only lives from two to three times the length of time it takes him to mature, reports the Winnipeg Free Press.

"What is the main difference between man and the lower animals?" asked Doctor Thomas. His answer was that animals eat more largely of natural food. It was also in the milling of food and the coagulating of vitamines by high degrees of heat.

"It is possible to live a hundred years, retaining all the faculties necessary to the enjoyment of life, provided one lives somewhat after the manner of the patriarchs mentioned in the Bible, who lived to such a great age. The patriarchs of old consumed large quantities of more natural food than we do nowadays. And we are paying the price for our more refined diet by shorter life."

Doctor Thomas gave the society some original calculations about the age of the patriarchs. "The Bible says that Adam lived altogether 930 years, and that he begat his first child at the age of one hundred and thirty years. If we assume that 130 years represents the time it took Adam to mature, and divide this into the total number of years lived, you will find that Adam lived 7.15 times the length of time it took his body to mature. Cainan 6.19, Enos 7, Methuselah 7.45 and so on right through the list.

"If we figure that 130 years mentioned in the Hebrew testament is equal to 21 years, the age it takes to mature, it will be found that Adam lived 147 years, which is quite possible."

Profit in Exchange of National Ideas

A writer in the Berlin popular monthly Uhu believes the Germans, like the British, are too much inclined to take their pleasures sadly, and holds up the Americans as an example of what he considers a laudable "keep smiling" philosophy of life.

Comparing tourists of the two nations, he says: "The contrast is most striking. The German travels for profit more than for pleasure. He studies, investigates, researches and enthuses, but he does not obviously enjoy himself. The American is a pleasure seeker, conventional and superficial, but making a joy of his travels as he does of his life."

He concludes that it would do both countries good if each could acquire something of the qualities of the other.—Living Age.

First Horses in America

The earliest horses which were the primitive ancestors of the American horse, were brought over by Cortes for the campaign in his conquest of Mexico, begun in 1519. The horse-breeding enterprises of the Twentieth century date back to the cavalry mounts used by Cortes.

Italics in Bible

Italics in printing the Bible are used in cases where it was necessary to insert additional words to make the translation from the original manuscript intelligible to the readers of the English text.

Expect Too Much

"Some men not only makes trouble," said Uncle Eben, "but expects to be paid for doin' it."—Washington Star.

Gets Results

"Ninety-five per cent of the heat of a fire goes up the flue," says the Albany (Ga.) Herald, "and something like the same percentage of some people's energy is of no greater value. The thing that drives a nail home is hitting it on the head from the same angle—and hitting it every time."

Watch Your Change

The largest denomination of Uncle Sam's greenbacks is the $10,000 note only a few of which are in circulation

Mothers, Do This—

When the Children Cough, Rub Musterole on Throats and Chests

No telling how soon the symptoms may develop into croup, or worse. And then's when you're glad you have a jar of Musterole at hand to give prompt relief. It does not blister.

As first aid, Musterole is excellent. Keep a jar ready for instant use.

It is the remedy for adults, too. Relieves sore throat, bronchitis, tonsillitis, croup, stiff neck, asthma, neuralgia, headache, congestion, pleurisy, rheumatism, lumbago, pains and aches of back or joints, sprains, sore muscles, chilblains, frosted feet and colds of the chest (it may prevent pneumonia).

To Mothers: **Musterole is also made in milder form for babies and small children. Ask for Children's Musterole.**

Wisdom's Height

True wisdom is to know what is best worth knowing and to do what is best worth doing.—Humphreys.

Who is so deaf as he that will not hear?—Herbert.

A Farmer Boy's Success

From hard work on a farm to the study of medicine was the course Dr. Pierce pursued. Finally he determined to put up in ready-to-use form his 'Golden Medical Discovery' so the public could easily procure it. This 'Discovery' is a tonic in its effects on the stomach and digestive apparatus; an alterative in its action on the blood, liver and skin. It increases the appetite, stimulates the digestion, enriches the blood, and makes both men and women feel as they did when they were young.

All dealers. Large bottles, liquid, $1.35; tablets, $1.35 and 65c.

Send 10c to Dr. Pierce, Buffalo, N. Y., for a trial package tablets.

Admitted

Hubby—Really, I think all pretty women are conceited.

Wife (sweetly)—I'm not, dear!

Hoosier News Briefly Told

Samuel Werts, age seventy-six, for more than thirty-six years principal of the Columbus high school, died of pneumonia.

Mrs. Don Edgar of Fort Wayne rescued her four small children from death when her home was destroyed by fire. The children are five, four and three years and two months old.

Oscar Palmour of Atlanta, Ga., was elected regent of the Sigma Nu fraternity at a final session of the twenty-second biennial convention of the organization which was held at West Baden.

Fire destroyed the tipple of the Indiana Creek coal mine at Bicknell, owned by the Knox Consolidated Coal company, and loss is estimated at $75,000, with 450 men thrown out of employment.

Dr. Samuel McGaughey, Irvington physician and active Republican worker, has been appointed physician at the Marion county jail at Indianapolis, it was announced by the board of county commissioners.

Harry C. Stutz, widely known in automobile circles, and Miss Blanch Clark, a musician, were married in Indianapolis and left immediately after the ceremony for a wedding trip. The bride is a harpist.

Harry B. Smith, former adjutant general of Indiana, indicted at Indianapolis for alleged filing of false claims on which he was said to have collected more than $437 from the state, was granted a continuance until January 18.

Word was received at Franklin of the death of Luther Short, age eighty-one, widely known resident of Franklin and former consul general to Turkey. He died at Daytona, Fla. He had been ill of heart disease for a month. Mr. Short was born in Springfield, Lawrence county.

The Department of Justice at Washington, it was reported, is considering the sending of a special government physician to the Atlanta (Ga.) federal prison to conduct a physical examination of Warren T. McCray, ex-governor of Indiana, who has suffered a breakdown in health.

A bag weighing 123 pounds and containing $205 in nickels and pennies was brought to the mayor's court at Greenburg by Walter and Birney McCoy in payment of a fine for liquor law violation. The court was told it took a long time to save that much. Mayor Jenkins accepted the payment.

Gov. Ed Jackson, who has been visiting Senator Arthur R. Robinson in Washington, left for New York. He will return to Indianapolis directly from New York. Senator Robinson went to Indianapolis to attend the funeral of Henry Elfers, his father-in-law. Mrs. Robinson already had returned to Indianapolis.

Rich and poor, high and low, old and young, in and around Evansville, lost alike in Consolidated Realty and Theaters corporation investments, it was disclosed at Evansville. Mrs. Magdeline Reis, age ninety-one, lost approximately $30,000, it is said, and tells a pitiful story of false friendships which played a part in her loss.

Under a new rule by the Indiana securities commission at Indianapolis all dealers in securities in Indiana must register at the state office of the body. This will include brokers and banks who deal in securities only on specific orders of their customers.

The jury in the case of John Dorsey, age forty, charged with the murder of his wife, Fernie Fay Dorsey, at Indianapolis, December 18, 1924, reported a verdict at Greenfield of involuntary manslaughter, and found that Dorsey was sane at the time he committed the crime. The verdict carries a sentence of two to twenty-one years.

A calendar of primary and election events in 1926, as compiled by the state board of election commissioners at Indianapolis, shows the state primary election will be held on May 4 and the general election on November 2. Candidates for nomination for United States senator have until March 5 to file their petitions with the secretary of state.

Indiana sold 76 acres of meander land in Lake county for three times its appraised value, it was learned when the bids of the successful bidders were opened at the office of the auditor of state at Indianapolis. The appraised value of the land, divided in eight tracts, was $4,065.80 and the total of highest bids was $12,005, according to Edward Spray, state land clerk.

Lying in a Lebanon hospital with his left foot and left hand crushed off and a bruise in his right side where he had been clubbed, Edward Proffitt, forty-four years old, a well-known farmer living east of Lebanon, told of a brutal attack made upon him by an unknown assailant who struck him down, robbed him of $40 and then kicked him under a moving passenger train. He may die.

The L. E. Myers company, contractor for the construction of the Oakdale dam, has completed its work on the big power plant project in the Tippecanoe river near Delphi. The plant has been accepted by the Interstate Public Service company.

George K. Denton, former congressman from the First Indiana district, died in Evansville at the outset of a campaign for the Democratic United States senatorial nomination from Indiana. His death followed a brief illness from pneumonia. He had just announced his candidacy.

Lesson for January 17

JESUS AND NICODEMUS

LESSON TEXT—John 3:1-17.

GOLDEN TEXT—For God so loved the world that He gave His only begotten Son that whosoever believeth in Him should not perish, but have everlasting life.—John 3:16.

PRIMARY TOPIC—Nicodemus Visits Jesus.

JUNIOR TOPIC—A Ruler Visits Jesus by Night.

INTERMEDIATE AND SENIOR TOPIC—What Nicodemus Learned From Jesus.

YOUNG PEOPLE AND ADULT TOPIC—The New Birth.

I. The History of Nicodemus (vv. 1, 2; Cf. 7:45-52; 19:38-42)

The lesson of today has its peculiar significance in the light of Nicodemus' station in life. He was a learned rabbi, a doctor of the law, and presumably a man of good character. His coming by night indicates his timidity. Like Joseph of Arimathea he was afraid to openly espouse the cause of the new teacher of Galilee. Though timid, as an honest man he investigated and got first-hand information. Because of this information he uttered the brave words in the Sanhedrin against judging a man before hearing him (John 7:45-52), and he also rendered the loving service at the Lord's tomb (John 19:38-42).

II. Jesus' Discourse With Nicodemus (vv. 3-17).

The subject of this conversation was the new birth.

1. The Necessity of the New Birth (vv. 3-7).

It is not a matter of choice whether one is to be born again, but of necessity, if he is ever to see or enter the kingdom of God. Regeneration is the first demand the gospel of Christ makes upon man.

(1) The kingdom of God is a spiritual kingdom, therefore there must be a spiritual birth in order to enter it (v. 3). As we enter the physical kingdom by a natural birth, so we enter the kingdom of God by a supernatural birth.

(2) The nature which we get through the natural birth is radical and essentially bad (v. 6; cf. Gal. 6:19-21). That which is born of the flesh is flesh. The flesh cannot be improved (Jer. 12:23); cultivate and educate it all you please and it will still remain flesh. In order to enter into the kingdom of heaven there must be a nature fitted for heaven. There is nothing that can be substituted for the new birth. Men today are trying to substitute morality and education for the new birth. Nicodemus possessed these, yet Christ declared that he needed something more. It is no more possible to have a physical being without a physical birth than it is to have a spiritual nature without being born of the spirit.

2. The Mystery of the New Birth (vv. 8-13).

Though mysterious, its results are definite. We cannot discern from whence the wind cometh, or whither it goeth, but we know that it blows by its effects. The fruits of our life demonstrate our nature, whether it is heavenly or carnal. We need not be told that we have had a physical birth, for our bodies with their various faculties prove it. Even so, the presence within us of a nature which has no affinity for the things of the world, but a strong affection for God and a disposition to yield prompt obedience to His commands, proves that we have been born from above.

3. The Ground Upon Which the New Birth Rests (vv. 14, 15).

Christ's atoning death on the cross makes regeneration possible. He took the place of sinners. His infinite merit was placed to their account; He suffered in the sinner's stead.

4. For Whom Salvation Was Provided (vv. 16, 17).

"Whosoever believeth on Him." These verses give in a condensed form the whole plan of salvation. Observe: (1) Its source—"God so loved." (2) Its ground, the death of Christ—"He gave." (3) Its condition—"believeth on Him." Its results—"should not perish, have everlasting life."

III. Man's Attitude Toward Christ (vv. 18-21).

1. Some Believe and Are Saved.

Those who believe are now free from condemnation (John 5:24). They are not only saved now but forever (John 10:28, 29).

2. Some Will Not Believe and Are Therefore Resting Under the Condemnation of God.

The awful sin which causes men to be eternally lost is unbelief in Christ. The cause of their unbelief in Him is their love of sin. Refusal to come to Christ proves that men's deeds are evil and that they love darkness rather than light.

In God's Eternity

Look up, my wearied brother; see thy fellow-workmen there, in God's eternity; surviving there, they alone surviving; sacred band of the immortals, celestial bodyguard of the empire of mankind.—Carlyle.

The Honor

When one has come to seek the honor that comes from God only, he will take very quietly the withholding of the honor that comes from men.—George Macdonald.

Road Building

FEDERAL AID ROADS VIEWED AS DEFENSE

Facts concerning the relation of national defense and interstate commerce are brought out in a statement recently issued by the American Association of State Highway Officials.

"When the federal aid road system now under construction was planned," says the statement, "national defense was taken into consideration. The War department was consulted as to roads that would meet the greatest need in any line of defense, and road builders were governed accordingly in the selection of routes embraced in the federal aid system. In the congressional hearings that were held, General Pershing took part, and in the course of his testimony before the senate committee on post offices and post roads in 1921, he impressed upon the committee the value of the county road in times of war in the transport of needed food supplies."

Ever since co-operative work began on the federal aid system, all roads built with federal aid funds have been constructed, say the officials, "with military requirements in view, particularly in the matter of culverts and bridges. Since the needs of national defense have been taken into account added security is given to the nation, and under the provision of the federal aid act, which promotes this phase of national security, no state is called upon to pay more than its due share for this added security."

In the relation which highways hold to interstate commerce, road officials in their statement incidentally call attention to the point that federal co-operation in highway improvement is not new.

Visions of interstate highways as a nation developers were had as early as 1803 when the Cumberland pike was planned by congress, and all through the succeeding years the highways in their interstate character have been growing in importance. "The benefits derived from this growth," officials add, "are not confined to states, but come to the nation as a whole."

Of the federal aid system, 53.1 per cent is located in fifteen states. "This," say the officials, "is because the system was planned to include 7 per cent of the mileage in each state, this latter mileage being found sufficient to connect all county seats and marketing centers."

Best Public Roads Are in U. S., Writer Asserts

It is well to remember that making roads for motor traffic is a new American invention. Twenty years ago, says Will Payne in the Saturday Evening Post, we were properly reprobated for the scandalous state of many of our public roads. The splendid highways of western Europe, especially of France, were held up as an example for our emulation.

But in the matter of highways 20 years takes you back into ancient history, for motor cars have completely changed the stress to which roads are subjected. Now the United States has the best roads in the world, and France, the once boasted example, shows many miles of main highway that have been pounded by self-propelled vehicles into very indifferent condition.

I may mention that last June the king of England, with much pomp and ceremony, snipped a pretty ribbon and thus opened to traffic a new highway. Every London newspaper featured the affair largely. It was, indeed, a national event. So far as a layman may judge by merely looking at it, this new road is a first-class piece of construction, probably as good as any in the United States. But it is only eight miles long.

Plans Highway to Link Hudson Vehicular Tube

Proposals are being made to construct a highway to link the Hudson vehicular tube and the New Jersey state highway system.

The plan would require approximately $70,000,000. But the saving to trucks and passenger cars as estimated would be $18,000,000 annually.

The new highway would form the first 15-mile link of the transcontinental Lincoln way westward from Canal street, New York city.

If put into effect it would save motorists more than an hour in traveling from Hudson to Elizabeth, as compared with the present route through Newark.

If the new route is constructed there will be no cross streets. Connections with side streets would be made by ramps in a manner which would produce no cross currents of traffic.

New Sierra Roadway

The California highway commission has awarded the contracts to place under construction all of the remainder of the Lincoln highway in California east of the summit of the Sierras. These contracts include several concrete arch bridges over the Truckee river as well as the six-mile section immediately adjoining the Nevada state line. The commission has awarded a contract for surfacing a 12-mile section of the Lincoln highway at the north end of Lake Tahoe.

Is Winter Time Your Backache Time?

Does Your Back Foretell Every Change of the Weather? Do You Feel Old and Stiff and Suffer Sharp, Rheumatic Pains?

Then Look to Your Kidneys!

DOES every cold, chill or attack of grip leave you lame, stiff and achy? Are you nervous and depressed; feel tired, worn out and miserable? Does your back throb and ache until it seems you just can't keep going?

Then look to your kidneys! Colds and chills threw a heavy strain on the kidneys. They overload the blood with impurities that the kidneys have to filter off. The kidneys are apt to weaken under this rush of new work, become congested and inflamed.

It's little wonder, then, that every cold finds so many folks suffering with torturing backache, rheumatic pains, headaches, dizziness and annoying kidney irregularities.

If this is the case with you, don't risk neglect! Help your weakened kidneys with a stimulant diuretic. Begin using *Doan's Pills. Doan's* have helped thousands. Local users testify to their worth. *Ask your neighbor!*

"Use Doan's," Say These Good People:

C. E. LAWSON, N. Washington St., Utica, Ohio, says: "I think colds settling in my kidneys weakened them. My back was stiff and lame and a dull pain across my back kept me in a tired condition. I often had dizzy spells when specks before my eyes blurred my sight. My kidneys were weak and sluggish. Two boxes of Doan's Pills rid me of the lameness in my back and put my kidneys in normal condition."

MRS. ALBERT MILLER, 402 W. Zimmerman St., Forest, Ohio, says: "A cold settled in my kidneys. Washing was an effort because of the knife-like pains that cut me in my back. If I sat down I couldn't get up again because of the twinges across my kidneys. I felt tired and worn out and was very nervous, too. My kidneys acted too frequently. Doan's Pills cured me of all signs of kidney trouble."

Doan's Pills

Stimulant Diuretic to the Kidneys

At all dealers, 60c a box. Foster-Milburn Co., Mfg. Chemists, Buffalo, N. Y.

Evidences of Santa Claus

A group of youngsters of tender years were discussing the probability of Santa Claus.

"Well, I know there is a Santa because on Christmas morning I saw his footprints in the ashes in our fireplace," one held forth as sure proof.

"Huh, I know Santa Claus came to our house, 'cause I saw a toy he dropped in our fireplace just as he started to go up the chimney," said another.

"There is, too, a Santa Claus, 'cause last Christmas he ate a banana at our house and I saw the peeling on our library table when I got up," piped a future President.

Cuticura Comforts Baby's Skin

When red, rough and itching, by hot baths of Cuticura Soap and touches of Cuticura Ointment. Also make use now and then of that exquisitely scented dusting powder, Cuticura Talcum, one of the indispensable Cuticura Toilet Trio.—Advertisement.

Peak Gets Statesman's Name

Honoring the memory of Henry C. Wallace, secretary of agriculture from March, 1921, until his death in October, 1924, a mountain peak in the Absaroka National forest in Montana has been named Mount Wallace by action of the United States geographic board. The peak, about 10,600 feet high, is in Pike county and is considered one of the gems of the Absaroka range.

There is nothing more satisfactory after a day of hard work than a line full of snowy-white clothes. For such results use Red Cross Ball Blue.—Advertisement.

Grasshopper and Cattle

Because a half a dozen grasshoppers under a fern make the field ring with their importunate chink, whilst thousands of great cattle, reposing beneath the shadow of the British oak, chew the cud and are silent, pray do not imagine that those who make the noise are the only inhabitants of the field.—Burke.

Dr. Peery's "Dead Shot" is not a lozenge or syrup, but a real, old-fashioned medicine which cleans out Worms or Tapeworm with a single dose. 272 Pearl St., N. Y. Adv.

Point Overlooked

Myrtle—I can't imagine how the unfortunate affair leaked out. I never said a word about it in the presence of the servants.

Fred—Possibly not, dear, but did you ever say a word about it in the presence of a keyhole?

Hoxsie's Croup Remedy for croup, coughs and colds. No opium. No nausea. 50 cts. Druggists. Hoxsie Co., Newburgh, N. Y., Mfrs.—Adv.

Catty

"I wonder why Widow Cobb is going to marry again."

"Oh, I suppose she has a whole lot more to say."

Women who remain single can console themselves with the thought that they were born that way.

It is impossible to destroy courage by plucking it up.

There is none so homely but loves a looking glass.—South.

DR. W. B. CALDWELL AT THE AGE OF 83

Your Laxative! Does It Regulate for Weeks?

To Dr. W. B. Caldwell of Monticello, Ill., a practicing physician for 47 years, it seemed cruel that so many constipated men, women and children, and particularly old folks, had to be kept constantly "stirred up" and half sick by taking cathartic pills, tablets, salts, calomel and nasty oils.

While he knew that constipation was the cause of nearly all headaches, biliousness, indigestion and stomach misery, he did not believe that a sickening "purge" or "physic" every day or two was necessary.

In Dr. Caldwell's Syrup Pepsin he discovered a laxative which regulates the bowels. A single dose will establish natural, healthy bowel movement for weeks at a time even for those chronically constipated. Dr. Caldwell's Syrup Pepsin not only causes a gentle, easy bowel movement but, best of all, it is often months before another dose is necessary. Besides, it is absolutely harmless, and so pleasant that even a cross, feverish, bilious, sick child gladly takes it.

Buy a large 60-cent bottle at any store that sells medicine and just see for yourself.

***Dr. Caldwell's* SYRUP PEPSIN**

Many a man who smiles and says nothing is a liar.

As a moss gatherer, the rolling joke heads the list.

Tanlac puts solid flesh on scrawny bones

How can you expect to get back your health and strength as long as your body is scrawny and underweight? Let Tanlac put some good solid flesh on your bones, put your stomach in shape to digest your food, purify your poisoned blood! Then see how much better you feel.

In our files are one hundred thousand glowing letters of thanks from men and women who have been helped back to health and strength by Tanlac. What it has done for these folks it can surely do for you.

Tanlac is Nature's greatest tonic and builder. It is compounded after the famous Tanlac formula from roots, barks and curative herbs. It gets right down to the seat of trouble and makes you feel right from the first dose.

Don't put off taking Tanlac another day. Don't go on dragging your poor, tired-out, sickly body around when this great remedy can bring you quick relief.

In cases of torpid liver, rheumatism, stomach complaint, lowered resistance, indigestion and malnutrition Tanlac will work wonders. Get a bottle this very day and start feeling better tonight. You owe it to yourself to try what Tanlac can do. For constipation take Tanlac Vegetable Pills.

Gives Tanlac Full Credit

"Since taking Tanlac, my weight has gone up from 108 to 130 pounds.
"I am eating, sleeping and feeling fine, have a world of energy and enjoy the best health of my life. I shall always praise Tanlac."

Makes Pumping Up Tires Unnecessary

Chicago, Ill.—F. E. Hughes, Suite 130, 2512 Monroe, this city, has perfected a new air-tight valve cap that enables auto owners to pump up their tires once and never touch them again until punctured or worn out. Leading tire manufacturers, after thorough tests, have approved Mr. Hughes' invention and banished the old theory that air escapes thru rubber. One inflation lasts the life of a tire, and tire mileage is doubled. These caps retail for $1.25 for set of five. The inventor wants agents and will send proof and samples Free. Write him today.

Local Briefs

County Roads Cost $175 Per Mile For Maintenance

An interesting report is made by Byron Platt, county highway superintendent of the activities of his department during the year 1925.

The receipts during the year were $68,500, including $7,000 in gasoline tax. The tractor owned by the county earned $4,250 for work done for townships and contractors and this money was paid into the county gravel road repair fund. The amount on hand in the gravel road repair fund at the end of the year was $16,000

The county took over 70 miles of road during the year, making a total of 224½ miles in the county system. This mileage is divided by townships as follows: Fairfield, 16⅔; Smithfield, 18¾; Franklin, 19½; Troy, 5; Richland, 12½; Grant, 4½; Union, 14¼ Wilmington, 33½; Stafford, 1; Keyser, 18½; Butler, 17½; Jackson, 28⅔; Concord, 14½; Spencer, 14 and Newville, 5¾. The wide variation is accounted for by the difference in the activity in each township towards improving the roads. When the township has a road that meets the county's requirements and connects with the county system, the county is willing to add it to the county system The mileage built by contract during 1925 or contracted for to be built in 1926 and taken over by the county is 55. The indications are that a large additional mileage will be built by contract this year.

Mr. Platt found the average cost of maintaining the county roads was $175 a mile. The highest cost was $500, which was spent on the Auburn-Fort Wayne road.

Radio!

Since securing the A. C. Dayton Radio Agency in this community, we have installed six complete sets, the seventh and eighth will be put in by time of issue of this advertisement.

The A. C. Dayton embodies Quality, Beauty, and Simplicity. So simple to operate that a mere school child can learn in five minutes just how to handle. The set and horn equipment are guaranteed indefinitely and we will immediately replace either, should they ever prove defective, at no cost or trouble to you.

A Free Demonstration will eliminate all your doubts.

The A. C. Dayton Co. has been manufacturers of electrical equipment for 35 years, so, "When Better Radios are built, the A. C. Dayton Co. will build them.

Wm. CURIE,

Hardware RADIO Implements

Our Hired Man

When I told the boss that I smashed his truck in town the other day, and that it would cost $65.00 to fix it up, he said, "The auto giveth and the auto taketh away."

I hadn't milked any cows before I learned it didn't pay to weight a switching tail with a brick.

The other night, the boss and the missus had a spat over which was kept the cleanest, the kitchen or the milk house

"I scrub the kitchen three times a week," says the missus. "And I whitewash the milk house three times a year," says the boss walkin' out of the room

Now's the time you can tell where the drafts in the barn come from.

Discussing small top milk pails, the boss says, "The milk goes in just as easy—and it's sure harder for the dirt to get it"

Last week we heard a talk by the County Agent on Bacteria in Milk—"It's the little things that count," he said.

VOL. XL | ST. JOE DeKALB COUNTY, INDIANA, THURSDAY JAN. 28, 1926 | NO. 4

County Convention Speakers

Being Secured for Garrett Convention, February 11-12, 1926, The Best Yet is the Slogan-Banpuet and Special Features Planned.

Garrett will be hostess to perhaps the largest attended County Sunday School Convention, held in DeKalb County, on February 11-12, and the M. E. Church nas been chosen as the Convention Church Final arrangements were completed last Sunday with the Garrett people, and a warm welcome is extended for the entire representation of schools.

The program is being completed this week, but to date a number of excellent speakers have been engaged for the convention, as follows:

E T. Albertson, state secretary, well known in DeKalb county and H. G. Rowe, State Young People's Superintendent, another of DeKalb's favorite workers, will be present for the two days, and what they are not able to give to people who are wanting to know their task in the organized Sunday School work, would not make a very large volume. because they are men of practical experience and have workable solutions to the average workers difficulties. You ought to hear them both to appreciate them.

E. T. ALBERTSON
State Secretary

A real new departure in convention work of our county is the employment of Mr. and Mrs. Harry E. Ricker of Peru, Indiana, to have complete charge of the music for the entire two days. They are people of experience and b sides have deep set convictions of the kind of music that ought to be used in the worship period of the Sunday School, and no doubt this fact will be demonstrated in their services.

HARRY G. ROWE
State Young Peoples Supt.

Dr. William Harris Guyer, President of Findlay (Ohio) College, will be present on Thursday afternoon and evening for two addresses. He is a forceful speaker and has sufficient wit and humor to make it stick. The convention is exceedingly fortunate in securing this busy man as his entire time is consumed in lecturing when he can leave his college work. You will never forget this man if you hear him once.

HON. DAVID HOGG
M, C. 12th. District

On Friday afternoon, the Hon. David Hogg will address the convention on "Christian Influence in Government" While this address will have no political bearing, yet it will bring forth one of the greatest needs of our government today, and he will no doubt show the failure of the church in selecting men to make up our government.

On Thursday evening at 6 o'clock a teachers and officers banquet has been arranged for, with Howard W. Mountz of the convention church, to act as toastmaster and a large, enthusiastic crowd is expected from every section of the county. Many other plans are being worked out for the benefit of the delegates attending, and without a doubt, the weather being favorable, the committee in charge will have realized their ambitions, when the convention closes.

Fireman Killed In Accident

The following account of the accidental death of Mr. Chas. Dean, Springfield, Ohio, husband of Ruth Circle-Dean, has been received at this office. Because of her acquaintances and relatives here we publish the account.

"Mr. Charles Dean, Springfield, Ohio, city fireman, was killed Jan. 14, 1926 by accident on answering an alarm. A large cattle truck skidded and ran into the fire truck in which Mr. Dean was on, throwing the truck about 25 feet and Mr. Dean about 50 feet fracturing the skull. He was rushed to the city hospital but died within a few hours. He leaves his wife, Ruth and a six months old son.

"The funeral service was held Saturday at 2:30 P. M., in charge of the Masons, the K. of P. lodges, with the firemen in full uniform acting as pallbearers. He was also an ex service man, having served two years in the World War At the last resting place of Mr. Dean, the bugle was sounded, while the fire gongs rang throughout the funeral service. Mr. Dean was buried in Ferncliff cemetery.

Curie's Auction February Sixth

Bills are being circulated for miles around St. Joe, advertising the Auction Sale at the Curie Implement Store, on Saturday, February 6th, at 10 o'clock, at which time Mr. Curie places on sale some odd pieces of machinery, perfectly good and all to go to the highest bidder. People will come for miles to this sale as they are acquainted with the business reputation of Mr. Curie and will know that the sale is bonafide. Discs, harrows, plows, gas engines, feed grinders, mowers, hog waterers, cream separators, belting, hand sprayers, truck, Ford Coupe and many other articles will be sold.

The Editor's Beatitudes

If an editor has beatitudes, I think they should read something like this:

"Blessed are the merchants who advertise because they believe in it and in their business; for their prosperity shall increase many fold."

"Blessed are the country correspondents who send in their well written items every week; for fame of their friendly neighbors shall go abroad in the land"

"Blessed is the woman who sends in a written account of a party or wedding; for she shall see the details of the function and the names of her guests correctly reported"

"Blessed are all those who do not expect the editor to know everything but who call up and tell him whenever an interesting event occurs to them; for they shall have a newspapar in their town"

"Blessed are they who get their copy in early; for they shall occupy a warm place in the editor's heart."

"Blessed are all those who cooperate with the editor in his efforts in behalf of the community; for their town shall be known far and wide as a good place in which to live."

Want Dope On Radio?

Here's where to find it. How's your radio working?

This indeed is an important question. It determines whether or not you are getting all the value from your set. And if it's falling down on the job, if you know it is capable of greater range, you are the loser if you don't set out to adjust the matter.

Slight adjustments, change in hookups, or installation of an additional unit, often turn a poor outfit into a surprisingly good one. But how to make these changes is the problem.

Many radio fans are finding The News' Radio Department just the place to look for valuable information concerning a multitude of radio topics. There's something in it for everybody. Turn to it today and see what it has to offer.

Notary work of all kinds attended to promptly at News office.

LAFLAMME

SYNOPSIS.—With David, half-breed guide, Brent Steele, of the American Museum of Natural History, is traveling in northern Canada. By a stream he hears Denise, daughter of Col. Hilaire St. Onge, factor at Walling River, play the violin superbly. He introduces himself and accepts an invitation to make the post his home during his stay. He finds the factor worried and mystified. The "log chateau" is a real home. From St. Onge he learns of the mysterious creature of evil, the Windigo, and the disappearance of a canoe and its crew, with the season's take of furs. Then at night the Windigo gives a weird performance. Even Steele is mystified. David, Steele's Indian, and Michel, St. Onge's head-man, leave for the scene of the canoe's disappearance in an attempt to solve the mystery. St. Onge tells Steele that Lascelles, the company's manager at Fort Albany, seeks his ruin in order to compel Denise to marry him to save her father. Steele and Denise fall in love. Steele finds the track of the Windigo—huge and much like a bear's. David finds the same thing. Tete-Boule, Indian in St. Onge's employ, is caught listening to Steele's talk with David and Michel, and roughly handled.

CHAPTER IV—Continued

—9—

"What you told me has been respected, sir," interrupted Steele, irritated at the manner of the older man.

"Yes, monsieur," mollified the factor, "we have found you a gentleman. At for a time I suspected you of ving a member of the provincial po-ce, and that would have complicated matters."

"What do you mean?"

"Why, if it were' ever known up river that the police had stayed here with me for some time before acting against Laflamme, the post might be burned over our heads. They are a lawless crowd, monsieur."

"According to your story you are bound to lose the post whatever happens."

"Yes, but there is Denise."

"I don't understand."

"Monsieur, Laflamme has never stopped at anything. He might not stop there."

"You mean that he—is in love with Mademoiselle St. Onge?"

"Precisely!"

"And might attempt to take her by force?"

"He might attempt anything. He has never respected the law—is a desperate man."

"But they would hunt him down. He could not get away in this country. He would be a madman to attempt it."

"He is a madman, monsieur."

Steele was tempted to laugh in the face of his host. He would shortly have the opportunity of measuring this madman with his own eyes. St. Onge certainly was painting him in strong colors. But they had wandered from the point.

"I have asked you for your confidence," he began abruptly. "If you cannot see your way clear to allow me to aid you, I shall regret it." He was thinking of the girl up at the house.

"Monsieur Steele, we have decided that you deserve our confidence—Denise and I; but I fear it will do so good now. They have got us."

"They?" demanded the American.

"Yes," and the blood mounted to St. Onge's bronzed face as he talked. "I told you that Lascelles had pursued my daughter since the winter we spent at Albany. And now, with the disappearance of this fur, the post can be closed, as it shows a loss under my management. He can force me from the company's service—ruin me. In France I have no property left; it is all gone, and I am an old man, monsieur."

The face of St. Onge was yellow and wrinkled.

"But you will not consent to your daughter—" vehemently protested the younger man, when he was interrupted, with:

"Ah, monsieur, you do not know her. I fear that already she may have involved herself. I have just learned that she sent a letter by the last canoe to Albany."

Steele's deepest instincts revolted at the thought. It was monstrous—unbelievable! Small wonder he had found her playing her heart out at the rapids. He knew now just what hopelessness, what heartache, lay beneath the "Farewell" she had played on the hill. To shield her father's old age from the bitterness of failure and possible penury here, in this new land, she had deliberately offered to destroy that glorious youth of hers—at last capitulated to this intriguing cur of an inspector.

"But that is not all," went on St. Onge. "Shortly before your arrival a canoe brought this letter from Ogoke."

Steele's lean face lighted with curiosity as he started to read the letter handed him by the factor. Then the muscles of his jaw bulged as his teeth ground in anger.

"Monsieur St. Onge,

"Ravillon Freres, Walling River.

"For the third and last time I am writing you in an attempt to make you see the light as a sensible man. I have reason to know that Lascelles is now ready to force your hand. The post has proved a failure, as he intended it should, and you have now to decide between leaving the company or giving your daughter to a man you despise.

"The offer I have made to you, I repeat. From Ogoke Lake we can keep the Revillon Freres, and the Hudson's Bay company out of the Walling River valley, and control the Swift Current and Drowning River trade as well. In five years we will retire rich.

"I offer your daughter a name honored for generations in Three Rivers. Although I have spent my life in the North, my education has been of the best—not picked up in the barrack room like that of Lascelles. Monsieur le Colonel, the time has come when you are forced to make a choice between us. Join with me, and in a few years your daughter will live in luxury in Montreal or Quebec, and your old age will be provided for; choose Lascelles and you will never see the ice break up on the Walling, for your Indians will leave you. I have loved your daughter since I saw her at Albany, and can make her happy. Consider carefully before you decide to become the dog of Lascelles. If it is to be that rat of a sous-lieutenant, I warn you now that you will find my arm long. Until the snow flies I will wait for your canoe.

"LOUIS LAFLAMME."

Steele returned the letter to St. Onge with the comment, "Monsieur, you were a soldier of France. To a letter like this there is but one reply—for a soldier." There was a glitter in the eyes of the American as they met those of the older man.

"For a soldier," repeated the Frenchman with excitement, "there is but

"But That Is Not All," Went On St. Onge.

one reply, 'On guard!' I would kill her with my own hand before giving her to that renegade. Why, there is a white woman now at Ogoke—and to write this insult!"

The American leaped to his feet. "Colonel," he cried, "Laflamme says you won't see the ice leave the Walling. Let's call that bluff! With your leave, I'll come back on the snow, and we'll watch the ice go out together!",

The hands of the two men met as they silently pledged each other. Then Steele's face sobered as his mind turned to the greater problem that confronted him.

"But Lascelles—how does Laflamme know so much about him?"

"Laflamme was at Fort Albany, four years ago, attempting to make a deal with Lascelles. He was suspected of trying to lure him from the Revillon Freres' employ. It was there he first saw Denise. Since then he has written us many letters. Once he stopped here on his way up river, and threatened to take her away by force if she did not listen to him. She lives in constant fear of him."

"That explains much," replied Steele. "And the letter she sent to Lascelles—when did it go downriver?"

"With the search party from Albany. Long before you reached here—as much as two weeks."

"And this letter evidently accounts for her depression—her sadness."

"Yes. This matter—and her fear of Laflamme. She believes that he will keep his word—try to use force. As for the letter, she refuses to tell me what she wrote, but I can guess."

"And of course Lascelles will show up here before the river closes, since he has at last listened to him?" Her inexplicable, "There is no way out for the lost," was now clear.

"That is what I fear—"

"But what do you intend to do, monsieur? You must have some plan," impatiently demanded Steele.

"What can I do? I've told her that I shall never consent to it; that I would kill her and myself first."

There was no solution of this problem in the mind of the American. It was a situation which seemed hopeless indeed. If she refused to listen to her father she surely was too proud to brook interference from a stranger. She had burned her bridges, yet something must be done—something to prevent her self-destruction. But what? And then, he remembered with a start, there was this Windigo matter.

CHAPTER V

The following morning the three friends were loading their canoe preparatory to ascending the river on a round of the fall camps of Indians trading at the post, when the flash of a paddle far upstream aroused their interest.

"Dat ees queer t'ing," commented Michel, scowling darkly. "Eef M'sieu Laflamme come to mak' trouble, he weel fin' plenty here."

At the mention of Laflamme, David's small eyes narrowed; the muscles of his thick forearms worked nervously as though he already felt his fingers at the throat of the free-trader. Steele's curiosity was keenly aroused, for it was too late in the year for the canoe of a trading hunter to visit the post; this boat was undoubtedly from Ogoke. What new scheme had Laflamme in mind? It would be four weeks before the winter would break—the limit he had given St. Onge for his answer.

It was not long before the hard-driven craft was close enough to disclose but a single occupant. And shortly, as it neared the shore, Michel called:

"Bo'-jo! bo'-jo! Pierre! W'at you do here so far from de Feather lake?"

The Indian grounded his boat on the beach and shaking the hand of the head-man, replied in Ojibway as David and Steele joined them:

"Bo'-jo, Michel! The hunters at the Feather lakes are leaving for the Medicine Hills country. For three nights the Windigo howled on the burnt ridge by Big Feather lake. The people are weak with fear; they will not trap there this winter."

"Did you hear the voice of the Windigo, Pierre?" asked Michel gravely.

"No, I was netting whitefish at the Lake of the Deep Water. When I returned to the camp they were leaving. There will be no trap lines in that valley this long snows."

"Did the people see the tracks of the Windigo?"

"No, their blood was cold in their veins. They did not stay to look for a trail. Why should they? They were afraid."

"But why did you leave your family for the Windigo to eat and come here; last spring you traded your fur at Ogoke?" rasped Michel so savagely that the Ojibway backed away, for the raw-boned Iroquois was feared the length of the Walling.

"I need shells for my gun, and Ogoke is far," weakly replied the other, his eyes shifting uneasily.

The swart features of Michel twisted with anger. "You lie, you have plenty shell!" he replied, fiercely, returning to English for Steele's benefit. "You travel here to mak' trouble wid your beeg talk of de Windigo." And the long arm of the exasperated headman shot out a crushing blow in the face of the Ojibway.

As the Indian staggered back with a cry from the attack of the infuriated Iroquois, Steele stepped between them, and pushing Michel aside, ordered sternly:

"That's enough!"

The cowed Indian, nursing his bleeding lips, and protesting his innocence, left the men on the beach and joined the post people, who were excitedly discussing the coming of the stranger and his reception at the hands of Michel.

"Evidently you don't like that Pierre," laughed Steele. "What made you so mad?"

"I t'ink he cum here to talk to Tete-Boule," was the significant reply. "Dey weel mak' de medicine tonight to scare de Windigo."

"What, is he a shaman—a conjuror, too?"

"He claim he ees beeg medicine man, one of de Midewiwin, so I t'ink he put de devils een me now." Then Michel related what had passed between him and Pierre.

"But you can't blame him for fearing the Windigo, or for coming here if it is nearer his hunting grounds than Ogoke."

The inscrutable Iroquois faced Steele with snapping eyes.

"Many long snows fall, m'sieu, seence de 'Jibway starve out on de Walling riviere. Maybe ten—maybe more. Many die all tru dees countree dat long snows, for eet was de year of de rabbit plague and dere were no moose. Dees Pierre cum to Fort Matamawan dat spreeng an' say hees woman die, but I go to hees camp dat summer, an' I fin' her bones een de bush een two, three place—all roun'. He keel hees woman—and left her in de snow for de wolverines an' fox—she nevaire starve. He ees no good. He cum here to mak' de trouble an' scare our people."

Pierre also apparently has a part in the conspiracy. Is Laflamme back of the Windigo scare?

(TO BE CONTINUED.)

Changes in Men's Dress

The wig and the pigtail went out of fashion early in the Nineteenth century and gentlemen wore their hair rather long and freely oiled. Loose cossack trousers, high-waisted vests, and voluminous cravats were in fashion, the shirt collar was often worn turned up with the points showing above the cravat. The coat cut away squarely in front went out of date late in the Nineteenth century.

Disposition of Heifer Calves

Three-Fourths of Females Are Left for the Production of Beef.

(Prepared by the United States Department of Agriculture.)

Half of the beef calves dropped each year are heifers. Out of this number only 25 per cent are needed for replacements in the breeding herds. That leaves three-fourths of the heifer calves for the single purpose of beef production. Unfortunately the disposal of these females has represented the most losing proposition with which the ranchman has to deal. Furthermore, he has not had the benefit of as much experimental work in the feeding of heifers as with steers.

To Aid Farmers.

In view of the need for more information concerning the feeding of heifers for beef, a concerted effort is being made by a number of state experiment stations, co-operating with the United States Department of Agriculture, to conduct investigations which will aid the ranchman and farmer in more profitable disposal of the heifer calves in the beef herd. This is one of the many problems in beef production that are being undertaken co-operatively by the department and state stations in the recently launched movement for studying the factors which influence the quality and palatability of meat.

Light Heifers Favored.

At the present time light heifers sell fully as high as steers of similar breeding, condition and weight. Heavy heifers are never wanted except at a discount, and there have been times in the past when all heifers have been severely discriminated against. Packers are frequently accused of being responsible to a large extent for this discrimination. As near as can be ascertained, a part of this discrimination is due to prejudice and a part to actual inferiority of heavy heifer beef. Heavy heifers frequently carry too much external fat, a great deal of kidney suet, and make carcasses which need considerably more trimming than those of steers of similar weight.

Although there is often no discrimination against lightweight heifers, and not infrequently a premium is paid for them as compared with steers of similar weight, those in charge of experimental work feel that trials should be conducted with all classes of heifers in comparison with steers.

Stretching Barbed Wire Is Most Difficult Task

In constructing a fence on rough land care should be taken in stretching the wire over hilltops to avoid lifting the posts out of the ground in the low areas. It is usually advisable to make a number of short pulls with the wire stretchers rather than one long pull. In level areas longer pulls may be made from a well-braced post. An effective height for a four-wire fence is 56 inches. The bottom wire may be 18 inches from the ground and a 12-inch space allowed between the first and second and second and third wires; the top wire may be 14 inches above the third. Variation may be made, of course, to suit the condition, as, for instance, a pasture to hold calves away from their dams at weaning time demands closer spacing. An ordinary spool of barbed wire weighing 100 pounds contains approximately 440 yards, and in constructing 1 mile of 4-wire fence 18 spools of wire are the usual requirement.

Little Bee Featured as Benefactor of Humankind

To the bee, busiest of winged creatures, goes the honor of being the only insect ever featured in the "hero role" of a United States Department of Agriculture educational motion picture. Two of the twenty entomological films produced by the United States Department of Agriculture, "Bees—How They Live and Work" and "Keeping Bees at Work," present the queen bee and her workers as benefactors of humankind. In all other insect motion pictures made by the department the "bugs" are pictured as villains. Even the film, "The Most Wonderful Insect in the World," which presents the seventeen-year locust or periodical cicada, is designed to teach methods of destroying the pest. Other titles, such as "Cotton's Worst Enemy—the Pink Bollworm," "Good-by Boll Weevil," "An Undesirable Alien—the European Corn Borer," indicate the base character of the insect playing the title role.

Sow Sweet Clover Early in Spring Is Best Plan

Sweet clover may be sown on wheat in the spring about the same as red clover seed would be sown, but it is more important that the sweet clover be sown early. The sweet clover will start to grow better if it is sown early enough to have a little freezing weather after seeding, as many of the seed will grow better after having been soaked and frozen. It is more important also, that there be limestone in the soil for the sweet clover than for red clover, unless there is considerable humus in the soil. If sweet clover is being sown on the land for the first time the seed should be inoculated with the proper bacteria, which can be secured in the dirt from where sweet clover or alfalfa has been growing well.

Poultry Ideas Held by Breeders Tested

Considerable Divergence of Opinion on Questions.

(Prepared by the United States Department of Agriculture.)

To determine the soundness of various ideas held by commercial poultrymen, the United States Department of Agriculture has conducted experiments leading to rather conclusive results. From a practical standpoint it is highly desirable for poultrymen to improve, if possible, the hatchability of eggs, to distinguish pullets from roosters at an early age, and to obtain other similar information commercially important but baffling. There has been considerable divergence of opinion on most of the questions.

Hatchability, says the department probably is best improved by testing breeding birds for bacillary, white diarrhea, and eliminating affected birds.

The size of eggs has no significant effect on their hatchability.

There is no significant correlation between either shape or weight of egg and the sex of the chicken hatched from it. Therefore, from a practical standpoint, poultrymen cannot expect to influence the sex of chicks hatched by selecting eggs according to either shape or size.

While there is a fairly definite relation between the weight of eggs and that of the chicks hatched from them there is no significant difference in the weight of either sex, and it is highly improbable that pure-bred chicks can be separated according to sex at hatching time.

Male chicks grow faster than the females, and as early as two weeks of age there is a significant difference in the rate of growth between the sexes.

The addition of skim milk to a ration induces much faster growth, the difference being observable as early as at the end of the second week. This points to the value of skim milk in growing-chick rations.

Plentiful Water Supply Is Important in Winter

According to dairy authorities water is the most important part of the dairy cow's ration, since water represents at least seven-eighths of the material which goes into the milk pail. A short age of water will cut down the milk supply more quickly than a shortage of any other part of the ration. Experiment station tests show that a cow will consume from three to four pounds of water to each pound of dry matter eaten. The average animal in the herd will drink around 12 gallons per day while one cow on test at the Missouri experiment station, giving 110 pounds of milk daily, consumed 65 gallons of water in a day.

A plentiful supply of water is of especial importance in cold weather. The two things which affect the quantity a cow can drink are the temperature of the water and the number of times she drinks. No cow should or will drink as much ice water as she needs for heavy milk production, nor can she drink enough at one time. Hence the importance of water bowls which keep the water before the cow at all times, and of some method of taking the chill off the water.

Apply Manure to Garden Any Time During Winter

Neighbors all wonder at a good garden. They often ask: "Why isn't our garden as good?" The only secret of having a good garden is to make a heavy application of good stable manure. This manure may be applied any time this winter. It should be as free from weed seed as it is possible to get. A load or two will not become bothersome if too much to apply to the garden, even though it is less than a half acre.

Stable manure furnishes several important essential elements that are necessary for the plant-growth. Besides the food for plants, and humus material added to the ground by the application of manure, there is the additional crop of beneficial bacteria. These little plants are necessary for other plant growths. They decompose, tear down, and make the food in the soil available for the larger plants.

If one will realize that stable manure is rich in nitrogen and contains large amounts of potash, but is low in phosphoric acid, he will readily understand that 50 per cent of acid phosphate applied for every ton of stable manure applied, will return high dividends in an increased crop production, earlier crops, and a much better quality.

FARM FACTS

A woodlot started now will save coal bills for farmers in years to come.

* * *

It is very important to test each ear of seed corn before shelling it for seed.

* * *

When building an icehouse for cooling milk on the dairy farm, figure on 1½ tons of ice per cow, or 75 cubic feet of space.

* * *

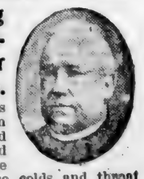
A "face cord" of wood is eight feet long and four feet high, but the sticks may be of any length. In a standard cord the sticks are four feet long.

* * *

The seed corn situation is getting worse instead of better, and good seed corn is going to be very scarce and probably quite high in price before planting time.

TIRED BODY CELLS

Have no resisting power—need building up with Father John's Medicine.



If your body cells are tired and run down, if you find that you get tired easily, then you are in danger, because colds and throat troubles attack people who are in this weakened condition, and the germs quickly get a foothold.

You can build new power to fight off winter illness, coughs and colds, by taking Father John's Medicine.

Build up your strength with this old-fashioned food tonic.

It is all pure nourishment, guaranteed free from alcohol or dangerous drugs. It has a history of more than 70 years of success.

FATHER JOHN'S MEDICINE

CHILDREN WHO ARE SICKLY

Mothers who value the health of their children, should never be without MOTHER GRAY'S SWEET POWDERS FOR CHILDREN, for use when needed. They tend to Break up Colds, Relieve Feverishness, Worms, Constipation, Headache, Teething disorders and Stomach Troubles.

Garfield Tea

Was Your Grandmother's Remedy

For every stomach and intestinal ill. This good old-fashioned herb home remedy for constipation, stomach ills and other derangements of the system so prevalent these days is in even greater favor as a family medicine than in your grandmother's day.

Bird's Odd Actions

Extraordinary behavior on the part of a blackbird broke up the evening service at a church on the island of Lewis, in the Hebrides. The bird began by tapping persistently at the windows until a number of women, becoming alarmed, rose and went out. This allowed the bird to enter the church, and it made straight for the pulpit, alighting on the head of Rev. William Cameron, who was preaching.

Operation Avoided

Sioux City, Iowa.—"For a long time I was run down in health and almost constantly sick. I felt so weak and tired-out most of the time that I was not able to do my housework. The doctors said it was a feminine ailment and that an operation was my only chance. But before I consented to that a lady told me Dr. Pierce's Prescription had cured her and then I decided to try it. Although I was tired of medicines, I took several bottles of 'Prescription' and it made me stout and well, cured me completely."—Mrs. Robert Cummins, 119 W. Sixth St. All dealers. Tablets or liquid.

Send 10c to Dr. Pierce, Buffalo, N. Y., for trial pkg. Tablets.

Sidereal Year

The period of time required for the earth to make one absolute revolution around the sun is called a sidereal year. It consists of 365 days, 3 hours, 9 minutes and 9.6 seconds. This period never varies.

If your eyes smart or feel scalded Roman Eye Balsam, applied on going to bed, will relieve them by morning. Adv.

Loves to Tell It

Young vigor to old folks

"Six years ago bad nerves, sleeplessness, constipation, and headaches had me run down. "Tanlac sent my weight up fifteen pounds and now, at sixty-seven, I feel as fine as at forty." W. H. Sicarn, 1211 North Oakland Av., Indianapolis, Ind.

One of Tanlac's greatest blessings is the new life and vigor it brings to old folks. Every day men and women up in the seventies and eighties thank us for Tanlac's wondrous benefits.

Tanlac is a natural tonic, made from roots, barks and rare herbs. Harmless to man or child. It cleans the blood, stirs up the liver and puts digestive organs in working order.

If your body is weak and run-down, if you lack ambition, can't eat or sleep, you'll be delighted with Tanlac's results. Take Tanlac Vegetable Pills for constipation.

Don't Fuss With Mustard Plasters!

Musterole Works Without the Blister—Easier, Quicker

Don't mix a mess of mustard, flour and water when you can relieve pain, soreness or stiffness with a little clean, white Musterole.

Musterole is made of pure oil of mustard and other helpful ingredients, in the form of a white ointment. It takes the place of mustard plasters, and will not blister.

Musterole usually gives prompt relief from sore throat, bronchitis, tonsillitis, croup, stiff neck, asthma, neuralgia, headache, congestion, pleurisy, rheumatism, lumbago, pains and aches of the back or joints, sprains, sore muscles, bruises, chilblains, frosted feet, colds of the chest (it may prevent pneumonia).

WILL NOT BLISTER

Better than a mustard plaster

A Half-Stew

A North side man tells this one:

"I was downtown on a recent Sunday evening and, seeing an oyster sign on a restaurant window, I decided a stew would be just about what I wanted at that moment.

"Going inside, I said to the waitress: 'A half-stew, please.'

"When the steaming plate reached me I saw that the girl had certainly brought me a 'half-stew,' as six halves were floating about instead of six whole oysters."—Indianapolis News

DEMAND "BAYER" ASPIRIN

Aspirin Marked With "Bayer Cross" Has Been Proved Safe by Millions.

Warning! Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians for 25 years. Say "Bayer" when you buy Aspirin. Imitations may prove dangerous.—Adv

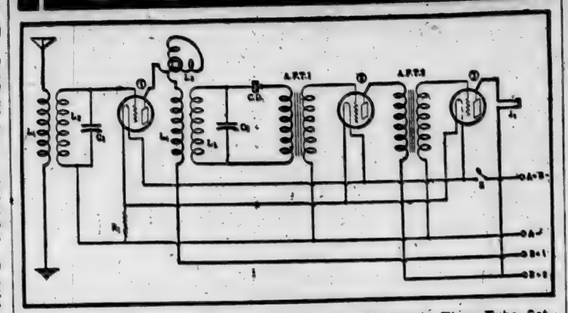
RADIO



The Electrical Schematic Diagram of Toroid RF Simple Three-Tube Set, Using Crystal Detector.

By LEWIS WINNER, in Radio World.

A very simple three-tube set using a crystal as a detector is shown in the illustration. The receiver employs one step of tuned RF with regeneration, a crystal detector and two steps of transformer coupled audio-frequency amplification.

On most receivers, no matter how many stages of tuned RF you add, the signals of the local stations do not increase much. This was found to be true on many tests with such receivers. The RF steps were so arranged that they could be snapped in and out of the circuit. A station was tuned in. The RF tubes were put in and then out of the circuit. The difference was so small that only with milliameter in the output circuit could the effect be noticed.

There are only about a dozen leads to make. No soldering is necessary. The Orbit toroid coils were used in the set; also air-gap sockets.

List of Parts.

Two tuned radio-frequency transformers (toroids) L1L2, L4L5.

One variometer, L3.

One crystal detector, CD (carborundum).

Two audio-frequency transformers, AFT1, AFT2 (Acme).

One ¾-ampere ballast resistors, R1.

Three sockets (air-gap).

Two .0005 mfd. vernier variable condensers, with dials, C1C2 (U. S. Tool).

One single circuit jack or two phone tips, J1.

One 3½-inch dial (for variometer).

One A battery switch.

One 7 by 21-inch panel.

One cable cord.

One baseboard, 6 by 19 by ½.

Accessories: Bus bar, mounting for crystal detector, batteries, phones, antenna, ground and lead-in wire, etc.

The shaft of the variable condenser, C1, that shunts the secondary of the antenna coupler, L2, passes through a hole 3-16 inch in diameter, which is 5¼ inches from the left-hand edge of the panel, and 3½ inches from the top and the bottom. Lay the template over this hole and then drill the holding holes according to those laid out upon the template. The same policy is followed with the other variable condenser. The hole through which the shaft of the variometer L3 passes is 10¼ inches from both the right and the left-hand edges. It is also 3½ inches from the top and the bottom of the panel. The hole for the shaft of the last variable condenser is 5¼ inches from the right-hand edge and 3½ inches from the top and the bottom of the panel. The hole for the filament control switch, S, is 10¼ inches from the right and the left-hand edges of the panel. It is ¾ inch from the bottom of the panel. This necessitates cutting away a small bit of the baseboard. The holes for the screws, which hold the baseboard, are best located by the builder, as these depend upon the thickness of the baseboard, etc. I used a comparatively thin board and therefore had to place the screws very near the bottom of the panel.

We have now automatically placed the variable condensers, variometer, board and switch. Angle irons are used to mount the coils onto the condensers. These condensers have special provisions for mounting the coils, which are placed at right angles to each other. The set of plates of one variable condenser runs in the opposite direction to the other set of plates. That is, one condenser is mounted upside down. This was done so that the coils could conveniently be mounted. If the condensers are mounted in the regular fashion it will be difficult to mount the coils.

The transformers are mounted at right angles to each other. The crystal detector, which is of the fixed type, has a special type of mounting. You cannot fit it into a grid leak holder, as it is too small. Therefore take a pair of mountings and bolt them together, seeing when doing so, that the crystal fits into the holders. You then have a perfect holder. This is then screwed down to the baseboard and the crystal is fitted into the clips. There was no jack used when this set was constructed, although one is shown in the diagram. A pair of phone clips, mounted at the extreme right of the set, were used. No large binding post strip is used. A battery cable was used instead and attached to the proper points.

Wiring the Set.

The beginning of the primary winding, L1, goes to the antenna post on the small terminal strip. The end of the same winding, L1, goes to the Gnd. binding post. The end of the secondary L2 winding goes to the G post on socket 1, and to the stationary plates of the variable condenser, C1. The beginning of this same winding, L2, goes to the rotary plates of this variable condenser, C1, and to one terminal of the resistance R1. Now with the variometer you may have some difficulty when wiring up. Most have binding posts, but some, such as the one that was employed in this set, have none at all. If the latter case prevails scrutinize the variometer very carefully. See where the beginning of the stationary winding goes to and also where the end of the rotary winding goes to. In most cases the stator winding terminal goes to one frame and the rotary end to the other frame. Neither of these frames, of course, is electrically connected. After finding these connections place small tags on them. The rotary winding will terminate at the front of the variometer while the stationary winding will terminate at the back. The rotary winding terminal goes to the P post on socket 1. The stationary winding goes to the beginning of the primary L3 of the second RFT. The end goes to the B+ 45 (1) of the cable. The beginning of the secondary winding L5 goes to the variable plate of the variable condenser, C2, and to the B+ post on the audio-frequency transformer AFT1. The end of this winding goes to the stationary plates of the same variable condenser and also to one terminal of the crystal detector (high potential marked A on the carborundum). The other crystal goes to the P post of the audio-frequency transformer AFT1. The F— post on socket 1 goes to the other terminal of the resistance, R1. The G post on AFT2 goes to the G post on socket 2. The F— post on the transformer goes to the same terminal that the beginning of L2 went to, or to one terminal of the resistance, R1. The F— post on this socket goes to the F— post on socket 1, and also 3. This common lead goes to one terminal of the resistance. This means that the resistance is in the negative lead of the filament. The P post on the socket 2 goes to the P post on AFT2. The B+ post on this socket goes to the B+ 67½-volt cable lead (2). The G post on AFT2, goes to the G post on socket 3. The plate post on the same socket goes to either the top terminal of the single circuit jack or to one terminal of the phone tips. The F+ of this socket goes to one terminal of the filament control switch, S. The other terminal of this switch goes to the A+B— cable lead. All the F+ leads from the sockets are common. All the grid returns are placed in the negative lead of the A battery. No C battery is employed, although the same may be used. If you desire to use a C battery, break the two leads that come from the F post of the two AFT, and bring the same to the C— lead of the C battery. The C+ lead goes to the A— lead.

Simple to Operate.

This receiver is very simple to operate. The only trouble that you may come up against is the difficult controlling of the oscillatory flow of the RF tube. This is due to the fact that many variometers will not oscillate over the complete broadcast band. A small 20-turn coil placed in series with the plate circuit of this same tube will cure this ill. The two condenser dials should tune in step. Don't forget to reverse the leads of the crystal detector, in case the signals are not loud enough. Also reverse the A battery leads. A 100-foot antenna should be used. The ground should be made to the old faithful water pipe. If you find that the RF tube is difficult to control, the insertion of a 10-ohm rheostat may help. I say may, because, with some tubes it helps and with others it is of no use. That is, you bring the filament temperature up to a certain point and the tube starts to oscillate in the same manner. If you turn it down, it stops all together, turn it up it howls too much. The variometer in this set should do all the controlling of the regeneration. By increasing and decreasing the voltage, better or worse results will be obtained. Try changing the tubes around for louder signals. This receiver is selective, and if one finds the results vice versa, they should reverse the secondaries of the radio frequency transformers.

Simple Tube Repair

A tube with a loose base can be repaired by wrapping a strip of adhesive tape around the joint three or four times, carefully stretching the tape at each turn so as to fit tightly over the top of the metal base and the glass. After wrapping hold the tube in the closed hand, pressing tightly on the tape for a few moments, to heat the tape, and make the support solid. This will save the tube for future use.

Lesson for January 24

JESUS AND THE SAMARITAN WOMAN

LESSON TEXT—John 4:4-42.

GOLDEN TEXT—With joy shall ye draw water out of the wells of salvation.—Isa. 12:3.

PRIMARY TOPIC—Jesus by the Well.

JUNIOR TOPIC—Jesus by Jacob's Well.

INTERMEDIATE AND SENIOR TOPIC—A Sinful Woman Finds the Savior.

YOUNG PEOPLE AND ADULT TOPIC—How Jesus Deals With Sinners.

I. Jesus Must Needs Go Through Samaria (vv. 4-6).

The growing popularity of Jesus aroused the envious opposition of the Pharisees, which obliged Him to leave Juden and go into Samaria. There was another way to reach Galilee, one used by many Jews to avoid contact with the despised Samaritans, on the eastern side of the Jordan. He must "needs go through Samaria" in order to find this poor sinful woman and the needy citizens of Sychar. The great necessity which was upon Him was to seek and to save that which was lost (Luke 19:10).

II. Jesus' Testimony to the Woman (vv. 7-26).

This is a fine example of personal evangelism.

1. A Favor Asked (vv. 7-9).

Jesus tactfully made a request which appealed to the woman's sympathy. Not only did the thirst of the weary traveler appeal to her, but the fact that He being a Jew asked a favor of her, showed His sympathy for her. In introducing the conversation, He referred to that which was uppermost in her mind, namely, water. This was the teacher's point of contact. He soon passed from earthly water to the water of everlasting life which was in Himself. Every human mind has a handle. Our success as Christian workers depends upon our ability to grasp and use it.

2. Jesus' Tender Dealing With This Woman (vv. 10-15).

He first appealed to her curiosity by declaring, "If thou knewest the gift of God" (v. 10). He knew the deep unrest of the soul of the sinful woman as she went on her way. He knew if she really knew Him she would believe on Him and be saved from her sins, therefore the first thing was to get attention. When we can get one to give attention to the claims of Christ, there is good chance of winning him. He followed this appeal to her curiosity by a promise which directed her attention to her deepest needs. There is a consciousness of deep need in every soul. The deepest need of a soul Jesus only can satisfy.

3. The Woman Convicted of Her Sins (vv. 15-19).

Jesus succeeded in arousing her interest, but she did not really understand Him. Before she could understand what the Water of Life is, she must be convicted of her sin. She did not agree with Him, but became a humble inquirer. The soul must be convicted of sin before it can be converted.

4. The Problem of Worship Submitted to Christ (vv. 20-24).

This she did as soon as she perceived Him to be a prophet. Jesus knowing the inner life of this woman, told her of the glad time even then present when true worshipers could hold intercourse with God anywhere. He showed her that the place of worship is unimportant, that the all-important thing is to have the true conception of God as brought through the Jews. Since worship is spiritual, only those who have been regenerated can worship God in spirit.

5. The Woman of Samaria Witnessing for Christ (vv. 27-39).

The woman left her water pot and returning to the city said, "Come, see a man which told me all things that ever I did. Is not this the Christ?" As soon as she was converted she became an enthusiastic missionary. This is as it ought to be and always will be. The soul that realizes Jesus cannot be silent (John 1:41-45). The result of her testimony was that many believed on Jesus.

III. Jesus Testifying to the Citizens of Sychar (vv. 40, 41).

The woman's testimony brought the request from the Samaritans that Jesus tarry with them. He abode with them two days. Though they heard the woman's testimony, they believed because of Christ's own word (v. 41).

IV. The Samaritans Witnessing for Christ (v. 42).

They declared, "We know that this is indeed the Christ, the Savior of the world." They confessed to the woman that their belief was not due to her testimony but to having heard Him themselves, that they were sure that He was the Messiah.

Safe From Others

He that respects himself is safe from others; he wears a coat of mail that none can pierce.—Longfellow.

God Governs the World

God governs the world, and we have only to do our duty wisely and faithfully, and leave the issue to Him.

God Gives Time

God never imposes a duty without giving the time to do it.—Ruskin.

DR. W. B. CALDWELL AT THE AGE OF 89

A Child's Laxative Which Mothers Can Rely On

To Dr. W. B. Caldwell, of Monticello, Ill., a practicing physician for 47 years, it seemed cruel that so many constipated infants and children had to be kept "stirred up" and half sick by taking cathartic pills, tablets, salts, calomel and nasty oils.

While he knew that constipation was the cause of nearly all children's little ills, he constantly advised mothers to give only a harmless laxative which would help to establish natural bowel "regularity."

In Dr. Caldwell's Syrup Pepsin mothers have a regulating laxative which they can depend upon whenever a child is constipated, bilious, feverish or sick from a cold, indigestion or sour stomach. All children love its pleasant taste.

Buy a large 60-cent bottle at any store that sells medicine and just see for yourself how perfectly it cleanses and regulates the bowels of infants and children.

Dr. Caldwell's SYRUP PEPSIN

More Chilling Than Thrilling

Poor Suitor—But, sir, I thrill at your daughter's slightest touch.

Practical Parent—After marriage you'd be more likely to chill at her slightest touch is usually for a hundred dollars.

Cuticura Soothes Itching Scalp.

On retiring gently rub spots of dandruff and itching with Cuticura Ointment. Next morning shampoo with Cuticura Soap and hot water. Make them your everyday toilet preparations and have a clear skin and soft, white hands.—Advertisement.

Even though you preserve silence, you are compelled to hear what people say.

War and the Profiteer

Mrs. Rose Pastor Phelps-Stokes said at a tea in New York:

"War is hideous, and the world realizes it at last. The only man who sees beauty in war nowadays is the profiteer.

"It's like the chap who stood on the promenade deck and gazed with tear-dimmed eyes at a school of spouting whales.

"'Ah,' he said, 'ain't that beautiful, though!'

"'Curious, perhaps,' said a Bostonian. 'Hardly beautiful.'

"'It's beautiful to me' sobbed the other man, 'for I'm a plumber, I am, and those spouts remind me irresistibly of a magnificent line of busted water pipes.'"

Proved safe by millions and prescribed by physicians for

Lumbago Colds Neuritis Neuralgia

"The Road to the City"

The St. Joe Dramatic club presents this play for the play for the pleasure of the Tri-Township Farmers Institute and to present a powerful argument against the deceptive lure which the road to the city holds out to Rural Young People.

CHARACTERS

Robert Darnell	A Country Physician	Derwood Ridgway
Richard James	A Man From the City	Merritt Maxwell
Jud Judkins	A Young Farmer	Sam Mumaw
John James	Richard's Invalid Father	Ray Reasoner
Duke	A Man of Mystery	Harvey Hull
Jet Sanderson	At the Crossroads	Katharine Bowser
Toto Lee	Her Cousin	Lena Meek
Lilly Morton	From the City	Esther Bowman
Mrs. Sanderson	Jet's Widowed Mother	Cora Price

SYNOPSIS

Act I. The living room of the Sanderson home in the country. At the Fork of the Road.

Act II. The library of the James home in the city. Where one Road Leads.

Act III. The same as Act II. Where the Road Ends.

Act IV. The same as Act I. Jet Makes Her Choice.

Spencerville, Indiana, Jan. 28, 1926.

ADMISSION, 25c.

SPENCERVILLE

Clean up of odd machinery Feb. 6, at Curie's store.

Russell Wad , wife and daughter of St Joe visited Mrs Rebecca Beams, Sunday.

Otis Koch, wife and babe of Ft. Wayne, were Sunday guests in the John Koch home.

Pictorial and McCall patterns ordered at News Office Phone your orders to us.

The Home Bureau will serve dinner at the Farmers' Institute Friday and Saturday.

Martin James, wife and daughter and Moses Perry, were recent guests of Joel Betz and wife

James Reed and wife and Miss Ida Reed spent Sunday with Wm. Reed an wife near Rehobeth.

Mrs Jessie Summers spent several days last week with her sister, Mrs. Rolla Moffett at Auburn.

The Ladies Aid of the Lutheran church held their last meeting at the home of Mrs. Flossie Rhoads.

Mrs Florence Silberg and daughter, Orpha, of Butler, were guests in the Sophia Miller home, Saturday.

Rolla Moffett and wife, Wm. and Ray Rodefer with their wives, all of Auburn, spent Sunday afternoon with Mr. and Mrs. Jacob Baltz.

The new spring McCall Quarterly is here and it is chuck full of splendid styles. Pictorial Quarterly also on sale and display at News office.

The following guests very pleasantly surprised Mr. John Bachmann at his home Sunday in honor of his seventy-ninth birthday anniversary: August Baltzli, wife and daughter, Robert Bachmann, wife and daughter, Alfred Bachmann and wife, John Zimmerman and wife and Mrs Lucy Kuffee all of Fort Wayne and John Webb of this place.

Mrs. Cora Steward and daughter, Miss Arminta, very pleasantly entertained the C. C. Club Friday afternoon. Partners for lunch were chosen by a contest which was greatly enjoyed by all. The guests present were Mrs. Ada Berry, Mrs. Emma Keyes, Mrs. Ashby and Mrs B L. Smith. The next meeting will be held with Mrs. Ida Hahn in two weeks.

The Loyal Woman's class of the Spencerville Lutheran church entertained their husbands and families on Tuesday evening in the basement of the church A fine supper was enjoyed by all after which a social hour was spent and the evening's entertainment closed with a well rendered humorous play given by five women. There were about fifty present and all agreed in pronouncing it a decided success. The class is a very successful one.

MICKIE SAYS—

Nourishing Drink for Children

BABIES and children, the same as adults, grow weary of being fed the same food in the same way each day. It is true that most children take naturally to milk, but that does not mean that they must be fed it ad nauseam. On the contrary, that is the very thing to be avoided.

Pediatricians advise consumption by children of a quart of milk a day in one form or another. This does not mean skim milk, but whole milk, for the skimmed product is lacking both in butter fat and the essential food element known as vitamin A, which is found in butter fat. Many mothers do not appreciate that removal of cream from the top of a bottle of milk results in skim milk.

In evaporated milk, a product recommended by many leading doctors for the use of infants and children and which is simply pure cow's milk sterilized in cans and with sixty per cent of the water removed, there is no cream line. The milk in the top of a can is the same as it is in the bottom of the container. This results from a process called homogenisation, in which the fat globules in the milk are broken up into such microscopic bits that they remain in homogeneous suspension. Every drop of homogenized milk has a buttery taste because it contains butter fat. For this reason, in evaporated milk, there is none of the flat taste one finds in drinking from the bottom of a bottle of market milk.

In order to avoid feeding the baby or child plain milk three or four times a day, many authorities recommend the use of a mixture of fruit juice and milk, a highly palatable and refreshing drink.

Following is a recipe worked out by experts for an orange-milk drink:

Mix in a fruit jar ⅛ of a cupful of orange juice, ¼ of a cupful of evaporated milk, three teaspoonfuls of sugar, ⅛ teaspoonful of lemon juice and a few grains of salt. Shake well before serving.

Notice Of Sale Of Real Estate

The undersigned administrator of the estate of Jacob Gratz, deceased, hereby gives notice that by virtue of an order of the DeKalb Circuit Court of Indiana, he will at the hour of one o'clock P. M. on the 25th day of February, 1926, at the residence of the following described premises, offer for sale at public auction all the interest of said decedent in and to the following described real estate to wit:

The east half of the northeast quarter (¼) of section thirty-six (36) township thirty-three (33) north, range thirteen (13) east, DeKalb County, Indiana; also the west half (½) of the northwest quarter (¼) of section thirty-one (31) township thirty-three (33) north, range fourteen (14) east in said DeKalb County, Indiana

Also a part of the south half (½) of the southwest quarter (¼) of section twenty-five (25) township thirty-three (33) north range thirteen (13) east, described as follows:- Commencing at the southeast corner of said southwest quarter of section twenty-five (25); thence west on the south boundary line of said section, forty-one (41) rods; thence north parallel with the west boundary line of said section eighty (80) rods; thence east forty-one (41) rods; thence south eighty (80) rods, containing twenty and one half (20½) acres of land, all of said real estate being in DeKalb County and State of Indiana.

And the following described real state in Allen County, State of Indiana to wit:—

A tract of land described as follows: Commencing at the river St. Joseph on the section line between section fourteen (14) and section eleven (11,) running thence west to the corner of lands formerly owned by John M. Crory; thence north on the line of said land so owned by John McCrory to the northeast corner thereof; thence east to the bank of the St. Joseph river; thence down along the meanderings of the river to the place of beginning; said tract containing twenty (20) acres of land more or less and being in section eleven (11) township thirty-two (32) north, range thirteen (13) east in said Allen County, Indiana and being the same real estate conveyed by James McCrory to Jacob Gratz on the 25th day of May 1891, and which deed was recorded in deed record 125 on page 360 thereof of the Deed Records of Allen County, Indiana

Said sale will be made subject to the approval of said court, for not less than ⅔ of the appraised value of said real estate and upon the following terms and conditions to-wit:

At least one third of the purchase money in cash, the balance in two equal installments payable in six and twelve months respectively, evidenced by notes of the purchaser, bearing 6% interest from date, waiving relief, providing for attorneys fees and secured by mortgage on the real estate sold.

The Administrator reserves the right to reject any and all bids.

S. D. Steffey,
Administrator.

Atkinson & Husselman, Attys.

St. Joe Locals

A daughter was born to Mr. and Mrs. Cy Cline, west of town, this week.

Elmer Hart and wife of Napoleon Ohio, were here Tuesday guests of relatives.

Mrs. Dan Morr of Concord, died Tuesday morning. Funeral arrangements are made for Thursday from the house.

Walter Dallas of Wolcottville, father of Mrs. R. W. Brodbeck, was operated on Tuesday and is reported holding his own. His left kidney was removed because of tumor growth.

The service station was broken into Tuesday night and 10 tubes, some batteries, patches and other articles were missing. An entrance was made at the front. Auto tracks were fresh when Mr. Yeiser came to open Wednesday morning.

Local Briefs

Receipt books on sale at News office.

Mrs. Emma Hart is reported much improved.

Attend Curie's sale, Feb. 6. Some real bargains in machinery.

We haven't heard of any local radio sets picking up any of the foreign programs.

Mahlon Baker and wife of Auburn, are here the guests of relatives for a few weeks.

For Sale or Rent: Business rooms with residence in connection. Call on Chas. Fry. 47tf.

Mrs. Chas Waterbeck of Willard came home Friday and spent until Monday with her parents, Roy Kinsey and wife.

Miss Ima Bray, Harcourt Miser and Howard Shilling and wife, were pleasantly entertained Sunday at the country home of O. E Ginther and wife.

C. C. Woodcox and Burl Enzor are in Detroit this week attending the Detroit Automobile Show and driving home a new Chrysler Sedan for Mr. Enzor.

John Barger is recovering nicely from his goitre operation. He is able to be about town. Charles Bassett is doing the mechanical work in the garage.

Among the new rural users of electric energy is Wm. Hamilton. Last week juice was turned on. He wired from the Clay Coburn corners east of town to his home, using the company poles.

Justice of the Peace .E. A. McClintock of Auburn, heard a number of cases Monday night, eleven having been set on the docket for disposal, all accounts, filed under the new garnishee law.

Remember the Curie Auction begins at 10 o'clock, Feb. 6th. Be there and get your share of bargains.

Mr. and Mrs Frank Myrtle and Mr. and Mrs. Harold Myrtle and son of Berwyn, arrived Saturday evening and spent over night in the Wm Randall home. About 2 P. M. Sunday they left for their home making the trip by auto.

The Grabill State bank, in a suit filed in the DeKalb circuit court states that on Sept 7, 1923, W. E and Fillmore Shull gave Glen Romine a note for $228 50, due in nine months, and that Romine assigned it to the bank. The note has not been paid and a judgment of $300 is asked.

Candidates are beginning to appear for county offices. E. E. Turner of Grant township, well known auctioneer, it is understood will announce his candidacy fn a few days for the republican nomination of sheriff. Victor Stodgill an Auburn resident, has also announced his candidacy for the republican nomination for this office.

Mr. and Mrs Fred Hart entertained at Sunday dinner, Otis Coburn and son, John of Indianola, Nebr., Vernon Wilmot and wife of Spencerville, Mrs. Henry Schoolmaster of Lansing, Mich , John and Lester Coburn east of St Joe, John Hart, wife and daughter, Effie of Fort Wayne. Wm. Quance and wife of Auburn were afternoon callers Mrs Schoolmaster is here taking care of her mother. Mrs. Dora Coburn of Fremont is also in the the Hart home for a few weeks.

A Stonewall Jackson club is being organized by Bert Jackson and just as we go to press he reports a membership of 55. The address of their headquarters is 199 Railroad Ave., the east half of bin No 6 will be used for their meetings as soon as weather permits. There are certain conditions each member must comply with before he can become a full-fledged member. First, must be able to smoke a pipe second, agree to not work during the winter; third, must attend each session of the club at 9 and 2 daily. Bert Jackson put himself in as president, secretary and treasurer so that he may know how things are run. Membership will be closed this week.

American Lace Is Crowded to Fore

The hour of triumph for American-made lace has arrived, declares a fashion writer in the New York Times. After long years of endeavor its creators are placing it with confidence before the appraising eyes of the world. Appreciation of its value and its popular demand have been growing steadily, until now imitation lace is relatively more important than real. The "live" market is for lace designed and made by American artists and artisans. American lace manufacturers have lately arranged an exhibition in which the history, the importance and practical possibilities of the fabrics are shown. A direct appeal to women of fashion was accomplished by a rec-

Metal Lace, Metal Cloth, Make Gown for Formal Wear.

ognized connoisseur of lace and a gifted young Bohemian artist, who planned and directed the fashion pageant in which were shown many beautiful models of gowns and other garments done in American-made lace. A large number of gowns from the most prominent couturiers, which were originally done in lace or artistically translated into lace, were exhibited.

The most inviting opportunity for the use of lace is the negligee or tea gown. Usually lace has been thought of for summer gowns, but fashion now decrees wool and fur for hot weather costumes and chiffon, illusion, lace and other sheer materials for winter.

Some among the latest inspirations from both French and American designers are made altogether of lace. The material was once known as imitation or novelty lace, but is now recognized as a reproduction. These tea gowns have few rivals for beauty, even among those made of the most costly brocades. The present modes are happily designed for the new laces, of both heavy and the most delicate meshes. Yards are used in long flowing sleeves, capes, deep collars, trains and floating scarves.

Laces Most in Demand.

The laces most in demand for these graceful d'interieur are chantilly, Margot, d'Alencon, Bourbon, Bohemian, Spanish, Macrame, valenciennes, the many variants of metal lace. Even wool lace is introduced in sports clothes, in sweaters, scarves and in children's dresses. It may be woven of very fine yarn into jackets, scarves and veils fine as fleecy clouds. The dyes with which these wool laces are colored create the most decorative effects. Made-in-America laces that are reproductions of rare old patterns are now called American chantilly, alencon, valenciennes, filet, and so on. The best of these are scarcely to be distinguished from the originals. In some of the wide laces such as are most suitable for negligees, afternoon and evening gowns, creative artists have combined or interminglied patterns of different types. In a flouncing of chantilly a Spanish motif is introduced with intriguing effect. Into a silk lace of Point d'Alencon design, a note of Margot is woven successfully.

Hand-run laces in white, ivory and ecru are especially lovely this season. They make most charming informal gowns, particularly in combination with delicate shades of crepe or any soft, sheer stuff. A distinct achievement is the tinting of the made-in-America laces. They are so lovely that only a background or length of plain material for contrast is required in the composition of an up-to-the-minute costume. In metal lace American lace makers have accomplished some important and brilliant results. The advantage of metal lace in gilt, bright or dull threads on a mesh of warm ecru or cream-colored silk, or of silver tracing a delicate pattern on frosty white, for a dinner gown or a dance frock, is keenly appreciated by fashionable women.

Some of the possibilities of domestic lace for gowns are illustrated by models from many prominent designers. A symphony in brown is done in dyed Bohemian-type lace over a lighter shade of brown satin for a jeune fille dance frock. In another evening gown an ecru "Spanish" lace is combined with jade-green taffeta. Blue bourbon lace is introduced with blue crepe in a smart afternoon gown, and another model of the same sort is made of American black chantilly and printed crepe in black and white and jade green. In a number of the all-over laces and flouncings the design is elaborated by the addition of beads and metal dots, making glistening high lights on the silky, flowered mesh. Tiny bits of embroidery, wee flowers and fancy motifs are introduced in the laces of this type. Still another attractive novelty is the shadow-lace shown in subtly colored effects and in the most lovely omber tints. A formal dinner gown is built with a clever combination of two kinds of lace, brown chantilly and ecru Spanish, an unusual and charming. American "Duchess" lace, all cotton, is made with much skill and is very effective over white taffeta. The narrow laces are much in demand as a dainty finish for collars and sleeves, and for frilly fichus.

Informal Dress for Interior.

The informal dress for the interior boudoir coat, breakfast coat or lounging robe, is shown in almost countless styles, in a great variety of goods. Quilted gowns, which came in with the autumn fashions, are successful for wear at home and for traveling. One of these is indispensable on the ship or train in cold weather. Some of the more expensive ones are made of Chinese embroidered silk, or are ornamented in some manner with needlework. Usually the gown is lined with a contrasting color, in striking combinations. All of the handsome dress fabrics, brocaded velvets, satins and chiffons are used for negligees, even the metal brocades which make the most elaborate models. These materials are in themselves so ornate that no trimming other than a border may be added. For this fur, ostrich and marabout are fashionable.

The very last word in stylish neckwear is a set of collar and cuffs of a metalized brocade, satin or crepe, the pattern being in silver or gilt on a background of rose or blue, yellow, mauve or green. Many lovely ones are black with an embroidered design in metal. The collar is invariably cut in the round flat shape, the cuffs to match, with sometimes a point on the outer edge. These ornamental accessories presuppose a simple one-piece frock of crepe, satin or lightweight wool, which is untrimmed but for the one decorative touch. In accord with this novelty are other collar and cuff sets of Chinese embroidery, of mousseline in different shades worked in petit point or the highly colored European folkcraft. A row of narrow metallic soutache forms the finish for most of this fancy neckwear.

Large, Floppy Flowers.

A large floppy flower appears to furnish the distinctive touch on many articles of fashionable dress. The newest flower garnitures are enormous roses or almost any other posies in beautifully tinted, metalized gauze. One of these forms a gay garniture for an evening gown, for the collar of a wrap of fur, velours or metal brocade, for a negligee and for any one

White Velvet Gown Depends on Clever Use of Lace.

of several uses in the boudoir. Some of the more chic among the younger women tuck a large flower of this sort on the corner of a pillow, coverlet or on the cushion on the dressing table.

Handbags are shown in novelties that grow more and more attractive. Evening bags are small and dainty and distinctly ornamental, studded with jewels. Some are made of silk heavily embroidered in color, others with a painted motif appliqued like a tiny medallion, framed in gilt and set with colored stones.

THE KITCHEN CABINET

(©, 1926, Western Newspaper Union.)

Our climate is a series of surprises, and among our many prognostics of the weather the only trustworthy one that I know is that when it is warm, it is a sign that it is going to be cold.—Ralph Waldo Emerson.

GOOD THINGS TO EAT

A nice bit of cake to serve with a cup of tea on an afternoon is:

Date Bars.—Take one cupful each of nuts and sugar, two well-beaten eggs, one cupful of flour with two level tablespoonfuls of it removed. Add one-half teaspoonful of baking powder, one cupful of washed, stoned and quartered dates, and one-half teaspoonful of cinnamon. Mix all together and bake in square tins. Dust the tins well with flour after greasing and spread the mixture evenly over the tins. Bake in a slow oven twenty-five minutes.

Chicken a la Reine.—Cream two tablespoonfuls of butter, add the yolks of three hard-boiled eggs, rubbed to a paste. Soak one-fourth of a cupful of cracker crumbs in one-fourth of a cupful of milk and add the egg mixture. Pour on gradually one cupful of chicken stock. Then add one cupful of finely minced chicken. Season with salt, paprika and celery salt. Serve on toast.

Pepper Soup.—Take six or eight large red peppers, remove the seeds and the veins and cook the peppers until tender. Put through a sieve and add a cupful of boiled rice, season with salt and tabasco sauce. Beat one egg with half a cupful of cream, add it to a quart of milk, heated hot, combine mixtures and serve poured over toasted squares of bread; serve immediately.

Braised Liver.—Wash two pounds of fresh liver and flour well, seasoning with salt and pepper and a little lemon juice. Lay in a casserole; add two sliced onions and six carrots shredded lengthwise, a bayleaf, a sprinkling of parsley and a pint of boiling water. Place thin slices of bacon over all; cover tightly and bake one hour and a half; then remove the cover, baste and brown ten minutes. Serve with tomatoes or chili sauce.

Chicken Jelly Salad.—Soften one-half teaspoonful of gelatin in four tablespoonfuls of cold water, add to one cupful of boiling chicken broth, stir well until dissolved, adding salt, pepper, onion juice and celery salt to season. Chill until cold, then add part of this to a cupful of finely chopped cooked chicken in layers, with the broth as it hardens, adding cooked egg, cooked carrots or beets cut into small shapes to decorate. Let each layer become firm before adding another. Serve unmolded with mayonnaise dressing.

Try this prune pie: Bake a pastry shell and fill with stewed prunes, sprinkle with nuts, cover with whipped cream and serve.

Food for Any Season.

There is no more delicate or appetizing meat dish than tongues, well cooked and seasoned.

Beef Tongue en Casserole.—Take a tongue which has been slightly corned, remove all the rough portions, rub with flour to which has been added a dash of allspice and a pinch of ginger. Fry a few slices of salt pork, then add a sliced onion and the tongue. Tie the tongue into shape and flour lightly on all sides. Prepare a cupful of gravy made from the broth of the trimmings, add the juice of a lemon, three tablespoonfuls of shredded almonds, and half a cupful of seeded raisins. Put the tongue into a round casserole, pour over the gravy and bake half an hour in a moderate oven. Untie the tongue, serve on a hot platter with the gravy poured around it.

Raisin Sandwiches.—Put through the meat chopper alternately a few raisins which have been steamed until plump and a few walnut meats or pecan meats until a cupful of each is used. Add a dash of salt and blend with enough whipped cream to make a mixture to spread.

Cream Prune Pie.—Put a cupful of stewed prunes through a sieve, add a cupful of milk, one teaspoonful of cornstarch, a third of a cupful of sugar, the yolks of two eggs well beaten, a pinch of salt; mix well and pour into a pastry-lined plate. Cover with a meringue and bake all together; if the crust has been previously baked, cook the filling first then add meringue and bake.

Round Steak Birds.—Cut strips of round steak, flatten by pounding until thin. Place on each strip a slice of bacon, a slice of pickle and a slice of onion. Roll up and tie with a string. Dust with salt and pepper and brown in a little hot fat. Simmer until tender, never allowing the meat to boil. Serve with the gravy poured around the rolls, after removing the strings.

Nellie Maxwell

Seen and Heard In Indiana

Haines Egbert, Goshen lumber man, has subscribed $25,000 to a $125,000 fund for rebuilding the First Presbyterian church at Goshen, and Mrs. Egbert has subscribed $10,000 to a fund for a new organ.

Fire starting in the projection room of a motion picture theater at Washington destroyed the theater and damaged adjoining buildings, causing a loss estimated at $150,000. Nearly 1,000 persons filed quietly from the theater as the fire gained headway.

Mrs. Elmer Booe of Gary, until recently of Kokomo, was killed at Winamac when the auto in which she was riding collided with an ice truck at the intersection of Washington street and state road No. 15. Mr. Booe was injured.

A quiet but impressive wedding was that of Miss Beryl Meredith, daughter of the late Joseph T. Meredith, member of the city council at Columbus at the time of his death a few weeks ago, to Howard Spettel, son of Mr. and Mrs. Charles Spettel of Cincinnati, Ohio.

Gov. Ed Jackson announced at Indianapolis that Miss Carina C. Warrington of Fort Wayne would resign as state probation officer March 1 and would be succeeded by Mrs. Florence Riddick Boys of Plymouth, a prominent writer and Republican political worker in the Thirteenth district.

School money to be distributed soon by the state superintendent of public instruction to counties of the state is $2,658,471.01, it was announced at the office of L. S. Bowman, auditor of state, at Indianapolis. On the basis of a school enumeration of 826,654 children, the distribution will be about $3.21 per capita.

"The individual who declares that 'I am the law' and proceeds to violate the rules of society, is a traitor to his state and to his country," declared Gov. Ed Jackson in an address on "The State and the Law" before an audience of 1,200 persons at the Y. M. C. A. big meeting at English's theater at Indianapolis.

Mrs. Robert E. Burke, chairman of the reciprocity committee of the Indiana Federation of Clubs and assistant in the public welfare service of the Indiana university extension division at Bloomington, urges the clubwomen of the state to use the bulletin as a guide in club work, particularly in the arrangement of club programs.

Eight children in the first and second grades at the Onward school near Logansport were injured when the plastering fell in a mass from the ceiling of the school room. The more severely injured are Bernard Hines, Robert Means, Weldon Lutz, Harry Bore, Muriel Mowyer, Lulu Garber, Willadene Wilson, Sarah Shaw and Adam Fox of Anderson.

Establishment of a consolidated school for an entire township which is sought in a petition signed by the required number of taxpayers, is mandatory upon the trustee and advisory board, under a decision made by Special Judge W. W. Thornton of Indianapolis, hearing the Redding township school case in the Jackson Circuit court at Seymour.

The Indiana state fair next fall will be an eight-day affair instead of the customary five-day program, the state board of agriculture decided at a meeting held at Indianapolis. It will be the first time in the history of the Hoosier fair that a program of more than a week has been planned. The fair will open Saturday, September 11, the board announced.

The Indiana Wheat Growers' association announced plans at Indianapolis for the construction of a grain elevator, with a 1,000,000-bushel capacity, in Indianapolis, for which it will have exclusive use for three years, with an option to buy at the end of that time. Ground will be broken for the structure at once. The elevator will be the largest soft-wheat warehouse in Indiana. It will cost $300,000.

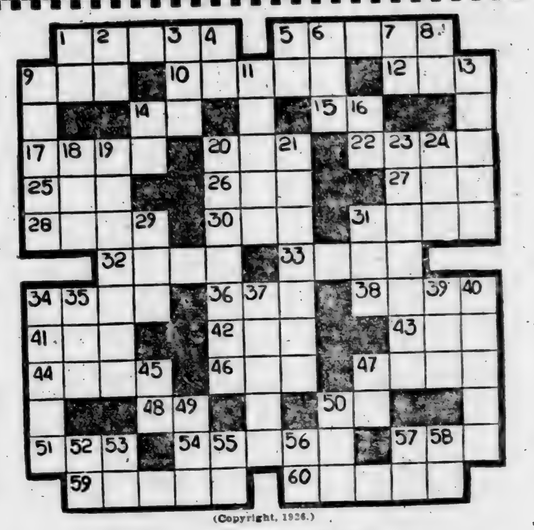
Resignations of three members of the state board were virtually demanded in a letter sent to them by Gov. Ed Jackson. The members to whom the letter was sent are Mrs. T. Victor Keene, Indianapolis; Homer C. Haas, Peru, and J. A. Turner, Nashville. In the letter Governor Jackson criticized the three severely for their attacks on Dr. William F. King, secretary of the board. He characterized charges against Doctor King as "frivolous."

With James H. Moore, manager of mines at Evansville, Crescent and Sunnyside, declining to meet the demands of Harvey Cartwright, Bicknell, vice president of the United Mine Workers of America, District No. 11, for union wages in his mine, other operators, whose mines have been forced into idleness, are planning to file civil damage suits. Damage demands in the suits against union mine officials and organizations are expected to run high into thousands of dollars.

The Bartholomew County Corn Growers' association opened its twelfth annual county corn show in the city hall at Columbus with the largest number of exhibits in the history of the association's shows.

Application to Washington for a year's soldier's adjusted compensation to leave to his wife, Mrs. Iona Clark of Catoosa, Okla., was made on his last day on earth before facing the electric chair by Ty Clark, formerly of South Bend, Ind., convicted for the murder of L. M. Stout, Sulphur Springs banker.

CROSS-WORD PUZZLE



(Copyright, 1926.)

Horizontal.

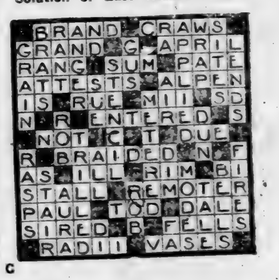
4—To utter a loud noise
5—Belonging to the first man
9—Sorrow
10—To stir up
12—A pronoun
14—One
15—Nickel (symbol)
17—To run quickly forward
20—Something a cow chews
22—An implement
25—A female sheep
26—Part of the verb "to be"
27—A vegetable
28—Not distant
30—A cereal grain
31—To consume by fire
32—A fruit
33—A container for water
34—Ran
36—Anger
38—A portable lodging
41—Atmosphere
42—An immeasurable period of time
43—Neither
44—To entangle
46—A call for help (Morse code)
47—A man's name
48—Exist
50—You and I
51—A domestic animal
53—A river in France
57—A flying mammal
58—Parts of speech
60—An aquatic mammal

Vertical.

1—Therefore
2—That man
3—A vase
4—A preposition
5—While
6—A lair
7—Belonging to me
8—Same as 1 vertical
9—A Scandinavian god of mythology
11—Interest in excess of a legal rate charged to a borrower for the use of money.
13—One of a certain kind of Tatar militia
16—A preposition
16—That thing
18—To inspire with reverence
19—Those who gather in the harvest
20—Totes
21—Makes more profound
23—Wealthy
24—Over (contraction)
29—A color
31—Part of harness a horse has in its mouth
34—Renounced
35—A falsehood
37—European corvine birds
39—A negative
40—A kind of fish
45—An exclamation of surprise
47—Second and fourth vowels
49—A masculine being
50—Moist
52—Upon
53—To proceed
55—Exists
56—A negative
57—Part of the verb "to be"
58—A measure of area

Solution will appear in next issue.

Solution of Last Week's Puzzle.



C

HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

WARNING GIVEN BY RATS SAVED MINERS

Rats in coal mines have often shown that they are friends of the miners in giving them warning of approaching danger, and the average miner hesitates to kill a rat, especially if he is working in a chamber where there is bad air or gas. Two miners in the Empire colliery, Wilkes-Barre, were eating their lunch the other day, when they were attracted by the peculiar movements of two rats which continually annoyed them. Five times they drove them away by throwing pieces of coal at them, but each time the rodents returned. Beginning to feel suspicious the elder miner proposed to his companion that they should move to another part of the pit, and they had only proceeded about 20 feet, when the roof crashed in behind them, bringing down such a mass of coal and rock that it would require three weeks' work to remove it.

Hubby Saw Possibility Wife Had Overlooked

Mrs. Knowall took a great interest in the doings of all the neighbors. It was a great day for her when a new arrival came to the house on the opposite side of the street and she watched with interest as the furniture was removed from the van and carried into the house.

Probably They Had

In his young days Lord Coleridge was talking to his grandfather, and told him that he had taken up the flute. "My dear Bernard," said his grandfather, "haven't all your friends asked you to put it down again?"

Industry Wins

At the working man's house hunger looks in, but dares not enter. Nor will the bailiff or the constable enter, for industry pays debts, but despair increases them.—Franklin.

"Well," said her husband when he returned from business in the evening, "have you found out anything about the social standing of the new folks across the street?"

"Not yet," was the reply. "They have no car."

"No?"

"Yes, and they have no phonograph, no radio and not even a grand piano. I can't imagine what they have got."

"Humph!" remarked friend husband, sardonically. "Perhaps they have 'n bank account."—Forecast.

Early Colonial Domain

The expression "Old Colony" originally applied to that part of Massachusetts included in the limits of the Plymouth colony, but afterwards was used to designate the entire state. In 1692 the Plymouth and Massachusetts bay colonies, which for many years had been independent of each other, were united in one province, bearing the name Massachusetts.—Kansas City Star.

Securing Wall Paper

If wall paper persists in peeling off despite repasting, it can be secured with flat-headed carpet nails, on the heads of which pieces of paper have been gummed to make them unnoticed. Again, doors and floor-boards often shrink, causing a draught under the door. Such a gap is easily got rid of by inserting pieces of paper to build up the carpet or linoleum.

Matterhorn Wasting Away

The Matterhorn, the famous mountain in Switzerland, is slowly wasting away. On an average day in thawing weather, hundreds of tons of fine dirt, clay and rocks slide down the mountain side. On some occasions thousands of tons of dirt slide in a day.

Punctuality Scores

People spend the time you make them wait in summing up your faults; so don't be late.—Bell Telephone News.

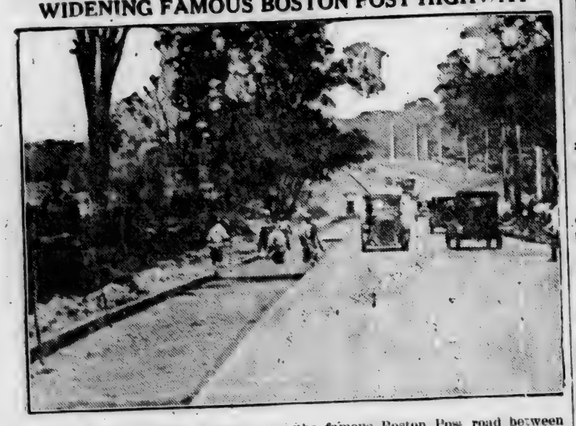
WIDENING FAMOUS BOSTON POST HIGHWAY



Traffic has become so dense over the famous Boston Post road between that city and New York and which dates back to the time of the Pilgrims that it has been found necessary to double the width to 36 feet. Detouring of vehicles was avoided while the additional concrete slab was laid.

LARGER CROP OF AUTO ACCIDENTS

Allowances Not Made for Winter Conditions on Various Highways.

The large crop of automobile accidents produced every year by the winter months and the disproportion between this number of accidents and the number of vehicles on the streets, was the subject of a warning issued to motorists by Charles M. Hayes, president of the Chicago Motor club.

Mr. Hayes called attention to the result of an investigation by the accident prevention departments of several large A. A. A. clubs in various sections of the country. This investigation, he declared, clearly proves that motorists by and large do not make allowances for winter conditions on the highway.

Fail to Make Adjustment.

"The fact that in many cases the curve of accidents sharply rises in the winter months when there are fewer vehicles on the streets," he said, "shows conclusively that congestion alone is not the cause of accidents. The findings of the accident prevention departments of scores of A. A. A. clubs are unanimous on the point that motorists fail to make the right adjustment in their driving habits when wintry weather arrives.

"It has been proved, for instance, that in some cities the accidents on a wet day increase by about 100 per cent. The traffic officers making the counts noted that on the whole the motorists involved in these accidents were going at the speed which they had come to regard as safe in dry weather and had they made the necessary adjustment, and reduced speed 25 per cent, it is safe to assume that there would be no increase in accidents. In other words, a 25 per cent reduction in speed on a wet, slippery pavement is absolutely necessary to restore the margin of safety and offset the disadvantages of poor vision and skidding.

Rely Too Much on Chains.

"Another thing that causes many motorists to come to grief is the degree of confidence that they place in chains. Chains, it has been shown, may be a good aid in keeping the safety margin but are by no means a preventive against accidents. It is not the chains themselves but the fact that the motorist is liable to be over-confident that leads to trouble.

"The man who takes chances on a wet day for the simple reason that his car is equipped with chains, is simply flirting with the undertaker.

"One way in which we can reduce our accidents during the winter months is simply to recognize that it is winter and that the conditions under which the automobile is operated involve increased hazard factors. To meet this condition, the motorist must undergo a psychological adaptation."

When It Is Necessary to Prime Vacuum Tank

Nearly every motorist at some time or other has the peculiar experience of running out of gasoline. Whenever the supply tank has been completely exhausted it should be remembered that it is necessary to prime the vacuum tank before the carburetion system will function again. This is generally done by removing the plug on the top of the vacuum tank and filling the tank with gasoline.

The easiest method, however, is, after replenishing the supply at gasoline in the feed tank, to close the choke on the dash, retard the spark and advance the gasoline throttle lever. Then throw on the switch and run the motor on the starter for about a half a minute; throw off the switch and after waiting for about three minutes start the motor in the usual way.

Turning the motor over with the choke closed for half a minute forms a vacuum in the system and starts the gasoline siphoning from the supply tank to the vacuum tank.

It is necessary to wait three minutes in order to allow sufficient time for the vacuum tank to fill itself. This procedure not only saves time, but also makes the filling convenient.

Winter Motoring Is Not Attractive to Owners

Winter motoring is not attractive to many owners owing to the complications involved in starting and caring for the car, and this is especially true of the older models. Many of these are directly due to the lack of comfort in the garage. They are also the cause of rapid depreciation in one's sense of humor, and probably make one more efficient in profanity. An unheated garage not only reduces the pleasure of winter driving, but may also be responsible for a number of other troubles, in addition to hard starting.

An unheated garage prevents working around the car and giving it the attention it should have to operate efficiently in cold weather. There is always danger of failing to drain the radiator or providing an anti-freeze solution of the proper strength with the resultant danger of damage to the radiator or cylinder through freezing. Low temperatures cause the oil in the engine and the lubricant in the transmission and axle to congeal and the cylinders, bearings and other vital parts are quite likely to depreciate rapidly.

The viscosity of the fuel will increase so that it will not flow as readily through the carburetor, while it will also be more difficult to vaporize and thus increase the possibility of its condensing in the cylinders, finding its way into the crank case and diluting the lubricating oil.

This gives rise to excessive fuel consumption and a considerable portion of the fuel enters the cylinders in noncombustible form; that which does not condense will escape to the atmosphere and give rise to the possibility of explosion.

Starting an engine in a cold garage requires more battery energy and thus materially reduces its life, while a weak battery is also apt to freeze. Aside from the fact that proper engine care is impossible, the finish of the car will also suffer, as it cannot be properly cleaned—frozen slush and mud lingering for weeks can have but one result, that of dulling the polished finish.

Secret Lock Is Puzzle to Automobile Thief

A good device for puzzling the automobile thief was made as follows:

The regular terminal was removed from the end of the ignition wire and an extra one procured. One of these was clamped around a piece of brass tubing and the other around a similar piece of tubing of hard rubber. The inside of each tube was threaded with a small tap. The end of the wire was placed inside a yet smaller piece of brass tubing and a little solder was poured in to make a good connection. This piece of brass tubing was very slightly larger than the holes in the hard rubber and brass tubes inside the two terminals, and was threaded on the outside so as to screw into the holes in the two terminals. In ordinary use, the terminal with the brass lining is screwed on to the end of the wire and used in the regular manner. When the car is to be locked, however, the hood is raised, the brass lined terminal is removed and the rubber-lined one is screwed into its place. The hard rubber is an insulator and the ignition system will not function, and friend thief will puzzle for a long, long time before he dopes out what is the trouble.

Tire Chains Are Almost Indispensable on Auto

Tire chains are an almost indispensable motoring accessory in wet weather, but many a car owner has ruined his tires because he did not give the chains proper consideration.

First of all, chains should be of the proper size; not so tight as to eat into the tire's tread and sidewalls or so loose as to slip under strain. They should be adjusted to creep slightly so as to distribute the wear over the tire.

Put on chains when they are needed—no sooner and no later—and take them off as soon as the need is past. Keep them on the tires as long as they add to driving safety, but not a moment longer. This advice is particularly applicable to paved highways.

Apply brakes even more cautiously when chains are being used. A sudden application of the brakes locks the wheels and often causes the chains to eat into the rubber.

Daddy's Evening Fairy Tale

WHITE MOUNTAIN GOATS

"I'm sure I can't help it, I'm sure I can't," said the White Mountain Goat to his neighbor.

"What can't you help?" asked his neighbor, another White Mountain Goat.

"I can't help it because I am dirty," said the White Mountain Goat.

"As far as that is concerned," said the neighbor White Mountain Goat, "I am no better.

"I am dirty, too."

"But doesn't it seem a pity?" asked the White Mountain Goat.

"It does," said the neighbor, "but we can't help it."

"Just what I said, just what I said," remarked the White Mountain Goat.

"We can't help it," he repeated. "But it is a disgrace to our family name. We are called the White Mountain Goat family, and outside our yard, here in the zoo, is a sign which reads:

"'The White Mountain Goats.'"

"Well, we are White Mountain Goats," said the neighbor. "The sign is all right. There is nothing the matter with it. The sign speaks the truth."

"Of course," said the White Mountain Goat, "the sign itself doesn't speak the truth.

"The sign can't speak, for that matter. But the truth has been written

Neighbor White Mountain Goat.

upon the sign—or in some way put upon the sign so it reads as it does.

"Someone who knew what we were, put that upon the sign. It's a fortunate thing that they don't let anyone write upon those signs, or print upon those signs.

"There'd be some funny mistakes if that were the case. I've heard people at the zoo make the most extraordinary mistakes in animals.

"I've heard a leopard called a tiger and a tiger called a leopard and I've even heard a hippopotamus called a rhinoceros.

"Yes, I've even heard that."

"Well," said the neighbor, "I don't suppose they would let any such ignorant person put up the signs.

"Then, too, visitors can't be expected to know us right away. It is by coming to see us, or by reading about us or by seeing our pictures that they get to know us.

"They even make mistakes in each other. I've seen one person speak to another and have to explain who she was before the other remembered her.

"And then the other person would say:

"'Of course, of course. You will forgive me, won't you? You see, my dear, I haven't seen you in such a long time.'"

"That is so," said the White Mountain Goat, "but of course, it is harder, I should think, to tell one person from another than a rhinoceros from a hippopotamus.

"But we don't live up to our family name. We aren't white. We are quite soiled, quite. We are too active, we do too much."

"Yes, that is why we don't keep white," said the neighbor, "but in the spring when we shed our coats and are all dressed up for the summer we are white. Then we are worthy of the family name."

"True," said the White Mountain Goat, "but it isn't always the spring. The other day a child passed in front of our yard with another, and she said:

"'See, little sister, there is a sign which says those animals are white mountain goats, but they're not very white-looking.'

"That made me very sad."

"My dear White Mountain Goat, you mustn't be sad," answered his neighbor, "for we cannot help it as we have both agreed. If we could help it, it would be different and we would disgrace the family name. But it is better to grow a little dirty-looking and keep busy than to be idle and to look as white as snow—when snow is white. Even snow gets dirty!"

"That's so," agreed the White Mountain Goat. "Your words have cheered me up a great deal. And now I am to be cheered still more."

For just then the keeper brought the goats their favorite meal of oats and clover.

Puzzles

Where does all the snuff go to?
No one nose.

• • •

Why is woman like a stove?
Often needs a new lid.

• • •

Why are hot biscuits like the sun?
They rise in "years" and set behind the vest.

• • •

What has eyes yet cannot see?
A potato.

ROAD BUILDING

GASOLINE TAX IN VARIOUS STATES

(Prepared by the United States Department of Agriculture.)

Gasoline taxes collected by the several states yielded a revenue of $60,108,734 in the first half of 1925 of which $53,814,240 is applicable to road work, according to a report by the bureau of public roads of the United States Department of Agriculture. At the beginning of the year there were 13 states which did not tax gasoline. At the present time a tax is imposed in all states except Illinois, Massachusetts, New Jersey and New York. On July 1 the tax per gallon was 5 cents in one state, 4 cents in two states, 3½ cents in one state, 3 cents in 12 states, 2½ cents in one state, 2 cents in 23 states and 1 cent in five states.

The rates of taxation on June 30 and the revenue derived in the first six months of 1925 were as follows:

States and D. C.	Tax rate, cents per gal. June 30, 1925.	Gross tax receipts, Jan. 1 to June 30, '25
Alabama	2	$ 963,520
Arizona	3	401,438
Arkansas	4	1,520,789
California	2	7,514,667
Colorado	2	914,962

3. Changed to 4 cents on July 1, 1925.
4. Changed to 3½ cents on July 1, 1925.

Highway Material Tests Being Made at College

At the request of the state highway commission, a small temporary wooden barracks has been built behind the Engineering building of the University of Wisconsin to be used as a highway testing laboratory. Tests of various highway materials are now being carried out by the university and the commission.

Samples of road material are tested in the laboratory for straight compression and for cross binding strength. Some of the tests are made on roads under construction in order that the mixture may be of the proper consistency. The sample is put in a frame along the edge of the road and then tested on the roadbeds. The result is later examined in the laboratory.

Roadbed samples are also tested during regular intervals of varied periods of days or weeks, and some are put away to be tested after a year or two.

Good Road Notes

Experiments are being conducted by the Illinois state highway department to determine what is the best grass mixture to grow along the shoulders of the state aid roads. Several different mixtures have been worked out, and a number of experimental strips several hundred feet long are being seeded for study and observation.

• • •

Seven and one-half million dollars will be spent on roads in national parks during the next three years, Steven Mather, director of national parks for the United States government, told members of the Motor Car Dealers' association of Los Angeles. A comprehensive picture of national park development was drawn by Mather and his assistant, A. E. Demarary, for the automobile men.

• • •

The real good that a good roads movement can do will never be realized to the full until China has been persuaded to accept the idea.

• • •

Road improvements in 16 states of the South will cost $40,000,000 this year. North Carolina is developing one of the finest highways in the country—a hard-surfaced road running from Wilson to Jacksonville, a distance of 165 miles. When completed, this highway will be the longest asphalt road east of the Rocky mountains.

• • •

A REASONABLE GUESS

"Hobbs Hooble, from down there in Booger Holler, has been away for quite a spell," said Gap Johnson of Rumpus Ridge. "I reckon he was dodging the revenuers, or something that-a-way."

"Did he tell you so?" inquired Gabe Giggery.

"No, but when I sorter asked him if he hadn't been he said it wasn't none of my business."—Kansas City Star.

Striving for the Touch

The professor had asked time and time again for the students to put more personal touch in their themes, so one of the papers which he received ended thus:

"Well, professor, how are the wife and kiddies; and, by the way, before I forget it, could you lend me five dollars?"—Penn Punch Bowl.

PAINTS, DOESN'T DRAW

"Pretty and accomplished, eh? Does she paint and draw?"

"Yes, she paints, dear; but doesn't seem to attract the men at all."

Melancholy Days

The melancholy days are here
The saddest of the year,
When chronic irritation smites
The eye and nose and ear.

Avoiding Argument

Teacher (to small boy)—Is the world round or flat?

Small boy—Round.

Teacher—Why is it round?

Small Boy—Aw, it's flat, then. I won't argue with girls.

Hearing Not Good

"Is your herring good?" asked the woman of the fish dealer.

"Mam?"

"Your herring—is it good?"

"No, ma'am," he replied, "I'm very deaf.

Show-Off

Wifey—Why do policemen swing their "billies" round and round like a windmill, I wonder?

Hubby—I suppose they want to show that they can manage a rotary club.

The Fair Coed

"For my next lesson," said the fair coed, "I have to describe a parabola."

"Well?"

"Where can I see a pair?"

Convenient for Them

Mrs. Kawler—It is a great thing that you have the telephone in your house.

Mrs. Keen—So the neighbors tell me.

WENT DEEP

Old Salt (telling yarn)—I'm a deep-sea sailor, friend, an' ain't used to traveling in deep woods, but at last we got into the pirate cave. Gosh, the gold was all over the floor three feet deep!

Auditor—Say, pardner, whatever yer git into yer git into pretty deep, don't yer?

Talcum vs. Tears

Today girls seldom weep,
And this is why:
The pretty dears must keep
Their powder dry.

No Sech

"Ras, I heah you is gone into business," said Miss Amy Brown. "Yas, dasso," answered Rastus Pinkley. "I'se raisin' chickens an' sellin' 'em."

"What's de matter? Has you los' yo' appetite?"

And Worse

Applicant for Room—What are your terms for students?

Landlady (in college town)—Bums, loafers, dead beats and wonderful promisers.—Colby White Mule.

Two of a Kind

He—Ah, I wish I had some of the cakes my mother used to bake for me!

She—And I wish I had some of the dresses my father used to buy for me!—Sheffield Telegraph.

Snowy linens are the pride of every housewife. Keep them in that condition by using Red Cross Ball Blue in your laundry. At all grocers.—Advertisement.

Adverse Publicity

"Why did Gentry give up politics?"

"No newspaper would denounce him."

Cocoa a "Man's Drink"

BAKER'S BREAKFAST COCOA
Has a full rich flavor delicious to the taste; it is invigorating and sustaining.
Henry C. Sherman, Professor of Food Chemistry, Columbia University, in his book "Food Products" says: "Cocoa, in addition to the stimulating property, due to the alkaloid theobromine, and the flavor which makes it popular both as a beverage and in confectionery, has a considerable food value."

Church Notes

M. P. Church Notes

ST. JOE

Charles H Spurgeon used to tell of a poor woman who framed a check for $12,000 which had been given to her by a dying friend. She had no idea that it was of any immediate use and retained it for a keepsake. Mr. Spurgeon soon turned it into cash for a comfortable competence for her. What a blessing it would be if we could translate God's love and power and promises into present possessions.

Obituary

Golden Mae Vallieu, wife of William Vallieu, was born near McBain, Michigan, March 9, 1908, passed away at her home in Spencerville, Indiana, January 18, 1926, at the age of 17 years, 10 months and 8 days. She was the only daughter of Jesse B. and Elsie M Hughes.

She united with the Church of Christ, in St. Joe, February 23, 1924

She was united in marriage to William L. Vallieu, November 28, 1924. To this union a little daughter was born, Gene Louise, now three weeks old She leaves to mourn her departure a husband, a daughter, mother, brother, three grandparents, a host of relatives and friends

Her father passed to the beyond when Golden was but 21 months old. Her sufferings were great, but she bore them with patience, and at last received a crown in glory.

Card of Thanks

We wish to express our sincere thanks to the neighbors and friends who so kindly assisted us in the sickness, death and burial of our loved one, also for the floral offerings and their sympathy in this hour of bereavement

W. L. Vallieu
Mr. and Mrs. J. C. Vallieu
Mrs. Ella Hughes
Oral Hughes.

School Contests Are Dated

Superintendents and principals of DeKalb county high schools, meeting in Auburn Saturday afternoon in the office of Clarence Green, county school superintendent, decided upon dates for the sectional and final discussion, oration, music and reading league events which aae held annually and in which high school students compete.

It was decided this year that the sectional contest will be held on the night of March 19 and the finals will be held in Auburn on the night of March 26.

There will be six events this year, piano, chorus, which is a new event, quartet, oration, reading and discussion.

The DeKalb county bar association will give $10 in gold to the winner of the discussion, and W. H. Willenar of Auburn, will give $10 to the winner of the reading contest. Prizes will also be given to winners of the musical events.

You can get transfer paper at News office in large or small sheets.

Makes Pumping Up Tires Unnecessary

Chicago, Ill.—F. E. Hughes, Suite 130, 2512 Monroe, this city, has perfected a new air-tight valve cap that enables auto owners to pump up their tires once and never touch them again until punctured or worn out. Leading tire manufacturers, after thorough tests, have approved Mr. Hughes' invention and banished the old theory that air escapes thru rubber. One inflation lasts the life of a tire, and tire mileage is doubled. These caps retail for $1.25 for set of five. The inventor wants agents and will send proof and samples Free. Write him today.

TRUSTEE'S REPORT

The following report of Receipts and Expenditures for the year 1925 has been made by the trustee of Concord township.

FRANK MILLIMAN, Trustee.

ST. JOE NEWS.

VOL. XL ST. JOE DeKALB COUNTY, INDIANA, THURSDAY FEB. 4, 1926 NO. 5

Ed Storer to Head Farmers Institute for Year 1927

Farmers Institute held at Spencerville in the Community Hall, January 28-29. The morning of the 28th found us all buried in snow banks, the worst of the season, drifts three to four feet deep in places, but it takes more than snow banks and blizzards to stop people when they have their minds made to do and it was so in regard to the Farmers Institute.

Forenoon attendance was good considering the weather and an interesting program was carried out, meeting was called to order by chairman, Clyde Hart. Community singing through out. The principal speakers of the first session were our County Agent, Mr. Earl Stinson on Sheep Industry and Prof. Smith of Spencerville on Selection and Grading of Seed Corn. Both gave instructive talks on their respective subjects. My visit to the "Fat Stock Show" by Gale Bowser was well given and interesting. Dismissal for the noon hour.

A warm lunch served by the Home Bureau members of Spencer township in the hall was a great accomodation to the people.

Afternoon session opened with music. Each session opened with community singing led by C. A Woodcox' Soil Demonstration by the Spencerville agricultural class and Seed Corn Demonstration by the St. Joe agricultural class were worthy of special recognition. Address by John J Lacy of the Farmers Guide was well to the point: Subject, "Diversified Farming." There were some fine readings that were well given. Music by the ladies quartette of Spencerville closed the afternoon program. These ladies sang beautifully. Any town can well be proud of a quartette that sings so well. We oft times wonder if home talent is justly appreciated.

Evening entertainment by the St. Joe Dramatic Club at the hour of opening found the house well filled. There were 254 paid admissions. "The Road to the City" was splendidly rendered and every body was pleased. We could justly make personal mention but space will not permit. Even with their handicap of the failure of lights when most needed they were at home and rendered their parts in a natural and becoming manner. The young people's orchestra of St. Joe furnished the music for the evening, rendering a number of fine selections and are worthy of much praise.

Second day, weather cold, five below zero, but a good crowd at an early hour. Here I wish to mention the work done by the schools of Spencer township. Space will not allow me to mention each number seperately but all were well done and show clearly what we can look for in the future. Briefly the second day's program outside the schools was as follows: Mr. Berg from Purdue on "Soils"; Mrs. Fordice, subject "Clubs and their service to Rural People" was well presented and appreciated.

Attendance in the afternoon was near four hundred. Afternoon session opened with music by Concord Men's Octette, which gave some pleasing numbers. Short talks were made by H. M. Widney on Farm Bureau and Prof. Smith on Boys and Girls Club work for the Tri-township. A motion was made and carried that the Tri-township foster a Boys and Girls Corn Club this year. Mr. Berg's subject "Advertising Methods and Plans." Mr. Berg made plain the fact that advertising saves time, closes deals and makes money on the investment. Following this address the Newville Center School gave a playlet which was very entertaining. Mrs Fordice a talk on "Foods," coffee unfit for child life, milk a protective food, oleomargarine not fit for a child, developes invalids.

Election of officers for 1927:

President—Edwin Storer.
Vice Pres.—Harvey Hull.
Sec. Treas.—John Ulm.

There were 97 displays of corn, 59 different persons making the exhibit, 26 boys, 16 girls, 17 men. Best ten ears in the show, grand sweep stakes, $10 silver set donated by Montgomery Ward Co., went to H. M. Widney.

Concord township: 1st $..00, Jerry Douglas; 2nd., $2.00, Robert Johnson; 3rd., $1.00, Jerry Douglas; 4th., Carl Carpenter.

Spencer township: 1st., $3.00, John Ulm; 2nd., $2.00, Bruce Koch; 3rd., $1.00, Ed Pflaummer; 4th., Richard Andrews; 5th., John Ulm.

Newville township: 1st., $3.00, Marion Dermott; 2nd., $2.00, Iva Morr; 3rd., $1.00, W. W Wilder.

Single Ear for Boys and Girls: 1st., $3.00, Iva Morr; 2nd., $2.00, Victor McCoury; 3rd., $1.00, Howard Means; 4th., Dalas Zimmerman; 5th., Lenore Laub.

70 Acre Farm For Rent

70 acre farm east of Spencerville, Ind. All sand, mostly river bottom land, good buildings, would make excellent truck farm Crop or cash rent. Write me or call me at 224 East Berry St., Ft. Wayne, Ind., J. M. Beams.

Letter Received From The Smiths in France

Monsieur et Madame EARLE J. SMITH sont heureux de vous faire part de la naissance de leur fille MADELEINE.

Paris, Le 7 Decembre 1925

Harry Stutz Died at St. Louis

Mrs. James Wyatt of Auburn, was notified last week of the death at St. Louis, Mo., of her nephew, Harry Stutz, which occurred Wednesday night, January 27, after a long illness from heart and liver trouble, following an operation a year ago.

The deceased, who was about thirty-eight years of age had resided in St Louis eight years. He formerly resided at Concord, DeKalb county, with his foster mother, Mrs. Ira Bone. He is survived by his widow, a brother, William Keeler of St. Joe, and Mrs. Bone, by whom he was adopted.

Wm. Keeler attended the funeral on Friday.

Obituary

Sarah C. Morr was born in Ashland county, Ohio, April 3, 1845 and passed from this life January 26, 1926, aged 80 years, 9 months and 23 days.

She was united in marriage to Daniel Morr June 7, 1877. They were given two children, one having passed into eternity in infancy. She leaves to mourn her going, the husband, one daughter, Mrs. Mary Krise, one brother, George Ferrel of Goshen, one grandson, Paul Krise besides other relatives and many friends.

Mrs. Morr has lived in this community most of her life. She has been a hard worker and for several years has had very poor health.

The funeral service was held at the home Thursday morning. Rev. Otis Jones officiating. Interment Riverside cemetery. R. R. Kinsey funeral director.

Card of Thanks

Through the columns of The News we wish to express our appreciation to the friends and neighbors for their kindness and words of sympathy in the death of our loved one.

Daniel Morr
Mr. and Mrs. Howard Krise and son, Paul.

Parent-Teacher Association

The next Parent Teacher meeting will be held at the St Joe school house on Friday evening, February 12. A special program has been arranged and all members are urged to be present.

Community Singing led by Miss Bray.
Song . . . Girls' Glee Club
Talk . . . Rev. Otis Jones
Song . . . Girls' Glee Club
Dixie Jubilee Quartette
Business Session.

Only about 25% of the patrons of the school have paid their dues and become members of this organization. Those who are not members are especially urged to be present at this meeting and join the P. T. A.

Change Of Venue Is Ordered

The suit of the City of Auburn against Walter W. Mountz and the American Surety Co., has been ordered by Judge Endicott sent from the DeKalb circuit court to the Noble circuit court at Albion.

A motion for a change of venue from the county had been filed by the city, which claimed that it could not receive a fair and impartial trial in this county bec use the defendant Mountz has undue influence upon the citizens of the county.

The city, by its attorney, Capt W. D. Stump, is attempting to collect $8,030.53 that it claims Mr. Mountz failed to account f r while he was employed by the city as collector for the water and light department.

Owners of pleasure and truck motor vehicles have just twelve days to provide themselves with 1926 license plates. After February 15th the time limit fixed by the secretary of state, all drivers of motor vehicles who do not have their cars equiped with new plates will be subject to arrest. Let The News make your application at once.

Court Cases Are Dismissed

The suit in the DeKalb circuit court of the St Joe Valley bank against Don W Campbell, William Hablawetz and Charles Brown, on a note, has been dismissed.

Edward Pflaumer, executor of the Emilius Case estate, has dismissed the suit on note in the DeKalb circuit court against William Keeler and Saxe P. Hadsell.

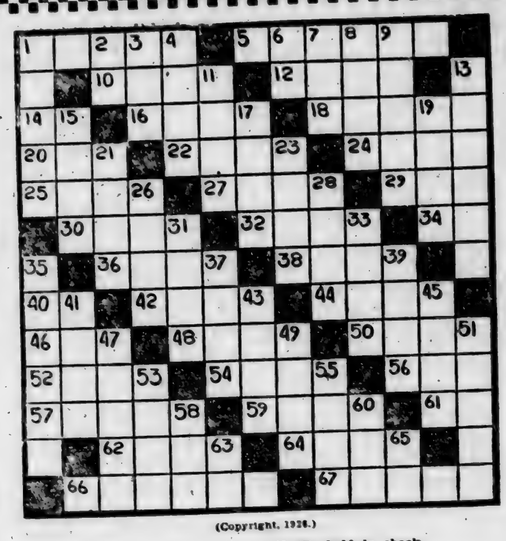
CROSS-WORD PUZZLE



(Copyright, 1926.)

Horizontal.

1—To gain knowledge
5—Certain beverage
10—Needy
12—A form of bread
17—To proceed
16—Pieces out
18—Noblemen
20—Suitable
22—Every one
24—High cards
25—The stem of a certain grass
27—A platform
29—To fasten
30—Necessity
32—Actual
34—New Testament (abbr.)
36—A serving woman
38—Passed away
40—Part of the verb "to be"
42—To gather in a harvest
44—To mend
46—A small spot
48—Actual
50—A ruminating mammal
52—Sketched
54—To ensnare
56—A passageway
57—A citrus fruit
59—The god of love
61—A preposition
62—A verse
64—A word of speech
66—To annoy
67—Certain vegetables

Vertical.

1—A sweet substance
2—Above
3—A deer
4—To couple
6—Either
7—A dandy
8—An annoying insect
9—To select
11—To study with the eyes
13—Opposed to "liabilities"
15—Not closed
17—Mark left by a wound
19—To hold in check
21—To abound in
23—Hastened
26—Expensive
28—Declared
31—A course of eating
33—To guide
35—Part of a horse's equipment
37—To run quickly
39—Sketched
41—A greater quantity
43—Free from mixture
45—Tidy
47—Time (musical)

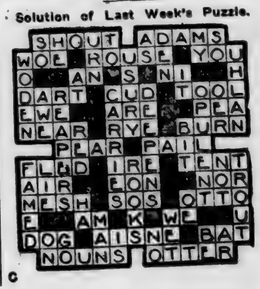
58—Signifying the maiden name of married woman
60—To go to court to gain legal re dress
63—Manuscript (abbr.)
65—A point of the compass

The solution will appear in next issue

Solution of Last Week's Puzzle.



HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

TELEPHONE REALLY WORTHLESS TO HER

Now that even our home telephone haunting ground is being dialized, we call to mind a clash between this mechanical expedient and operatic temperament.

It was Miss Anna Fitzu, of the Metropolitan galaxy, who went so far as to get hold of a real vice president of the New York Telephone company in her demand to have her number changed back to operator service.

"My dear lady," the vice president replied gallantly, "anything within reason. But—"

"I've always had a telephone beside my bed. This idiotic new contraption won't work."

"Extraordinary. I shall have an expert sent up. He will make what repairs—"

"Repairs? Not at all! I had it put there especially so that I could knock it over in case of burglars and I've knocked this silly thing over half a dozen times and nothing ever happened."—New Yorker.

American Tapestries

Tapestries have been woven in the United States. William Baumgarten started looms at 321 Fifth avenue, New York city, in 1893. After several pieces had been finished the industry was moved to Williamsbridge, a suburb, and weavers from Aubusson were engaged. A piece of American tapestry put out by these looms is at present in the Field Columbian museum in Chicago. Another set of wall panels and furniture, costing $20,000, was executed for P. A. B. Widener of Philadelphia. Some wall panels were also made for the directors' room of the New York Life Insurance company.

Removed Harbor Bar

Pearl harbor, in the Hawaiian Islands, is landlocked. The depth is from 50 to 60 feet. Originally there was a bar of water, thus making the harbor useless for large vessels. After the annexation of the Islands to the United States a channel four and a half miles long was dredged from the sea across the bar and coral reef, with a depth of 35 feet. This now makes the harbor available for the largest vessels afloat.

Vanity Rebuked

Emil Fuchs, the artist, in his book "With Pencil, Brush and Chisel," tells the story of a physician, a professor in a medical college, who was raised by Queen Victoria to the rank of physician in ordinary to the queen. The man was exceedingly vain and anxious that everyone should know of the event, so when he next entered the lecture room of the college he took a piece of chalk and under his name wrote his new title. After the lecture as he was leaving, he turned at the door for a last, proud look, and saw that someone had added: "God save the Queen."

American "Rubber" Trees

Most of the popular accounts of rubber trees in Florida relate to Ficus elastica, or the so-called "Assam" rubber tree, the same species that is often grown as a house plant in the North. In Florida and also in California this species grows in the open air and attains a large size, though not always containing rubber. Many experimental plantings of Ficus have been made in tropical countries, but the results have not been favorable in comparison with the Para rubber tree of Brazil, to which all commercial plantings are now confined.

Saint of English Birth

St. Boniface, the apostle of Germany, was an Englishman, whose name was originally Winfrid. He was a native of Kirton, Devonshire. He began his missionary work in 716 and was murdered in Friesland.

Rounding the Cycle

They walked by each other. Their eyes met. They rode together. Their lips met. They went to the minister. Their souls met. They lived together. Their lawyers met.—Blue Jug.

Seen and Heard In Indiana

Mrs. Lou C. Holtsman has been appointed postmistress at Harrodsburg, Monroe county, to succeed Ferdinand H. May, resigned.

James M. Ogden, corporation counsel of Indianapolis in the last city administration, has formally announced his candidacy for the Republican nomination for representative in congress from the Seventh district (Marion county) to succeed Representative Ralph E. Updike.

The significance of Indiana's long fight against tuberculosis will be emphasized for the state at large when approximately 200 representatives of county tuberculosis associations will convene at Muncie, February 11 and 12, in the fifteenth annual meeting and conference of the Indiana Tuberculosis association.

Rear Admiral Robert Ross, U. S. N., retired, who died at his winter home in Cocoanut Grove, Fla., had been the commanding officer of the Culver summer naval school for nine years. The cadets of the academy paid him honor at the hour of his funeral by firing a rear admiral's salute and the flag was flown at half mast.

The horse soon will be extinct in Monroe county unless farmers begin taking steps to prevent this condition. It has been learned from a questionnaire sent out by the county agricultural agent, Walter Rogers. Of 235 horses and mules, owned by 75 men who have responded, more than 80 per cent are more than ten years old.

Combined opposition of banking interests of the state, particularly of Lake county, to extension of clemency to persons convicted of bank robbery in Indiana, has been voiced before the state board of pardons in the filing of a clemency petition by Toney Cazack, Lake county, serving a 10 to 25-year term in the Indiana state prison.

Hugh Poe, twenty-six years old, and out of art school only two years, has been selected to paint the 63 portraits of Culver Military academy boys who died in the World war. The paintings will be hung in the gold star room of the new Culver Memorial building. Poe, a Kentuckian, entered the Indianapolis art institute six years ago fresh from high school.

E. K. Sowash, Crown Point, was re-elected president of the Indiana Grain Dealers' association at the twenty-fifth annual convention in Indianapolis. The following officers were re-elected: Wallace M. Moore, Covington, vice president; Bert A. Boyd, Indianapolis, treasurer; Charles B. Riley, Indianapolis, secretary, and Leonard Taylor Lafayette, a director. H. W. Rieman was named a director.

Newton Rhoades, seventy-eight years old, and one of the widely known traveling men of Indiana, died at his home in the northern part of Hamilton county following an illness of two years. He is survived by the widow and one daughter, Mrs. Harry Meehan. For 40 years he had represented wholesale houses in Indianapolis and during that time his territory had been most of the counties in Indiana.

Ross Lewis of New Albany was elected president of the Indiana Confectioners' association at the thirtieth annual convention in Indianapolis. Other officers selected were Homer J. Williamson of Indianapolis, first vice president; Edward Bromm of Evansville, second vice president; E. E. Wool Nichols of Indianapolis, secretary-treasurer. Members selected for the executive committee were Omar C. Mewhinney of Terre Haute, W. C. Dickmeyer of Fort Wayne, and Oscar Heider of Indianapolis.

The public service commission issued an order requiring the Pennsylvania railroad to operate special miners' trains between Vincennes and the Bicknell coal fields at a cost of $20 in excess of monthly commutation fares for each trip made. A committee of miners of the Bicknell district charged that the railroad refused to run trains for immediate return to Vincennes on days when work was not available at the mines, except at a cost of $120 for each special trip, although formerly the railroad operated special trains without additional charge beyond the commutation fares.

Descendants of the 17 persons who went to New Harmony with Robert Owen, Scotch philanthropist a century ago, took part in the re-enactment of the landing of the "Boat of Knowledge" on January 26. Two descendants of Robert Owen live in Indiana. They are Mrs. Aline Owen Neal, of New Harmony, a granddaughter, and Alfred Dale Owen, of Evansville, a grandson. Among the descendants who trace their lineage to Mrs. M. D. Fretageot, a French woman of culture who came with the Owenites, are 15 New Harmony persons. They are Arthur Emery Fretageot, Mary Fretageot, Mrs. E. V. Johnson, Mrs. Frances Bennett, Jack Hale, Mrs. Mary D. Hale, Mrs. Nancy Boren, Miss Anna Johnson, Mrs. A. L. Stallings and three children.

Dr. Lafayette Page of Indianapolis was elected president of the Indiana Academy of Opthalmology and Otolaryngology at the annual meeting in Evansville. Other officers are Dr. L. D. Brose of Evansville, vice president, and Dr. Samuel F. Adams of Indianapolis, secretary and treasurer.

Senator James E. Watson has received notice from George R. Spaulding, lieutenant commander of engineers, that the preliminary examination and report on a project for improvement of White river up as far as Indianapolis is unfavorable.

IMPROVED UNIFORM INTERNATIONAL

Sunday School Lesson

Lesson for February 7

JESUS HEALS AND SAVES A BLIND MAN

LESSON TEXT—John 9:1-41.

GOLDEN TEXT—"I am the light of the world, he that followeth Me shall not walk in darkness, but shall have the light of life."—John 8:12.

PRIMARY TOPIC—The Blind Man Made to See.

JUNIOR TOPIC—Jesus Helps a Blind Man.

INTERMEDIATE AND SENIOR TOPIC—What Jesus Did for the Blind Man.

YOUNG PEOPLE AND ADULT TOPIC—Jesus Christ the Light of the World.

I. Working the Works of God While It Is Day (vv. 1-5).

1. The Disciples' Problem (vv. 1, 2).

In their minds all affliction, negative and positive, was God's retribution for sin. Therefore, they argued that this man's blindness proved his sin. They recognized, too, that the effect of sin is sometimes hereditary. No doubt they inferred this from the second commandment (Ex. 20:5). The implication is that they held the view that men have a pre-existence, and that suffering in this life may be the result of sins committed in that pre-existent state.

2. The Lord's Answer (vv. 3-5).

The Lord affirmed that in this case there was neither sin on the man's part, nor that of his parents, but that it was an occasion for the display of the works of God and that He had come to execute this task while it was day, because the night would come when no man could work. Since Christ is the light of the world; the task which challenged His attention was the opening of this man's eyes. The purpose of Jesus in working miracles was not a mere exhibition of miraculous power, but "to illustrate in the physical sphere His power in the spiritual sphere." This man's absolute helplessness in bettering his physical condition is illustrative of man's utter helplessness in the salvation of his own soul. The natural man is blind and dead (II Cor. 4:4; Eph. 2:1). God by His spirit must quicken the soul dead in trespasses and sin before it can see to take hold on Christ, the remedy for sin.

II. The Man's Eyes Opened (vv. 6, 7).

1. The Means.

Jesus spat on the ground and made clay of the spittle and anointed his eyes. Observe that the means used in this miracle were little less than foolish in themselves. The object must have been to teach this man the utter inadequacy of the means to the accomplishment of the end, that he might be caused to look from the means to the One who used them, that he might be convinced that the power was of God.

2. His Obedience (v. 7).

He immediately obeyed. He did not stop to question the reasonableness of the command.

III. The Man's Testimony (vv. 8-34).

In his testimony we have a fine example of the development of faith. The opening of this man's eyes aroused inquiry among his neighbors. When a man's spiritual eyes are opened, there will be a stir among his friends.

1. He Testified to His Personal Identity (v. 9). This was very easy. His self-consciousness enabled him to know that he was the same man who was born blind.

2. He Testified as to How It Was Done (vv. 11-15). So definite was his experience that he was able to tell just how it was done. When he repeated it there was no conflict.

3. He Testified That the One Who Opened His Eyes Was a Prophet (v. 17).

4. He Testified That This Healer No Doubt Was Sent of God (vv. 30-33). He declared that He was the greatest worker of miracles who had appeared since the world began.

5. He worshiped Him as the Son of God (v. 38).

IV. The Results of His Confession.

1. As to the People, They Were Divided in Sentiment (v. 16). Some believed He was from God because of His works, others that He was a sinner because He did His work on the Sabbath day.

2. As to the Man, They Cast Him Out (v. 34). Faithful testimony will often result in ostracism from even religious people.

3. As to Jesus, He Found the Man (v. 35). Being cast out by men he found himself in the arms of Jesus. It is quite often true that separation from human fellowship results in more vital fellowship with Jesus. He was led on to a deeper faith. He first saw Him as a miracle worker, then as a prophet and finally as the Son of God and when he perceived Him to be the Son of God, he worshiped Him.

Religion

Religion, in its purity, is not so much a pursuit as a temper; or rather it is a temper, leading to the pursuit of all that is high and holy. Its foundation is faith; its action, works; its temper, holiness; its aim, obedience to God in improvement of self and benevolence to men.—Tryon Edwards.

Satan's Deadliest Foe

Time well employed is Satan's deadliest foe; it leaves no opening for the lurking fiend.

POINTS ON KEEPING WELL

DR. FREDERICK R. GREEN
Editor of "HEALTH"

(©, 1926, Western Newspaper Union.)

TRENCH WARFARE

IF ALL this stuff about germs is true, how does it happen that anybody is alive?

The question is a perfectly fair one and its answer makes a strange and wonderful story. If we are, at all times, surrounded by these invisible carriers of death, why isn't everybody dead? Because of the ability to resist and overcome disease which the human body has acquired in past ages.

But how does the body defend itself against its outside enemies? Very much the same as the nation defends itself against invaders.

The body, in health, is like a nation at peace. There is no excitement, no disturbance. The body is made up of millions of cells, just as the nation is made up of millions of people. But when everything is peaceful, each cell goes about its own business. The red blood cells go about their business of carriers of traffic, hauling oxygen into the cells and hauling carbon dioxide out to be dumped, traveling on the main roads and paths formed by the arteries and veins.

On the roads are found a few policemen, in the form of white blood cells, sauntering along the roads, keeping the peace and watching for the stray criminal. But the reserves are in the barracks in the bone marrow, the spleen and the lymph glands. Any occasional invader can be taken care of by the police.

But suddenly an important position in the lungs is captured by a strong force of tuberculosis germs. They at once begin to increase in numbers, living off of the surrounding country and throwing poison gas into the body in the form of the toxins or poisons which they make.

Then the order for mobilization is issued and the reserves rush out of their barracks and down the roads to the point of attack. If they are strong enough, they drag the invaders out, carry them to the frontier and throw them out of the country. If they can't do this, they do just what the Allies did in Flanders. They "dig in" and throw up a wall around the invading force to keep them from spreading. Just the same thing, only in France it was called a "line of defense" and in the body it is called an "inflammatory reaction." Finally, the white cells build barbed-wire entanglements in front of the trenches to surround the enemy, only they are called connective tissue formations.

Then the white-celled troops, like the French, say: "They shall not pass."

CHICKENS AND SUNLIGHT

MUCH has been said in these columns about sunlight. This is not strange when one considers that more attention has been paid to sunlight by scientific men all over the world in the last five years than has been given to the subject in the preceding century. It almost seems as though the sun was a recent discovery and that no one had known of its existence until recently. Today we are beginning to realize that the sun, at least so far as our universe is concerned, is literally and actually the center and source of all life. We can understand now why the old Persian magi or wise men worshiped the sun as the greatest power and source of good in the universe.

But perhaps this hasn't interested you. "All this stuff about ultra-violet rays is just another case of those scientific fellows talking about something nobody can see and that probably doesn't exist." Maybe even the newly discovered fact that sunlight, plain everyday sunlight, will change a pale, thin, rickety child into a plump, rosy, healthy one doesn't interest you either. "Another of those doctor's fads. Nothing in it."

All right. Then maybe you will be interested in chickens. Now there's something parctical. If you can raise chickens that are bigger, fatter, heavier and that will sell for more in the market, now that's really talking. That's practical.

Very well, let's talk about chickens, then. Prof. E. B. Hart of the Wisconsin state agricultural station took two healthy chickens of the same age and variety. He put them on exactly the same diet. One chicken was exposed to direct sunlight for half an hour each day. The other was kept out of the sunlight entirely. At the end of four weeks, the bird that had had the proper food with sunlight had gained 148 per cent in weight and had grown proportionately, while the chick that had had proper food but no sunshine had only gained 23 per cent. Half an hour of sunshine a day had made one bird grow six times as fast as the other!

Then Professor Hart tried another experiment. He took two groups of chickens of the same size, age and stock. He fed both groups on a diet that would ordinarily produce rickets. One group got ten minutes of sunshine a day. The other group got sunshine all day. At the end of six weeks the ten-minute group all had rickets and the all-day group were all healthy and averaged 50 per cent more weight than the others. The sunshine kept them healthy in spite of poor food.

Land $12,000 a Foot

Land in the heart of Melbourne, Australia, has been sold at $12,000 a foot; a record.

Advises Middle-Age Women

Rockford, Ill.—"About five years ago at middle life, I was in very poor health. I suffered a great deal and was oftentimes very dispondent. I had dizzy spells and was nervous all the time. It would be impossible for me to exactly describe my feelings. I tried several remedies which gave me no relief and not until I began taking Dr. Pierce's Favorite Prescription did I get any better, but it helped me right away. I continued taking it, and had comparatively no more trouble."—Mrs. Hattie Bennett, 1437 Myott Ave.

Write Dr. Pierce, President Invalids' Hotel in Buffalo, N. Y., for free medical advice. Send 10c if you wish a trial package of the Prescription Tablets.

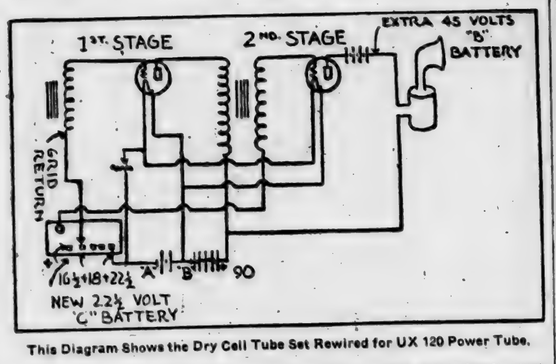
Diagram Showing How to Install the UX 112 Tube, Using Storage "A" Battery.



This Diagram Shows the Dry Cell Tube Set Rewired for UX 120 Power Tube.

By EDGAR H. FELIX
In Philadelphia Record.

The superior quality of reception obtainable with loud volume by the substitution of UX 112 and UX 120 tubes for UV 201-A and UV 199 tubes, respectively, in the last stage of audio-frequency amplification, makes their installation of interest to every owner of a receiver having two or more stages of audio-frequency amplification. Several important changes must be made in the wiring of the receiving set to adapt the circuits and power supply to the needs of the new tubes.

The UX 112 is the big brother of the UV 201-A tube. The filament current consumption of the new tubes is half an ampere, only double that of the economical UV 201-A. To secure satisfactory results with the UX 112 tube, 135 volts of plate potential are required, as compared with 90 volts usually used with the UV 201-A. Furthermore, unless the 9 volt "C" battery is used in connection with it, the UX 112 is a heavy user of "B" battery current and distorts considerably. By the addition of the "C" battery, however, a large size "B" battery can power this tube for a year or more. It is not necessary to use an extra large or heavy duty size "B" battery for furnishing the extra 45 volts required by this tube.

The method of connecting an extra 45 volt "B" battery is as follows: (1) Examine the socket which holds the tube used in the final stage of amplification and identify the plate terminal, usually marked "P." (2) Disconnect the wire attached to this terminal. (3) Connect the positive terminal of the new extra 45 volt "B" battery to the plate socket terminal. (4) Connect the negative terminal of the new "B" battery with the wire which you have just disconnected from the plate socket terminal. This gives a total voltage of 135 volts on the UX 112 tube, but it does not increase the plate voltage of the UV 201-A tube in the first stage of audio-frequency amplification.

Adding the Extra "C" Battery.

A somewhat similar method is pursued in adding the extra 4½ volt "C" battery. The new "C" battery is connected in series with the one already installed; the existing connections of the latter with the first stage of amplification are not disturbed. The secondary of the second audio-frequency transformer, however, is disconnected from the —4½ volt terminal of the original "C" battery, a new lead being run from that secondary terminal to —9 volt terminal of the new "C" battery.

For dry cell tube sets using UV 199 tubes, the new UX 120 is used in the last stage. This also requires 135 volts plate potential obtainable from a large size "B" battery. The same instructions for connecting the extra 45 volt "B" battery for the UX 112 apply to the UX 120.

The UX 120 requires a 22½ volt "C" battery. Substitute for your present "C" battery a 22½ volt tapped "B" battery made up of large size cells. This assures you of long shelf life. There is practically no current withdrawn from the "C" battery, and consequently, its usefulness is determined by its shelf life.

A "C" battery is connected in the reverse direction as compared with a "B" battery. The "B" battery is connected with the plus to the plate and the minus toward the filament. The "C" battery, on the other hand, is connected with the negative terminal toward he grid and the +22½ volts to the filament. The full voltage of the battery is impressed upon the grid if the grid return is made to the minus connection of the battery, since its plus lead is connected with the filament. The usual circuit, starting at the grid, runs from the grid socket terminal to the secondary of the audio-frequency, transformer; the other terminal of the transformer secondary to the correct terminal of the "C" battery, while the positive of the "C" battery goes to the negative "A" battery lead.

The UV 199 tube used in the first stage of amplification should have a 4½ volt negative bias, but does not work with a 22½ volt bias. Three cells give the required 4½ volts.

Securing 4½ Volts for First Stage.

The novice may be confused by the markings on the battery when he is directed to connect the grid return of the first amplifier tube with the +18 terminal of the "C" battery in order to obtain 4½ volts negative bias. As compared with +22½, however, 18 volts is 4½ volts less or negative. Consequently, to secure a regal bias of 4½ volts, we connect the grid return to the 18 volt tap of the 22½ volt battery. The 21 volt tap is 1½ volts negative, as compared with +22½; the 19½ volt tap, 3 volts negative, and the 18 volt tap, 4½ volts negative. If you now have no "C" battery in the first stage, simply disregard this part of the process.

The grid return from the secondary of the second stage transformer is connected with the negative terminal of the 22½ volt battery. This gives 22½ volts negative bias, the amount required by the UX 120. The method of identifying this terminal has already been described in connection with the instructions for installing the 4½ volt "C" battery for the UX 112

National Radio Fading Tests Start February 8

Dates for the national tests of radio reception to determine the causes of static and fading were announced recently after 4,000 of the 4,500 designated observation stations had expressed a willingness to take part in the survey, which is being conducted by the Stewart-Warner Speedometer corporation in co-operation with the Northwestern university. The first test will be held on the night of February 9, from 8 to 11 p. m. central standard time. The second and third will be on the two succeeding nights at the same hours. Subsequent trials will be held throughout the winter, should the data obtained indicate that real progress in a search for the causes of these two major radio annoyances is possible.

It was originally planned to hold these tests in January, but owing to the international tests scheduled for that month it was decided to hold the fading and static tests at a later date.

Most of the observations will be made by broadcast listeners using standard receiving sets and depending for the accuracy of their reports upon their own ears. However, to insure the scientific accuracy of the result, 20 control stations equipped with electrical measuring devices and automatic recorders will be placed in the principal broadcasting centers of the country.

Safety First!

Safety first in testing a new circuit. Place some sort of a protective device in series with the negative lead of the B battery. If a short circuit exists between the filament and high potential B battery the protective device will give warning and protect the tubes.

The Storage Battery

The storage battery of a radio set requires greater attention than the automobile battery, because there is no generator to keep it charged as the current is used.

Dash and Freedom in New Fur Coats

Airy Grace, Flowing Lines Prominent in Garments for Winter.

Movement; the new feeling of dash and freedom; the spirit of airy grace and flowing lines—all that the word kinetic expresses, is to be found in the world of furs. This newest and smartest of fashion's themes is easily achieved in frivolous crepes and fly-away chiffons. But to express it in furs requires the utmost and the most masterly skill, says a fashion writer in the Philadelphia Record.

However, it has been done, and done delightfully. Often the development of the pelts is all that is needed to bring out this new theme. This is particularly true of mink. Its beautifully blended colorings are so worked that a feeling of movement is artistically expressed, even when the straight-line models are used. Furs, as a whole, are still slender. You may have godets and flares if you

Coat of Jacquard Fur Is One of the Smartest Models.

wish, but these are shown with reserve so that the silhouette is never allowed to assume bulky proportions.

Mink Is Aristocratic.

A Patou model of finest selected Eastern mink pelts, with all the richly aristocratic appearance of the regal sable, is a wonderful symphony in brown tones. Godets, cleverly and effectively placed, call attention to the kinetic theme, yet so great is the skill with which they are applied that the garment is as slenderly youthful as any deb could wish. This godet flare is only one instance of the genius of Patou, who has given us several models of this type. A roll collar shows the pelts worked in an opposite way with a puffed effect which is very becoming. The same arrangement is shown on the lower part of the sleeves, which gain distinction by hot having cuffs.

Mink is extremely smart this season, both for matron and maid. It is always elegant, in the best of taste and since the kinetic idea is being featured, it is decidedly youthful. One unusual model has a high-standing collar drawn through a self loop at the front. But as a rule collars are of the shawl type, generously deep, with one end coming down to a point, which sometimes reaches to the beginning of the front flare.

A very new model, which is a surprise because it made its appearance so suddenly, and after we thought everything had been decided, is ultra smart and has the chic of Paris in every line. It is a platinum moire caracul with a collar of finest Russian squirrel with that blue tint which is so ravishingly lovely. This follows an entirely new line, quite different from anything we have had. One end is brought down the right side, caught under a flap of the caracul at the waistline and drawn out in a dashing flare to the hem.

It is a stunning adaptation of the tuxedo model which so many fashionable members of the younger set are wearing. Another instance is shown in softest Siberian squirrel, always so flattering and so charming. It is trimmed with platinum fox, in cuffs and tuxedo collar, one side of which reaches the hem. Worn with it is a little hat of the new Paris orchid velours, becomingly rolled off the face and enriched with a rhinestone pin. With such an outfit any deb is ready for a season of conquests and will be certain to leave a trail of broken hearts behind her.

The New Tuxedo Model.

One wonders who the designer of the new one-side tuxedo really was. A number of Paris houses claim it. And it is certainly amazingly popular. It has even spread to frocks, or perhaps that was where it originated, who knows? A very smart Philadelphia matron is wearing it in platinum gray Vionnet crepe with the trimming in squirrel. And a noted stage favorite features it in much the same materials, only she chooses cocoa crepe with mink as the "tuxedo."

There is assuredly no more delightful way of showing one's acquaintance with the kinetic theme. With every step of the wearer and even if she doesn't step at all, but remains standing gracefully, this side flare gives the sense of ultra-grace and movement.

There has been such a craze for raccoons and silver muskrats among the younger set this season that many wonder if leopard is no longer smart. Indeed it is, and vastly so. But one can buy two raccoons for the price of one leopard. And naturally one always sees more of the less expensive garments. There is no denying the distinction of leopard and it will never lose its vogue any more than Hudson seal or ermine.

Rich Glorious Colorings.

They are even showing leopard cat and angora leopard this season in an effort to keep up with the demand for this striking pelt. But there is nothing to compare in rich, glorious colorings with African baby leopard. Its tawny shadings and beautiful markings make it a fur which will never lose its appeal.

A delightfully kinetic flare is formed on a stunning leopard model by a border of selected natural fitch which comes up in a point at the front. The fitch is also used for flare cuffs and for a collar which follows a modified one-side trimming idea and rolls in a deep point to meet the flare. Such a coat is the last word in chic and is something to gladden the heart of any deb or young matron. It may be worn with a tailored felt of periwinkle blue or a draped turban of Lanvin green, if for daytime wear. But leopard coats of this type are so wonderfully handsome that they go very smartly to evening affairs. And then one might choose a gold lace poke if something more elaborate than felt is desired.

Funny, isn't it, how felts go everywhere? Remember what a short time ago it was that a felt hat was considered proper only for business and school wear? And now they go to the most stately affairs. And did you read about the furore they had in London recently because girls remove their felt hats from their bobbed heads as they enter a restaurant, exactly as their men friends do? And they tuck them nonchalantly under their arms as they proceed tableward. Parisians have been doing this for some time and it didn't create any excitement at all. But then, we have grown accustomed to thinking of Paris as the place of strange happenings.

Beaver and Leopard.

Beaver is also a very pleasing accompaniment of leopard. It tones in wonderfully with the golden brown-red. By the way, have you noticed how especially becoming leopard is to a red-headed girl? What a pity every girl with Titian locks can't have one.

A model which is attracting much attention is of African baby leopard trimmed with golden Alaska beaver which is so much handsomer and thicker and silkier than any other beaver could possibly be. A deep collar rolling in a point to the border which is drawn smartly up at one side; bell cuffs and the wide border of this enchanting fur make this coat a thing of everlasting beauty.

Heim, who has created so many handsome models this winter, reverses the usual process and uses leopard for a trimming fur. It appears on a coat of natural korova, as a narrow collar coming down in a point on one side to meet the border which is much

Comfy Coat of Muskrat, One of the Winter Favorites.

higher on the right side than the left. A saucy little tab of leopard is caught with a buckle at the waistline.

The outstanding model of Bechoff's collection is a cocoa American broadtail, which is an immensely popular pelt this season. It is featured in a number of coats shown for the women who must use it for both dress and business wear. And cocoa seems to be a high favorite in colors. It tones in with almost any other shade better than anything, perhaps, except black. And black is noticeable by its absence this season. With the exception of the seals, both Hudson and Alaska, there is little black. And even women who formerly clung tenaciously to Hudson seal, have now decided upon the more youthful cocoa or platinum shades.

THE KITCHEN CABINET

(© 1926, Western Newspaper Union.)

The boast of heraldry, the pomp of power,
And all that beauty, all that wealth e'er gave,
Await alike the inevitable hour:
The paths of glory lead but to the grave.

A VARIETY OF DISHES

For a change when preparing a brace of rabbits, try:

Rabbit Pie (Missouri Style).—Skin and disjoint the rabbits and cover with boiling water. Add one sliced onion, a slice of bacon, a bay leaf, one teaspoonful of salt, a dash of pepper, and a tablespoonful of kitchen bouquet; simmer tightly covered until tender. Remove the meat, thicken the stock with flour, add any more seasoning needed and strain over the meat. Place a biscuit dough over the meat and bake half an hour.

Potted Pigeon.—Clean, wash and truss the pigeons, season and brown in a small amount of fat—pork fat will be best; add boiling water to cover, with one chopped onion, one bay leaf, a slice of carrot, a sprig of parsley and salt to taste. Cook until tender, remove the pigeon and thicken the liquor with flour mixed with enough cold water to blend, let boil, then pour over the pigeons and serve. The pigeons will require about two hours cooking, depending upon their age.

Baked Ham.—Cover a ham with cold water and bring to the simmering point, simmer gently for two or three hours, until the skin loosens, then put the ham well drained and dried into a baking pan, after removing the skin. Mix a teaspoonful of mustard in two cupfuls of boiling water, add one cupful of vinegar and pour the mixture over the ham, heating frequently during the baking. When the ham is well baked, cover with brown sugar, press down firmly, adding a few cloves; dredge the top with flour and return to the oven to brown. The cloves will flavor the ham better if cooked in it during the whole time of baking.

Baked Pork Chops.—Chop some of the fat from the chops very fine, add two tablespoonfuls of the fat to one and one-half cupfuls of bread crumbs, a fourth of a cupful of boiling water, salt and a beaten egg. Lay six chops in a baking pan and cover with the dressing, adding pepper to taste. Cover the bottom of the pan with boiling water and bake in a moderate oven, basting occasionally, one hour.

Apple Preserves.—Make a sirup of a pound of sugar, a pint of water, the grated rind of a lemon, the juice of a lemon; let boil briskly five minutes. Drop quarters of apple into the sirup and cook gently until clear; then set aside to cool. Boil the sirup down, arrange the apple in glass jars and pour over the fruit in the jars. Seal tightly.

Winter Sandwiches.

During the winter more nourishing sandwich fillings are enjoyed.

Deviled Ham Sandwiches.—Mix one can of deviled ham with one or two finely chopped pickles and moisten with mayonnaise or cooked salad dressing. Spread thin slices of bread with mayonnaise, and an equal number very thinly with prepared mustard; spread the latter with the ham mixture and cover with the remaining slices. Press edges together, trim off the crusts and shape as desired. Serve with potato salad and coffee.

Chicken and Nut Sandwiches.—Finely chop the white meat of cold boiled chicken. Season with salt, pepper and moisten with mayonnaise dressing. Shape thin slices of white bread with a crescent, spread thinly one-half the slices with mayonnaise and very thinly sliced almonds or Brazil nuts. Spread the remaining half with the chicken mixture; put together in pairs, press the edges to keep them in shape, arrange in baskets or on sandwich plates. Serve with ripe olives, sweet pickles and dainty cheese balls.

Onion and Bacon Sandwiches.—Broil thin slices of bacon until brown, drain, chop fine. Peel and finely chop one southern onion—there should be one part bacon to two parts onion. Mix thoroughly and moisten with mayonnaise dressing. Spread thin slices of bread with creamed butter, then with mayonnaise; spread half of the slices with the prepared ham, press together and cut into triangles.

Hot Chicken Sandwiches.—Chop medium fine some cold cooked chicken. Have ready rounds of toast, hot and buttered. Slightly moisten the chicken with hot chicken gravy and spread half the rounds with the chicken mixture. Cover with the remaining rounds and arrange on hot plates, pour over the hot gravy and serve at once.

Chocolate Sandwiches.—Melt one-half cupful of broken chocolate, add one-fourth cupful each of sugar and hot water or cream. Cook five minutes, stirring constantly. Add a teaspoonful of vanilla and two teaspoonfuls of butter. When slightly cool spread on sponge cake, lady fingers or white buttered bread. Cut into fancy shapes.

Loosen Up That Cold With Musterole

Have Musterole handy when a cold starts. It has all of the advantages of grandmother's mustard plaster WITHOUT the blister. Apply it with the fingers. You feel a warm tingle as the healing ointment penetrates the pores, then a soothing, cooling sensation and quick relief.

Made of pure oil of mustard and other simple ingredients, Musterole is recommended by many nurses and doctors. Try Musterole for bronchitis, sore throat, stiff neck, pleurisy, rheumatism, lumbago, croup, asthma, neuralgia, congestion, pains and aches of the back or joints, sore muscles, sprains, bruises, chilblains, frosted feet, colds of the chest. It may prevent pneumonia and "flu."

Notice Of Sale Of Real Estate

The undersigned administrator of the estate of Jacob Gratz, deceased, hereby gives notice that by virtue of an order of the DeKalb Circuit Court of Indiana, he will at the hour of one o'clock P. M. on the 25th day of February, 1926, at the residence of the following described premises, offer for sale at public auction all the interest of said decedent in and to the following described real estate to wit:

The east half of the northeast quarter (½) of section thirty-six (36) township thirty-three (33) north, range thirteen (13) east, DeKalb County, Indiana; also the west half (½) of the northwest quarter (¼) of section thirty-one (31) township thirty-three (33) north, range fourteen (14) east in said DeKalb County, Indiana.

Also a part of the south half (½) of the southwest quarter (¼) of section twenty-five (25) township thirty three (33) north range thirteen (13) east, described as follows:—Commencing at the southeast corner of said southwest quarter of section twenty-five (25); thence west on the south boundary line of said section, forty-one (41) rods; thence north parallel with the west boundary line of said section eighty (80) rods; thence east forty-one (41) rods; thence south eighty (80) rods, containing twenty and one half (20½) acres of land, all of said real estate being in DeKalb County and State of Indiana.

And the following described real estate in Allen County, State of Indiana, to wit:—

A tract of land described as follows: Commencing at the river St. Joseph on the section line between section fourteen (14) and section eleven (11,) running thence west to the corner of lands formerly owned by John McCrory; thence north on the line of said land so owned by John McCrory to the northeast corner thereof; thence east to the bank of the St. Joseph river: thence down along the meanderings of the river to the place of beginning; said tract containing twenty (20) acres of land more or less and being in section eleven (11) township thirty-two (32) north, range thirteen (13) east in said Allen County, Indiana and being the same real estate conveyed by James McCrory to Jacob Gratz on the 25th day of May 1891, and which deed was recorded in deed record 125 on page 360 thereof of the Deed Records of Allen County, Indiana.

Said sale will be made subject to the approval of said court, for not less than ⅔ of the appraised value of said real estate and upon the following terms and conditions to-wit: At least one third of the purchase money in cash, the balance in two equal installments payable in six and twelve months respectively, evidenced by notes of the purchaser, bearing 6% interest from date, waiving relief, providing for attorneys fees and secured by mortgage on the real estate sold.

The Administrator reserves the right to reject any and all bids.

S. D. Steffey,
Administrator.

Atkinson & Husselman, Attys.

SPENCERVILLE

The C. C. Club will meet on Friday with Mrs. Ida Hahn.

Robert Hollabaugh is confined to his home on account of sickness

Paul Dean and wife took Sunday dinner in the B. F. Markle home.

Kenneth Rhoades and Charles Timmerman visited the high school Monday.

R. U. Bowser visited his father, Theodore Bowser near Huntertown Monday.

Wm. G. Erick has been appointed by Judge Endicott as guardian of Mariah Hobaugh who, because of infirmities, is unable to look after her property. Mr. Erick was directed to file $2,000 bond. The petition for a guardianship was filed by Wm. C. Hobaugh.

See the widow at News office for Valentines.

R. U. Bowser and wife visited their son, Roy Bowser and wife at St. Joe, Sunday.

Miss Leila Holton, of Rehobeth spent several days last week visiting George Beams and wife.

Mrs. Cleo Reed and Miss Gaylon Goldsmith attended the Jello demonstration at Auburn, Monday.

Harry Denter, wife and son, Billie, of Fort Wayne, spent Sunday afternoon in the Jerry Markle home.

The Home and Foreign missionary society of the Lutheran church will meet today with Mrs. LeAnna Steward.

Kermit Steffey, who is attending college at Muncie, spent the week-end here with his parents, Rev. and Mrs Steffey

Mrs. William Goldsmith, who has been doing institute work in the southern part of the state, returned home Saturday.

Remember the Curie Auction begins at 10 o'clock, Feb. 6th. Be there and get your share of bargains.

Ray Farver and family, Mr. and Mrs. Potts and babe and Harold Farver, were Sunday dinner guests of Lem Farver. Mr. and Mrs. Emmett Armstrong were afternoon guests in the home.

Announcements were received here recently of the arrival of a little daughter born to Mr. and Mrs. Isiah Smith, at Richmond, name Audree Bertaline. Mrs Smith will be remembered as Miss Marie Miller.

Walter Carr and family of near Auburn, Mrs. Vernie Kelley and children, were Sunday dinner guests at the home of Mrs. Del Smith Mrs. Lena Zimmerman and son, Dallas, were afternoon guests in the same home.

David Shook, age 63, brother of Dr. Benj Shook of Spencerville, died Saturday evening at his Auburn home, following the third stroke of paralysis. At the time of his first stroke he was serving as deputy Auditor under his brother, Frank. He was born in Starke county, Ohio, and when but four years old he came to this county with his parents and settled in Fairfield township. He was a teacher in the rural school for 20 years. Besides the widow and five children are four brothers Burial was made Tuesday afternoon.

NEWVILLE

Alfred Smith was a Fort Wayne visitor, Thursday.

A real Valentine display at News office—and priced cheap.

You can get transfer paper at News office in large or small sheets.

Our mail carrier did not get to Newville Thursday, on account of snow drifts we suppose.

Iven Smith and wife are the parents of a little daughter born last week in the Souder hospital at Auburn.

Curie's Auction Feb. 6. See bills for particulars.

Attendance at the Christian Sunday School last Sunday, 89, collection $5 00; U. B. attendance 108 and offering we did not learn.

Mrs. Minnie Hatch fell Saturday injuring her hip severely. Frank Snellbaker took her to Garrett to be with her mother a few days.

Eugene Webster was taken seriously ill last week and was taken to the Garrett hospital. Reports say he is better at this writing.

Willie Miller received the sad news Saturday evening that his sister, Mrs. Marth Stoffer had died at her home at VanWert. Deceased was for a number of years a resident of Newville and was at that time the wife of Thomas Williams, our leading merchant. She was a member of the U. B. Church and has many friends here are sorry to hear of her demise. Willie Miller and wife and Byron Miller went to Groverhill, Ohio, Monday to attend the funeral.

Zez Confrey Mixes Salads and Songs

Zez Confrey, famous composer of the musical classic, "The Kitten on the Keys," is hailed by his friends as the most versatile of America's popular song composers. Those who know him say he can mix a salad or a song oddity with equal success, which is saying considerable since his portrayal of the delightful pranks of a certain young feline frisking over the ivories has been recognized as the model of American syncopation.

Zez Confrey.

But Mr. Confrey has other "firsts" in his repertoire, his acquaintances declare. Country bred, he is a judge of horse flesh, and also knows a good cigar.

The simple life is Mr. Confrey's idea of happiness. Every so often Manhattan gets too crowded for him and he boards a train for the country and the companionship of a certain murmuring brook. Inevitably he comes back with one of the merry tunes for which he is noted.

A bachelor, Zez keeps open house for his friends. If he invites a few of the boys over for a midnight supper, he does the cooking himself. Invitations to his lively little dinners are sought after. There are two dishes to which Mr. Confrey is partial. So are his friends. His recipes for the two follow:

Royal Eggs With Mushroom Sauce.

12 eggs	1½ cup evaporated milk diluted with
Salt	1½ cup meat stock (This may be prepared from bouillon cubes)
Pepper	
1-3 pound mushrooms	2 tbsp. flour
1 slice pimento	Parsley
2 tbsp. butter	
12 slices toast	

Saute the mushrooms in two tbsp. butter, taking care not to burn; make a white sauce of two tbsp. butter, flour, evaporated milk and meat stock. Cook five minutes. Add the cooked mushrooms and chopped pimento. Break eggs and drop into hot fat, being careful to keep egg in a globular mass. Just as soon as they are a golden brown lift out and drain. Place an egg on each piece of toast. Allow two pieces for each serving. Pour over all the mushroom sauce and garnish with parsley.

Pineapple-Cheese Salad.

10 slices pineapple	Crisp lettuce leaves
1 cup cream cheese	1 tbsp. pineapple juice
¼ cup chopped nuts	1 tsp. sugar
2 tbsp. evaporated milk	Green and red mangoes
	Creamy salad dressing

Combine the cheese, nuts, evaporated milk, pineapple juice and sugar, and blend into a smooth mass. Cut pineapple circles in half. Spread cheese mixture on a slice of pineapple and press the other half circle of pineapple on top of cheese as one would a slice of bread in making a sandwich. Cut diamonds or triangles from green and red mangoes and press into the edge of the cheese mixture between the pineapple. Lay two of the prepared pieces of pineapple on a crisp lettuce leaf. Serve with creamy salad dressing. This serves five.

Khedive's Ex-Chef Gives Cooking Tip

Great chefs are born, not made. Rarely if ever do they rise to the heights in their profession by dint of perseverance. In Europe and the East a chef with the true gastronomic instinct is treasured jealously. He expects and obtains the treatment of an ambassador. His dishes are the pride of his master, to be boasted of to friends in the cafes and bazaars.

H. Gedojian.

Such a chef is Haroutoun Gedojian, sometime chef to the family royal of the khedive of Egypt, now the owner of a bizarre gold coast restaurant in Chicago. In his forty-three years as a chef extraordinaire, Haroutoun's word has been law in the cuisines of three Egyptian princes and one princess, the mother of the khedive. When Lord Kitchener was sirdar of Egypt, before the trouble in the Soudan, Haroutoun cooked for him.

One of Kitchener's favorite dishes, according to Haroutoun, was schischkabb, a dish made from milk-fed baby lamb. Prince Jamiel, another of his masters, was particularly fond of dried cream and honey, a preparation which is one of Haroutoun's zealously guarded secrets. Prince Saad Pasha was a keen admirer of a confection Haroutoun makes entirely out of flour, butter and nuts.

In many of his admirable dishes, Haroutoun uses evaporated milk, which is simply fresh cow's milk sterilized in cans and with sixty per cent of the water removed. Because of a homogenizing process through which evaporated milk is put, the fat globules in the milk are broken up into microscopic particles and distributed throughout the milk, where they remain in homogeneous suspension.

This breaking of the fat globules gives a distinct buttery flavor to every drop of the evaporated product, a flavor which ordinary market milk does not have. Haroutoun says he uses evaporated milk in preference to market milk in the preparation of all sorts of baked dishes, as well as in cooking.

TOMORROW MORNING

By DOUGLAS MALLOCH

LET me lie down tonight content
To take my burden up again
Tomorrow morning. Labor spent,
Let me lie down content, and then
Arise tomorrow morning glad
To take again the task I had.

Let me return to my old task
Tomorrow morning glad to see
Some duty that the day will ask
Tomorrow morning waiting me—
Yes, be it counter, bench or chair,
Be glad to find it waiting there.

But how tomorrow morning may
I know the joy of day's return?
Because, I wonder, of my pay,
Because of money that I earn?
Well, men are paid a worthy hire
A lot of times, and yet they tire.

Tomorrow morning most depends
On not tomorrow but tonight.
Because today we lived it right
That makes tomorrow morning seem
A dawn as lovely as a dream.
Live well the day, do well the deed.

Whatever deed is yours to do,
For, if you do, you do not need
To worry over mornings now,
Nor fear the sun, if this one sets
Amid no shadows of regrets.

Live well today, and leave no frayed
And tangled ends of things half done,
Things poorly said or poorly made,
To greet tomorrow morning's sun.
If you would see the sun arise,
Then leave no clouds upon your skies.

Mother's Cook Book

When it shall be said of any country in the world, my poor are happy; neither ignorance nor distress is to be found among them: my jails are empty of prisoners, my streets of beggars; the aged are not in want, the taxes are not oppressive; the rational world is my friend, because I am the friend of happiness; when these things can be said, then may that country boast of its constitution and its government.—Thomas Paine.

WINTER SANDWICHES

A LIST of good fillings for sandwiches is always welcome, for when one entertains there is nothing more satisfying than a well made sandwich.

Sardine Sandwiches.

Remove sardines from the box, drain on soft paper to remove the oil. Scrape off the skin, remove the bones and mince very fine. Finely chop the white part of two hard cooked eggs, add to the sardines and press the yolks through a ricer into the mixture. Season with salt, cayenne and moisten with mayonnaise or cooked salad dressing. Use as filling between slices of white bread.

Peanut Sandwiches.

Finely chop one pint of freshly roasted peanuts; then pound them in a mortar until smooth, season with salt and moisten with thick cream. Use as filling between thin slices of white bread. Trim off crusts and cut into three narrow strips. Serve with orange pekoe tea, pass crystallized ginger.

Date and Ginger Sandwiches.

Finely chop equal measures of dates and preserved ginger. After draining the latter from its sirup, mix thoroughly and moisten with sirup from the ginger jar, flavor with grated orange or lemon peel. Add one-fourth cupful of water, cook until the right consistency to spread. Spread between lady fingers, sponge cake or slices of brown bread. Serve with cocoa or tea.

"What's in a Name?"

By MILDRED MARSHALL

Facts about your name; its history; meaning; whence it was derived; significance; your lucky day, lucky jewel

SELINA

SELINA is sometimes spelled Selena and the latter shows clearly the influence of its interesting origin. It was adopted in England under the mistaken impression that it reproduced the French Celine, an error which later proved fortunate since it introduced a charming name fitted to the fairest English maid.

Selina signifies "moon." Selene was the Greek term for the moon and named another moon goddess, separate from Artemis, or Diana. It seems to have been a favorite with goddesses and sirens and other beautiful women of early history. One of the Cleopatras was so called, we are told.

Long popular in Greece and Egypt, it did not make its appearance in England until the Nineteenth century when it was adopted by the Wesleyan Countess of Huntington. Since then, its vogue has been widespread on both sides of the Atlantic. In this country it is generally regarded as a Puritan name by those who are not aware of its earlier association with famous sirens.

The moonstone is Selina's talismanic gem. It will bring her success in love and will preserve her charm and graciousness. Monday is her lucky day and 3 her lucky number.

Farmers' & Merchants State Bank

Spencerville, Ind.

SPORTING GOSSIP

Well, the basketball tournament is over. Some teams have snaps and others do not. Auburn drew such an easy schedule that it was able to use its reserves in its first two games so it had an almost new team to start the Finals. Yes, Auburn beat Ashley and then Waterloo, just as our dopster doped it last week Spencerville drew the prize for hard games along with Ashley. Garrett worked hard for its 27 and 15 victory over Spencerville. Its subs were kept on the bench until the last three minutes of play. Garrett beat Butler by a wider margin than it beat Spencerville, so had Spencerville trimmed Garrett—oh, well, that is all past now.

Spencerville has four more games on its schedule. Next Friday nite it motors back to Ashley to show Ashley how Spencerville can play. Then on the next two Fridays it plays Corunna and Waterloo here in order, then on the 24th of February it meets Woodburn—the team that nosed Leo out of the Allen county tournament by one point—and we have beat Leo twice, so it does not seem very difficult to say that Spencerville's next four games are safely stowed away. However, hard practice must come, for soon after these four games come the district tourney at Auburn. Well—here's hoping that we dont draw Auburn, Garrett, Fremont or Angola for our first game.

Curie Prepares For Auction

If William Curie does not have a good auction Saturday it will not be his fault. One hundred and fifty large bills have been distributed in territory for 25 miles around St. Joe, besides a page ad for two weeks in The News. Besides the auction his store will be teaming with special prices.

Just received the largest car of fence ever delivered in St Joe and for the benefit of farmers a special price and special terms will be made for Saturday only. Make your wants known to Mr. Curie.

Farmers' Mutual Elect Officers

One of the largest meetings in point of attendance, was that Saturday of the Farmers' Mutual Fire Insurance company of DeKalb county held in the court house assembly room. The meeting was marked by the utmost harmony and good feeling and because of the satisfactory manner in which the officials have conducted the affairs of this company during the past year, all were re-elected without opposition. Those who serve another year are:

President, Noah Lung.
Vice Pres., Henry St. Clair.
Secretary, Philip S. Carper.
Treasurer, Perry A. Foote.
Actuary, Charles H Bangs.

Two directors were re-elected for two years, Samuel M. High and Charles S. Arford. The other directors composing the board are: George Harmes Albert N. Thrush and Byron C. Platt.

Writing tablets and envelopes at News office, also box stationery from 10c up.

All the late magazines at News office. Place your order—we will save one for you.

LASCELLES

SYNOPSIS.—With David, half-breed guide, Brent Steele, of the American Museum of Natural History, is traveling in northern Canada. By a stream he hears Denise, daughter of Col. Hilaire St. Onge, factor at Wailing River, play the violin superbly. He introduces himself and accepts an invitation to make the post his home during his stay. He finds the factor worried and mystied. The "log chateau" is a real home. From St. Onge he learns of the mysterious creature of evil, the Windigo, and the disappearance of a canoe and its crew, with the season's take of furs. Then at night the Windigo gives a weird performance. Even Steele is mystified. David, Steele's Indian, and Michel, St. Onge's head-man, leave for the scene of the canoe's disappearance in an attempt to solve the mystery. St. Onge tells Steele that Lascelles, the company's manager at Fort Albany, seeks his ruin in order to compel Denise to marry him to save her father. Steele and Denise fall in love. Steele finds the track of the Windigo—huge and much like a bear's. David finds the same thing. Tete-Boule, Indian in St. Onge's employ, is caught listening to Steele's talk with David and Michel, and roughly handled. Louis Laflamme, factor at Ogoke, makes application for the hand of Denise. Pierre, Indian from Ogoke, visits the Wailing River post.

CHAPTER V—Continued

—10—

"But why should he come so far to make trouble here, as you say? What is behind it all?"

For an instant, Michel seemed on the point of making a revelation. Then, evidently changing his mind, with a shrug of his bony shoulders, he answered: "We see some day."

Steele and David exchanged puzzled looks. What could Michel have in the back of his head?

* * * * * * *

With the coming of the canoe with news from Feather lakes, Wailing River was again thrown into a panic of fear of the night prowler. After a hurried talk with St. Onge, Steele started up the river, bound for Big Feather lake. He had little hope of discovering anything which would throw light on the mystery. But one thing piqued the curiosity of the three men. They were keenly interested in finding tracks similar to those near the post, for they carried the exact measurements of the latter, and in case they tallied with those at the Feather lakes, forty miles away, they would have discovered a new and most peculiar trait in animal habits, namely, a beast with feet strangely like a bear's, which had ranged forty miles within a few days.

On the morning of the second day the canoe was traveling in the easier water inshore, when Michel, poling in the bow, suddenly exclaimed:

"Kequay! Look!"

On the shore, ahead, were the remains of a fire and near it what resembled the body of a man. With a few strong thrusts of the poles, the canoe was driven to the beach. The man leaped ashore. Before them, stretched beside the dead fire, lay an Indian, hideously mutilated.

"He has been literally torn to pieces," muttered Steele. "A bear alone could have done this, and yet I never heard of such a thing."

David was on his knees searching for tracks in the dry leaves, when a cry from Michel drew the attention of the others.

"Look! Track on de shore!" and the Iroquois pointed to a patch of mud clearly marked by the prints of huge feet.

"They're ringers for the tracks near the post," said Steele, and he took from his pocket strips of rawhide of the dimensions of the footprints which had frightened Charlotte. In breadth, length and character, the tracks in the mud were identical with those near Wailing River. The three friends looked blankly at each other.

"It's the same bird," said Steele.

David removed his felt hat and scratched his broad forehead. "No bear travel forty mile and back twenty on'ess somet'ing drive heem," he insisted.

"But bears don't mutilate bodies like this," added Steele.

"Wal," muttered the Ojibway, "dees one mak' de mess ov dees poor feller all de same. W'at you goin' do?"

As the features were obliterated, Michel was busy examining the kit of the dead man in an attempt to identify him as an Indian trading at the post.

"De gun ees French company gun, but de kettle and knife I nevair see before. I t'ink eet ees not Wailing Riviere hunter."

"Who could he be, then, traveling on this river so late in the year?"

"Eet ees ver' strange," muttered the headman.

"Eef dat bear ees de Windigo," David's wide face contracted in a network of wrinkles, as he grinned at Steele, "w'at we do den?"

"Windigo or no Windigo, David, he's our meat if he steps in front of my Marmiche—or yours. Why, what's [illegible] Michel?"

The grave face of the Indian had suddenly assumed an expression so sinister as to arouse the white man's curiosity.

"By gar! We are de fool!"

"What d'you mean?"

For answer, Michel leaped into the canoe and poled rapidly upstream for a few hundred yards, while the puzzled Steele looked on. Then the Indian swung the nose of the boat down river and paddled past them in midstream.

"What in thunder is he driving at, David?"

"We are de fool for sure," was the laconic answer as Michel swept by with his eyes on his friends, then threw the bow of the canoe to the shore and landed.

"He nevaire pass here widout seein' dis camp."

Michel's maneuver was explained.

"Dat Pierre pass here two sleeps back," said Michel, joining Steele. "Dees man bin dead t'ree, four day an' de tracks on de shore are old one. De riviere rise after de rain two sleeps back. De Windigo mak' dem tracks here before de rain," and Michel pointed to some footprints which were barely covered by water.

"Sppose he did not notice this camp, what then?"

"He was hongree an' hunt for game; he sees dees camp for sure."

David nodded in agreement.

"Then why did he not tell us?"

"Dat ees w'at I ask heem tonight at Wailin' Riviere."

CHAPTER VI

The twenty miles of hard running river down to the fort was covered by the three skilled canoemen in a few hours. On arriving, they hastened to the trade house. Steele opened the ponderous slab door and entered, followed by the two half-breeds, to learn that Wailing River had a visitor.

With a Smile Steele Extended His Hand.

Seated with St. Onge behind the trade counter was a short, thick-set stranger, wearing a cap with an insignia in gold braid.

"M'sieu Lascelles," whispered Michel over the shoulder of the American.

St. Onge and Lascelles were evidently in the midst of a heated conversation in French, for they ignored Steele's entrance.

"You are as superstitious as you claim the Indians to be. I am not interested in this Windigo stuff," Lascelles said irritatedly, when St. Onge, glancing toward the door, saw Steele.

"You are back so soon, monsieur? And you have news?" The factor appeared relieved at the appearance of the man he thought far upriver.

Brent Steele's back stiffened as he advanced to meet the man who had the power in his hands to crush the girl over in the factor's quarters, whose rare quality he would never sense, whose soul he would never know. As he walked around behind the trade-counter, there was a set to his heavy shoulders, a glint in the gray eyes, which did not pass unnoticed by the men he approached.

"Monsieur Steele, this is Inspector Lascelles of the Revillon Freres."

With a smile Steele extended a hand, hard as a spruce knot, and grasped the fingers of the puzzled and curious Lascelles.

"I missed meeting you at Albany, inspector, in August. You were over at Moose when I called."

The black eyebrows of Lascelles rose as he now identified the stranger whose presence at Wailing River he found most annoying for his plans.

"Oh, yes, Monsieur Steele, the American scientist; I thought you left Albany weeks ago bound for the Nepigon," he suggested pointedly.

"I did, monsieur, but I stumbled on a most interesting situation here—right in my line, you know. I found what I have been searching for, for years." Steele was losing no time rubbing it into the skeptical Lascelles. "You have a bona-fide Windigo in this valley, monsieur—a—most interesting situation to a scientist, I assure you. The Indians are in a panic and you will have difficulty in keeping them on their trap-lines this winter."

"You, a scientist, believe in Indian sorcery and superstition?" demanded the Frenchman, sarcastically.

"Well, now, that is somewhat difficult to answer, monsieur," badgered Steele, to the delight of the two swarthy-faced men with whom he had entered. "I have heard the Windigo wail in the night; I have seen his tracks; and I have just returned to report to Monsieur St. Onge that we have found up near the mouth of Stooping river the remains of an Indian torn to pieces evidently by this same Windigo."

"What do you say?" St. Onge was on his feet.

"This morning we found the camp and body of a strange Indian—the tracks were identical with those you saw near here on the trail." Then Steele suddenly changed the subject. "Where is that Pierre who came here from the Feather lakes the day we left? Michel wishes to ask him some questions."

"He left this morning. Didn't you pass him on the river?"

A muttered curse from Michel met Steele's backward glance.

"Too bad!" exclaimed the American.

"I suppose, monsieur, you attribute the loss of our furs to this same Windigo?" broke in Lascelles.

"Oh, undoubtedly, inspector," replied Steele, with a suspicious curl of the lip, his blood slowly rising at the tone used by the man from Albany. However, above all things, he had to consider St. Onge and Denise, he told himself, and not to allow this fellow to lure him into a hostile attitude.

"I see you are joking," rejoined the Frenchman, flushing.

"On the contrary, I am very far from joking when I tell you that there are mysterious things afoot in this valley—which neither my experience nor scientific knowledge are able to fathom. You had better go upriver tomorrow and see for yourself. You seem skeptical regarding the whole matter."

"Have you never seen a dead man before, monsieur?" derided Lascelles. "I fear it has gone to your head—this Windigo matter."

St. Onge excitedly half rose from his chair, as the cool gray eyes of his guest slowly surveyed the man from Albany, from moccasins to hair; and then fell back relieved, when the American, flushed, but in control of himself, drawled:

"Monsieur, you were formerly a man of war, a soldier, while I am only a peaceful man of science. To you it is but natural that violent death should be a familiar sight, while to me it is most terrifying. Why, I find it most repulsive even to clean a fish." So innocuous was Steele's smile, and so guileless his manner, that Lascelles, conscious of being played with by the rugged American, found no words to reply, but sat in impotent rage. Then the retreating backs of Michel and David, whose shaking shoulders betrayed their suppressed mirth, spurred the Revillon man to answer:

"If you are so afraid of blood," he sputtered, "why are you hunting this man-eating Windigo?"

Steele smiled down good-naturedly at the man he would have blithely battered with his fists, and leaving the two men at the trade-house, sought out Denise St. Onge.

"Oh, welcome back! Monsieur Steele," she said, forcing a smile, "I have just heard that you have made a terrible discovery."

"Please, we will not talk of that" he insisted. "I have something to say to you before I go, tomorrow. Tonight there will be no opportunity." He wondered if Lascelles had seen her privately since his arrival that afternoon, but it did not matter. "We are to make a wide circle of the country," he went on, "and will be away until I leave for Nepigon."

Her sensitive face quickened with emotion as she listened.

"Mademoiselle St. Onge," he began, "I have no right to ask this from you, but in justice to yourself I must."

She started to speak, as if in protest, then her troubled eyes squarely met his.

Is Lascelles in the plot, too? Or are these suitors pressing their suit each in his own way?

(TO BE CONTINUED.)

Combines Fan and Fountain

One of the most remarkable palm trees in the world is to be found in West Africa. Its branches grow in the shape of a fan, and always east to west, and are filled with a cool, pleasant-tasting liquid, which often saves the lives of travelers whose water supply has run short.—Los Angeles Times.

The eternal stars shine out as soon as it is dark enough.—Carlyle.

Important Factors in Care of Bees

Much Depends on Activity of Bees and Weather.

(Prepared by the United States Department of Agriculture.)

The annual crop of a colony of honeybees is dependent upon a considerable number of factors, part dealing with the activities of the bees and part resulting from the various external factors influencing the secretion of nectar by the honey plants of the locality. Weather suitable for the secretion of nectar and the storing of it by the bees is one of these important factors. Although the weather is beyond the control of the beekeeper, a knowledge of the influence of weather factors upon honey crops in various parts of the country will be of great value in developing the best beekeeping region of the United States.

To gain this knowledge it is first of all necessary to keep certain colonies under observation, recording at frequent and regular intervals the weight of each, and recording such accompanying phenomena of the weather as may reasonably be supposed to influence either the secretion of nectar or the activities of the bees. The results of making a careful record of this kind with two colonies of bees at the bee culture laboratory of the bureau of entomology, and the mathematical analysis of the records kept, are included in United States Department of Agriculture Bulletin No. 1339, "The Effect of Weather Upon the Change in Weight of a Colony of Bees During the Honey Flow," by James I. Hambleton, apiculturist in charge of the bee culture investigations of the department. The bulletin is of technical interest to beekeepers and others working on bee-keeping subjects, and is available upon application to the department while the supply lasts.

Missouri Demonstration on Reducing Chick Loss

Thirty-two farms were used by the poultry department of the Missouri university last year in a demonstration of methods of reducing the annual losses in raising chicks. It is reported that these farms raised 88.7 per cent of all the chicks hatched. This was an unusually good showing as compared to a much heavier loss by farms which were not in the demonstration.

Five essentials were adhered to in the demonstrations, namely: hatch early, brood each hatch separately for four weeks, range on fresh ground, feed balanced rations constantly and separate pullets and cockerels.

Undoubtedly the third essential, that of ranging on fresh ground, had a great deal to do with the success of the demonstration. It has been adequately demonstrated in recent years that successful brooding cannot be carried on in old poultry lots. Farmers could greatly increase their poultry returns this year by remembering the above essentials. Fresh ground is sometimes hard to supply and, as a result, the most important essential is often overlooked.

Get Rid of Roundworms for Success With Pigs

Success in raising pigs will depend to a great extent upon proper housing and freedom from parasites, especially roundworms, says W. C. Skelley, assistant animal husbandman at the New Jersey State College of Agriculture.

The roundworms can be controlled by the following treatment. Withhold all feed for about 18 to 24 hours and for 50 pounds of live weight give a capsule containing 2 grains santonin, 2 grains calomel, and 5 grains sodium bicarbonate. In about 12 hours after giving this capsule feed a light slop containing a tablespoonful of epsom salts, well dissolved, for each 50 pounds of live weight. Repeat this treatment in about 14 days.

The housing need not be expensive, but should be kept clean and warm. Small portable colony houses that are tight and dry and provided with plenty of clean, dry bedding make very satisfactory quarters. Under these conditions, with plenty of good feed, fall pigs will make good gains and be ready to go on the market in the early spring.

FARM FACTS

Corn, kafir, sudan, and cane seed should be tested for germination.

* * *

The old saying that a bushel of corn before a cow freshens is worth two bushels after freshening is true.

* * *

Milk is about 90 per cent water. The body weight of a cow is over 80 per cent water. To give a maximum of milk, cows must drink plenty of water.

* * *

The Kansas State Agricultural college poultry department recommends an egg-laying mash composed of equal parts finely ground corn chop, middlings, wheat, bran, finely ground oats or barley and high-grade tankage, or meat scraps.

* * *

Look over the breeding flock and make sure you have a sufficient number of good male birds to insure high fertility and hatchability the coming season. Five of six well-matured, vigorous males should be sufficient for every 100 hens in the flock.

Copper Sulphate for Sheep Worms

Method of Control Devised by Scientists Gives Good Results.

(Prepared by the United States Department of Agriculture.)

A method of controlling stomach worms in sheep devised by scientists of the United States Department of Agriculture and tested on farms for the last three years has given excellent results. The treatment consists in dosing the sheep once every 25 days with a 1 per cent solution of copper sulphate.

Losses From Worms.

Following good results at the department's experiment farm near Vienna, Va., the bureau of animal industry arranged with owners of 12 farm flocks in Schuyler county, Missouri, to try the method under ordinary farm conditions. At the beginning of the experiment, all owners reported they were experiencing serious losses from stomach worms.

While the experiment was in progress no change was made from the former, usual practice of grazing, which consists in the use of permanent pasture throughout the year, except in the fall, when the flocks are allowed to run in fields and meadows from which the crops have been removed. During the last year no sheep or lambs under treatment were seriously affected by the stomach-worm disease.

Treatment Does Good.

The second generation of sheep which have developed under the copper-sulphate treatment are larger than their dams, have grown better wool, and have sold without culls. Buyers of feeder lambs from the dosed flocks have recognized their outstanding condition and paid top prices for them. These favorable results were observed among more than 2,000 sheep.

Full directions for using the treatment, which is comparatively simple, may be obtained on application to the bureau of animal industry, United States Department of Agriculture.

Early Spring Is Proper Time to Prune Orchard

Warm days during March can be profitably spent in renovating the fruit trees. Moderate pruning every year encourages annual fruiting and is much better for the tree than heavy pruning every three or four years. The work should not be delayed until growths starts in the spring.

Trees which have not been pruned regularly and have grown too bushy and dense should receive a rather heavy thinning of medium-sized branches in the outer portions of the tree. If possible, avoid removing large limbs because this leaves the tree thin in places and too dense elsewhere. All dead, diseased, broken, injured, crossing and rubbing limbs should be removed as far as possible. When young trees have been properly pruned until they reach bearing age, only moderate pruning of small branches is required to keep the tree properly thinned. Sunlight will then be admitted to the central portion of the tree.

In the pruning of young trees keep the head low. Also avoid having two branches leave the trunk at the same point. Four or five main branches should be saved, and as far as possible so selected that they will be evenly distributed around the tree as well as up and down the main trunk. In all your pruning work use sharp, efficient pruning tools. Make all cuts clean and close and wax or paint all wounds that are over an inch in diameter.

Does Not Pay to Grind Alfalfa Hay for Cows

Experiments conducted by the dairy husbandry section of the Iowa agricultural experiment station indicate that it doesn't pay to grind alfalfa hay when it is to be fed to dairy cows. At least it wasn't profitable in these preliminary tests. Eight cows were used in the experiment.

The use of ground alfalfa did not increase the yield of either milk or butterfat in these tests and, in addition, there was a greater amount of ground hay refused by the cows than of the unground hay.

It cost $3.50 per ton to grind the alfalfa and there seems little likelihood that this figure could be reduced on the average farm, those in charge of the test say. The grinding cost, they state, represents from 20 to 25 per cent of the market value of the hay on the farm in the average year.

Corn Good Animal Fuel During Severe Weather

Corn is cheap, about a cent a pound. One can get fine-burning soft coal for less than a half-cent a pound.

Animals are going to keep up their body heat during cold weather. They can do this with corn at a cent a pound if the owner can do some of it for them with coal at half the corn price.

If the chill is not taken off of the cow's drinking water with coal or wood, she will warm it to 98 degrees with corn. If the pigs are forced to drink water or milk in which there is some ice, they are going to melt the ice with corn at a cent a pound. If the chickens have a warm mash at noon, just that much corn is saved. Eggs come faster.

All the way around, trading coal for corn on a fuel basis is good business.

This Mother Knows the Value of FATHER JOHN'S MEDICINE FOR COLDS

"Just as soon as any of my family get a cold, I always give them Father John's Medicine. One of my babies as well as my husband had pneumonia two years ago, and I believe that Father John's Medicine helped them to regain their health. I always use Father John's Medicine just as soon as any of us get cold." (Signed) Mrs. John E. Nicholes, 2936 Hazel St., Erie, Pa.

Away Goes Eczema
Peterson's Ointment

"One day a druggist told me," says Peterson, "that Peterson's Ointment was the best remedy he sold for eczema. But you'll never make any money on it," he added, "because it heals so quickly that only a little ointment is used." All druggists, 60 cents.

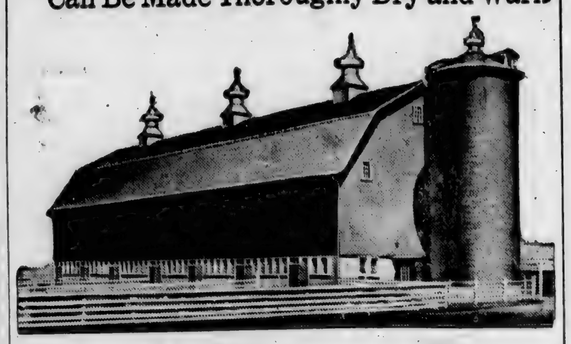
Concrete Barn Has Advantages and Can Be Made Thoroughly Dry and Warm



By WILLIAM A. RADFORD

Mr. William A. Radford will answer questions and give advice FREE OF COST on all problems pertaining to the subject of building work on the farm, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on the subject. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

Some people seem to think that a barn is a barn and that there is just one way to build barns, the typical frame style. But concrete barns are also possible and many times well worth considering. In the past there has been a certain prejudice against concrete for such purposes, principally because of the fear of dampness, but by applying the methods which have been developed to produce good concrete construction there need be no fear on this score.

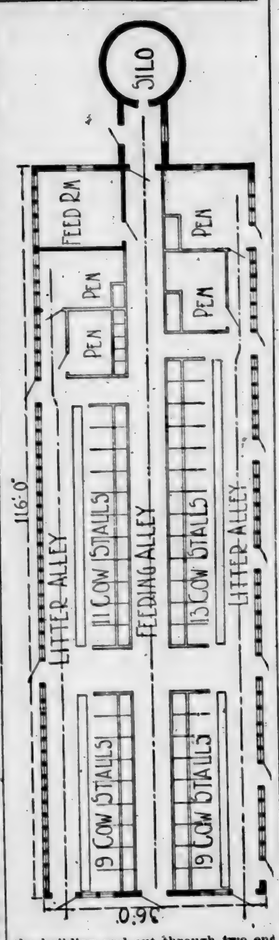
A concrete barn can be built which will be as thoroughly dry and warm as any other type of construction. In localities where the materials, sand and stone or gravel are available locally, the cost is low. A concrete barn is a permanent structure and it affords protection against the danger of fire, an enemy which it is difficult, if not impossible, to fight when it attacks farm buildings.

Because of all this it will be interesting to take note of the concrete barn which is pictured here. The walls throughout are of solid concrete and the roof is covered with a composition roofing which is also highly fire resistant, while the silo is built of brick. Aside from the materials of construction this barn differs little from any other first-class dairy barn, the design following the lines which experience and scientific study have proven to be most advantageous for the handling of a dairy herd.

The brick silo is placed at one end of a long central feed alley which extends the full length of the barn and makes it possible to serve all the pens and stalls quickly and with a minimum of labor, using an overhead conveyor track for handling the feed. At one side of the doorway from the silo into the main barn, there is a feed room, the contents of which can be handled by the same means.

At this end of the building there are four special pens and beyond the cow stalls are placed in rows at either side of the central feed alley. These stalls are divided into groups leaving passages between which come opposite doors in the sides of the building. In all, there are 42 stalls, sufficient to accommodate a large herd. The number of stalls easily can be varied, however, by decreasing or increasing the total length of the building.

Back of the stalls, at each side of the building, is a litter alley. Here again the overhead track is used for handling the litter in the quickest and most convenient manner and the tracks extend on down the length of



the building and out through two end doors. There is also a wide door at the open end of the central feed alley.

The side walls of this barn are almost completely occupied by windows which give an ample supply of the light and sunshine which is so essential to healthy cattle and profitable milk production. Another essential, good fresh-air ventilation, is provided for by means of ventilator shafts and roof ventilators, with a capacity ample to assure that the air will always be fresh and the odors carried off promptly.

The upper part of the building is devoted to hay storage and the large loft is sufficient to take care of the needs of all the animals housed in this barn.

CHILDREN CRY FOR

Fletcher's CASTORIA

MOTHER:— Fletcher's Castoria is especially prepared to relieve Infants in arms and Children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep.

To avoid imitations, always look for the signature of Chas. H. Fletcher. Absolutely Harmless—No Opiates. Physicians everywhere recommend it.

A man never fully realizes how golden silence is until he tries to buy it.

The Cycle

"How do you feel as a widower?"

"Well, one weeps for his wife at rest from duty, then from habit, and then from pleasure!"—Die Muskete, Vienna.

Bad Accident

Senior—Why is Stanley so very narrow-minded?

Junior—He was putting his mind on his book one day, and someone closed the book.

"Why, Uncle Jim! You look ten years younger!"

"When I saw you a couple of months ago, I made up my mind you were getting old. At least you looked it."

"Yes, Billie, and I felt old. No appetite, couldn't sleep nights—one day just like another, and none of them any good. I knew constipation was at the bottom of it, but it seemed the more laxatives I took the worse I got. Then one day I saw Nell giving Nujol to my little grandson. The doctor had prescribed it for the baby, but I found out it's just the thing for old fellows like me, too.

"I tell you, Billie, it keeps me feeling fine all the time. My appetite's back and I sleep like a child. If I look any younger, Nujol gets the credit."

Nujol helps Nature in Nature's own way

Middle age brings on a decrease in the natural lubricating secretions in the intestine. Then you need Nujol. It supplies the deficiency of the natural lubricant. Medical authorities approve Nujol because it is gentle, safe and natural in its action.

Constipation is dangerous for anybody. Nujol is safe for everybody. Nujol simply softens the waste matter and thus permits thorough and regular elimination without overtaxing the intestinal muscles. It is not a medicine.

You can take Nujol for any length of time without ill effects. It should be taken regularly in accordance with the directions on each bottle. Unlike laxatives, it does not form a habit and can be discontinued at any time.

Ask your druggist for Nujol today and begin to enjoy the perfect health that is possible only when elimination is normal and regular.

Nujol
THE INTERNAL LUBRICANT
For Constipation

DR. W. B. CALDWELL AT THE AGE OF 83

Women Need a Mild Laxative —Not a "Physic"

Countless girls and women now know how foolish and needless it is to "purge" and "physic" themselves to avoid sick headaches, dizziness, biliousness, sallow skin, colds, or sour, gassy stomach.

They have found that Dr. Caldwell's Syrup Pepsin helps to establish natural bowel "regularity" even for those heretofore chronically constipated. Dr. Caldwell's Syrup Pepsin not only causes a gentle, easy bowel movement but, best of all, it never gripes, sickens or upsets the most delicate girl or woman. Besides it is absolutely harmless and so pleasant that even a cross, feverish, bilious, sick child gladly takes it.

Buy a large 60-cent bottle at any store that sells medicine and just see for yourself.

Dr. Caldwell's SYRUP PEPSIN

Built-In Articles Should Match Color of Woodwork

In order to appreciate the value of built-in furniture from the standpoint of economy and as useful and decorative adjuncts to the home, architects must be experienced. Such pieces should, to give the best effects, conform closely in color and finish with the standing woodwork of the room of which they are practically a part.

There are now many architects who specialize on the small house and some of these make much of quaint and effective built-in pieces in the interior arrangements. However, a frequent pitfall to the inexperienced is the finish given this built-in furniture. Often it seems desirable to make these pieces appear as furniture rather than as part of the room.

With this idea such pieces are treated with different finish from that used on the standing woodwork, and always with disastrous effect. Where one must live in a house planned for another it is often possible to introduce some pieces of built-in furniture advantageously. A window-seat, or inglenook seats may be built in with ease and at small cost.

The Arch Enemy

Rust is one of the most insidious and one of the worst enemies which your home can have. Frequently the largest item of upkeep is the repairing or replacing of rusted metal. Use, therefore, metal that will not rust and save this huge item of upkeep expense.

Most Economical

It has been said that the Colonial is the most economical type of house to build, both in first cost and maintenance. This is because it is almost always plain and rectangular, without angles, bays and cut-up roof, all of which increases labor and material needed and add to repair bills later.

Pilgrim House Preserved by the Use of Paint

When our New England forefathers came to make their homes in the new world they brought with them memories of the well-kept homes of their ancestors, and when they built for themselves their new homes reflected this as well as their own staunch pioneer characteristics.

Howland house, Plymouth, Mass., was built in 1666, and is the oldest house in the town where the Pilgrims landed, and the only house left in which the Pilgrims are known to have lived.

A few dollars' worth of paint applied as needed has preserved this historic place for us. Conserving objects that could not be replaced is one of the greatest services paint renders.

Device Stretches and Attaches Screen Cloth

There is a tool on the market now which stretches and attaches screen cloth at the same time. It is provided with removable steel claws for drawing the mesh into position for the insertion of a staple which is driven in by a plunger. When it is desired, the implement can be used on plain work by removing the claws. The tacker holds a magazine consisting of 77 staples joined together in one strip, preventing waste and saving time in loading. The outfit weighs less than two pounds and may be carried in a hip pocket. It will withstand hard usage.

Electricity on Farms

The average American farm still depends upon animals to provide 60 per cent of power utilized. Electricity provides 5.6 per cent of farm-used power, tractors nearly 17 per cent, stationary engines, 12.5 per cent and windmills but a trifle more than 1 per cent.

A move to rid all Indianapolis city meat markets of impure and adulterated meats was started last week by health authorities. Seven proprietors plead guilty when arraigned for violation of the pure food act.

Lorenzo Burch and wife of Hamilton, are guests in the Earl Smith home a couple of days this week, staying with Rosella Mendelsohn during the absence of Earl and family, who were at Niles, Michigan and South Bend

Complaints have been made to the law-enforcing officers of the county that children under sixteen have been driving automobiles in violation of the law. Capt H. C Springer, prosecuting attorney, gives warning that the law will be enforced and the parents of these children will be prosecuted if violations continue

Farmers who find their old dairy and other barns so uncomfortable that they give stock too little protection will find a few hours time spent in rehanging doors and stopping up cracks worth real money Old rusty and broken hinges, locks and tracks and rollers should be replaced by modern ones that will be birdproof, easily handle and secure in stormy weather. Much better door hangers and rollers are now made than in the old days when many of these barns were built.

Kathleen Key

Handsome Kathleen Key, the "movie" star, who recently returned from Rome with a well known producing company in a great screen success, is noted for her beautiful shoulders and hands. This is Miss Key's latest picture.

WHO SAID

"Few spirits are made better by the pain and languor of sickness, as few pilgrims become eminent saints."

THESE words are the more remarkable when considered in the light of the age in which they were uttered. Thomas a Kempis, the author of the above quotation, was born in the year 1380, and his life was spent at a time when it was a popular belief that great physical pain and suffering were the sure road to spiritual improvement. This remarkable man blazed a new way for the Christians of his time, and pointed out to them that their salvation lay not in enduring useless and purposeless suffering in the hope of heavenly reward, but in following the footsteps, as far as possible, of the founder of their religion.

Thomas a Kempis has gone down in history largely because of his great work, "The Imitation of Christ." This book is reputed to have been translated into more languages than any other book ever written except the Bible. It is devoted to an exposition of the life of Jesus Christ and to the attempt of the monk, Thomas a Kempis, to imitate the Savior's life.

A new sentiment has attached to this book since the fact has been made public that the book last read by Edith Cavell, the English nurse, martyred by the Germans, was a little volume bearing the title, "The Imitation of Christ." This copy of the work of Thomas a Kempis is being treasured in England as a priceless memento of the life of the Englishwoman who—in imitation of the life of the Savior she served, gave her own life to save others.

The little book that was found among the effects of Edith Cavell bears copious annotations in her handwriting which show her complete lack of fear during those few days preceding her execution when the American consul at Brussels was fighting to save her life. Thomas a Kempis was a German and it is a strange thing, that his work should have been the chief source of consolation to a woman later executed by his countrymen.—Wayne D. McMurray.

AN ABBREVIATED STORY

CHARGE!

HILL 600 simply had to be taken. It was necessary for the morale of the men, the vanity of the commanding general, and the winning of the war. It was the principal topic at the morning war council.

"It's got to be taken," decided General Shooten Irons. "And the only way to take it is by a great charge."

"Very true," agreed General Watt Calibre. "But it will have to be a charge such as never has been known before."

"An epochal charge, a charge of unimaginable ferocity," said General Rainer Shells.

"It will have to be a charge that will go down in history," said General Aimen Fire.

A brooding silence fell. Then suddenly all the generals leaped to their feet together. The magnificent idea had struck them all simultaneously, for they were all heads of families and had received bills for having furnaces hemstitched, flues cajoled, and one thing and another.

And that afternoon the detachment of plumbers and steamfitters, a body of chargers such as had never been seen before in one organization, took Hill 600 with the loss of only a half dozen apprentices.

(© by George Matthew Adams)

WHY

Hand-Clapping Has Become Sign of Approval

Every emotion that rouses us has to be worked off by some corresponding, bodily effect, as a sort of safety valve to the brain.

Just as a cat purrs and a dog wags its tail, so we humans have to cry or laugh or clench our fists, according to the different emotions to be expressed.

When the emotion of pleasure is experienced by a whole crowd at once, we have a further desire—to communicate our own sensations to our neighbors, as well as to the speaker, actor or other person who has pleased us. And the only way we can communicate our feeling is by making a noise.

There are only three ways in which we can easily do this: By shouting, by stamping our feet, or by clapping our hands.

The first method is very often used, but generally out-of-doors. The stamping of feet needs not only boots but a hard surface to stamp on, and since the ancients, from whom we inherit our method of applause—which word means a "clapping at"—did not wear boots and, therefore, could not stamp audibly, hand-clapping became adopted as the recognized fashion of expressing pleasure.

Why Flowers Can Be Used as Barometers

Most people know that seaweed, which becomes moist and clammy when rain is coming, makes an excellent barometer. Flowers are sensitive to weather conditions and those in a position to observe them can generally tell something of the coming day. So true a prophet is the scarlet pimpernel that it has been called "the poor man's weather glass."

Crocuses, dandelions, anemones and wood sorrel close their flowers on the approach of rain. Fir cones open and close as the weather is fine or wet. In some parts of the continent, especially in Germany and Switzerland, where many quaint customs survive, they have a frog weather glass, which consists of a green frog in a bottle half filled with water. From the neck of the bottle, and just touching the water, runs a flight of steps. If the frog remains under water, near the bottom or actually at the bottom of the bottle, the weather will be fine, but when he comes up and sits on the steps it is certain to be dull, cold and wet.—Brief Stories.

Why Married Men Live Longer Than Bachelors

Do married men live longer than bachelors, or does it only seem longer? The great philosopher, Herbert Spencer, declared that the apparent longevity of married men was not due to their marriage. The physically and mentally strong, he said, would be more likely to marry; therefore they lived longer not because of marriage, but in spite of it, so to speak. Theologians, philosophers and doctors—even statisticians—have always maintained that married men live longer than bachelors. Insurance companies, which base their expectations on cold facts, have so far been unable to come to any conclusion on the question. They are inclined, however, to prefer married men for insurance.

Why Phrases Are Barred

In April, 1913, the editor of a Swiss newspaper placed a ban on the use of the following metaphorical figures of speech by the members of his editorial staff: The voice of honor, the cry of conscience, the restraining hand of conscience, the needle of, remorse, the whip of satire, the shield of indifference, the trumpet of fame, the bases of society, the annals of crime, the chariot of progress, the torrent of passions, the artifices of language and the broadside of pleasantries. It is of interest to observe that most of these expressions are as threadbare in the English tongue as in the French.—From La Bulgarie, Sofia. (Translated for the Kansas City Star).

Why Sap Travels

The old conception was that as soon as the leaves drop from trees the sap or moisture in a tree went down. This idea is false, as all through the winter the roots of the tree are absorbing moisture. The highest sap content is just before the leaves start in the spring. It would be more correct to say that the sap is continually going up in a tree instead of down. The water content of a maple tree in the fall of the year is 27 per cent, in the winter 32 per cent, and just before the leaves appear in the spring 89 per cent.

Why Rain Water Is Best

Ordinary rain water contains appreciable amounts of dissolved oxygen, nitrogen, ammonia and carbonic acid gas, and in special cases it is found to contain nitric acid, sulphuric acid and other components of the impure air of cities. The acid and alkaline impurities increase the power of the rain water to dissolve the mineral constituents of the earth's crust, the gases make it possible for plants and animals to live in rivers and ponds which would not support life if the water were chemically pure.

Why Copper in Soldering

Copper is used for soldering tools because it is a good heat conductor, has fairly high specific heat, tins readily with solder, and has no alloying metals to be sweated out as in the case of brass.

HOW

EFFECT OF SUNLIGHT ON GERMS IS MADE USEFUL.

For a long time scientists have known that sunlight kills germ life. This knowledge has been put to practical use in many different ways. But science does not know yet just why sunlight kills germs. The public health service, assisted by the bureau of standards, has been doing some valuable work along this line. It had been previously established that the germ-killing power of sunlight came largely from the actinic or invisible rays of the sun. For the experiments these rays were produced in regulated quantities. The health service supplied many different species of germs for the experiments. One type, bacterium colicommunis, is the kind most frequently found in sewage-tainted water. In some cases the germs died in less than one second after being exposed to the rays. After a long series of tests the scientists in charge of the work, W. W. Coblentz and H. R. Fulton, worked out the mortality produced by each different wave length of the invisible light waves.

How Natives of Somali Deal With Man-Killers

Libbah, the lion, helps to make many reputations in Somali. So long as he will leave the karius (native encampments) alone, the men are quite ready to leave him alone. But lions, especially when aging and unable to catch game with ease, are apt to begin preying on straying or sick camels. This leads to frequent raids on the stock. Then a herder disappears, and it becomes only a question of time when shrieks on a dark night proclaim that the lion has forced a zareba (stockade) to satisfy his taste for human blood.

Victims will now be taken regularly, and as long as the man-killer lives no one knows when his turn will come. The men at this stage band together to track the lion to his lair in daytime. Once found, they mob him, galloping round in circles, shouting, hurling spears, till they get him dazed and confused, when a picked man, choosing his moment, rushes in like a toreador to administer the coup de grace.—Cornhill Magazine.

How Nurses Raise Funds

Falmouth, Mass., has a nursing association affiliated with the Red Cross public health nursing service, which has won recognition from far places by its method of raising funds for its work, says the Red Cross Courier. These funds are raised by an annual fete, preceded by a theatrical benefit performance.

At the performance preceding the last fete the sketches and features were presented by talented amateurs, and a club gave a performance of Booth Tarkington's one-act play, "Bimbo, the Pirate."

The fete was held on the village green, a picturesque and beautiful bit of old New England. With decorated booths and grounds adorned with flags and Japanese lanterns the atmosphere was gay, and residents and visitors entered into the carnival spirit. The ice-cream booth disposed of 55 gallons of ices. There were fortune-telling, candy, fancy work, fruit and vegetables, flower and sandwich and "hot dog" booths. Foliage and crepe paper gave them rainbow hues. The net result was a fund of $2,600.

How Trains Are "Run"

As the average train passenger flashes by station after station, passes and meets other trains, and arrives safely at his destination and on time, he is, no doubt, unconsciously grateful to the conductor and engineer who piloted the train. But very few people who travel on trains know or give thought to the fact that there is a "power behind the throne" which made the tracks clear and gave them uninterrupted passage. Back of every train movement is the train dispatcher. From him crews receive their orders, and upon his instructions trains are run. There are over 6,000 train dispatchers in the United States who started in when they were young men and have become dispatchers only through long years of hard work and study.—Pathfinder Magazine.

How Indian Cures "Cold"

When a Glacier park Indian catches cold he drinks hot herb tea and packs himself in his outdoor sweat bath, which is about as near to nature a contrivance as is possible, the Indian department informs us. Willow boughs are bent so that each end is in the ground four feet apart, forming a framework. A fire is built in the center of a pile of stones on the ground. Hides and blankets are put over this framework of boughs and when hot the fire is withdrawn and the patient steps in, with a pail of water. He keeps sprinkling the water on the hot stones, getting an ideal vapor sweat bath. "Heap heat" and his cold is gone.

How Do Ants Know?

Ants' nests, says a recent authority, contain between 200,000,000 and 400,000,000 inhabitants, all living peaceably; all hostile to any intruder even of the same species from another nest. How do they know?

RHEUMATISM

While in France I obtained from a noted French physician a prescription for the treatment of Rheumatism and Neuritis. I have given it to thousands with wonderful results. The prescription costs me nothing. I ask nothing for it. I will mail it if you send me your address A postal will bring it.

Write today.

Paul Case, Dept.B104 Brockton, Mass

NEWS OF THE TOWN

Mrs. John Wineland is numbered among the sick.

Mrs. Ed Leighty is spending the week in Chicago in the Wm Leighty home.

Mrs. C. R Price visited relatives in Fort Wayne from Friday until Monday.

C C. Bassett spent Sunday in Fort Wayne with his son, Carl and family.

Pictorial and McCall patterns ordered at News Office Phone your orders to us.

Miss Wyone Allen was a Tuesday visitor of her sister, Mrs. Jane Coburn.

Bring your family and come to the Chicken supper Saturday, Feb. 6, at Lutheran church basement, from 5 to 7.. Price 25c.

The new spring McCall Quarterly is here and it is chuck full of splendid styles. Pictorial Quarterly also on sale and display at News office.

Seven divorces were granted in DeKalb county the last term of court closing Saturday, five husbands and two wives, but there are twenty-four pending.

Mrs. Virgil Perry spent a couple days last week at Sherwood, a guest of Sam Openlander and wife. Mrs. Openlander left Sunday for Denver, Colorado, to visit in the Wm. Cheek home

The Auburn Auto Co., is employing 650 persons. January 900 cars were turned out and February schedule calls for 1,575 Orders for $7,000,000 worth of automobiles compared to orders for $68,000 last year.

The Lutheran Aid Society will serve a Chicken supper Saturday, Feb. 6, from 5 to 7. Price 25 cents. Come.

J. J. Gordon of Bluffton, won the contract for the Robert Nichells road in Concord township on a bid of $11,439. Other bids on this road were: J. N. Neff, $11,600; Keller & Baker, $12,153; Wright Bros., $11,781 50. The estimate of the surveyor was $12,957 50.

Mr. Willis Reasoner died Monday morning of heart trouble, aged 66 years. He is survived by his wife and an adopted son, Mr. Alton Tappen of Detroit, Mich. Funeral was held at the home Wednesday afternoon.—Butler Record. Mr. Reasoner was a brother of Silas and Chas. Reasoner of near here.

If any person is found guilty of a criminal act and given a penitentiary sentence, the cry of ill health ought not excuse the serving of the term as a penalty for such guilt. Such is the case of former governor McCray, now in Atlanta prison, and friends are reluctant to file such complaint and President Coolidge does not think their claims sufficient to warrant clemency.

Why Fish Do Without Sleep

The bureau of fisheries says that fish do not sleep. They rest and remain quiet in nooks of streams, but never close their eyes.

ST. JOE NEWS.

VOL. XL | ST. JOE DeKALB COUNTY, INDIANA, THURSDAY FEB. 11, 1926 | NO. 6

Contest Opens To Select King Of Old Fiddlers

Following the Henry Ford exciting race of Old Time Fiddlers of Michigan also the Herald Examiner contest for the champion of the Middle West to be held at Chicago this spring Indiana will make a wild run to find out the champion of Indiana, who will later compete with other states.

Indiana contest will be laid out in districts, there will be about nine counties in each district. Ft. Wayne will be listed as district No. 1 and will take in Steuben, LaGrange, Noble, DeKalb, Whitley, Allen, Huntington, Wells and Adams counties. Steuben and DeKalb counties will contest at Garrett opening Feb. 19th; LaGrange and Noble counties will contest at Kendallville opening about Feb. 24th; Whitley county at Columbia City; Allen county at Ft. Wayne; Huntington county at Huntington; Wells at Bluffton and Adams at Decatur. The winners of each county will be taken to Ft. Wayne for final tournament to find out the champion for district number one.

After the final district of Indiana is challenged the winners of each district will be taken to Indianapolis for the grand final contest to prove the champion of Indiana.

Old Time Fiddlers, dust off the fiddle and rosin up the bow, get in for the hot race. Each contestent must be fifty years old or over. Watch this paper for further announcements

Legal Publications

Notice To Issue Bonds

Notice is hereby given to the tax payers and citizens of Concord School Township, DeKalb County, Indiana, that the Township Trustee of said School Township and the Advisory Board of said Township did on the 6th day of February, 1926, determine to issue bonds of said School Township in the aggregate sum of $35,000 for the purpose of constructing a school building in said township; said bonds to consist of thirty series; each series to be comprised of two bonds, each bond to be in the sum of $583.3, all bonds to bear interest at the rate of 4½ per cent per annum, payable semi-annually on the first day of January and July of each year and you are hereby further notified that unless a remonstrance is filed by tax payers as requested by the Statute, said bonds will be issued and sold as determined upon by said Trustee and Advisory Board.

Witness our hands and seals this 6th day of February, 1926.

F. L. Milliman, Trustee
Edw. Schrader
Geo. Walter
M. D Engle, Advisory Bd.

Parent-Teacher Association

The next Parent Teacher meeting will be held at the St Joe school house on Friday evening, February 12. A special program has been arranged and all members are urged to be present.

Community Singing led by Miss Bray.
Song . . . Girls' Glee Club
Talk . . . Rev Otis Jones
Song . . . Girls' Glee Club
Dixie Jubilee Quartette
Business Session.

Only about 25% of the patrons of the school have paid their dues and become members of this organization. Those who are not members are especially urged to be present at this meeting and join the P. T. A.

Fish And Game Club

The Fish and Game club held its regular meeting at the town hall St. Joe, Friday evening, February 5th.

Nominations were made for the officers for next year and they will be voted on at the March meeting.

F. R. Leighty, deputy game warden, gave an interesting talk on some of the experiences he has had. Arrangements are being made for a good program and general good time at the March meeting.

More about it later.

Unusual Crowd In Town Saturday

Surely everyone is agreed that there was an unusual crowd in town Saturday to attend the Curie auction. Everything sold in the way of implements that was advertised and bes des the special inducements given in the store, made the days business total considerable. Mr. Curie has the right idea in business, and whenever he has an article that is slow sale he disposes of it at some price and does not carry it for years.

Mr. and Mrs. Charley Kooh attended the funeral of Frank Fogle at Churubusco, Sunday.

Commissioners Grant Five Roads

Five gravel roads were established by the DeKalb county commissioners at their February session

These are the Martin Stahl and Philip Mertz roads in Fairfield township, the Charles Ridge and Charles A. Keller roads in Wilmington township and the Herman Ketel road in Union township.

The auditor was directed to advertise to bidders for the Russell Conine and Stanley Davis roads in Newville township, the contract to be awarded March 2. The same date was set for the Philip Mertz road.

The viewers of the Samuel Hawver road on the Keyser-Butler township line filed their report and were directed to file their supplemental report after ten days.

A like order was made in the Ira Grogg road in Butler township.

The Jerry Varner road in Troy township was continued to the March term for the report of the virwers, as was also the Charles A. Dohner road in Troy township, the Homer Casebere road in Stafford township, the Frank W. Hovarter road in Richland township, the Marion Haverstock road in Franklin township.

William Bleeks resigned as third drainage commissioner in the Ora D. Baker drain and Loren Means was appointed in his stead.

Bonds were ordered issued for the balance of unpaid assessments for the Fillmore Shull drain.

AMONG OUR SICK

Mrs. John Barger was operated on last week at Wayne for appendicitis and is reported as improving nicely.

Keith Ulm, son of Robert Ulm of Butler, was operated on Sunday at Garrett, for Mastoid Abcess. The youngster is getting along fine.

Wm Koch submitted to an operation Tuesday mording at Fort Wayne, which disclosed that he had two cancers of the stomach and that his liver and bowels were in a very serious condition. The decision was made that no further operating should be done and so he is left to suffer until the end. No possible medical help could be given. If he survives in about 10 days he will be returned home.

Belle Barney, Beauty Shop

Marcel and Curl, Bobbing, Shampooing and Special Scalp Treatment for growing hair. Call No. 80 for appointment.

ANNOUNCEMENTS!

I will be a candidate for the republican nomination for Trustee of Concord Township at the Primary on May 4th., subject to the will of the voters of the township.

4 1p. O. K. SHULL.

Makes Pumping Up Tires Unnecessary

Chicago, Ill.—F. E. Hughes, Suite 130, 2512 Monroe, this city, has perfected a new air-tight valve cap that enables auto owners to pump up their tires once and never touch them again until punctured or worn out. Leading tire manufacturers, after thorough tests, have approved Mr. Hughes' invention and banished the old theory that air escapes thru rubber. One inflation lasts the life of a tire, and tire mileage is doubled. These caps retail for $1.25 for set of five. The inventor wants agents and will send proof and samples Free. Write him today.

Charm and Style in Evening Gowns

Severity Gives Way to New Variations; Many Colors and Fabrics.

Evening dress has never been more beautiful than it is shown this season. As long as a severe, unvaried style prevailed, there was little inspiration or opportunity for originality. The only chance for variety was in the one item of material. Now, observes a fashion authority in the New York Times, liberated lines have come in—the flare and flounces, godets and drapery, with all the charm and style, the art and grace of the creator's own idea. Among the gowns received from the most distinguished houses in Paris are some of every known fabric, trimming and type. A dinner dress of ivory velvet embroidered in pearls and silver thread is further embellished with white fox fur. The antithesis of this regal style of gown is one of sea green crepe, on which are embroidered scattered sprigs of small flowers and leaves in their natural pink, white and bronze. This needlework is veiled with a tunic skirt of pale green tulle, gathered very full at the belt, which marks the line of the hips. It has a frou-frou effect at the bottom, finished with a full ruching of tulle. A soft, swathing sash, drawn about the hips and knotted at one side, with fringed ends, forms a decorative touch on this gown.

Black Chiffon Over White With Godets of Lace and Heavily Studded With Rhinestones, and a Gown of Maize-Color Elizabeth Crepe.

The beaded gown, returning with all the appeal of an absolute novelty, is exceedingly fashionable. From some of the best houses have come some delightful frocks for dinner, the opera and the dance, beaded in sparkling crystal, in pearls and colors, with cleverly intermingled needlework of silk and metal thread. This new version of the beaded gown is in no way commonplace. It has grace of shape and the broken line of the uneven hem is a distinguishing feature of almost all of the best models. The straight-around hem now gives to the costume a somewhat gauche appearance. Also, it is the fashion of the moment to outline a pattern upon the fine net or georgette background, rather than to bead so solidly as to give the effect of a coat of mail.

Favors Beaded Gowns.

Of the French designers, Worth has gone in enthusiastically for beaded gowns, presenting one of especial beauty that alone might sustain the prestige of his atelier. It is made of chartreuse green crepe delicately embroidered in crystal beads. It has a round decollete in front and very deep V at the back. A straight line model, it is made in panel shape back and front, with a soft, finely plaited godet inserted at each side to drop several inches below the hem line of the dress. A replica of this green and crystal gown is done in white chiffon beaded in glass beads over a foundation of silver lame.

Of the other French creators who indulge their fancy for the beaded gown, Dosuillet has done some particularly attractive models. This artist has a leaning to the metallic fabrics. Even when a silk or crepe is used for the dress foundation, metal is introduced in the design. A violet crepe dinner gown is embroidered all over with gold beads in a close oriental pattern, with very delicate scrolls. A bit of scarlet elaborates the scheme somewhat, and the frock is cut down the front to show a skirt of gold lame.

Gold and silver are much liked by leading couturiers this season. Some striking styles in evening gowns show bead work and metal in motifs of oriental richness. Jenny, who ordinarily prefers soft materials and is usually restrained in composition, makes a picturesque evening dress of ivory crepe satin embroidered in colored beads, with scarf draperies of gold-colored tulle. Drecoll, Premet, Patou and Vionnet are among the grandes maisons whose beaded dresses at the moment are very much in evidence and in demand. For once a distinctive mode appears to be universal, interpreted in individual models. Not only evening dresses of the more fragile materials, but also afternoon gowns of crepe or satin are elaborated with beads. Two models are of more than usual interest and beauty. In one from the house of Doeuillet gray chiffon is beaded with gray pearls, lightly marking a conventionalized floral design. The bottom of the gown is finished back and front with a band of gray fox fur. An afternoon gown done by Jenny in the jumper dress style has a slightly curving tunic bodice of satin, heavily embroidered with beads, and a skirt of finely plaited crepe de chine to match the rose tint of the bodice.

Dance Frock in King's Blue.

Louise Boulanger designs a whimsical dance frock in king's blue chiffon and rose and silver figured lame. In this refreshing little frock the long, straight bodice of lame blouses in round-about folds at the bottom, with a knoted sash and ends of the material at one side. Two flounces of the blue chiffon—the under one straight at the hem, the overlying one pointed at each side—form the skirt, a snappy little 'kerchief scarf is wound about the neck and knotted over one shoulder. Lanvin is indulging in curves in her creations.

Madeline Vionnet, whose prestige is established on this side in styles for younger women, adheres to her tenet of simplicity in some lovely evening gowns. She usually employs chiffon and the other soft fabrics. The flare and circular cut are shown in her models almost without exception. With canny skill Mme. Vionnet has created a naive dance frock in princess style with unbroken lines rippling at the bottom. Chiffon dyed in graduated shades is used. This frock has a decorative flounce-like effect. It is given further distinction by the severely plain line of the decollete neck and long, tight sleeves. Another model of striking character from Vionnet is composed of black chiffon and apple-green taffeta, the silk in a deep band and a pattern is appliqued on the black background. This gown has long sleeves that almost cover the hands. The bodice is soft, with the effect of a wide girdle about the hips. This model suggests something of the period gowns, the skirt being wide and full.

Brocades Are Popular.

Chiffon velvet brocades and metallic brocades make the regal costumes of the more formal variety. Callot illustrated in terms of fine stuffs and beautiful colors the possibility of elegance even with the trainless skirt. In a particularly handsome evening gown, the tunic bodice is made of brocaded chiffon velvet in green and manuve. The graceful, rather bold pattern, is outlined in gold thread and pearls. The skirt, a flounce with an uneven hem line, is of plain green velvet, attached to the bottom of the bodice with the ultra-fashionable up curve in the front. Drecoll creates a stunning evening gown of gold tissue and black velvet; and in contrasting mood, Lucien Lelong presents a dance frock in pink chiffon and silver lame, with bands of silver and straps.

The KITCHEN CABINET

(©, 1926, Western Newspaper Union.)

If you would know the value of money, go and try to borrow some; for he that goes a borrowing goes a sorrowing, and indeed so does he who lends to such people, when he goes to get it again.

It is easier to suppress the first desire than to satisfy all that follow it.—Poor Richard.

CODFISH DISHES.

Codfish, dry, fresh, or salted is rich in iodine. The lack of this element in our diet is an important cause for enlarged thyroid glands and goiter. To make any common food palatable it is necessary that we vary the manner of serving it.

Codfish Souffle.—Cook one-half of a green pepper and one-half an onion, both chopped, in two tablespoonfuls of butter. Mix two cupfuls of mashed potatoes with one cupful of cooked flaked codfish, add the well beaten yolks of two eggs and fold in the stiffly beaten whites. Bake in a greased baking dish twenty minutes. To accompany this dish serve string beans, creamed cauliflower or green peas.

Scalloped Codfish.—Prepare one and three-fourths cupfuls of white sauce. Mix one and one-half cupfuls of shredded codfish with seasoning of chopped capers, red and green peppers, add the sauce and arrange in a buttered baking dish, cover with one-half cupful of well buttered crumbs and bake in a moderate oven until the crumbs are brown.

Codfish en Casserole.—Take one can of tomatoes, two cupfuls of cooked spaghetti or macaroni, one onion sliced, one-half cupful of flaked fish, and one-half cupful of buttered crumbs, adding a bit of cayenne pepper. Simmer the tomato and sliced onion with the seasoning until the onion is tender. In a buttered casserole place a layer of spaghetti, then of fish, one of tomato and finish with buttered crumbs. Bake fifteen minutes.

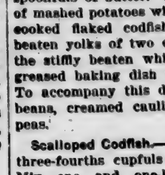
Codfish Creole.—Cook in three tablespoonfuls of butter, one chopped green pepper, one tablespoonful of pimento, and one onion chopped; when well-cooked add three-fourths of a cupful of tomato soup, one-eighth of a teaspoonful of soda, one-fourth teaspoonful of paprika, two cupfuls of flaked fish and one cupful of hot milk. Serve piping hot after mixing all the ingredients. Serve on buttered toast or with crackers and cheese.

Codfish With Rice.—Take one cupful of rice or mashed potatoes, one cupful of shredded codfish, four tablespoonfuls of cream, two well-beaten eggs, salt and pepper to season. Mix well and fills well-buttered mold with the mixture, cover with buttered crumbs and bake. Serve with caper or cucumber sauce.

Codfish with drawn butter sauce served with baked potatoes is a dish which is well liked by most codfish lovers. Melt two or three tablespoonfuls of butter, add as much flour and when well blended add enough water (boiling) to make a rather thick sauce. Cook until smooth, add the flaked fish to the sauce and serve.

Satisfying Salads.

We all enjoy a salad and when one is particularly attractive to look at and appetizing to the palate we will add it to our list of good things.



Pear Salad Lucerne.—Drain one can of pears. To the sirup add one and one-half cupfuls of tomato, one-fourth teaspoonful of salt, a stalk of celery, two whole cloves, two tablespoonfuls of vinegar and boil for three minutes. Rub through a sieve, bring to the boiling point and add two and one-half tablespoonfuls of gelatin which has been softened in one-fourth cupful of water. Mix well and pour into a shallow mold. Serve on lettuce with one-half of a pear on top of each mold of jelly. Serve with mayonnaise.

Piquant Peach Salad.—Drain the sirup from a can of halved peaches. Soak two tablespoonfuls of gelatin in one-fourth of a cupful of cold water, add one stick of cinnamon, one-fourth of a teaspoonful of salt and the same of paprika. Bring to the boiling point and add the softened gelatin. Stir until dissolved, strain and add two tablespoonfuls of lemon juice, place peach halves in bottom of the molds and pour in the gelatin mixture. Serve molded on lettuce with mayonnaise.

Cherry Salad.—Stone large canned cherries and replace the pit with small bits of celery. Mix with stoned, ripe olives and serve with mayonnaise on lettuce. The Royal Ann or white cherries are especially nice for this dish.

Fruit Salad.—Peel and cut into pieces three medium-sized oranges, one cupful of strawberries, three-fourths of a cupful of pineapple, one-half cupful of walnuts. Remove the centers carefully from the thinly sliced oranges. Place three slices on a lettuce leaf. Mix the strawberries, pineapple and nut meats together and heap on a spoonful of the mixture. Sprinkle with French dressing and serve as a dessert with crackers, cheese and black coffee.

HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

"FLIES" WERE "FLIES" TO THE OLD LADY

George Ely Crosby, the champion fly caster, said at a banquet:

"I'll conclude my remarks, gentlemen, without any mention of the fall of the franc or other questions of international finance, for I don't know any more about international finance than my new housekeeper knows about fishing.

"I was getting ready for a week's trout fishing last June when my housekeeper bustled into my bedroom with a big bundle of sticky, black-speckled trash that she began to shove into my grip.

"'Hold on,' I said. 'What are you doing with those flypapers?'

"'I've been saving them for you ever since the hot spell,' said the ignorant old dame. 'You know you told me, Mr. Crosby, that you always had to buy flies when you went fishing.'"

Carrier Pigeon Has Good Staying Power

"Racing pigeons dart away instantly toward their home lofts when released. Though they weigh only 16 ounces and eat only an ounce of food a day, they will fly 12 or 18 hours without stopping. A pigeon fancier comes to love his birds as a dog or horse breeder loves his favorite setter or mount. They have great intelligence. Certain birds have been valued at more than $2,000, and have brought such prices."

Charles Ellsworth, veteran Cincinnati pigeon breeder and racer and president of the American Racing Pigeon union, in annual convention in Cleveland recently, gave these facts to the members of the union.

Ouch!

"When Bill's dog was killed by an automobile, it was a sea-going tragedy," remarked the witty youth. "What do you mean?" asked the fair listener to his wit. "A bark gone forever," was the reply.

No Returns

Her Friend—Now that you've broken off your engagement to Jack, I suppose you'll be rid of his presence.

She—Oh, no, indeed! I shall keep them all.

Small Things Throw Light on Public Men

In conversation with John Hay a few years before his death (writes Joseph Bucklin Bishop in his book, "Notes and Anecdotes of Many Years," I cited this utterance in support of something that he was saying to the same effect, whereupon he added (I quote from memory):

"Real history is not to be found in books, but in the personal anecdotes and private letters of those who make history. These reveal the men themselves and the motives that actuate them and give us their estimate of those who are associated with them. No one should ever destroy a private letter that contains light on public men, or willingly let die an illuminating anecdote disclosing their individuality."

Employ Rum as Anesthetic

Wild animals in captivity occasionally require surgical operations, and until recently the accepted practice of the veterinarians who performed them was to use chloroform for an anesthetic, according to Popular Science Monthly. Animal surgeons in the famous Hagenbeck zoo, near Hamburg, Germany, however, have discovered that animals submit to surgery better when drunk than when subjected to the usual anesthetics.

Accordingly, when now a lion, or a tiger, or a hippopotamus needs a little dental work or other surgical attention, it is fed huge quantities of rum or cognac. Then, when it sinks into a drunken stupor, it is chained, and the surgeon performs his work with no pain to the patient or danger to himself.

Heard After Meeting

As to a choice between "Greenland's icy mountains" and "India's coral strand," we'll take hot India in ours, and—to the devil with the coal trust, or whatever name you call it by!—Atlanta Constitution.

The Monkey's Day

Lady—Why have they let all the monkeys out of their cages?

Zoo Attendant—Holiday, mum. This is Darwin's birthday. — Stanford Widow.

Guard Against "Flu" With Musterole

Influenza, Grippe and Pneumonia usually start with a cold. The moment you get those warning aches, get busy with good old Musterole.

Musterole relieves the congestion and stimulates circulation. It has all the good qualities of the old-fashioned mustard plaster without the blister.

Rub it on with your finger-tips. First you feel a warm tingle as the healing ointment penetrates the pores, then a soothing, cooling sensation and quick relief. Have Musterole handy for emergency use. It may prevent serious illness.

To Mothers: Musterole is also made in milder form for babies and small children. Ask for Children's Musterole.

RADIO

Action, Stability in Five-Tube Set

Receiver Using Basket-Weave Coil Mounted Behind Condensers.

By CAPT. P. V. O'ROURKE
In Radio World.

The standard five-tube tuned RF set is shown in the diagram. The receiver uses basket-weave coils that are mounted behind the tuning condensers. This introduces an action in the circuit which tends toward stability. Unless this were done the tubes on the radio side would be uncontrollable.

As a further check upon disastrous action by the radio amplifying tubes the rheostat controlling the two RF tubes may be varied. The greater the resistance of the rheostat in the circuit, the less brightly the tube burns and the less oscillation.

Fits On a 7 by 18 Inch Panel.

The set may be constructed on a 7 by 18 inch panel. A convenient method of assembly is to use a socket shelf. There is just enough room for the coils behind the condensers. Angle irons are used to secure the coils to the socket shelf. Although called irons, they are most commonly brass. A tubing is inserted through one of the apertures caused by the method of winding a basket-weave coil. This aperture formerly was occupied by a dowel stick or other rod of the winding form. Inside this tubing a long machine screw is placed, with thread toward the condenser, so that a nut may be affixed at that end, to clamp the screw down upon the brass angle. The other end of the angle is affixed to the socket shelf. Usually one angle, bent like an L, with a short horizontal plane as the base, is sufficient for each coil.

The Coils.

The inductances are alike in construction. The primaries have eight turns and the secondaries have 56 turns. The wire is No. 24 enameled silk covered. The form diameter is three and one-half inches. Usually there are 15 rods on which the wire is wound, these constituting the form.

The secondary is wound for 24 turns, then the primary wire is picked up and wound along with it, side by side, for eight turns. The primary winding being terminated then, the rest of the secondary (25 more turns) is put on. The small primary is used as a further aid in obtaining a receiver that will not cause troublesome oscillations.

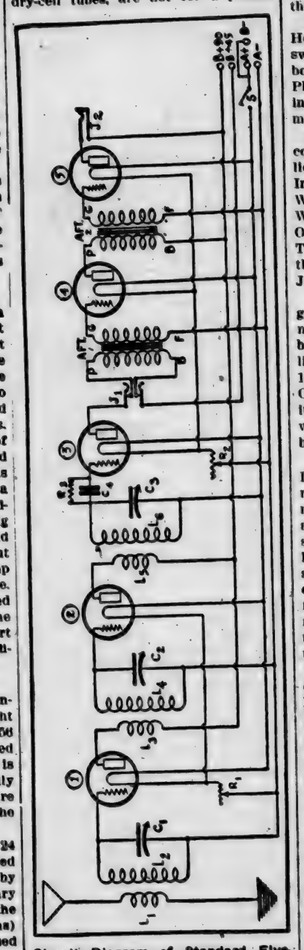
The set, made under these directions, with .00035 mfd. tuning condensers, will tune approximately in step. One factor that tends to operate against this is the added capacity in the first radio transformer, L1L2, due to the aerial-ground system. Thus C1 might tune with readings a little lower than those of the other condensers. To get away from this four turns may be removed from the secondary of the first radio transformer, or, in the actual winding, the number of turns might be made four fewer than that on the other secondaries (i. e., 52 instead of 56).

The circuit enables one to use earphones at the detector output, but the jack providing for this purpose, J1, is to facilitate the tuning in of distant stations, and not for general earphone reception. On that account the rheostat that controls three tubes—the detector and two audio—has no auxiliary switching arrangement. That is, when the detector tube is lighted the audio tubes must be lighted—otherwise there would be something wrong with the wiring. If the diagram were the guide. J2 is for insertion of the plug to which the speaker cords are attached.

The circuit comprises two stages of tuned radio-frequency amplification, tube detector and two transformer-coupled stages of audio-frequency amplification.

The Tubes.

The tubes should be 201A, operated from a six-volt storage battery, with 45 volts or less of B battery on the detector plate and 90 on the RF and audio amplifier plates. The set will operate fairly well on dry-cell tubes, such as the 199 type, but the greater volume and amplification from the large tubes make it well worth while to spend the extra amount of money. Except with some types of superheterodynes, the small tubes, or any dry-cell tubes, are not for a permanent set, because in time the radio user goes over to the five-volt tubes, because of their more satisfying service.



Circuit Diagram of Standard Five-Tube Tuned RF Set.

The following parts will be needed:

Three radio-frequency transformers, basket-weave (L1L2, L3L4, L5L6).
Three .00035 mfd. variable condensers, C1, C2, C3.
One 7 by 18 inch panel.
One 2½ by 17 inch socket shelf, with five sockets.
Two ten-ohm rheostats.
One double-circuit jack, J1.
One single-circuit jack, J2.
One 2 meg. grid leak.
One .00025 mfd. grid condenser.
Two audio-frequency transformers.
Three four-inch dials.
Three dial pointers.
One A battery switch.

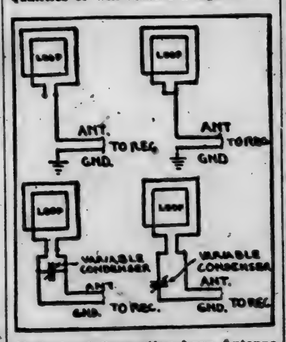
To Use Loop Aerial

To hook a loop aerial in an ordinary five-tube set, disconnect the primary and secondary of the first RFT transformer and shunt the loop across the variable condenser which originally tuned the RFT.

How to Connect Loop to Your Receiver Set

A loop antenna consists of a number of turns of wire arranged on a wooden framework of diamond or square shape.

One advantage of a loop antenna is the fact that it has directional qualities or will receive a signal from one direction with greater strength than from another. Also, in rotating the loop to help in selecting the station one wants to listen to, this kind of an antenna may at times aid in reducing interference from undesired stations or from static.



Methods of Connecting Loop Antenna to Receiver Set.

The extreme disadvantage of a loop antenna, however, is that with the gain of directional quality and possible selectivity, the overall received signal strength from a given station is usually very much reduced requiring a receiver of extreme sensitivity, and possibly instability, if far-distant stations are to be received.

The drawing illustrates four different methods of connecting loop antennas to a radio receiver set. It will be often found that by using either of the methods shown here satisfactory reception of local and semi-distant broadcasting stations up to possibly 200 to 500 miles can be had.

When using a loop with neutrodyne radio receivers, it is extremely desirable that the loop be placed from 6 feet to 10 feet away from the receiver to eliminate possible interference with one another. Results with a loop can probably be equaled if not excelled by using about 20 feet of wire strung around the picture molding, making up a simple indoor antenna.—Cleveland News.

Ohm and Megohm

The meaning of the terms ohm and megohm often is misinterpreted by the radio fan. However, they both are electrical units of resistance. The ohm is the fundamental unit and is the amount of opposition to the flow of an electric current which will cause the current to drop one volt when forced through at one ampere. As the term implies, a megohm is 1,000,000 ohms.

INDIANA STATE NEWS

Dr. H. F. Costello, sixty-two, physician, died suddenly at his home in Decatur from heart disease.

Alleged "buys" made recently by federal investigators working out of Indianapolis and Chicago have resulted in the arrest of six Clinton men on charges of violating the liquor law.

Gold has been reported found by T. J. Sare, an attorney of Bloomington, on his farm near there. Samples have been sent to the state geologist. Workmen digging a ditch on the farm found the mineral.

Moulton S. Conlon, age forty-six, of Hessville, blinded by clouds of snow sweeping the sand dunes near Osborne, drove his car on the Nickel Plate tracks there as he was returning from work and was killed. He formerly lived at Battle Creek, Mich.

One of the interesting displays in connection with the Indiana Republican Editorial association meeting in Indianapolis were two copies of the Waterloo Press, edited by Herbert C. Willis, president of the association. One was printed by Mr. Willis' uncle, T. Y. Dickinson, January 21, 1826, and the other was printed by Mr. Willis January 21, 1926.

The bravery of Kennard S. Dudgeon, age fifteen, farmer boy of Hanna, who dragged from the burning barn his unconscious employer, William H. J. Jahns, age forty, August 31, 1924, has won the recognition of the Carnegie hero fund commission meriting a bronze medal, bestowal of which has been announced in Pittsburgh, Pa.

Almost 25,000 tractors are in use on Indiana farms, according to preliminary figures of the federal Department of Agriculture, based on the 1925 agricultural census. The census showed 23,572 tractors in use in the Hoosier state, and 195,785 farms in the state—an average of one tractor to every eight and one-third farms. Final figures may show a slightly higher ratio. In 1920, Indiana had 9,230 tractors and 235,126 farms—one tractor to every twenty-two farms.

Indianapolis was chosen as the 1927 convention city of the Associated Building Contractors of Indiana at the annual convention in Terre Haute. The dates will be selected by the executive board. A. E. Kemmer of Lafayette, former first vice president of the association, was unanimously elected president of the organization. Other officers elected included G. F. Brill, Terre Haute, first vice president; John Rahn, East Chicago, second vice president; E. L. Danner, Kokomo, third vice president; C. C. Pierson, Indianapolis, secretary-treasurer and J. H. Owens, field secretary.

DePauw university will celebrate Founders' and Benefactors' day and its eighty-eighth birthday February 22, in connection with the usual George Washington exercises. James M. Ogden, president of the Indianapolis Bar association, who graduated from DePauw in 1894, will deliver the principal address the morning of February 22. A senior-faculty luncheon will follow. Butler and the DePauw varsity will meet on the basket ball floor in the evening. A new feature of the day will be a special alumni conference, inaugurated by the alumni council of DePauw.

The power of a mission worker is illustrated in the case of Harry Siebert, age thirty-six, of Mishawaka, who, after listening to a sermon on atonement at the South Bend Rescue mission, walked into the city court of Mishawaka and requested Judge E. J. Bower to send him to jail. "Judge, I jumped a bond in this court a long time ago," he informed the court, "and I am now ready to pay the penalty." It was learned that Seibert had been arrested for intoxication and that his bond had been fixed at $50, which was furnished by a local attorney. "On your plea of guilty, you are fined $10 and costs of $30," he was informed by the court. Unable to pay, he went to jail for 40 days.

Tax "ferrets" are driving some of Indiana's taxable wealth into Florida and New York city banks, according to information received by the state board of tax commissioners. So far as the tax officials have been able to learn, there is no law to prohibit boards of county commissioner to contract with these men to collect on property omitted from the tax duplicate. John Brown, chairman of the state board, however, said the commission was emphatically opposed to such contracts, by which the "ferrets" may keep as much as 50 per cent of their collections. The practice is being followed in a dozen or more counties in Indiana at the present time, it is understood. The situation in Howard county especially has been called to the attention of the tax commissioners. It is said business men and other persons of wealth in Kokomo and other cities have established legal residences in Florida or elsewhere to avoid taxation or onerous burdens.

When a man gets a wife by mail he cannot find married life happy, says Mitchell Reich of Gary, age sixty-four, who obtained a divorce from Aimeta Rose Foreman of Niagara Falls, N. Y. Miss Foreman, who attracted him through a matrimonial agency, left him with $200 three days after marriage, he testified.

A civic music club, the purpose of which will be the presentation of good music by local talent and the bringing to the city of the best musical talent available in the United States, is being formed in South Bend.

Help That Bad Back!

Too Often It's a Warning of Disordered Kidneys

WHY drag around feeling old, worn out and miserable? Why not make up your mind to be well? That daily backache, those sharp, stabbing pains—dizziness, bladder irregularities, nervousness and depression, are signs of kidney inactivity. Use Doan's Pills. Thousands recommend Doan's. Ask your neighbor!

Here Is Convincing Proof:

An Ohio Case

Mrs. Thomas Bailey, 321 E. Adams St., Sandusky, Ohio, says: "I had dull, bearing-down pains in my back. Mornings I could hardly move, my back was so stiff and lame. Headaches and dizzy spells came on, too, and I felt all run down. My kidneys acted too frequently. Two boxes of Doan's Pills drove the backache away and put my kidneys in good order."

Language most shows a man.—Ben Jonson.

Diseases of the mind impair the bodily powers.—Ovid.

Thousands of women testify to the truth of this from their own experience.

"But constipation is serious, Grace"

"Not so long ago I was like you—headaches a good deal of the time, sleeping badly, and the least bit of housework tired me out. My complexion too, was bad.

"Finally, I went to see Dr. Farman. He showed me that it was constipation that was back of my troubles. He said that it was a very serious thing because poisons from clogged waste matter were picked up by the blood and carried to every body organ. And if I didn't correct it in time I might become a victim of one of those terrible organic diseases.

"He made me drop laxatives altogether, changed my diet, and put me on Nujol. I don't think I've ever felt better. I sleep well, my headaches have disappeared, and you can see for yourself what an improvement there is in my skin. Nujol has done wonders for me."

Nujol Works Like Nature

Constipation is dangerous for anybody. Nujol is safe for everybody. It is neither a food nor a medicine. It does not gripe. It is gentle and natural in its action and is prescribed by leading medical authorities.

Nujol simply makes up for a deficiency—temporary or chronic—in the supply of natural lubricant in the intestines. It softens the waste matter and thus permits thorough and regular elimination without overtaxing the intestinal muscles.

Nujol can be taken for any length of time without ill effects. To insure internal cleanliness, it should be taken regularly, in accordance with the directions on each bottle. As Nujol is not a laxative, it does not form a habit and can be discontinued at any time.

Nujol THE INTERNAL LUBRICANT *For Constipation*

Ask your druggist for Nujol today and begin the perfect health that is possible only when intestinal elimination is normal and regular.

It is hard to keep a woman in luxury, but it is still harder to keep her happy.

Lots of people spend the last half of their lives trying to forget what they learned the first half.

No man is free who cannot command himself.—Pythagoras.

Hoxsie's Croup Remedy, the life saver of children. No opium. No nausea. 50 cts. All druggists. Kells Co., Newburgh, N. Y., Mfrs.—Adv.

Pay attention to business if you want it to pay attention to you.

Let this great Tonic build you up!

If your body is skinny and run-down, if you can't eat or sleep, have fits of nervousness, pimply complexion, you need Tanlac to put some solid flesh on your starved bones and bring you back to health.

Tanlac is Nature's great tonic and builder. It is made, after the famous Tanlac formula, of roots, barks and curative herbs gathered from the four corners of the globe.

Get a bottle of Tanlac at your druggist's today. Start the good work at once. You'll feel better right from the first. In a week's time you'll feel like a new person.

For Tanlac gets right down to the seat of trouble. It purifies the blood, aids digestion, helps the appetite, puts on pounds of flesh.

Millions of men and women who were once sickly and discouraged have been lifted right back to health and strength by the Tanlac treatment. Our files contain one hundred thousand glowing testimonials from grateful users.

Tanlac will help you just as it has helped millions of others. Buy a bottle at your drug store today and start the winning fight for prime, vigorous health. Don't put off good health any longer, and for constipation take Tanlac Vegetable Pills.

Tanlac Brings New Vitality

"When I began taking TANLAC last winter I felt depressed and worried for fear my health was permanently impaired. But, now I am so happy to recover my health that I want to tell everyone about TANLAC."

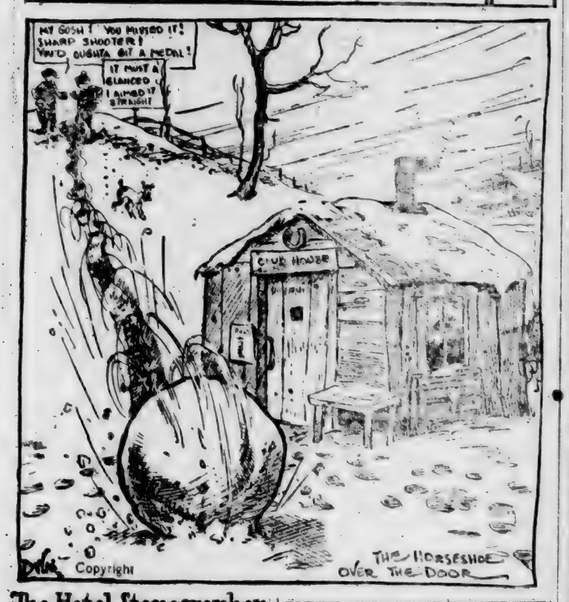
SCHOOL DAYS



The Hotel Stenographer

By Roe Fulkerson

"YOUR sweetie?" asked the house detective.

"No," replied the hotel stenographer. "He is studying law. I consider every passerby a possibility as a husband, and when I marry I will not get yoked for life with a professional man.

"So many colleges turn out doctors and lawyers and preachers that professional stock is badly watered. The man with a weak head and a strong back has less competition than at any time in history.

"An honest journeyman bricklayer makes more money than a lawyer and a union plasterer gets more dough for each week's work than a doctor does for helping somebody into or out of the world. Any steady working stonecutter can hire a school teacher to follow him around at work, and give him the rudiments of an education and not miss the teacher's pay out of his weekly pay envelope.

"You see, Kelly, the professional colleges are turning out more grads in a week than they used to do in a whole year. Quantity production has so reduced the quality that there has been a general reduction in fees all along the line.

"Every union has a law that there can be only so many apprentices to each journeyman, but colleges turn out apprentices six to one of the journeyman lawyers, doctors and preachers. Conditions are so bad that a good tinner and gutterspouter makes more dough than a dentist.

"So, in the chase for the gilded shekel, the green-hued frog-kin, the needful mazuma, give me the guy who wields the handsaw instead of the chap who mouths Blackstone. No longer is the fat and prosperous gentleman in the rear of the limousine a doctor or a lawyer. Today the more-or-less honest mechanic sits with a sardonic grin in the big car and watches the high-collar gents spring foi the sidewalk one jump ahead of his college-educated chauffeur. Me for the mechanic husband, Kelly; I want to eat regularly."

SOMETHING TO THINK ABOUT

By F. A. WALKER

A UNIVERSAL LANGUAGE

THE scenes and sounds of a great city speak in a vernacular which is readily understood by him whose eyes and ears are attuned to the splendor and the din.

And what is true concerning the sensoned citizen is proportionately true of the verdant visitor who at a glance interprets the meaning of the smile of a sturdy beggar grinding a hand-organ while his picturesquely frocked companion rattles a tambourine.

The chimes in the church steeple, the tinkling bells of the itinerant peddler of many wares, speak to all in a familiar tongue.

The Russian or the Greek who cannot frame a word of English knows well the lingo of the clattering milk cans in the early morning and answers their call with alacrity.

Who is so untutored that he cannot read the joy of the sound of the babbling brooks, or the love in the song of the happy bird that is singing among the green hills to his mate?

And the cumulus clouds with their ever-changing forms, their happy tints of purple and gold and silver, go sailing by in the evening sky, telling their tales of magnificence which cannot be put in words, but which are easily comprehended by the lovers of the sublime and the worshipers of Him who changes in a second the colors of the worlds.

The sigh and the songs of the winds! Who does not delight in their whisperings among the forest trees and the flowers, their moaning roars over the waters of the deep, their lullabies in the night when the earth is still, and sleep, half-dreaming, closes weary eyes to refresh and give them new luster for a day unborn?

Their language is universal, understood by creeping things, by beasts, by men and the angels.

This is no dead classic whose message is obscure.

Every word is a liquid gem, requiring no scholarship, no knowledge beyond that which Nature bestows to make its meaning comprehensible and inspiring, like the master stroke of a painter's brush or the magic note of a nightingale alone with the listening stars of night, straining his little throat in praising his Maker.

WHEN I WAS TWENTY-ONE

BY JOSEPH KAYE

At 21—Josephus Daniels Painted "Editor" on His Door.

"AT THE age of twenty-one I was editor of a weekly paper at Wilson, N. C., known as the Wilson Advancer.

"I had one ambition at that time, and that was to be one day the editor of the Raleigh (N. C.) News and Observer. That ambition was realized and I have been the editor of this paper for many years, so you see one ambition of my life has been realized.

"I am very happy in my work. To be sure, I was given a leave of absence from the News and Observer to be secretary of the navy for eight years, but all the time I was publisher of the paper.—Josephus Daniels."

TODAY—Josephus Daniels is already recorded in history as the man who headed the United States navy during the war, and his name will go down to posterity on that account alone, and future generations of Americans will read of him in school textbooks.

Daniels became secretary of the navy in 1913 and remained in this post for the period of the Wilson administration.

In private life Mr. Daniels' ambition was always along journalistic lines, and although he studied law and was admitted to the bar at the age of twenty-three, he never practiced—preferring to lay down the law through the medium of the printed word instead.

The TALE of KIDDIE KATYDID

By Arthur Scott Bailey

A WHINING CALLER

"I CERTAINLY hope you aren't going to disappoint me?" Mr. Nighthawk whined, as he looked hungrily at Kiddie Katydid, who was clinging tight to his perch. "Please, please jump for me—just once!" he begged. "Here I've come all the way across the meadow on purpose to see what a fine jumper you are! And I shall feel very unhappy if you don't perform for me."

But Kiddie Katydid refused to budge.

"I hadn't intended to do any leaping tonight," he told Mr. Nighthawk.

"No Jumping for Me Tonight!" He Piped in a Shrill Voice.

"And if I jumped for you, it would only upset my plans."

"I know—I know," said Mr. Nighthawk, nodding his head. "But I thought that just to oblige a friend you wouldn't object to jumping from this tree into that one." And he pointed to the nearest maple, the branches of which all but touched the tree-top in which they were sitting. But Kiddie Katydid's mind was made up.

"No jumping for me tonight!" he piped in a shrill voice.

All this time Mr. Nighthawk was growing hungrier than ever. And one might well wonder why he didn't make one quick spring at Kiddie Katydid and swallow him. But that was not Mr. Nighthawk's way of dining.

"Well," he said at last, "though you refuse to jump for me, won't you kindly call some other member of your family and ask him to oblige me?"

"I don't know where my relations are just now," replied Kiddie Katydid. "Some of them were here a while ago; but they went away." And that was quite true! At that peent—that first warning cry—of Mr. Nighthawk's, they had all vanished as if by magic, among the leaves.

"What about that Katy you're always talking about?" Mr. Nighthawk then inquired. "Don't you suppose you could find her and persuade her to do a little jumping for me—just to show me how it's done?"

"I'm sorry—" Kiddie said somewhat stiffly, "I'm sorry; but I must absolutely refuse to do such a thing. Now that you've mentioned her, I'll simply say Katy did. And beyond that I cannot discuss her with you."

"She did what?" Mr. Nighthawk wanted to know—through his nose.

But Kiddie Katydid declined to answer that question. He merely hugged his wings closer to his green body, and shot a sly glance at Mr. Nighthawk, as if to say, "Ah! That's for you to find out! But I shan't tell you!"

Mr. Nighthawk looked rather foolish. He had always supposed that any one who spent a good part of every night saying the same thing over and over and over again must be quite dull-witted. But now he began to think that perhaps Kiddie Katydid was brighter than the field people generally believed him to be. And when Kiddie suddenly asked him a question, he was sure of his mistake.

"Did you know," said Kiddie, "that Solomon Owl often visits these farm buildings?"

"Why, no! I wasn't aware of that," Mr. Nighthawk replied with a quick, nervous look behind him. "What brings him here?"

"Chickens!" Kiddie Katydid explained. "Solomon Owl is very fond of chickens. But they do say that he's not above eating a nighthawk when he happens to stumble upon one."

THE WHY of SUPERSTITIONS

By H. IRVING KING

MATCHES AND HUSBANDS

LET an unmarried girl light a match in a place as free from draughts as possible and watch in what direction the flame veers. In that direction is her future husband. This superstition is found, according to the American Folklore society, in rural New England and, perhaps, obtains in other sections, in apparently one of the few survivals of fire-worship found in our modern folklore. In Europe, through which we inherit our superstitions, fire worship was an imported cult from the East which never flourished in its transplanting and which has, therefore, left few traces upon our folklore.

Some investigators have held that besides the imported there was an indigenous fire-worship cult in Europe in very ancient times; but the best authorities hold that what is claimed as indigenous fire-worship among the aboriginal Europeans was merely a form of sun-worship, the fires being imitative suns. However, fire-worship did prevail to some extent in ancient Europe and we find traces of it now and then in modern folklore. Fire-worshipers asked many things of their lambent god—he was to them an oracle spelling the future and revealing the secrets of the present by the character and movement of his flame—just as the New England girl's match indicates the direction of her future husband.

Among the NOTABLES

ERNEST THOMPSON SETON

ERNEST THOMPSON SETON is an artist, sculptor, author, scientist, lecturer and wild animal lover, a man who put his varied abilities to a most unusual use. He has done more than any other man to give the average person an intimate knowledge of the wild animals of this and many other countries.

He was born August 14, 1860, in England, and when he was about twenty-one, came over to Canada and lived in the wilderness part of Manitoba for three years with his brother. They farmed some land, and Ernest Seton studied the animals of the region, and the wild life about him. He found a medium of expression in paint, plaster and prose, and pretty soon, through some papers he published, became widely known as a naturalist and was made the government naturalist of Manitoba. Then a publishing firm in New York induced him to illustrate an encyclopedic dictionary.

He made some thousand and odd sketches for this, and then went to Paris to study art seriously. In one year, a picture of his of a wolf was hung in the Salon—an unusual honor for an art student. He wrote then the "Art Anatomy of Animals," a book which artists everywhere have found invaluable.

His best-known general work is "Wild Animals I Have Known," though others of his animal tales are almost equally beloved, by children and grown-ups too. Rather recently he founded the Woodcraft League of America.

A LINE O' CHEER

By John Kendrick Bangs.

THE COUNT

I MAY be growing older every day
When counting years in the old-fashioned way,
But like the years themselves I have a plan
By which alone I reckon up my span.
So when the Spring comes on with jocund air,
And fragrant flowers budding everywhere,
And ardent Youth streams from the azure sky,
E'en as the Year is young likewise am I.

(© by McClure Newspaper Syndicate.)

SOMETHING NEW in HOLIDAY MENUS

THOSE big red letter days on the calendar mean particularly sumptuous dinners to the average American housewife. Her family expects something in the nature of roast turkey, duck, or chicken. Of course, the home manager doesn't want to serve the same thing each year and as a consequence, she spends hours in hunting recipes and planning new things in the menu line.

The appended menus for the holiday dinner and supper may prove a welcome change to your family.

Dinner.

Grapefruit Baskets
Nuts Olives Celery
Roast Duck Giblet Gravy
Peanut Stuffing, Mashed Sweet Potatoes With Marshmallows
Spiced Peaches, Cauliflower au Gratin
Bread Stuffed Tomato Salad
Cheese Straws Butter
Individual Pumpkin Pie With Whipped Cream Sauce
Coffee

Supper.

Cream of Tomato Soup Croutons
Fruit Salad With Whipped Cream Sauce
Cheese Crackers Assorted Cakes
Nuts Chocolate

Pumpkin Pie.

1¼ cupfuls pumpkin strained
¾ cupful brown sugar
2 eggs
1 cupful evaporated milk
¼ cupful water
2 tbsp. orange juice
1 tsp. ginger
1 tsp. cinnamon
¼ tsp. salt

Add the sugar and seasoning to the pumpkin; then add the slightly beaten eggs, milk and water. Stir till well blended and pour in a deep crust-lined pan. Bake at 450 degrees Fahrenheit for first 10 minutes and 300 degrees Fahrenheit for 50 minutes.

Cauliflower au Gratin.

Remove leaves and trim off the stalk from large cauliflower. Soak in a solution of 1 tbsp. vinegar, 1 tsp. salt and 1 quart of water for 15 minutes to remove dirt and insects. Cook whole, stem up, in boiling salted water for seven minutes. Place cauliflower in an oiled baking dish, pour over a thin evaporated milk white sauce and cover with buttered crumbs and grated cheese. Brown in a moderate oven. This serves six.

Cream of Tomato Soup.

1 No. 3 can tomatoes
4 sprigs parsley
¼ tsp. thyme
¼ bay leaf
1 tsp. peppercorns
6 cloves
2 slices onion
2 tbsp. butter
1 tbsp. sugar
1¼ tsp. salt
⅛ tsp soda
2 cups evaporated milk diluted with
2 cups water
2 tbsp. flour

Make a white sauce of the diluted evaporated milk, the butter and flour. Cook the tomatoes with the seasonings for five minutes and strain. There should be 2½ cups of pulp. Add soda to pulp, then combine with the hot white sauce. Pour immediately into thermos bottle.

Whipped Cream Sauce.

Three fourths cup evaporated milk, 1 cup whipping cream, ¾ cup powdered sugar.

Chill the cream and evaporated milk. Combine and whip until stiff. Fold in the sugar and keep chilled until ready to serve.

Rank Health With Three "Rs" Is Plea

By MARIE K. JOHNSON

As an educational subject for children, health should hold equal rank with the three "R's" in the curriculum of public schools. Doctors declare that without a healthy, sturdy body it is impossible for the child to have a healthy, happy mind.

Marie K. Johnson.

Neglect of childhood defects may result in permanent physical impairment later on. Many childhood ills are traceable directly to malnutrition.

High school students especially need a variety in foods for at this age their growth is rapid. The protein or "building food" should be abundant for high school boys and girls. When they buy their luncheons, high school pupils are apt to display a preference for chocolate sodas, cream puffs and candy. An appetizing luncheon put up at home is much to be preferred to the sort the boy or girl might obtain at the corner store near the school.

Meat is all right for the school luncheon but it should be put up in tempting form. If sliced thin it is more appetizing in sandwiches than if in thick pieces. Beverages or soup may be carried in thermos bottles but the bottles must be carefully washed and aired daily after using.

Milk is recommended for an important place in the boy's or girl's diet because of its proteins, minerals, phosphorus and calcium, necessary for the development of the body and in the case of calcium and phosphorus for the building of bone and teeth. Evaporated milk has come into favor as a health builder for children as well as adults because by removal of 60 per cent of the water it is rendered more than twice as rich in food value as ordinary milk and by a process called homogenizing more digestible than bottled market milk.

Crisp lettuce and celery, carefully washed and dried, may be so wrapped in oil paper that they will be fresh and in good condition at lunch time. Lettuce should not be used in sandwiches for wilted lettuce is almost indigestible.

HOW

SCIENCE HAS COME TO AID OF FOGBOUND VESSELS.—On December 12, 1924, occurred the most extensive fog within living memory. Over northwestern Europe it spread a huge clammy blanket for half a million square miles.

In the winter of 1879-80 fogs were unusually prevalent. For three months, with few intermissions, London was enveloped in a dark, choking pall.

More recently, during the Christmas of 1904, a disastrous fog mantled Britain for five days. All the transport services were disorganized. Apart from the increased mortality, the loss to the country was computed at $50,000,000.

At sea fog is among the most dreaded perils. All sense of direction goes when it descends upon the vast trackless expanse of water. In olden days ships went forward blindfolded.

But science has come to the aid of the navigator, although "slow down" and blaring foghorns still play leading parts in the "safety first" campaign at sea. Submarine bells, wireless, and electricity are now used in the liner's fight against fog.

One of the new wireless lighthouses, an odd-looking structure of steel lattice-work, has been erected on Inchkeith, in the Firth of Forth. Fitted with special apparatus, a ship overtaken by fog, but in touch with wireless lighthouses, can have her exact position ascertained.

How Native Eskimos Get Fire by Friction

In their native state the Eskimos use the same method of making a fire as was used by most of the Indian tribes. This is by wood friction and the method was general throughout the American continents at the time of Columbus' first voyage. By rubbing two sticks together sufficient heat can be produced to set fire to inflammable material such as dry grass. The most improved method was to twirl a dry stick in a hole in another piece of dry wood. The other way of making a fire among the natives of North and South America was by rubbing flints and pyrites together. This method was limited to a few tribes in Canada and Patagonia. Most of the Eskimos of today are supplied with matches through their trade with civilized nations.—Pathfinder Magazine.

How Hunters Signal

A sportsman and big-game hunter, J. Allen Barrett, of Lykens, Pa., has just copyrighted a unique idea for a national code of distress signals for persons who may be lost, injured or in need of assistance while traveling or hunting in sparsely settled regions.

Revolver shots should be used for the signals, but the victim should shout, call or whistle them. The chief requisite would be to have the code widely understood. The code follows:

To signify "lost," two shots quick; wait; one shot. "Injured," three shots quick; wait; one shot. "Sick," four shots quick; wait; one shot. "Help," two shots quick; wait; two shots. Rescuers answer, using the same number of shots, but in reverse order. One shot; wait; two shots quick.

How Language Is Made

Glancing over a list of some of the old-time inns and hostelries, one is compelled to wonder how such peculiar combinations originated. At these times any title but the simplest was quickly assimilated to the vernacular often with amusing results. Thus "The Bacchanals" became the Bag o' Nails, the "Bellerophon" the Bully Ruffian, and the "Capture of Bologne Mouth," or harbor, the Bull and Mouth; while the text, "God Encompasseth Us," displayed over private doorways, readily lent itself to signboard embellishment as the goat and compasses. The list could be stretched out almost indefinitely.

How Coal Was Formed

Coal is one of the most important economic minerals, and is of vegetable origin. When vegetable matter accumulates under water it undergoes a slow process of decomposition, gradually giving off its nitrogen, hydrogen, oxygen and some carbon, the result of which if carried far enough is the formation of a mass of carbon. The general theory regarding the formation of coal is that it results from the decomposition under tremendous pressure at a high temperature of vegetation in swamps. The first stage is peat; second, lignite; third, bituminous coal; fourth, anthracite, and the final stage is graphite.

How Sound Travels

Sound is a series of waves in the air, and the shorter the distance between these waves the higher the pitch. The bell, vibrating at a constant rate, sends out a constant number of waves per second, which travel toward the observer with constant velocity, relative to the air. But if the bell is approaching the observer the waves are closer together, hence the pitch is higher.

How to Cut a Cork

The best way to cut a cork is to damp it slightly and then use a sharp knife. If the cork is not damped there is a danger that it may slip and the fingers be cut.

FEBRUARY

L91
0462

Notice Of Sale Of Real Estate

The undersigned administrator of the estate of Jacob Gratz, deceased, hereby gives notice that by virtue of an order of the DeKalb Circuit Court of Indiana, he will at the hour of one o'clock P. M. on the 25th day of February, 1926, at the residence of the following described premises, offer for sale at public auction all the interest of said decedent in and to the following described real estate to wit:

The east half of the northeast quarter (½) of section thirty-six (36) township thirty-three (33) north, range thirteen (13) east, DeKalb County, Indiana; also the west half (½) of the northwest quarter (¼) of section thirty-one (31) township thirty-three (33) north, range fourteen (14) east in said DeKalb County, Indiana.

Also a part of the south half (½) of the southwest quarter (¼) of section twenty-five (25) township thirty three (33) north range thirteen (13) east, described as follows:—Commencing at the southeast corner of said southwest quarter of section twenty-five (25); thence west on the south boundary line of said section, forty-one (41) rods; thence north parallel with the west boundary line of said section eighty (80) rods; thence east forty-one (41) rods; thence south eighty (80) rods, containing twenty and one half (20½) acres of land, all of said real estate being in DeKalb County and State of Indiana.

And the following described real estate in Allen County, State of Indiana, to wit:—

A tract of land described as follows: Commencing at the river St Joseph on the section line between section fourteen (14) and section eleven (11,) running thence west to the corner of lands formerly owned by John McCrory; thence north on the line of said land so owned by John McCrory to the northeast corner thereof; thence east to the bank of the St. Joseph river; thence down along the meanderings of the river to the place of beginning; said tract containing twenty (20) acres of land more or less and being in section eleven (11) township thirty-two (32) north, range thirteen (13) east in said Allen County, Indiana and being the same real estate conveyed by James McCrory to Jacob Gratz on the 25th day of May 1891, and which deed was recorded in deed record 125 on page 360 thereof of the Deed Records of Allen County, Indiana

Said sale will be made subject to the approval of said court, for not less than ⅔ of the appraised value of said real estate and upon the following terms and conditions to wit:

At least one third of the purchase money in cash, the balance in two equal installments payable in six and twelve months respectively, evidenced by notes of the purchaser, bearing 6% interest from date, waiving relief, providing for attorneys fees and secured by mortgage on the real estate sold.

The Administrator reserves the right to reject any and all bids.

S. D. Steffey,
Administrator.

Atkinson & Husselman, Attys.

SPENCERVILLE

The Home Missionary Society of the Methodist Church will meet this afternoon (Thur day) with Mrs Pearl Farver. Mrs Ethel Bowser, leader.

Mrs. Alice Zimmerman and daughter Bina, attended a birth day dinner Sunday at the home of Mr. and Mrs. Bowers of Hicksville in honor of their daughter, Mrs Wallas Heffelfinger.

Clarence Widdifield and wife who has been staying at Dayton several months returned home last week. Miss Leone Widdifield was a week end guest of her parents, Mr. and Mrs Mortie Widdifield.

Aaron Hart died Wednesday morning at his home north of town, of cancer of the bowels at the age of 74 years. He leaves a widow and three children, one son and two daughters, of Ashland, O A short prayer service was held Friday morning at the home by Rev. Steffey. The body was taken to Ashland. The widow will remain at Ashland indefinitely.

See the widow at News office for Valentines.

The attendance at the Methodist Sunday School on Feb 7 was 109 collection $7 32. Lutheran Sunday School, attendance 66; collection $3 51.

FOR SALE:—Big Type Poland Sow to farrow April first—A good breeder. Phone Harry Watson, Spencerville. 6t1p

The C C Club was pleasantly entertained Friday afternoon at the home of Mrs Ida Hahn. Two guests were present, Mesdames B L Smith and Belle Rice.

Florence Buchanan and wife, of St. Joe; Vinton Miller and wife, Mrs Margaret Rhodes, and Paul Funk and wife were entertained at the W. F. Rhoades home, Sunday

Theodore Bowser, who spent the past week visiting his son R. U. Bowser and family, returned to his home near Huntertown, Sunday. He was accompanied by Ada and Gale Bowser.

Mr. and Mrs. Frank Wertman, of east of town; Mrs Moneta Fisher and Clesson Miller, of Wayne; and Mr and Mrs R U Bowser were Sunday guests in the Gerry Wasson home.

Oh Boy! Let's get our Valentines at News office.

Mrs. Beatrice Miller, who has been very ill, at the home of her parents Mr and Mrs. Gerry Wasson of the County Line, was taken Sunday afternoon to the Garrett Hospital for treatment.

Miss Cleo Johnson, of Harlan and Dale McNabb, son of Mr. and Mrs John McNabb, of near here were married Saturday. The young people will make their home in Detroit, where the groom has employment.

Why Fish Do Without Sleep

The bureau of fisheries says that fish do not sleep. They rest and remain quiet in nooks of streams but never close their eyes.

Public Sale!

The undersigned will sell at Public Sale at his residence located, 2½ miles Southeast of St. Joe, and ½ mile West of Coburn's Corners on Hicksville Road, on

Thursday, Feb. 18

Commencing at 10 o'clock:

HORSES: Work Team Gray Mare, sound, weight 1560, 9 years old; Brown Gelding, 9 years old, weight 1650, works in all harness

HOUSEHOLD GOODS: Grass rug 9x12, Congoleum rug 9x12, 15 yard rag carpet, cupboard, milk safe, sofa, 2 stands, 12 kitchen chairs, 2 beds, 3 rockers, springs, carpet sweeper, table, cook stove, 2 hot blasts, Wilson heater, 50 sap pails, sap tank, whiteware, 100-egg Prairie State incubator, black walnut lounge, couch and other articles

MACHINERY: 405 Oliver plow good as new, Bryan plow, both complete, Drag, Little Brown corn plow, and Land Roller.

TERMS: 6 months with 6 per cent interest from date. 4% discount for cash.

Warm lunch will be served

J. M. DERMOTT

Clyde Reetenwall, Clerk
Rhodenbaugh & McNamara, Aucts.

Notice of Appointment of Executor

State of Indiana } ss.:
DeKalb County }

I, J. H. Knauer, Clerk of the Circuit Court, for the County of DeKalb, State of Indiana, do hereby certify that F. R. BOWMAN has been appointed executor of the last will and testament of MAHALA WADE late of DeKalb county, who died testate, and the said F. R. BOWMAN having qualified and given bond as such executor is duly authorized to take upon himself the execution of said will.

Witness my hand and seal of said Court this 20th day of January, 1926

J. H. Knauer,
Clerk of DeKalb Circuit Court

Henry C. Springer, Atty.

4 t 3.

HOW

WORK OF REJUVENATION OF STATUARY PROCEEDS.—Do you know that statuary suffers from old age and has to be rejuvenated by beauty doctors just the same as human faces and figures? It does, and reports which have just come to hand concerning the accomplishments of Thomas H. Bleakney, technician to the Pennsylvania museum in Philadelphia, indicate that he is filling the sole of beauty doctor to wood, marble and plaster statues with results that rival some of the marvels wrought by beauty parlors. Under his deft touches, aged carvings shake off their senility and bloom again in the pristine beauty of their better days.

Old age works its ravages on art objects through chemical changes and bacteria which mar the "complexion" and leave cracks and wounds to fill with dirt. Under Bleakney's direction, these inanimate faces are treated for their looks by means of soap and water aseptic solutions and healing salves. Often the statue doctor's work resembles that of a surgeon, for wounds are cut into, cauterizations of diseased parts are made and even amputations are sometimes performed. Thymol, formalin, peroxide of hydrogen and ammonia are used sometimes.

How British Short-Tail Sheep Reached Island

The short-tailed sheep appears to have been the only European sheep at the period when the island of Great Britain was joined up to the continent of Europe. If the temple of Tarxien is to be dated 10000 B. C., then there has been ample time for the short-tailed sheep there to have been contaminated with the long-tailed sheep, which got its tail (carrying fat) at the same time that the camel got its humps, following upon the drying up of Asia and the formation of the Gobi desert.

If, on the other hand, Professor Zammit is right and the temple at Tarxien may only be dated 2000 to 4000 B. C., then the change has come about more rapidly. Then the even more interesting question arises as to which track across to our island the long-tailed sheep took. We have noted it in Egypt and in Rome. But did it come to Britain from southern Europe by way of the Mediterranean, or across country and finally through the kingdom of Scandinavia?—London Graphic.

How Fluke Made Fortune

The rough bath towel that brings a healthy glow to the skin was an accidental invention. A manufacturer of fine, smooth toweling had trouble with his machinery. Instead of the finely woven material coming through as usual, the threads were loose and tangled and, from his point of view, quite unfit for sale.

He set to work to adjust matters and, after much trouble, got the machine working smoothly. But in the course of his work his hands became coated with oil and grime, and he used a length of the faulty and apparently useless fabric to wipe off the grease. He was quick to note that the rough discarded stuff did the work much better than ordinary toweling and, being always on the alert for a new idea, he added rough towels to his stock. The new stuff became popular, and the fluffy towels soon became his chief output and made him a wealthy man.

How Patents Are Procured

New and original ornamental designs for articles of manufacture can be patented. Ornamental character, or beauty, is requisite to patentability. Mere utility is not taken into consideration, and it is questionable whether an article to which ornamentation would give no value is subject matter of a design patent. A design is not patentable if it was known or used by others in this country before invention thereof by the applicant for patent, or if it was patented or described in any printed publication in this or any foreign country before his invention thereof or more than two years prior to his application, or was in public use or on sale in this country for more than two years prior to his application.

How Air Is Tested

Air is tested for carbon monoxide by means of the hoolamite. The hoolamite is prepared by mixing fuming sulphuric acid and iodine pentoxide, using granular pumice stone as a supporting material. A sample of the air to be tested for carbon monoxide is drawn into a small rubber bulb, then forced through a small glass tube filled with chemicals upon which the carbon monoxide has the effect of changing the original color from gray or white to shades of green, the deepness of the green determining the percentage of carbon monoxide in the air.

How Quinine Was Named

Quinine or quinia, much used in medicine, was discovered in 1820 by Pelletier and Caventon, who obtained it from cinchona barks. The medicinal use of the bark, found in South America, was known to the Jesuits as early as 1535. It was used to cure of fever the wife of the Spanish viceroy of Peru whose name was Chinchona, and his name was given to the bark.

WHY

Women "Nag" Explained by One of the Sex

Just why do women nag their husbands and children as so many of them are always doing?

Gina Lombroso, the famous Italian woman scientist, has a very interesting answer to give this question. She says that a woman's "nagging" is simply a by-product of her finest trait, her sovereign activity.

"There is no virtue that has not its defect," she says. "It must be admitted that women are of a more combative temperament than men. They are always bickering, quarreling with husband, friends, servants, in fact, pretty much with everybody, and if they are not fighting openly they are usually boiling with wrath inside.

"Men are more even tempered, and families where the masculine element predominates are generally more peaceable than families where the feminine element is the stronger.

"But why are men more peaceable? Simply because they are more indifferent to things. Because man's only desire is to be left in peace. He shuts one eye, or even both, to whatever goes on around him, provided things do not get so bad that he has to take a hand himself, or get someone else to do so.

"Woman, on the contrary, who is blessed with a desire to do things, cannot bear to see them badly done. She inevitably steps in to correct what she thinks is wrong, to remonstrate if her orders are not carried out, and sooner or later she loses her temper."

Why Extremes of Color

Melanin is the name given to the pigment which colors negroes or the black cat, and this pigment will also be found when an apple or potato is cut in half and exposed to the air. It is not clear, however, what relation exists between the coloring matter of differently hued animals. In studying white animals some interesting points arise. There are two sorts of white animals, as in the case of white rabbits (pure white with pigmented eyes) and albinos (which are devoid of pigment or coloring matter.) If one were to cross a pure white rabbit with a pure black, the family in the first generation would be all white, while if a black thoroughbred were crossed with an albino the first generation would all be black.

Why Animal Glue Is Best

For repairing furniture, and all wood working, glue is the appropriate material. The United States forest service has made tests to ascertain the relative strength of the different kinds of glue used in wood working. From the housekeeper's standpoint it is indicated that animal glue made from the hides and bones is just suited to give strong joints—the strength of the glue being greater than the strongest wood!

For minor repair work, and for binding small articles, a liquid glue made either from the animal glue, or from fish products, may be used.

If you are working with articles of wood which will be exposed to much moisture, you should get a specially prepared water-resisting glue.

Why Plants Are Leafless

Leaves are a temporary part of the plant. Every plant has a period of rest due to annually recurring and unfavorable conditions of temperature and moisture, or both, when the activity of life in the plant is suspended and it ceases to feed or grow. In such a state leaves have no function and are therefore needless. In a deciduous plant the leaves suddenly and conspicuously fall off; in others, called evergreen, most of the leaves are retained in the green condition until they are gradually replaced by new ones.

Why Heights Are Bad

Because he believes that living at a high altitude is dangerous, a French scientists took a healthy young squirrel in a cage to the top of Mont Blanc for experimental purposes recently. The cage had a revolving wheel in it that registered every turn and the squirrel was able to turn 6,500 times every 24 hours at a low level, but only 900 times in the same period of time at the top of the mountain.—Popular Science Monthly.

Why Horse Failed to Win

A farmer, who had entered his horse in a race at a county fair, was much disappointed when the animal failed to carry off the honors. "He should have won," the farmer repeated, implying by his tone that he felt he had been cheated. Finally, the owner of the winning horse remarked, "Yes, he should have won, and he would have won, had not six or seven other horses passed him at a critical moment."

Why the Covered Bridge

The covered bridge is a survival of an ancient custom. A great many of the bridges in this country were built before the Revolutionary war and their builders followed the methods used by the old European bridge builders. The object of covering the roadway of the bridge was for the purpose of protection against the weather, against possible rists and primitive weapons.

Why It Is Called Loom

In his "Dictionary of Phrase and Fable," Doctor Brewer states that the machine for weaving is called a loom because the first machine set up for weaving raw silk in Derby, England, in 1718, was set by John Lombe. His surname spelled phonetically, loom, was applied to his weaving machine.

Spencerville, Ind.

SPORTING GOSSIP

Spencerville High School with a rearranged lineup downed Ashley High School last Friday night in another one of those games that is won in the last three minutes of play. The score—20 to 18. Since the county tournament the services of Vallieu have been lost at backguard, on account of his quiting school. A little about the game—Ashley started the game by rolling up a foul, a field and another foul. Wilmot called time and shifted the lineup, putting himself at center. In a short while Spencerville forged up to seven points with Ashley at six. Then Ashley decided something was wrong and began scoring again, so at the end of the first half the score stood 12 to 9 in favor of Ashley. During the second half Furnish took the place of Hollobaugh. Ashley ran into some very close and stubborn guarding, so manage d to score only nine points during this haul while Spencerville scored only six, leaving the score 18 to 15 Ashley; but with about three minutes to play Beame tossed in a field goal, and while doing so was flagrantly fouled. Luckily the ref saw this foul—he had been missing them all the time—and gave Pete two throws. He made one, tieing the score. With only five seconds to play, George made a held ball in our free throw lane. In the jump he juggled the ball forward and made a basket. The referee's whistle sounded counting the score, just as the timekeeper's whistle ended the game. Some game.

Next Saturday night Spencerville meets Waterloo on the Spencerville floor This team is the first one that downed Spencerville this season.

CHAPTER VI—Continued

—11—

"Will you promise me—that you will not—" He hardly knew what he wished to ask from the girl who so tensely listened. There had been nothing between them. He had no right—but in spite of his diffidence found himself begging: "You will not destroy yourself—that beautiful talent, that—soul, because you think to save your father?" He was talking recklessly now, all reticence gone. "No matter what happens to the post—what Lascelles tries to do, promise me that you will not throw your happiness, your life, to the winds. It is not necessary, as you may think. I have ample means. I will gladly finance your father—I have influence; I'll take it up with headquarters in Montreal. We'll beat Lascelles! Don't—don't destroy yourself, mademoiselle!"

As he finished, she was smiling at him through mist-blurred eyes, then rose and went to the window.

"You have not already?" he faltered, thinking of her letter to Albany.

From the window came the low answer. "I am the fiancee of Monsieur Lascelles."

"You are mad—mad," he groaned, stunned, unable to accept, now that he had heard it, what he had feared. "I had no right to ask you—what I did. But I could not help it, mademoiselle. I might have known—the heart of you—was dead. You have killed a beautiful thing."

She suddenly turned a tragic face. "Monsieur, you may wonder why I let you say these things, but you have guessed the reason," and she placed her hands on her breast, "the heart of me—is dead." And she left the room.

To remain longer under the factor's roof, to sit at dinner with this hopeless girl, who had bartered her happiness for her father's welfare, and the man who was brute enough to accept the sacrifice, was unthinkable, so Steele went to the little room which had been his since his coming, to pack his duffle bag. There he found Charlotte, waiting.

"You weesh for to maree ma'm'selle?" the Indian abruptly demanded. The question was startling, but did honor to the loyalty of the grave-faced woman who confronted him.

"She is to marry Monsieur Lascelles," said Steele gently, touched by the evident friendliness which prompted Charlotte to seek him out.

"She hate M'sieu Lascelles!" vehemently protested the Ojibway. "She cry an' cry w'en she send heem de letter. You are de good man. Michel say. Daveed tell you have beeg house, far away sout'. You tak' ma'm'selle, she t'ink you good man, she weel go wid you for your woman!"

Steele's pulse quickened at the thought. "Would she go with me, would she go with me?" he repeated to himself. "If I were man enough to take her from her father? She could never face a future with Lascelles!" Then his knowledge of Denise St. Onge asserted itself. "But no, she has given her word; and she'll keep it. She's that kind. She would never desert her father, and she's bound herself to Lascelles. It's too late!"

Searching his face with eager eyes Charlotte waited for his answer.

"It's too late—Charlotte. Mademoiselle has already told the Frenchman that she will marry him."

The scowl of contempt which greeted his reply transformed the dark face of the Ojibway into that of a fury. She had placed her faith in this American, and he had failed her.

"Daveed tell me you are good man to fight—have de strong heart," she hurled at him. "Why you have de fear ov dat leetle Frenchmans—are you beeg rabbit? Why you not tak' her away een de cano'? She weel go!"

Again, a fierce exultation swept him. Charlotte must know her mistress' secret thoughts to speak so confidently. What he had of late felt—sensed—in the presence of Denise St. Onge; what he had put aside as impossible, unbelievable—an illusion, based on his own emotions—might, after all, have been her instinctive call for help; the unvoiced reaching out of her heart to one who would understand her need. But he had failed her. The victim of his own lack of vanity, he had gone off upriver and left her to solve her problem alone, to bind herself definitely to Lascelles, when, had he acted on his instincts, he might have saved her from herself. He had been blind—and lost.

"We must wait, Charlotte. What you tell me—about mademoiselle—I—did not—know. But don't lose heart. First, I've work to do. I'm going to catch that Windigo. Then—"

Steele did not finish, for the scowling face of the Ojibway woman went a sickly gray at the mention of the dread name, and she disappeared through the door.

As he hastily threw his clothes into the canvas bag, the words of Charlotte, "She weel go wid you for your woman," returned to mock him. Did the Indian really know, after all, or was she trying to force his hand? That this exquisite girl whom he had found in the northern forests, as one finds a jewel in the grass, should have come to care for a man of whom she knew so little, seemed unbelievable. And yet more than once since that day on the mountain he had surprised a look in her eyes which had strangely sent his pulses racing. And now that he knew he had been loving her all those precious days which he might have made indelible in memory—he faced the bitter conviction that Denise St. Onge, once she had given her word, would keep it.

He carried his bag to Michel's shack and announced to the surprised owner that he would eat and sleep there; then, while in search of David, he ran into St. Onge.

"Monsieur Steele," the old soldier gripped his guest's hand and vigorously shook it. "You have my extreme admiration—and gratitude. Mon Dieu! But you were magnificent. To see you, our friend and guest, insulted before our eyes—and how you made him ridiculous!"

Steele's face hardened.

"But your daughter—what of her?" he demanded, almost fiercely, of the

"You Forget That You Have No Right to Ask Anything of Me."

man whose eyes wavered before his cold glance.

"You have seen her?"

"Yes, she has told me. She's ruined herself—thrown away her happiness—her life."

"And all for me," sighed the father, "all for me!"

"But you knew she would do it—to protect your future with the company; and you allowed her to," Steele continued pitilessly, in a voice, low, but carrying the bitterness of gall in its tones. "Colonel St. Onge, you have permitted a beautiful soul to destroy itself. You—"

"Stop, monsieur!" St. Onge interrupted, in a voice broken with passion. "You do not know—and you are my friend, therefore I forget what you say. I have begged her not to do this—am prepared to leave the company. I will not allow such a thing. Why," and the factor shook his clenched fists in Steele's face, "I would kill that pig Lascelles before I gave her to him."

"But she has given herself to him, of her own free will, today. And she is a thoroughbred; she will keep her word."

St. Onge glared into Steele's immobile face. "She will never marry that canaille, Monsieur Steele," he said pointedly, "the St. Onges have always known how to defend their honor."

The two were interrupted by the appearance of Lascelles crossing the clearing, and Steele, in no mood to meet the subject of the conversation, left the excited factor awaiting the approach of the man who was exulting in his hard-won victory. As he turned away, he said: "I have moved my stuff to Michel's shack. It is needless for me to tell you how much I appreciate your hospitality and that of your daughter. You understand of course that I could not stay."

"Yes, monsieur, it would only be embarrassing to you and to me, but I regret deeply to have you go."

CHAPTER VII

The following morning the people of Walling River were at the river shore where three men stood beside a loaded canoe near which rested a company birch bark.

Then approaching from the factor's house appeared the figure of Denise St. Onge.

He had seen her for a moment that morning, for his contemplated journey to the Feather lakes and the autumn camps of the Ojibways, interrupted by their discovery of the day before, might admit of no return to the post before starting south. It all depended how early the winter broke. So he had called at the factor's to say good-by until the sled trails were hard in November. For late into the previous night he had sat with his two swart-faced companions planning many things, and the first of these was an early return to Walling River with the fastest team of dogs that money would buy in the Nepigon country. Another was a systematic running down of the mysterious marauder, on the snow, where his trail could not escape them; the last, and most vital to Brent Steele he touched upon only to the extent of assuring Michel that Lascelles should never succeed in his plan to force Denise St. Onge into a marriage to protect her father's future with the Revillon Freres, notwithstanding the fact that she had already assented to his wishes. And the lean half-breed had sprung to his feet with an oath, and wringing Steele's hand, cried: "Eef you do not come back, m'sieu, and he cum to tak' her to Albany, dey weel fin' dead man by name of Lascelles een hees bed at Wallin' Riviere."

"Never fear," Steele had answered "David and I are coming back after Messieurs Lascelles and Windigo."

Steele was keenly curious of Denise St. Onge's motive in coming to the beach when he had already bade her good-by that morning at the house. He had said: "Mademoiselle, I am started again with David and may not return to Walling River before going south. Will you promise this one thing?"

"Monsieur Steele," she had replied, so patently fearing what the American might say that she lost control of her voice. "You forget that you have no right to ask anything of me."

But he had boldly ignored her protest. "I ask you, Denise St. Onge, not to throw away your future—your life—if you must—until spring. I am coming back on the snow, in November, to clear up this mystery and—to save you from yourself." And without waiting for her reply, for he did not dare trust himself, had left her.

And now for some reason she was hurrying toward them, on a mission seemingly urgent. Brent Steele watched the approaching girl with high hope. David and Michel exchanged curious glances. Then she reached them.

"I could not have you go, Monsieur Steele," she said in her low, throaty voice, "without wishing you bon voyage." In her haste a vagrant lock of black hair had loosed itself and she caught it up with her left hand, as she extended her right to Steele.

To her embarrassment he held the hand overlong in his as his eyes questioned hers.

"You asked me to make you a promise, monsieur," she said in a voice barely audible, looking from him to the hills to the south. "Well, I've come to say, au revoir. You have—my promise." And she swiftly disengaged her hand and had reached the clearing before Steele sensed to the full what her words had meant.

Then to Steele's brain, dazed with surprise and joy, returned the words of Charlotte: "She t'ink you good man, she weel go wid you for your woman." And he lifted his chest high with a deep breath, for he now believed Charlotte had known.

St. Onge and Lascelles left the trade-house and approached the waiting canoes.

"Good morning, gentlemen, you are late," greeted the man still in the clouds, with the thought and picture of the girl who had but that moment entered her house.

"Good morning, monsieur," returned St. Onge. "Monsieur Lascelles has decided that he will not have time to go upriver."

Steele smiled sarcastically at his rival. The temptation to turn the tables was overpowering.

"Possibly Monsieur Lascelles has too tender a heart to desire to look at a dead man—or is it his nose?"

Lascelles' face went purple. He choked, made an impulsive movement toward Steele who stood grinning, then gulped down his anger as David laughed outright in his face, while Michel turned his back. Too clever to make a scene in which he was bound to appear at a disadvantage, the inspector, now in control of himself, proceeded to take his revenge by saying:

"No, monsieur, but a soldier and gentleman always gives precedence to the ladies. I have but a few days to stay here and I have decided to spend them all in the company of a very lovely lady, my fiancee, Mademoiselle St. Onge.

(TO BE CONTINUED.)

A Diffunce

First Gentleman of Color—Whaffo' yo' runnin' so, boy?

Second Likewise—Ah done jes' seed a ghost!

"Whar?"

"'Bout six mile back."

"Huh! Yo' dat much skeered o' ghostes?"

"Not or'n'ry ghostes—nosuh! But Ah done owed dat ghost a dollar eight-eben!" — American Legion Weekly.

Progress

"And how long have you been at this work?" the prison visitor asked.

"Oh, just long enough to get the hang of it," the new executioner replied.

HOW TO KEEP WELL

DR. FREDERICK R. GREEN
Editor of "HEALTH"

(©, 1934, Western Newspaper Union.)

SLEEPING SICKNESS

FROM time to time the newspapers in different parts of the country tell of isolated cases of "sleeping sickness." What attracts the attention of the newspaper men, as well as of the people in the community, is that some person has "slept" for an unusual and, in some cases, an extraordinary long period. No matter what the condition of the patient or the cause of this condition, it is immediately dubbed "sleeping sickness."

Now the professional man knows that this term may be used to designate any abnormally long period of sleep or long continued period of unconsciousness from any one of many different causes.

There is, in the tropics, a real disease called sleeping sickness, due to a tropical infection but that disease is never seen in this country. There may also be unconsciousness, caused by many forms of meningitis or infection and inflammation of the covering membrane or "meninges" of the brain. This may follow infection by influenza, typhus, measles, mumps, pneumonia or scarlet fever. Long continued unconsciousness may be caused by brain tumors or in the last stages of Bright's disease. Then there are strange and mysterious cases in which none of these causes is present but where the patient, without being unconscious, sleeps for an amazingly long time, rousing from time to time but soon falling to sleep again.

In a recent article in the Journal of the American Medical Association, Dr William Browning, a well-known neurologist of Brooklyn, reports 28 cases which he has observed and makes the very interesting comment that each one of these patients was, at the time of the attack, exhausted by prolonged and excessive overwork and had been running a long time on a scanty allowance of sleep. In a word, they had been overworking and undersleeping. His history of these cases shows how many of us are starving ourselves for sleep and how many are the ways, today, in which the body can be kept on short rations of sleep.

One man of fifty-five was very regular in his habits and "never went out nights." But his son said he "sat up all hours of the night with a new radio." A boy of twelve was overworking to keep up his school work. A young man of seventeen was drilling one night a week with his regiment, bowling one night until after midnight, spending two nights with his girl and going to business school two nights. This left him one free night a week for sleep. Every one of the twenty-eight patients was regularly cutting down his sleep to an entirely insufficient amount. Physicians and nurses, for obvious reasons, are particularly subject to this condition.

Sleep is the one physical need we can get without cost. Regardless of special cases, we need eight hours of sleep every night. If you don't get it you are going to suffer.

MILKING BY MACHINERY

HUMAN life and human effort sometimes seem to be about the cheapest commodities there are on the market. But careful study of any method of production will show that machine labor is always cheaper than hand labor. In the old days back on the farm, there was one job that was always done by hand no matter how much machinery the farmer owned. That was milking the cows. Not only that but it was firmly believed that it was one job that always would be done by hand. Just as in another line of industry type setting was always done by hand. For years, the idea of machines that would set type or milk cows was regarded as a joke. "That is something that only fingers can ever do."

Yet for years past, most of the type has been set and much of the milking has been done by machinery. Many farmers still contend that the human hand is the best and most effective milking machine to be found. This has been the subject of much discussion in farm journals and at farmers' institutes.

The agricultural department of the University of Illinois decided to find out the truth. So two experts compiled the cost records from 66 Illinois farms for six years. The results have recently been published and commented on in the Prairie Farmer.

The report shows that it takes more time and costs more to milk by hand than by machinery. Figuring on the basis of one cow for one year, it was found that it required 133 hours of hand labor but only 81 hours of machine labor, a saving of 52 hours per cow per year. Naturally, the larger the number of cows, the greater the saving. Regarding expense, figuring labor at the rate of 17½ cents per hour, it cost $23.44 to milk a cow by hand for one year and $18.64 per year to milk a cow by machinery. The only way that hand labor could be put on the same scale as machine labor was by estimating hand labor at 8½ cents an hour and farm labor today cannot be secured at that price.

Regarding cleanliness, either was equally good, provided hands, machine, buckets, strainers and other utensils were kept clean.

REVISED UNIFORM INTERNATIONAL

Sunday School Lesson

(By REV. P. B. FITZWATER, D.D., Dean of the Evening School, Moody Bible Institute of Chicago.)

(©, 1934, Western Newspaper Union.)

Lesson for February 14

JESUS, THE GOOD SHEPHERD

LESSON TEXT—John 10:1-30.

GOLDEN TEXT—"I am the good shepherd, the good shepherd giveth his life for the sheep."—John 10:11.

PRIMARY TOPIC—The Good Shepherd and His Sheep.

JUNIOR TOPIC—Jesus the Good Shepherd.

INTERMEDIATE AND SENIOR TOPIC—What the Good Shepherd Does for His Sheep.

YOUNG PEOPLE AND ADULT TOPIC—Many Sheep, but One Shepherd.

The relationship of the Messiah to His own is set forth in the Old Testament under the figure of the shepherd and his sheep. (Ps. 23, Ez. 34).

I. The Good Shepherd (vv. 1-18).

1. He Is the True Shepherd (vv 1-6).

He came by the divinely appointed way. The power exercised by the Pharisees in casting out this man was not obtained by lawful means. It was stolen by them and exercised in the bold spirit of robbers. John the Baptist, and others of the prophets, had performed the function of the porter and opened the door to the Shepherd (v. 23). Despite the deceit, audacity, theft and robbery of these Pharisees, those who were Christ's sheep were declared to be forming a new flock and following Him as the true Shepherd (v. 4). The reason the man suffered excommunication for Jesus' sake was that he recognized Him as the true Shepherd and the Pharisees as strangers.

2. He Is the Door of the Sheep (vv. 7-10).

The way to fellowship to God is through Christ. He is the only door (Acts 4:12). There is absolutely no way to get into the fold of the redeemed but by Him. All who attempt it are thieves and robbers (v. 8). Those who become members of the flock through Him enjoy marvelous gifts (vv. 9, 10).

(1) Salvation—"Shall be saved." Not only saved now but saved eternally (vv. 27, 28).

(2) Liberty—"Shall go in and out" (v. 9).

Only those who accept salvation in Christ know what freedom is.

(3) Contentment—"Shall go in and out and find pasture" (v. 9).

The one who really enters the fold by Christ, the door, receives that which is all-satisfying to the soul.

3. He Is the Good Shepherd (vv. 11-18).

He is so devoted to His sheep that He willingly lays down His life for them. The hireling abandons his sheep in time of danger. The Good Shepherd has perfect knowledge of His sheep and they know Him (vv. 14, 15). He enjoys such personal intimacy with His sheep that He knows them by name and goes before them to lead the way and defend them from every danger. This He will do even unto death. On Calvary this was historically fulfilled. It was Christ's love for such sheep as this poor blind man that caused Him to give up His life in order to find for them the abundant life (v. 10). This sympathy is world-wide—"other sheep I have which are not of this fold." This suggests that the Gentiles have a place in His fold. All who believe in Christ form one flock. In order to save His sheep He voluntarily laid down His life (vv. 17, 18).

II. The Sheep (vv. 19-30).

1. Unbelievers Are Not His Sheep (vv. 19-26).

Christ's assertion that He was the good shepherd caused a division among the people. Some accused Him of being mad, others that He had a devil. To their request that He would tell them plainly if He were the Christ, He referred them to the testimony of His works, declaring that the secret of their inability to recognize Him was their unbelief.

2. They Recognise His Voice (v. 4).

There are many voices in the world, the voice of the hireling, the voice of the thief and the voice of the stranger but none of these will the sheep hear. The voice of the true Shepherd is recognised by His sheep even amidst the babel of voices in the world today.

3. His Sheep Follow Him (vv. 3, 27).

This is the proof that they are His. The one who does not hear, heed, and obey the Lord's voice is clearly not His sheep. His sheep have unquestioned faith in His ability to lead them.

4. His Sheep Are Eternally Se cure (vv. 27, 28).

The sheep are entirely dependent upon the Shepherd. It is the Shepherd's business to look after and care for the sheep. This He does for He knows them by name and is acquainted with their weaknesses and trials.

The Real Blessing

The real blessing, mercy, satisfaction, is not in the having or the lack of merely outward things, but in the consciousness that the true source of life and happiness is deeper than all these.—John W. Chadwick.

Eyes to See

As a face is made beautiful by the soul's shining through it, so the world is beautiful by the shining through it of a loving God. Happy the man who has eyes to see the shining.

It Builds Strength

Just the remedy to aid the system in throwing off catarrhal wastes, help the functional organs, restore digestion and bring back the perfect balance.

Let Yeast Foam build you up!

Everyone knows the tonic property of yeast—how it builds up your weight to normal—how it strengthens and invigorates the whole system.

Just try this: drop a cake of Yeast Foam in a glass of water; let stand for five minutes; stir; let settle and drink the milky water, including the white precipitate.

Or, if you prefer, eat the yeast with a cracker or a piece of butter.

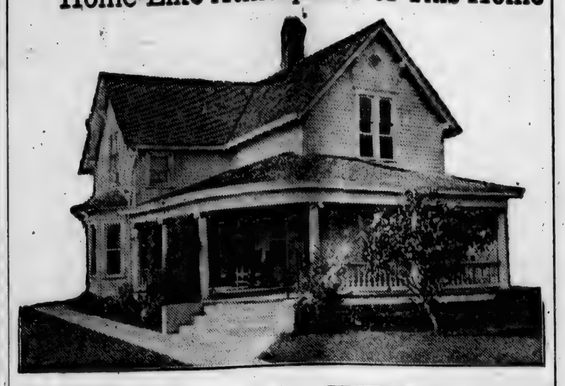
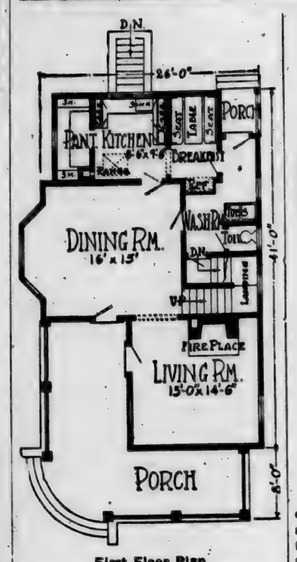
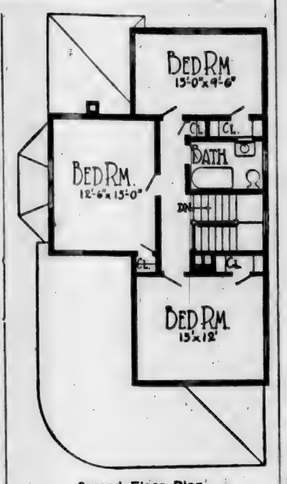
Broad Porch Contributes Much to Home-Like Atmosphere of This Home





First Floor Plan.



Second Floor Plan.

By WILLIAM A. RADFORD

Mr. William A. Radford will answer questions and give ADVICE FREE OF COST on all problems pertaining to the subject of building, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on the subject. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

There are as many different kinds of houses as there are different kinds of people and it is an interesting game, in passing along the street, to try to guess what the people living in any house are like, judging from the appearance of their home. It is often possible to make a fairly accurate guess, too, for the knowing home builder builds his own personality into his home.

The playing of this game has a real value for it causes one to observe more closely the characteristics of various houses and thus aids him when the time comes to plan for his own home. The interested observer will find that every so often he sees one house which, though very simple in its style, makes a strong appeal by virtue of its decidedly home-like atmosphere. Such a house is shown in the accompanying photograph.

Probably the broad circling porch is as much as anything responsible for this atmosphere. Porches seem to be left out of the plan for a very large number of modern homes, but there are many who still feel that a porch is an essential part of the home and there are few to whom a porch does not make its appeal.

The placing of the steps at the corner of the porch is a feature which adds a pleasing touch of individuality to this house and, together with the treatment of plants, trees and vines gives to a satisfactory degree the effect of privacy.

The characteristic home-like tone is also found within the home. It may be entered, from the porch, through doors opening into both the living room and dining room. The former, placed at the front of the house, is notable for its generous lighting supplied by windows on three sides and is made cheerful by a large fireplace. The dining room is also well lighted and large. From it a stairway leads to the upper floor.

Directly back of the dining room is the kitchen, small but compactly arranged and furnished with a large storage pantry. Opposite this pantry a breakfast room opens off the kitchen while beyond is a small rear hall with a door onto the back porch. From this hall one also passes forward into a washroom the placing of which, on the first floor, will prove a great labor saver to the housekeeper, who is thus saved the effort of many trips up and down the basement stairs.

It is at this point that one change might well be made in this plan. There is a door opening from the washroom into the dining room. While it might often prove a convenience and would not be objectionable if always kept tightly shut, it would really be better to separate the dining room and washroom by a solid wall.

On the upper floor will be found three bedrooms. These are all large and well lighted with ample provision for cross ventilation. Each is provided with a closet and there is an additional closet, for linens, in the hallway. The bathroom is placed most conveniently to serve all the bedrooms, just beside the stairway.

SAY "BAYER ASPIRIN"—*Genuine*

Unless you see the "Bayer Cross" on tablets, you are not getting the genuine Bayer Aspirin prescribed by physicians and proved safe by millions over 25 years for

Colds	Headache	Neuritis	Lumbago
Pain	Neuralgia	Toothache	Rheumatism

DOES NOT AFFECT THE HEART

Safe — Accept only "Bayer" package which contains proven directions.
Handy "Bayer" boxes of 12 tablets.
Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

Conditional

Gerald—May I offer you my umbrella, miss?

Geraldine—Not if you go with it.

Children's handkerchiefs often look hopeless when they come to the laundry. Wash with good soap, rinse in water blued with Red Cross Ball Blue. —Advertisement.

Let not a day so fair be without its white chalk mark.—Horace.

Mental pleasures never cloy.

When some people make up their minds they leave out a lot of important matter.

Shave With Cuticura Soap

And double your razor efficiency as well as promote skin purity, skin comfort and skin health. No mug, no slimy soap, no germs, no waste, no irritation even when shaved twice daily. One soap for all uses—shaving, bathing and shampooing.—Advertisement.

Success spells failure for some and failure spells success for others.

Funny Animal Cookie Cutters!

HOW delighted the children will be with cookies you can make with these animal cutters! The four—lamb, cat, goose and bunny—will be sent you for just the cost of packing and mailing—only 15c.

We also send you a Davis Cook Book, with many recipes for other good things easy to make with Davis Baking Powder. This pure, sure baking powder raises food twice—once in the cold dough and again in the oven, insuring feathery light baking. In addition, it costs you less and you use no more than of any other high-grade baking powder.

Mother! It's Cruel to "Physic" Your Child

DR. W. B. CALDWELL AT THE AGE OF 83

To Dr. W. B. Caldwell, of Monticello, Ill., a practicing physician for 47 years, it seemed cruel that so many constipated infants and children had to be kept constantly "stirred up" and half sick by taking cathartic pills, tablets, salts, calomel and nasty oils.

While he knew that constipation was the cause of nearly all children's little ills, he did not believe that a sickening "purge" or "physic" was necessary.

In Dr. Caldwell's Syrup Pepsin he discovered a laxative which helps to establish natural bowel "regularity" even if the child is chronically constipated. Dr. Caldwell's Syrup Pepsin not only causes a gentle, easy bowel movement, but, best of all, it never gripes, sickens or upsets the most delicate system. Besides, it is absolutely harmless, and so pleasant that even a cross, feverish, bilious, sick child gladly takes it.

Buy a large 60-cent bottle at any store that sells medicine and just see for yourself.

Dr. Caldwell's SYRUP PEPSIN

Suitable Drain for Porch Is Essential

A suitable drain to carry off rain or melted snow is almost an essential for a porch with a solid concrete, brick or wood railing.

Then, too, the washing of a porch is made much easier when there is a drain from the waste water and one does not have to mop it up and return it to the bucket. In fact, if the porch is provided with a drain one can use the ordinary garden hose and wash it just like a sidewalk.

We have found that the best and most efficient drain can be constructed easily in the following manner:

Frame up the porch joists in the usual way, then cut in headers between the outside joist and the one next to it, then head across again between the headers, leaving about two inches between this header and the outside joist.

Stop the porch floor about one inch over this header.

This leaves a place for the surplus water to drip down the front porch joist, where the ground will easily take care of any amount of water as would naturally fall in such a place.

Look to Title of Lot Before Purchasing

In buying a home site it is advisable to look up the records in the county treasurer's office and see whether or not the property has been posted for failure to pay taxes in the last few years. Most realty companies furnish titles, but many private sellers are lurking around waiting to dispose of property upon which they have paid no taxes.

Build the Garage Large Enough for Workbench

One of the greatest faults of garages today is that, while they are built large to house the automobile properly, no provision is made for a man to work around his car.

The average size garage is about 12 by 18 feet. This will take care of almost any automobile that is not in the truck class, but it is not large enough for the man who likes to tinker around and do his own repairs. A work-bench fitted with a vise and a tool rack is a handy thing and if a few extra feet are added on to the structure, there will be ample room for the bench.

Insulation of garages is also a thing which the owner should give consideration. It is surprising what a few rolls of common building, or tar, paper will do to keep a garage warm. The owner can save considerable money by sheeting the inside of the garage himself. It can be done by almost anyone who can drive a nail straight and use a saw.

How to Remove and Prevent Scratch Marks

Scratches on the woodwork are ugly and a cause, often, for slight uprisings in the home. These marks produced sometimes by the careless lighting of a match can be removed and also prevented. To remove a scratch mark use soap and application of a stiff nail-brush. To prevent them is a more simple matter. Obtain a small quantity of albolene and rub the woodwork well with it, then remove surplus with a flannel rag. You can scratch as much as you will and no marks will result, neither will the match light.

Children Cry for

Fletcher's CASTORIA

MOTHER:— Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of Chas. H. Fletcher. Proven directions on each package. Physicians everywhere recommend it.

Be sure of a light sweet dough: use Yeast Foam

Mr. and Mrs F. Buchanan spent last week with their daughter, Mrs Frank Rhoads and family at Spencerville.

For Sale or Rent: Business rooms with residence in connection. Call on Chas. Fry. 47tf.

Mrs. Constance Maurer of Coldwater, Michigan, came Saturday to visit her father, D D Burley a few days.

D H. Chambers, wife and babe of Napoleon, Ohio, were Monday and Tuesday guests in the Rolla Wiers home.

Now is the time for an undecided candidate to decide One announcements have been made for township office to date.

Its now McCall Needlework and Decorative Arts and its a fine magazine for the suggestions of home furnishings. Now on sale at News office.

Frank Leighty fell a distance of about ten feet Saturday on cement floor, injuring his right foot. He was on a ladder and it slipped. He is hobbling about.

The new spring McCall Quarterly is here and it is chuck full of splendid styles. Pictorial Quarterly also on sale and display at News office.

Russell Wade and Victor Brown who are working at Forrest, Ohio, were home Sunday and took their families back with them for the remainder of the winter.

John Wineland and wife, Glen Freeburn and family, Blanche Dorsey and family, and Glen Wineland were entertained at the Derwood Ridgway home, Sunday.

The DeKalb County Rescue Workers, a religious society of Auburn which has filed incorporation papers with the secretary of state at Indianapolis, Saturday received its certificate of incorporation of E. E Schortemeier, together with a license to operate as a society not for pecuniary profit.

George Blaker with his mother and sister, had quite a thrill Monday morning when their Ford Coupe went over the embankment near the creek bridge east of town. As it happened the car went straight over the bank and remained right-side-up Lloyd Draggoo was near by, pulled the machine out of the ditch and the parties were soon on their way.

MICKIE SAYS—

WHAT PRICE HEALTH

VALUE of health may not be reckoned in dollars and cents. Two thousand years ago there was perhaps some excuse for the gastronome, but today there is none. The way to health lies in a balanced diet. Hippocrates, the father of medicine, figured along the same lines back 450 B. C. He expressed the belief that the science of medicine had its beginning in the efforts of men and women to find better and smoother diets.

Diet in the home today is becoming a matter of premier consideration. Women are taking cognizance of those important food elements known as vitamines. They have learned, also, the benefit to the human body of such minerals as iron, calcium and phosphorus.

This knowledge has resulted in the housewife planning her menus with an eye open to dietary values, which is the big reason why milk has assumed such a large place in the menu of the American family. Milk contains every structural element for body building. It is an almost perfect food. Despite the best refrigeration processes, milk will keep sweet only a short time. Millions of American housewives have solved this big problem by using evaporated milk, which is simply fresh cow's milk sterilized in cans to achieve keeping qualities and with sixty per cent of the water removed.

Evaporated milk is not the same as condensed milk, although many persons confuse the two. The condensed product is a combination of milk and sugar cane in a two-fifth cane sugar and three-fifth milk proportion. Evaporated milk has nothing but water taken from it and nothing at all added. Sugar is the preservative used in manufacturing the condensed product, while heat only is the preservative for evaporated milk. For this reason the evaporated product may be used in any way in which market milk is used.

Fudge Making Finds Favor With Co-Eds

Fudge may be classed with pie as a typical American dish. It has a place in every young man's heart and every girl's category of accomplishments. Co-eds swear by fudge and "fudge shines" in sorority parlors are the very latest wrinkle in collegiate circles.

Meta H. Given.

There's a big wallop in a platter of fudge, the co-eds explain, because it's one of the greatest sources of energy, containing both milk, the "perfect food," and sugar.

If you've any doubt of the place fudge occupies in the young male heart, try these recipes on him and hear his own answer. Each of the appended dishes was prepared by Miss Meta Given, doing research work in the home economics department of the University of Chicago, and they are the result of much experimentation.

Chocolate Fudge.

2 cups sugar
¾ cup evaporated milk
¼ cup water
1 tbsp. corn sirup
2 squares chocolate
Few grains of salt
1 tbsp. butter
½ tsp. vanilla

Shave the chocolate so that it will melt more easily. Add the sugar, salt, milk, water and corn sirup. Cook, stirring until chocolate and sugar are melted, and then only occasionally to prevent burning, until the soft ball stage is reached, or a temperature of 234 degrees Fahrenheit. Remove from fire and add the butter. Cool until almost lukewarm, 110 degrees, add flavoring and beat vigorously until when a little is dropped from the spoon it will hold its shape. Pour into oiled tins and mark in squares.

Cocoanut Candy.

1¼ cup sugar
¼ cup evaporated milk
¼ cup water
1 tsp. butter
1-3 cup shredded cocoanut
½ tsp. vanilla

Put butter into granite saucepan; when melted, add sugar, milk and water, and stir until sugar is dissolved. Heat to boiling, and cook to the soft ball stage. Remove from fire, add cocoanut and vanilla, cool to 110 degrees Fahrenheit and beat until creamy and mixture begins to sugar slightly around edge of pan. Pour into buttered pan and when cool mark in squares.

Penoche.

2 cups brown or maple sugar
⅔ cup evaporated milk
⅔ cup water
1 tbsp. butter
1 tsp. vanilla
2 cups chopped nuts

Boil sugar, milk and water to the soft ball stage. Remove from the fire; add butter, flavoring and nuts. Cool to 110 degrees Fahrenheit, then beat until creamy and thickened; pour into a greased tin and when firm cut.

ST. JOE NEWS.

VOL. XL — ST. JOE DeKALB COUNTY, INDIANA, THURSDAY FEB. 18, 1926 — NO. 7

Commissioners Act On Paved Road

Further legal steps were taken Wednesday in the move to pave county highways in DeKalb county.

The county commissioners acted upon three petitions that were filed within the past month. One is for the south Auburn-Garrett road a bout two and a half miles in length; another is for the Auburn-Fort Wayne road, running six and a half miles from Auburn to the Allen county line; and the other is for the Butler-Spencerville road, twelve miles in length.

Similar entries were made with reference to all three petitions. It was formally determined that the petitions were signed by a sufficient number of freeholders and voters, that the roads are of public utility and that no remonstrances or objections were filed. The petitions were granted and referred to County Surveyor Calvin C. Kain, who, with the county board, will "proceed to view the roads without unnecessary delay" and file their reports at the March term, with their supplemental reports to be filed ten days later.

The county officials have not yet been satisfied that the public wants bonds issued to build the roads as proposed. With a bonding limit of only $350,000 in addition to the $100,000 now outstanding, it is obvious that all the roads asked for cannot be paved at once when the cost will be $25,000 to $30,000 a mile. Difficulties may arise in designating the roads to be improved.

Before any paving can be done it will be necessary for the county council to make an appropriation. The county commissioners will propably ask the councilmen for an informal conference before any money is spent in preliminary work If the council indicates that the appropriation required will be forthcoming the commissioners will doubtless take steps to let contracts.

Parent-Teacher Association

The weather man is not very favorable to the P. T. A, as the kind of weather he has dished up at the last few meetings would indicate. In spite of the weather a good crowd was on hand at the meeting Friday night at the school house.

The program consisted of community singing, songs by Girls' Glee club of the school led by Miss Bray, a talk by Rev. Jones of the Methodist church and a half hour of entertainment by the Dixie Male quartet.

The work of the Girls' Glee club was especially commendable, it showed a lot of training and was well organized. Rev. Jones talked to the children regarding the use of cigarettes and then addressed the assembly on making use of their talents. The quartet sang several negro songs and entertained with recitations, jokes and slams.

The membership committee reported a substantial increase in membership.

All who can are urged to attend the district meeting to be held at Auburn Saturday, February 27.

Your Dollar Is Big.

at our shop because it can buy only the best quality meats---- the only kind we handle.
Keep this in mind for your Next Meat Order.

Notice To Issue Bonds

Notice is hereby given to the tax payers and citizens of Concord School Township, DeKalb County, Indiana, that the Township Trustee of said School Township and the Advisory Board of said Township did on the 6th day of February, 1926, determine to issue bonds of said School Township in the aggregate sum of $35,000 for the purpose of constructing a school building in said township; said bonds to consist of thirty series; each series to be comprised of two bonds, each bond to be in the sum of $583.33, all bonds to bear interest at the rate of 4½ per cent per annum, payable semi-annually on the first day of January and July of each year and you are hereby further notified that unless a remonstrance is filed by tax payers as requested by the Statute, said bonds will be issued and sold as determined upon by said Trustee and Advisory Board.

Witness our hands and seals this 6th day of February, 1926.

F. L. Milliman, Trustee
Edw. Schrader
Geo. Walter
M. D Engle, Advisory Bd.

Given Surprise To Be Remembered

On returning from Sunday School, February 14, 1926, F. M. Monroe was sure surprised to find a numbe of guests at his home to remind him he had come to the 60th milestone in life. The affair had been carefully planned by his two sons, Stanley and Vernie Monroe with the assistance of their mother, who helped to keep the secret from him. A large birthday cake, baked by Mrs Stanley Monroe, holding sixty candles adorned the center of the table, which was groaning with good things to eat. The guests all brought well filled baskets to help make it a real surprise.

Those present were Stanley Monroe, wife and daughter, Martha of West Unity, Ohio, Clayton Wyatt and wife of Fort Wayne, Vernie Monroe, wife and son, James, M. H. Andress and wife, Will Miller and wife and Harry Hursh and wife.

Letters were read from absent ones who could not be present, after which the cake was passed and ice cream served. All departed later wishing "Dick" as he is familiarly known, many more happy birthdays.

SALESMAN WANTED IMMEDIATELY

Reliable, steady, intelligent, and well recommended man, from 25 to 60 years of age, to sell farmers in this State. Knowledge of farming and farm conditions desirable. Must be willing to work six days a week. Selling experience not necessary, personal training under local manager. Big pay every week. Good territory. All year work. Permanent position. Advancement. State if now employed, when you can start and if you have a car. Address Home Office Sales Manager, Dept. CDW, Box 1632, Philadelphia, Pa. 113.

Belle Barney, Beauty Shop

Marcel and Curl, Bobbing, Shampooing and Special Scalp Treatment for growing hair. Call No. 80 for appointment.

ANNOUNCEMENTS!

I will be a candidate for the republican nomination for Trustee of Concord Township at the Primary on May 4th., subject to the will of the voters of the township.
4 1p. O K. SHULL.

I am a candidate for the nomination on the Democratic ticket for Trustee of Concord township, and I ask for the support of the people who believe that I am worthy of the honor which I seek, subject to the will of of the voters of the township at the Primary, May 4, 1926. JOHN C. HULL.

AMONG OUR SICK

Lillian Steffey is suffering an attack of pneumonia and is a real sick girl. Mrs. Steffey has also been sick a few days but is about.

Aunt Kate Leighty is at the Lutheran hospital taking treatments. While she was not sick, yet her condition called for some special care, but by the time the robins appear she will be ready to return home and begin her spring work, and by the way, we miss her.

Wm. Koch, who is in the Lutheran hospital, is in a very serious condition. Last reports are that he does not rally sufficient to know the members of his family, and consequently they feel that the end is near. Mr. Koch is suffering from cancer, and the physicians were unable to operate.

Mrs. Arline Koch has been in Wayne a few days this week undergoing a thorough examination. Her health has been poor for some years and the decision was following the Xray test that gall stones by the hundreds was found in the gall bladder. Mr. Koch was called to Wayne Wednesday to make arrangements for the operation.

Culture Club Entertains Husbands

One of the most enjoyable events in the annals of the Culture Club was the Valentine party last Wednesday evening, given for the pleasure of the husbands, at the beautiful home of Mr. and Mrs. Wm. Pepple.

In keeping with the season the decorations were a profusion of red and tinseled hearts tastefully arranged and large red candles burned throughout the evening.

Earl William Kinsey sang "The Prisoner's Song" and this was followed by a thirty minutes play entitled "The Wife Tamer." Cast; James Jenkins—The Convivial Chap—Catharine Bowser; Henry Peck—The Henpecked Husband—Lena Meek; Mrs. Peck—The Injured Party — Esther Bowman. The play was presented for laughing purposes and was well received

Mrs. Price then conducted games which were both unique and entertaining—Craig Sheffer was accorded the distinction "the winner of hearts" although it was conceded that many of the husbands had "taking ways."

Partners were secured and a sumptuous banquet of delicious viands was served by the Mesdames Ann Sechler, Mildred Neer, Edith Sailer and Miss Dorothea Scholes.

A period of old fashioned visiting was enjoyed and the club members and guests disbanded with many expressions of having spent a delightful evening.

Mrs. Mae Smith of Portsmouth, Ohio, was an out of town guest.

RHEUMATISM

While in France I obtained from a noted French physician a prescription for the treatment of Rheumatism and Neuritis. I have given it to thousands with wonderful results. The prescription costs me nothing. I ask nothing for it. I will mail it if you send me your address. A postal will bring it.
Write today.

Milady's Clothes for New Seasons

Riviera Sponsors Kasha and Plaited Silhouette—Jumper Returns.

Though you be the merest dilettante in the ways of the mode, writes a fashion correspondent in the New York Herald-Tribune, you will have read many times of the trenchant fashion significance of the Riviera triumvirate—Cannes, Nice and Monte Carlo—how each winter there congregate at this Mediterranean resort the smartest and the fairest of Europe and America, and that, out of the fashions worn here, there invariably emerge the ac-

Two-Piece Sports Dress of Pink Kasha, With High or Low Neck.

cepted styles of spring and summer. You will know, too, that the prototypes of the tea hour dresses worn now at the Hotel de Paris will shimmer bravely and smartly next summer at Narragansett and Southampton, and that the tennis frocks seen at La Festa this winter will madly scamper on the courts of Germantown and Forest Hills next August—at least in counterpart.

The critic's delight is the puncturing of popular beliefs, and we are a little unhappy that we cannot announce the fallacy of these Riviera fashion theories. A thorough research, with comparisons for many years back, was convincing evidence that the styles of spring and summer are invariably predicated upon the mode at the Cote d'Azur, and that the similarity between the two is an unparalleled fashion relationship. In no other phase does the mode come so near to being an exact science.

The most significant message of these early Riviera styles is that the new silhouette cycle has reached its second stage, at least as far as frocks are concerned. The hemline flare is being gradually curtailed in favor of what Delong has called kinetic fullness, accomplished most often by plaits. The sudden distension which was the first manifestation of the slimline revolt is slowly going the way of all fashions.

The Tempered Flare.

Among its earliest and most ardent sponsors we sorrow at the rapid passing of this hemline flare, which has been such a splendid influence on the mode, yet its tremendous popularity this winter augured no other fate. A meek fashion like the cloche may pursue its even tenor for many seasons of its vogue—a bright or striking style has a career which is glorious but ever so brief—it can pass from singularity to popularity and thence to oblivion in a single season. And although it is a little early to consign the hemline flare to the limbo of history, this much is certain: the kinetic silhouette cut on gradual flared lines will replace it in smart circles next spring—has already replaced it on the Riviera this winter.

Just what is this kinetic silhouette? Many women are under the impression that it is an outline peculiar to Lucien Delong, arrived at in some mysterious way. The name was the felicitous inspiration of Delong, but the actual silhouette is now, and has been for some time, the possession of the entire French couture. The new outline, in its simplest form, is merely plaited fullness. Instead of sudden width at the lowest point, there is general width throughout—the impression of a straight, full silhouette is given when the wearer is in repose—the kinetic or rhythmic rippling of the skirt takes place directly she walks. And the approved and most modish method of accomplishing this new silhouette is by plaits of various types and varying degrees.

Kasha to the Fore.

In the matter of fabrics. There is flannel and there is crepe de chine, there is taffeta and there is lace. And then there is kasha. No material in the last decade has had anything like the merited popularity of this splendid Bodier conception, and it has earned a place in the mode which cannot be challenged. For coats, for jumpers, for afternoon frocks, kasha is ever in front—and if there is nothing particularly new in this pronunciamento it is because no material has been conceived in recent seasons to jeopardize the kasha vogue.

The most interesting colors are rose, poudre blue, mustard, almond green and wood brown. There is a surprising lack of the hectic and vivid colorings of last season. Pastel and medium hues are to be the colors that midsummer's dresses will be made in. This dictum you need not take too seriously. Despite the trend toward pastels, the new prints which are so original in conception will be a healthy influence toward vivid hues and these, too, will be a part of the spring picture.

We imagine you will have little difficulty in restraining your enthusiasm at the reappearance of the perennial jumper. So long has this vogue endured, and so numerous are its sponsors, that it is marching perilously close to the abyss of the commonplace. Of course, its new conceptions are different—the latest is the bloused effect with the yoke—but even they require the practiced hand of the artist to hold them in the ranks of the smart. None the less, and apart from what may be our unreasoned prejudice, the fact is that the jumper is very much in the mode along the Riviera and in Palm Beach, and it is undoubtedly destined for another season at least.

Fashions Are Parisian.

One thing more. The international aspect of the Riviera resorts has caused a general impression that Monte Carlo, Nice and Cannes are the crucible of fashion, the melting pot of the mode, out of which come composite styles acknowledging the influence of Spain, Italy, France, England and America. In point of fact, the styles are French, and only French—for every dress seen on the Riviera is the handiwork of some one of the Paris couture. There are, of course, various quirks peculiar to the different nationalities, but basically and essentially the fashions are Parisian. The hautes mondes are many, but the haute couture is one.

The conviction is daily increasing that the next season in the annals of fashion is to be a season of details rather than fundamentals. A drastic silhouette evolution has been accomplished and there will be no radical innovations in that field—simplicity has been banished in favor of intricate styling, and that movement, too, will be continued this spring without many surprises. Neckline, waistline and sleeves will undergo incidental

Two-Piece Lavender Jersey With Beautiful Plaited Skirt.

changes, but their broader aspects will remain the same. Realizing this, the French couture has inaugurated a series of "petits facons" which might be translated into divertissements in order to give the mode that variation which is its eternal need. You may remember that the cloche and the scarf were both originated at a time when the straight line was considered perennial, and the present moment is almost as propitious for novel incidentals.

Four divertissements have definitely been accepted on the Riviera, and we unhesitatingly suggest them to the demoiselles who want to be one step in advance of the mode. First there is the Reboux gigolo, and the success of this chapeau is reminiscent of the early days of the cloche. This hat is no longer made exclusively by Reboux—in unmistakable versions it appears in the collections of every Paris modiste. It is made of felt and velours—and its principal virtue, besides its smartness, is that it can be worn for every occasion, be it formal, informal or sports.

Capes are omnipresent. They cannot claim the Riviera as their birthplace, but here, at least, they have been sponsored with more definiteness and assurance than ever before. Sometimes they appear in novel forms and as often they are conventional. Our personal preference is for the latter, but in either guise they will be a distinguishing mark of the season that is about to come.

The Vogue of Green

The vogue of green finds expression in a smart little tailored frock of myrtle green crepe with frilled collars and jabot of white crepe piped with the green.

The KITCHEN CABINET

Thought is deeper than all speech,
Feeling deeper than all thought;
Souls to souls can never teach
What unto themselves was taught.
—Christopher P. Cranch.

REDUCING DESSERTS

For those of us who are overweight it is wise to choose a light dessert which satisfies the craving for sweets without adding much to the food value of the menu. The following have been chosen as good reliable desserts for such:

Chilled Prunes With Lemon.—Soak prunes and boil them with slices of lemon. After they have cooked fifteen minutes put them on the back of the stove to simmer. Allow the simmering process to continue until the sirup thickens. Remove from the heat and chill. The long slow cooking brings out the sweetness and flavor of the prunes and they will need no sugar to sweeten them.

Gelatin desserts of various kinds are especially good for those who are anxious about overweight. One thing must be remembered in serving them however, that they should not be served with whipped cream or rich sauce, of the very thing which you wish to avoid will result.

Saccharine may take the place of sugar in sweetening the dishes, as it will, in very small quantities, add sufficient sweetening.

Snow Pudding.—To one-fourth of a box of gelatin add one cupful of cold water. Let stand until thoroughly soaked and add two cupfuls of boiling water, five saccharine tablets, the juice of one lemon and cinnamon to taste. When slightly set, add the stiffly beaten white of an egg and beat until the mixture is light and foamy. Serve very cold.

Gelatin Whip.—Soak one-half of a package of gelatin in one cupful of cold water. Add three grains of saccharine, one-half cupful of canned plum juice. When the mixture begins to set, whip until light with an egg beater. Chill thoroughly.

Fruit Coups.—Bury a can of any kind of fruit liked, such as pineapple, peaches or pears, in ice and salt until frozen. Dice any fresh fruit—bananas, oranges, strawberries— and fill sherbet glasses with the juicy fruit, top with frozen fruit and serve at once.

Apricot Flower Salad.—Cut halves of canned apricots in two. Arrange on head lettuce like the petals of a flower with a ball of cream cheese for center. Sprinkle the cheese with riced, hard-cooked egg to simulate pollen and serve with mayonnaise dressing. Chopped nuts may be used instead of the egg if desired.

Honey Dainties.

Honey is not only valuable as a food but has medicinal properties as well. As it is slightly acid, when used in batter mixtures a fourth of a teaspoonful of soda added to each cupful of honey used will counteract the acidity.

Graham, Honey Pudding.—Mix and sift together two teaspoonfuls of baking powder, one-fourth of a teaspoonful of soda, and one teaspoonful of salt. Add three-fourths of a cupful of raisins and mix with the dry ingredients. Add one-half cupful of sour milk, one-fourth cupful of melted fat, one-half cupful of honey and one well beaten egg. Beat well and turn into a buttered mold. Cover and steam for two and one-half hours. Serve with:

Honey Sauce.—Melt one tablespoonful of butter in a saucepan, add one tablespoonful of flour and when well blended add one cupful of boiling water, cook until thick, then add one cupful of currant jelly, two tablespoonfuls each of lemon juice and honey. Serve hot. This is a sauce well liked with baked ham, or pork chops.

Ambrosia.—Mix one cupful of dark honey with one-half cupful of melted fat and one square of chocolate, add one-half cupful of sour milk and three well beaten eggs. Mix and sift together two and one-half cupfuls of flour, one teaspoonful of soda, two of baking powder, one-half teaspoonful of salt, one teaspoonful of cinnamon and add to the first mixture. Beat well and bake in a shallow pan. When cool cover with a caramel frosting.

Honey Cookies.—Mix three cupfuls of bran, one-fourth cupful of sugar, one-half teaspoonful of soda, and two teaspoonfuls of baking powder, add one-fourth cupful of sour milk, one-half cupful of melted fat, one-fourth teaspoonful each of salt and cinnamon, three-fourths of a cupful of honey, and one well-beaten egg. Bake twelve to fifteen minutes in a moderate oven. These are to be dropped by spoonfuls onto buttered sheets.

Honey Parfait.—Boil one cupful of honey with one-fourth cupful of water until it threads. Pour the mixture over the stiffly beaten whites of two eggs. Beat until cool, then fold in a pint of cream beaten stiff. Turn into a mold and pack in ice and salt for four hours.

HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

EXCHANGE FOOD WITH FIELD MICE

The Golden Rule is extended so far as to cover dealings between men and mice by the Indians of the Dakotas, according to Melvin R. Gilmore, anthropologist, of the State Historical Society of North Dakota.

The Indians of the region, Mr. Gilmore states, are very fond of the underground fruits of the ground bean, which are very rich and nutritious. But the only creature that can successfully gather these beans is a species of meadow mouse, which hoards them in storage pits in the ground.

The Indians rob these pits as white men would. But they do something that it is doubtful would be imitated by white men, for they always leave part of the beans for the mice, and when they are about to make a raid they always speak politely to the "mouse people" about it. But what is even more alien to white men's ways, the Indians always give the mouse a fair equivalent in exchange, filling up the cache with corn, suet or other food. This, the redskin explains to the mouse, enables both parties to enjoy a variety in diet.

"Closeup" Undesirable Under Circumstances

Dr. E. L. Fisk, head of the New York life extension institute, was talking about the various rejuvenating processes that fill the press from time to time.

"It is thrilling to read about men of sixty being rejuvenated into lads of eighteen or so," he said, "but you mustn't investigate the facts too closely.

"It's like the story of the colored folks' paper. This paper carried hundreds of advertisements about quack nostrums guaranteed to turn kinky hair straight and black skins white, and there was also a beauty department that gave all the best recipes for making flat noses aquiline and thick lips thin.

"Well, a young colored girl came down to the office of the paper one day and said timidly:

"'Could I see Venus Sorosis, the beauty editress, please?'

"The janitor looked at the girl; then he said:

"'Are you following out Venus Sorosis' advice:'

"'Yes, sir.'

"'Have you got full confidence in same?'

"'Yes, sir; full confidence.'

"'Then, miss,' said the janitor, 'you don't want to see Venus.'"

Odd-Sounding Names

Sometimes there is quite a bit in a name, as the following list suggests. These names are said to be authentic: Edna Broker Mothershead, Marian English Erie, Sawyer Turner Somerset, Nealon Pray Daily, Benton Killin Savage, Owen Taylor Moore, Ina Little Lambe, Broker Husbands Hart, R. U. Phelan Goode, Marie A. Bachelor, Eaton Growe Phatte, May Tyms Uppe, Betty Sawyer, Knott Worth Reading.

Booklover's Paradise

The three million books in the library of the British museum stand on 58 miles of shelves, and 30 people are employed to keep them dusted. Even then it is reckoned that each book gets dusted only once in 18 months.

Anesthetics Modern

No perfect anesthetic such as is known in modern times was known to the ancients. The Greeks and Romans, however, used mandragora to annul the pain and the Chinese used hashish for the same purpose.

Wisdom From Buddha

Through zeal, knowledge is gotten, through lack of zeal knowledge is lost; let a man who knows this double path of gain and loss thus place himself that knowledge may grow.—Buddha.

To Freshen a Sponge

Sometimes a sponge becomes sour. Rub a fresh lemon into it, then rinse it several times in lukewarm water, and the sponge will be as good as when new.

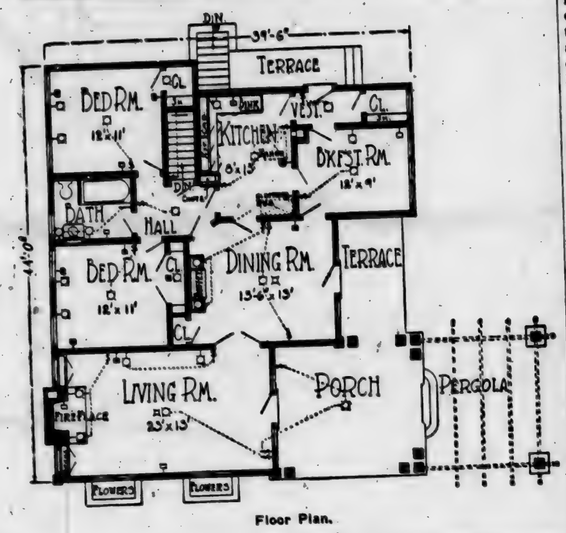
Proper Design Gives Individuality and Charm to the Small Residence



Floor Plan.

By WILLIAM A. RADFORD

Mr. William A. Radford will answer questions and give ADVICE FREE OF COST on all problems pertaining to the subject of building, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on the subject. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

Nothing is more ordinary in appearance than a poorly designed bungalow or one-story house, but when such a home is properly designed there is a particular charm about it which cannot be denied. Nor is it necessary to make such a house ornate or overdecorated to give it individuality. In fact simplicity, as in all architectural design, is highly desirable. It is good design which should be the aim, not ornamentation.

When good design is achieved, then individuality accompanies it, as is witnessed by the house shown in the illustration. This house would stand out anywhere, not as being conspicuous, but as possessing that much-desired individuality. It is not a large house and, especially from the direct front, seems quite small, but its compact design makes available an unusual amount of space for the comfort and convenience of its owners.

From the outside the simple brick foundation, bases for pillars and window flower boxes immediately catch the eye. These provisions for flowers under each of the front windows are most unusual in treatment and charming in effect.

Many houses today are built without a porch, a terrace or pergola being substituted in some cases, but here we have all three, a covered porch, a pergola over the driveway and back of the porch, a terrace off the dining room. Another exterior feature which attracts is the use of simple ornamental ventilators to break the expanse of the front roof.

Entrances are provided from the porch into the living room and from the terrace into the dining room. The former room is large, 23 feet by 13 feet, with a big fireplace at the end. There are built-in bookcases at each side of the fireplace with windows above and these, together with the large front windows, make it a bright and cheerful room.

No less attractive is the dining room with its outlook upon the terrace, while still beyond there is a breakfast room lighted by windows on two sides. This room might well be used for any one of several purposes if the family requirements made it desirable, as a sewing room or study, for example. Also to the rear of the dining room and next to this breakfast room, is the kitchen. It is small, but well arranged to simplify the housework and has a door opening into a vestibule, which in turn has a rear door opening onto a second terrace.

At the other side of the house are two bedrooms with the bathroom between. These are of equal size, well-lighted and airy and provided with ample closets. In the small hallway, off which these two rooms open, is found the basement stairway and here, too, is a clothes chute, which will save many steps for the housekeeper.

All of the rooms, except the living room, are grouped about this small hallway in a most compact manner. The living room, on the other hand, is rather separated, in a way which seems highly desirable, and is reached only from the front porch and the dining room. This makes it possible to have full use of this living room at all times without disturbance to those in other parts of the house, a feature which is not often found in the one-story dwelling.

Well-Chosen Pictures Make Home Brighter

How to hang a picture so that it will be in harmony with the walls and furniture of a room is an important thing to know. The entire room should "compose" well, that is, it should give a well-balanced appearance in the matter of placing furniture and wall decorating.

It is a fact that very few people who hang pictures on the walls of their homes realize the importance of the correct relationship between picture and furniture. Often a large picture is hung over a small piece of furniture, in which case there is an unconscious feeling that the small stand or table beneath that large picture is in imminent danger of being crushed, should the picture ever fall.

Or again, over a large picture, for instance, is hung a small picture that is completely lost. Such an arrangement looks quite as absurd to the discerning person as does a tiny little round hat perched on the head of a great, stout man.

As a very general rule, it might be said that the width of the picture should be about one-half or two-thirds of the width of the piece of furniture. That is, the ordinary davenport is about six feet in length, or as placed against the wall, we might say "width." The picture should be in correct proportion to the davenport.

The average desk is about three feet across the back. The picture that is hung above it should surely be 16 inches by 12 inches, to appear well proportioned in relation to the desk. Tall candlesticks on either side of the desk will fill the extra space on each side.

Before deciding on certain pictures for certain wall space, it is well to see if they are appropriate, in size, for the wall space, as well as in color and subject.

Picture dealers are now carrying various sizes of beautiful reproductions of the finest originals, in color, in sepia and in black-and-white. These are found at very reasonable prices.

Refrigerators Should Be Varnished Annually

Even in a well-made refrigerator it is almost impossible to prevent "sweating." It is quite impossible to prevent a difference in temperature between the outside casing and that of the room. Consequently any moisture held in the room atmosphere is bound to condense on the outside of the box. If the refrigerator is kept well finished with varnish or shellac, this moisture is prevented from seeping into the box, causing the panels to warp, seams to open, wood to rot. This condition offers germs an opportunity to develop and causes ice to melt more rapidly.

Protect Trees Which Beautify Your Home

It is a known fact that trees and shrubbery enhance the beauty of almost any ordinary-sized building, yet it is surprising to see the utter lack of appreciation of this fact displayed by a great many contractors.

When working on a job they made absolutely no effort to prevent growing things from being killed, with the result that there is not a live tree left on the place when the job is done.

Trees are very easily killed by piling rubbish about them or by knocking off the bark. If the builder will take care to see these things are not done he will leave the premises in such a condition that the trees will continue to bloom.

INDIANA STATE NEWS

Rev. J. W. Boyer, of Kansas City, Mo., has received a call to the pastorate of the First Presbyterian church of Vincennes, a church more than 100 years old.

Two five-year-old boys, Jean Renner and Harry Williams, went to their death in Evansville when the rotten ice on which they were skating in Garvin park gave way, leaving them to sink in 15 feet of water.

Sheriff Maloy of Kosciusko county has given notice that he will enforce every law on the statute books, relative to dance halls and Sunday observance if an attempt is made to open a dance hall on the shores of Winona lake.

Dr. William Warren Sweet, head of the department of history in De Pauw university, to whom was offered the presidency of West Virginia Wesleyan college, at Clarksburg, notified the board of trustees that he would not accept the offer.

H. S. Morse, general manager of the Indianapolis Water company, was elected president of the Indiana section of the American Water Works association at a meeting of the executive committee. The annual meeting of the section will be held at Purdue university March 25 and 26.

There are no natural factors to interfere with transportation in Indiana and no hindrance to a broad industrial expansion, according to a report on railroad facilities, mileage and rates in the state just completed by Prof. L. C. Edie of the bureau of business and research of Indiana university, prepared for the Indiana development council in co-operation with the Indiana State Chamber of Commerce.
